**Process as below shall be adopted for billing computation of the interim period (from 1.04.2026 till actual implementation of changed ToD in meters):**

AMISPs shall derive the changed ToD slot-wise consumption from the load survey data of the respective meters.

The derived data shall be forwarded to the concerned EE (Distribution) for validation/verification.

Upon receiving approval/confirmation from the concerned EE (Distribution), AMISPs shall proceed with the validated data.

Thereafter, the validated data shall be pushed to the RAPDRP billing system through API integration for further billing processing.

Above mechanism shall be followed thoroughly to ensure accurate billing as per revised tariff provisions and avoid any revenue loss during the transition period.
