D-Flow is an innovative and generic e-governance tool from NIC Rajasthan. The application is extremely useful in cases where data is to be collected from large number of cascaded field locations either on an adhoc basis or as a regular schedule. The system permits user at any level to create its own data collection form , name it and circulate it to any number of users for data collection. The form can be scheduled for reporting on one time basis or any frequency of collection, such as one time/ weekly/ monthly / annually etc. The user is also given the facility to attach scanned sheets which can be merged automatically while compiling the data forms received from various users. Presently implemented in Rajasthan Police department for approximately 2000 users ranging from state level users to the police station level. It is a generic application which can be used by any department without the need of coding and can be rolled out immediately.
