Principal Message

It gives me immense pleasure to present the Annual PM SHRI Newsletter for the academic session 2025–26. Our Vidyalaya continues to move forward with the vision of NEP 2020, focusing on holistic experiential learning. The PM SHRI initiative has strengthened infrastructure, technology integration, and skill - based education. Various innovative activities were conducted throughout the year to promote creativity, collaboration, and critical thinking among students. Teachers adopted learner-centered pedagogies to make education meaningful and engaging. Students actively participated in academic, co-curricular, social activities with great enthusiasm. Emphasis was given to environmental awareness, value education, and skill development. The school has made significant progress in creating a joyful and inclusive learning environment. We appreciate the support of parents and stakeholders in achieving these goals. We remain committed to nurturing responsible and confident citizens of tomorrow.

Satish Chandra Jha

Principal

PM SHRI KV ALIPURDUAR JN

About PM SHRI

PM SHRI schools are developed as model institutions implementing the vision of National Education Policy 2020. These schools focus on competency-based learning and experiential education. The aim is to create an environment that supports innovation, creativity, and skill development. Integration of technology enhances teaching learning processes and improves student engagement. PM SHRI promotes inclusive education ensuring equal learning opportunities for all students. Emphasis is given on environmental sustainability and awareness programmes. The initiative supports vocational education ,practical skill training. Students are encouraged to explore, experiment, discover knowledge independently. Schools focus on developing 21st century skills among learners. The overall objective is to prepare future-ready global citizens with strong values.

Highlights 2025–26

Major developments were completed under PM SHRI initiative. Vocational lab and mathematics garden were developed. Safety infrastructure was strengthened through CCTV and fire safety. Library resources and teaching learning materials were enriched. Students actively participated in co curricular activities.

Vocational Lab

The Vocational Lab established in the Vidyalaya provides opportunities for students to develop practical skills and understand importance of skill-based education. The lab is designed to provide hands-on learning experiences which help students connect theoretical knowledge with real-life applications.

Students actively participate in vocational activities which improve creativity, confidence and problem-solving ability. The lab also promotes dignity of labour and encourages students to explore different career options.
Teachers guide students in performing practical activities which enhance understanding and interest in learning. The vocational lab is an important step towards implementing NEP 2020 vision of skill development in school education.

Learning Enrichment Program

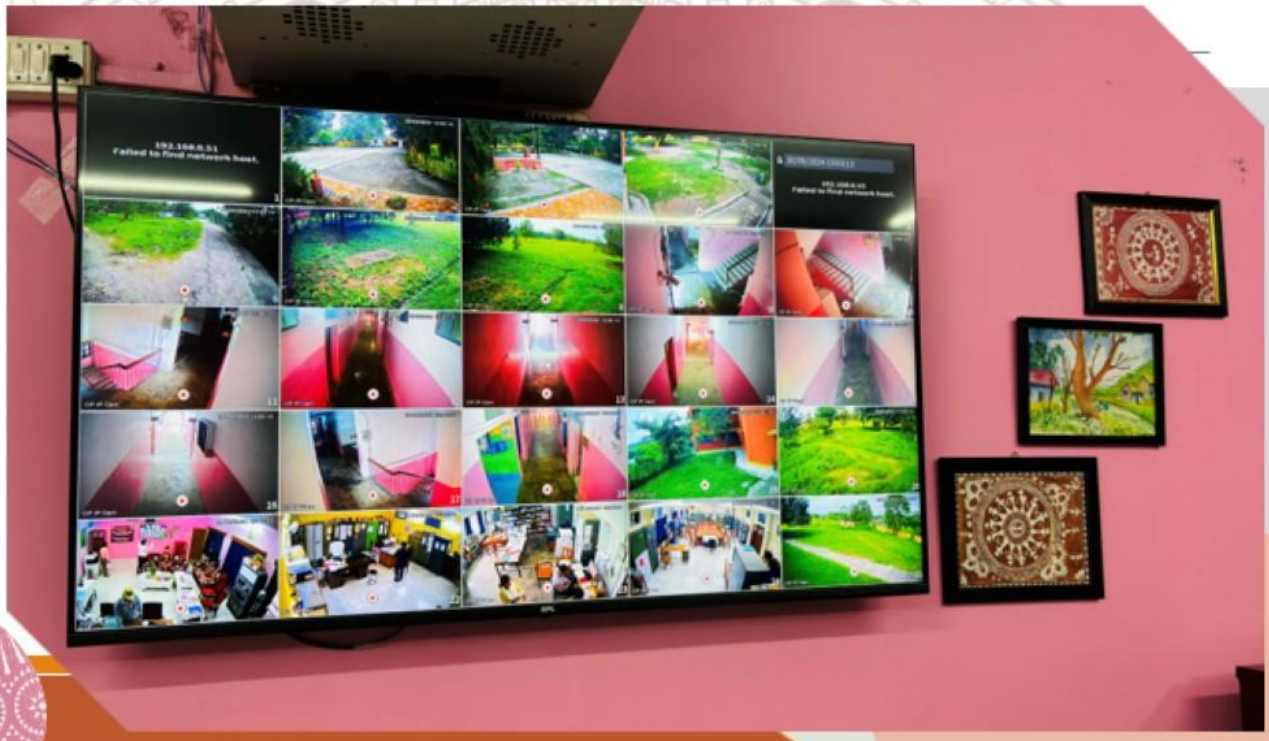
Special classes were conducted to improve subject understanding. Teachers prepared worksheets and provided guidance according to student needs. Students practiced regularly which improved conceptual clarity. Small group learning helped students ask questions freely. Students showed improvement in reading, writing, and problem solving skills. Continuous evaluation ensured progress of learners. The programme helped improve classroom performance. Overall, students benefited from additional learning support

TLM

Various educational materials such as mathematics kits, language kits, charts, and models were purchased. Teachers used these materials during classroom teaching. Students learned through activities and observation. Learning became interesting and effective. Students showed improvement in understanding of concepts. TLM encouraged curiosity and participation. Children enjoyed activity based learning. Overall, the materials supported effective teaching learning process.

Safety and Security

Safety of students and staff is given highest priority in the Vidyalaya. CCTV cameras have been installed in important areas to monitor activities and ensure discipline in school campus. Fire extinguishers have been installed to handle emergency situations effectively. Students and staff are informed about safety measures and emergency procedures through awareness programmes. Regular checking of safety equipment ensures preparedness for any emergency. Safe and secure environment helps students focus on learning without fear. The Vidyalaya continuously works towards strengthening safety infrastructure and creating protective environment for students.



ATL Instructor

ATL activities promoted innovation and STEM learning. Students created projects. Practical learning improved understanding. Students learned problem solving skills. Activities improved curiosity. Students learned through experimentation. Innovation skills improved. Overall, ATL supported practical learning.

Engagement of yoga/sports teacher/coach

Instructor guided students in yoga and exercises. Regular practice improved flexibility and concentration. Students participated actively. Yoga promoted physical and mental health. Discipline improved through regular practice. Students learned correct techniques. Activities improved well being. Overall, yoga supported healthy lifestyle.

Sport Equipment

Sports equipment was purchased for indoor and outdoor games. Students participated in sports activities. Games improved stamina and teamwork skills. Students developed leadership qualities. Participation increased confidence. Sports created energetic environment. Students learned discipline and cooperation. Overall, equipment supported sports activiti

Library

Library plays important role in developing reading habits among students. New books have been added in different subjects and categories to enhance knowledge and curiosity of learners. Students regularly visit library to read story books, reference books and subject related materials. Reading improves language skills, imagination and critical thinking ability. Library provides peaceful environment where students develop habit of self-learning. Teachers encourage students to use library resources for project work and assignments. Enriched library supports academic excellence and intellectual development of students.

Music Instruments

The Vidyalaya has purchased new musical instruments to encourage students to participate in music and cultural activities. Music education helps students develop rhythm, creativity and confidence. Students practice singing and playing instruments during music classes and school functions.

Music activities promote emotional expression and teamwork among students. Participation in cultural programmes helps students showcase their talent and build stage confidence. Music also reduces stress and creates joyful environment in school.

National Days

National festivals such as Independence Day, Republic Day and Children's Day were celebrated with great enthusiasm. Students participated in patriotic songs, speeches, dance and cultural programmes. These celebrations develop respect for nation and understanding of history.

Annual Sports Day encourages physical fitness, teamwork and discipline among students. KVS Foundation Day and other important occasions were also celebrated in school.

Teachers explained importance of national events and values associated with them.

Celebration of important days strengthens unity, patriotism and cultural awareness.

Cultural Academic and Sport Annual Day

Students participated in cultural programmes. Activities developed confidence and creativity. Students showcased talents. Teachers guided preparation. Programme improved communication skills. Participation increased enthusiasm. Students learned teamwork. Overall, annual day supported holistic development.

Citizenship Skills

Activities promoted awareness about constitutional values. Students learned rights and duties. Activities developed responsible behaviour. Students learned importance of equality. Discussions improved understanding of democracy. Students developed moral values. Activities supported character development. Overall, programme promoted citizenship values.

Hackathon

Hackathon encouraged innovation skills. Students created creative projects. Activities improved logical thinking. Students worked in teams. Technology skills improved. Students presented ideas confidently. Innovation culture developed. Overall, hackathon promoted creativity.

PTM

PTM strengthened communication between parents and teachers. Parents discussed progress of students. Teachers shared feedback. Parents supported improvement of students. Discussion helped identify learning gaps. Cooperation improved academic performance. Parents became aware about progress. Overall, PTM supported student development.

Exposure Visit

Under the PM SHRI scheme, Exposure and Field Visits are designed as transformative experiential learning tools to align school education with the goals of NEP 2020. These visits bridge the gap between classroom theory and real-world application by taking students—from primary to senior secondary levels—to diverse locations such as premium higher education institutes, science centers, heritage sites, and organic farms. By fostering a "learning by doing" approach, these excursions aim to ignite curiosity, develop a scientific temper, and provide students with early vocational and career awareness within a safe, inclusive, and stimulating environment.

Field Visit

Under the PM SHRI scheme, Exposure and Field Visits are designed as transforma experiential learning tools to align school education with the goals of NEP 2020. These visits bridge the gap between classroom theory and real-world application by taking students—from primary to senior secondary levels—to diverse locations such as premium higher education institutes, science centers, heritage sites, and organic farms. By fostering a "learning by doing" approach, these excursions aim to ignite curiosity, develop a scientific temper, and provide students with early vocational and career awareness within a safe, inclusive, and stimulating environment.

Other Activities

Various co-curricular activities were conducted throughout the academic session. Students participated in quiz competitions, art competitions, debates and awareness programmes. Morning assembly activities provide opportunity for students to express ideas and develop communication skills. Participation in competitions enhances confidence and creativity among students. Teachers motivate students to participate actively in different programmes. These activities support holistic development of learners.Continuous engagement in activities creates joyful learning environment in school.

Scouts and Guides

Scouts and Guides organised various activities to promote discipline, leadership and social responsibility. Students participated in cleanliness drives, plantation programmes and awareness rallies. These activities develop spirit of service and teamwork.

Scouts and Guides training encourages self-confidence and responsibility among students. Community service activities create awareness about social issues. Students learn importance of helping others and protecting environment.

Such programmes contribute towards personality development of learners.

Vidya Pravesh

The *Vidya Pravesh* program was organized at *PM SHRI Kendriya Vidyalaya Alipurduar Junction* as part of the *National Initiative for School Heads' and Teachers' Holistic Advancement (NISHTHA)* unde the *Samagra Shiksha Scheme*. The event aimed to welcome newly admitted students (Class 1) and their parents to the school environment, ensuring a smooth transition from home to formal schoolingKendriya Vidyalaya Alipurduar Junction held a grand Vidya Pravesh Function for Class 1 on April 9, 2025. The function was organized to welcome the new students into the school and to introduce them to the school environment.

Bala Activities

Under BALA concept, students participated in painting school walls with educational and creative designs. Beautiful Madhubani paintings and subject related diagrams have been created which make school environment attractive and informative. Walls display important concepts which help students learn visually.

Educational paintings such as heart diagram, geometric patterns and motivational quotes enhance learning environment. Students express creativity and develop interest in art through these activities.

Mathematics Garden

Mathematics Garden has been developed to make learning mathematics interesting and enjoyable. Various mathematical models and structures are displayed in the garden to help students understand concepts through observation and interaction.

Students can visualize shapes, angles, patterns and measurements in real-life context.

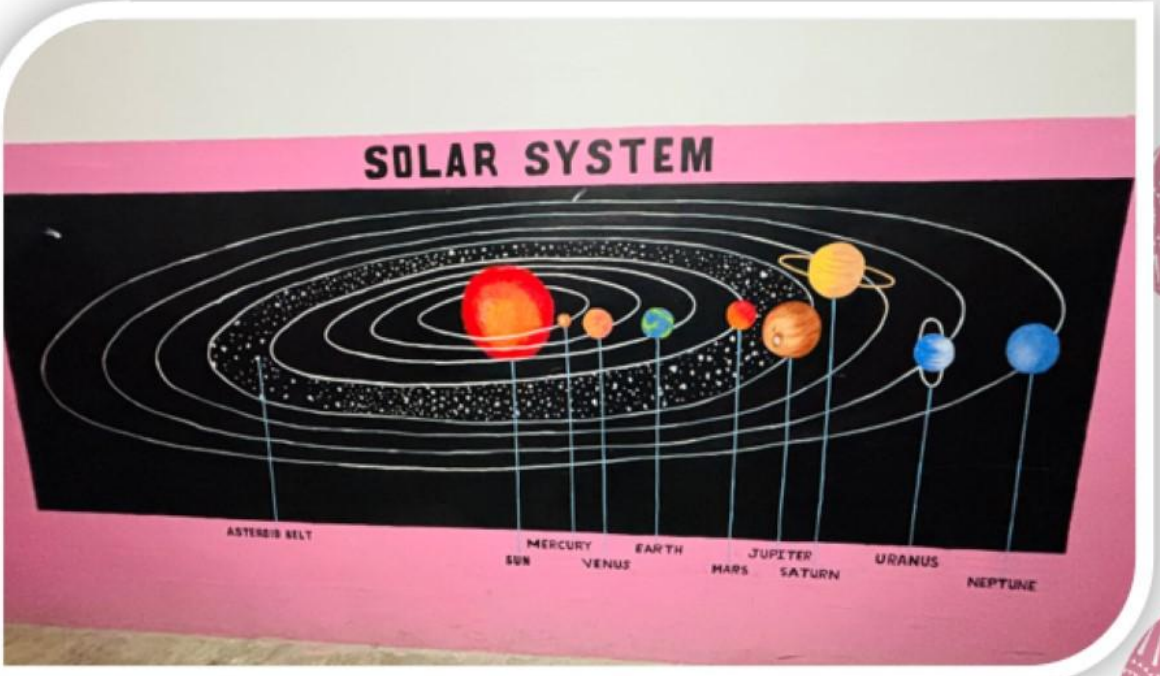
The garden promotes experiential learning and helps remove fear of mathematics among students. It encourages curiosity and logical thinking by connecting mathematical concepts with surroundings.

Compost Pit

The compost pit constructed in the school campus promotes environmental awareness and sustainable practices among students. Students learn importance of waste segregation and recycling biodegradable materials. Organic waste collected from school is converted into compost which can be used for plants and gardening.

This initiative helps students understand importance of protecting environment and reducing waste. It encourages eco-friendly habits and responsibility towards nature. Teachers explain process of decomposition and its benefits for soil fertility. Compost pit activity develops environmental consciousness among students and promotes sustainable lifestyle.

Bala Activities



Digital Classroom

Touch panels installed in classrooms have transformed traditional teaching methods into digital learning experience. Teachers use multimedia content, videos and presentations to explain concepts effectively. Students show greater interest and participation during digital lessons.

Technology integration helps improve understanding of complex topics through visual representation. Smart classrooms create interactive learning environment where students can ask questions and explore topics deeply. Digital resources support competency-based education. Touch panels promote innovative teaching practices aligned with modern education system.

Glimpses

Photo gallery showing glimpses of various activities conducted during session 2025–26.

Conclusion

PM SHRI Kendriya Vidyalaya Alipurduar Jn. continues to work towards providing quality education aligned with NEP 2020 vision. The initiatives undertaken during academic session 2025–26 reflect commitment towards innovation, skill development and holistic education.

The Vidyalaya aims to create future-ready learners who are confident, responsible and creative. Continuous improvement in infrastructure and teaching methods helps students achieve academic excellence. Teachers and students work together to create positive learning environment.

The school will continue to adopt new initiatives to provide best educational opportunities to learners.

Thank you
