# Unnat Bharat Abhiyan

Transforming Rural Livelihood through Science and Technology

शिक्षित भारत –सक्षम भारत – स्वस्थ भारत – संपन्न भारत- आत्मनिर्भर भारत

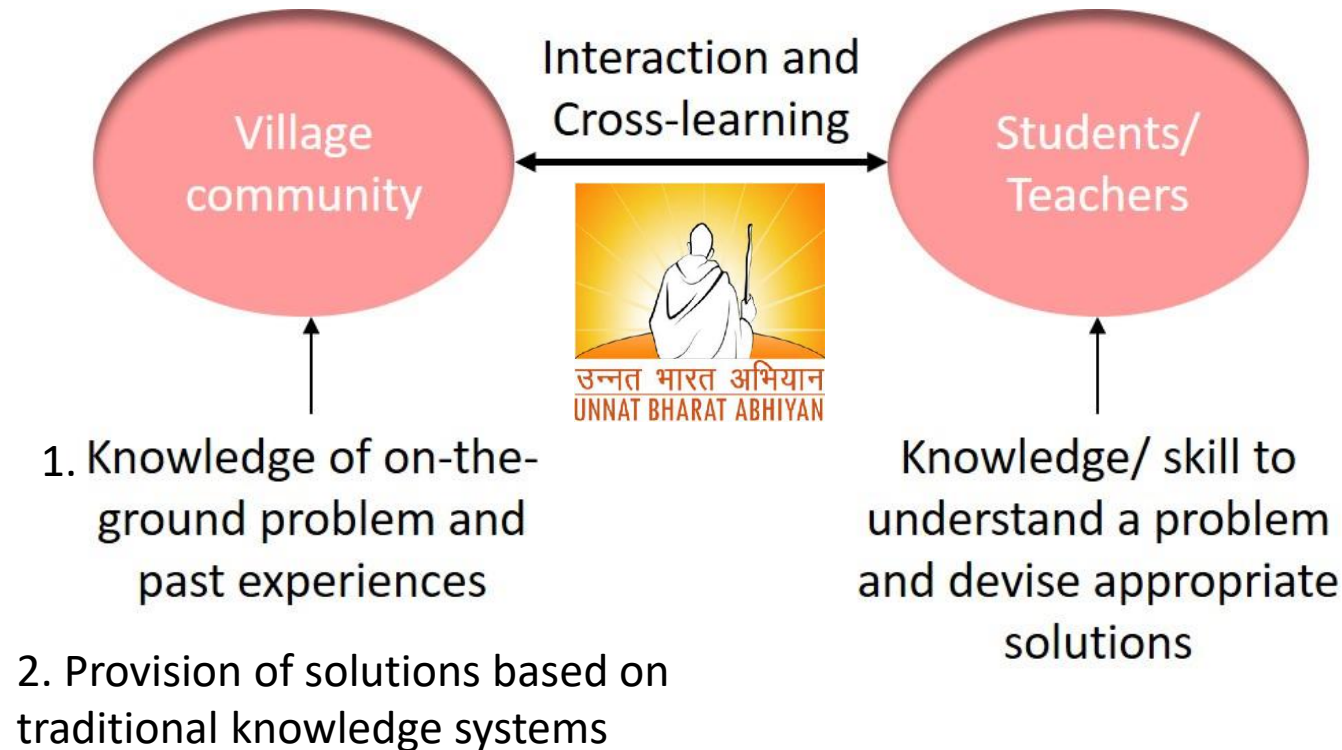

Three days National Write-shop on preparedness of Road Map and Draft Plan of Action on LSDGs in PRIs

July 04, 2022

**Manavee Ajit Singh**  
Senior Project Scientist, Unnat Bharat Abhiyan  
Indian Institute of Technology Delhi  
Email: [unnatbharatabhiyaniitd@gmail.com](mailto:unnatbharatabhiyaniitd@gmail.com)

# Unnat Bharat Abhiyan facilitates sustainable rural development through Higher Education Institutions

*The need to orient the academic system to practically understand societal issues and address real-life challenges in villages is realized!*

# **Mission**

---

- Development of mechanisms for coordination among educational institutions, implementation agencies, and grassroot stakeholders
- Holistic and sustainable development of village clusters through utilization of local resources and technological interventions, leading to livelihood generation
- Reorientation of academic curricula and research programs in alignment with the local needs

*Opportunity to enable faculty and students of higher educational institutions to work with the people of rural India in identifying development challenges and evolving appropriate solutions for accelerating sustainable growth of villages*

# Projects sanctioned under UBA Subject Expert Groups

About 292 projects have been sanctioned under UBA-SEGs till date

# Technology interventions guided by UBA-SEGs

## Technology development and customization

Universal Load Carrier Trolley

Mobile Hydraulic Lift

Solar Tunnel Greenhouse Dryer Coupled with Biomass Backup Heater and Automated Coconut Broom Making Machine

Environment controlled, automated green house for high-value agro produce in Vidarbha region

Provision of Better Health Conditions through a Mobile App for Kidney patients in Pathavaraka village, Uddanam region

Machine for Baria, Seviyan, Pickle, Murabba, Cotton Razai and Pattal making machine

Development of Digital classrooms

Lake restoration

ZBNF in Drought affected villages in Andhra Pradesh

# Convergence for facilitation of holistic and sustainable rural development

# Fast-tracking livelihood creation in rural areas through technology diffusion

To boost livelihood with little and moderate skill sets, especially for rural set-up

Diffusion of rural technologies for societal benefits through UBA network

Technology pitching and demonstration events for garnering stakeholder interest

Planning, implementation, capacity-building monitoring and evaluation through UBA network

Establishment of National Rural Technology Demonstration Centers

Establishment of National Rural Innovation Facility for Skills and Rural Entrepreneurship Development

Framework to assess suitability of technologies for deployment in rural areas created by CSIR-UBA

A repository of 82 CSIR technologies created based on the above framework

Technologies shortlisted for implementation by CSIR-UBA based on region-specific relevance

3 Technology pitching and demonstration events – online, offline, hybrid modes – showcasing about 40 CSIR technologies

Participation from over 2000 UBA institutions, over 50 CSIR scientists, representatives from VIBHA, NECTAR and other stakeholders

APPROACH

# Fast-tracking livelihood creation in rural areas through technology diffusion

## Pan-India

- Over 40 CSIR technologies demonstrated
- Above 50 potential technology seekers identified across multiple states
- Pilot phase: development of technology implementation strategy is in progress

## Northeast India

- 2 startup events as part of 2 technology conclaves respectively were organized in collaboration with NECTAR
- 4 select startup projects mentored by UBA out of which one is funded by NECTAR
- Setting up of technology demonstration and rural entrepreneurship centres is underway at Khanpara and Dima Hasao districts in Assam

# Key Impact

## CSIR Technologies for Rural Livelihood Building Atmanirbharta with Science and Technology

A Joint Initiative of CSIR, UBA and VIBHA

NIScPR  
विज्ञानसंचार-भारत

VIBHANA BHARATI

CSIR-National Institute of  
Science Communication and Policy Research  
(CSIR-NIScPR)  
Vigyan Sanchar Bhawan, New Delhi

Launched by Shri Jitendra Singh, Hon'ble Union Minister of State of the Ministry of Science and Technology and the Ministry of Earth Sciences on January 14, 2022

Framework for assessment of the suitability of CSIR technologies for deployment in select geographies (work in progress)

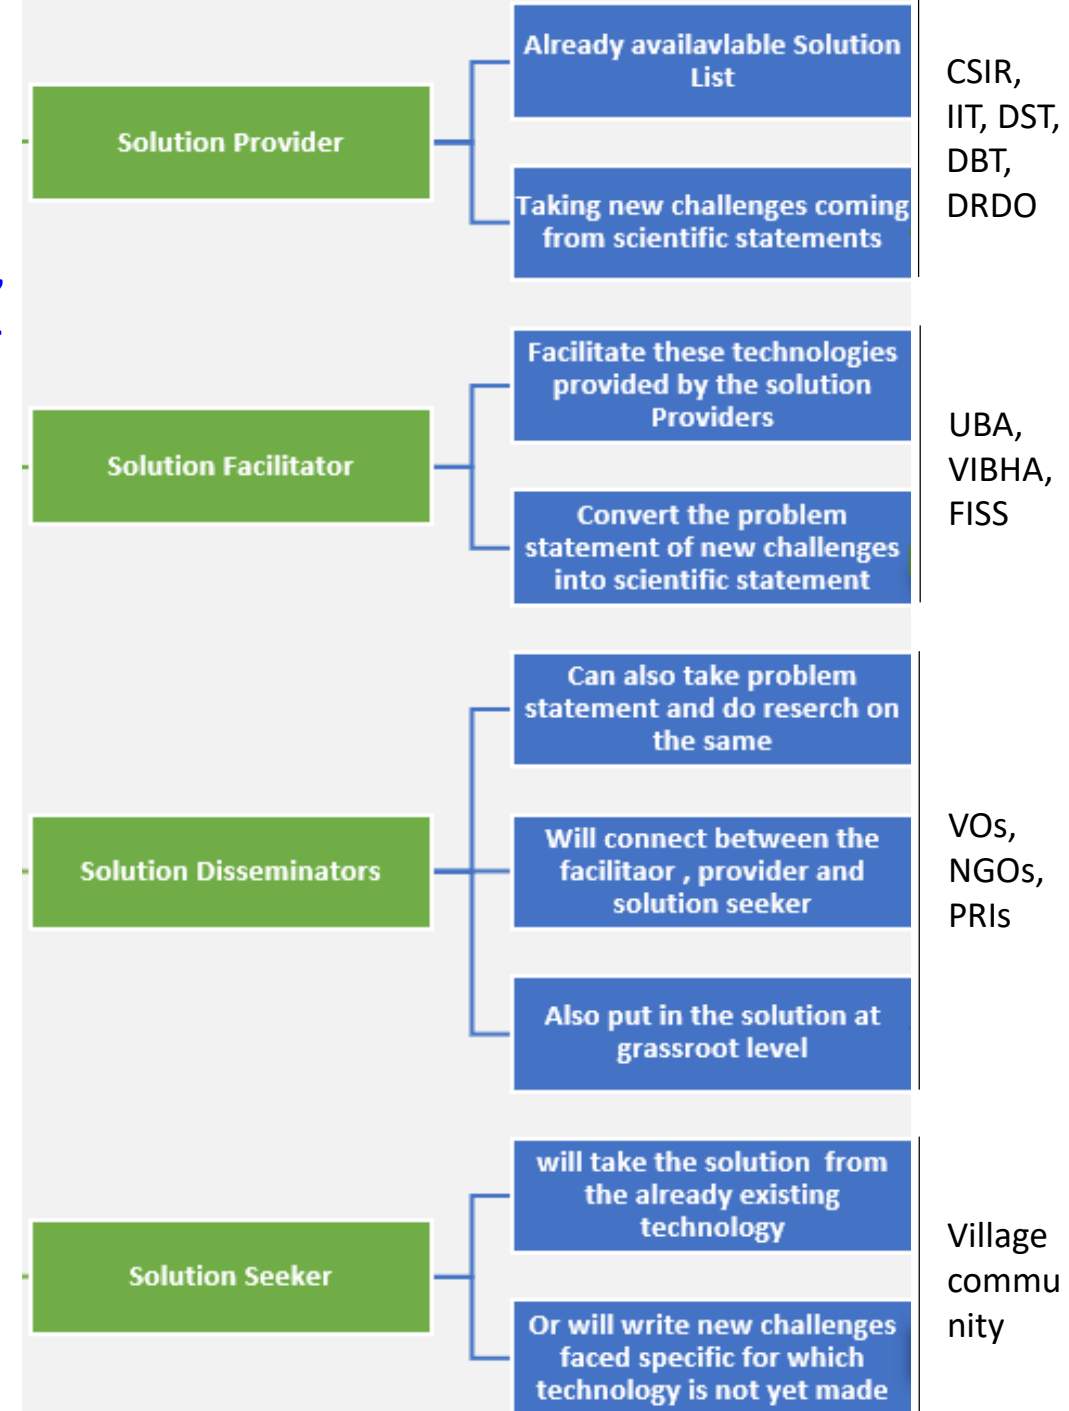

Basic Information			Salient Features of Process/Technology	
1	Title of the technology		Tentative supply chain (source of raw material, machinery to possible market)	
2	Describe the technology (salient features)		Can it be a part of circular economy?	
3	Objective of development/ purpose of the technology		How can the end product(s) be utilized?	
4	Equipment and machinery required		Is/are the end product(s) biodegradable? What about the waste products obtained in the process?	
5	Duration to the first output after installation		Possible chain of value addition	
6	Is the product output seasonal or continuous?		Can the complete value chain be made locally?	
7	Quality and stability of the obtained product(s)		How everything from top to bottom can be made in the village itself (circular and local)?	
8	Market demand of the product(s)		How to implement the technology from root to tip?	
9	Resources required (raw material, energy, water etc.) for operationalization of the technology		Can the technology be implemented at family-level or is external manpower required?	
10	Climatic and geographical conditions required (temperature, rainfall, humidity, winds, terrain, soil condition etc.)		Training days or months required to learn the technology properly	
11	Area footprint of the process		Additional Information	
12	Gestation period of the project		Manpower required to run the technology	
13	Minimum economic unit size		Status of commercialization of the technology. Please provide details.	
14	Indicative investment (please provide separately for minimum-sized unit and for larger units)		Scale of funding required	
15	If the technology is a plant/ crop etc., <ul style="list-style-type: none"> <li>What is the shelf life of the crop?</li> <li>Compared to the parent variety, what diseases is it prone to and the incidence of infection?</li> </ul>		Budget with breakage	
16	Advantages of the indicated technology over other similar commercially-available technologies (please share supporting data)		Type of certification(s) required for the product	
			Risk(s) involved with the technology/ process/ product	
			Technology photos	

# Tech4Seva

*Technology Outreach as an Enabler for Inclusive & Sustainable Development*

**Tech4Seva is a process to bring all stakeholders (technology providers, disseminators, facilitators, and seekers on a common platform in real-time to facilitate rural development through S&T.**

TECH4SEVA 2019

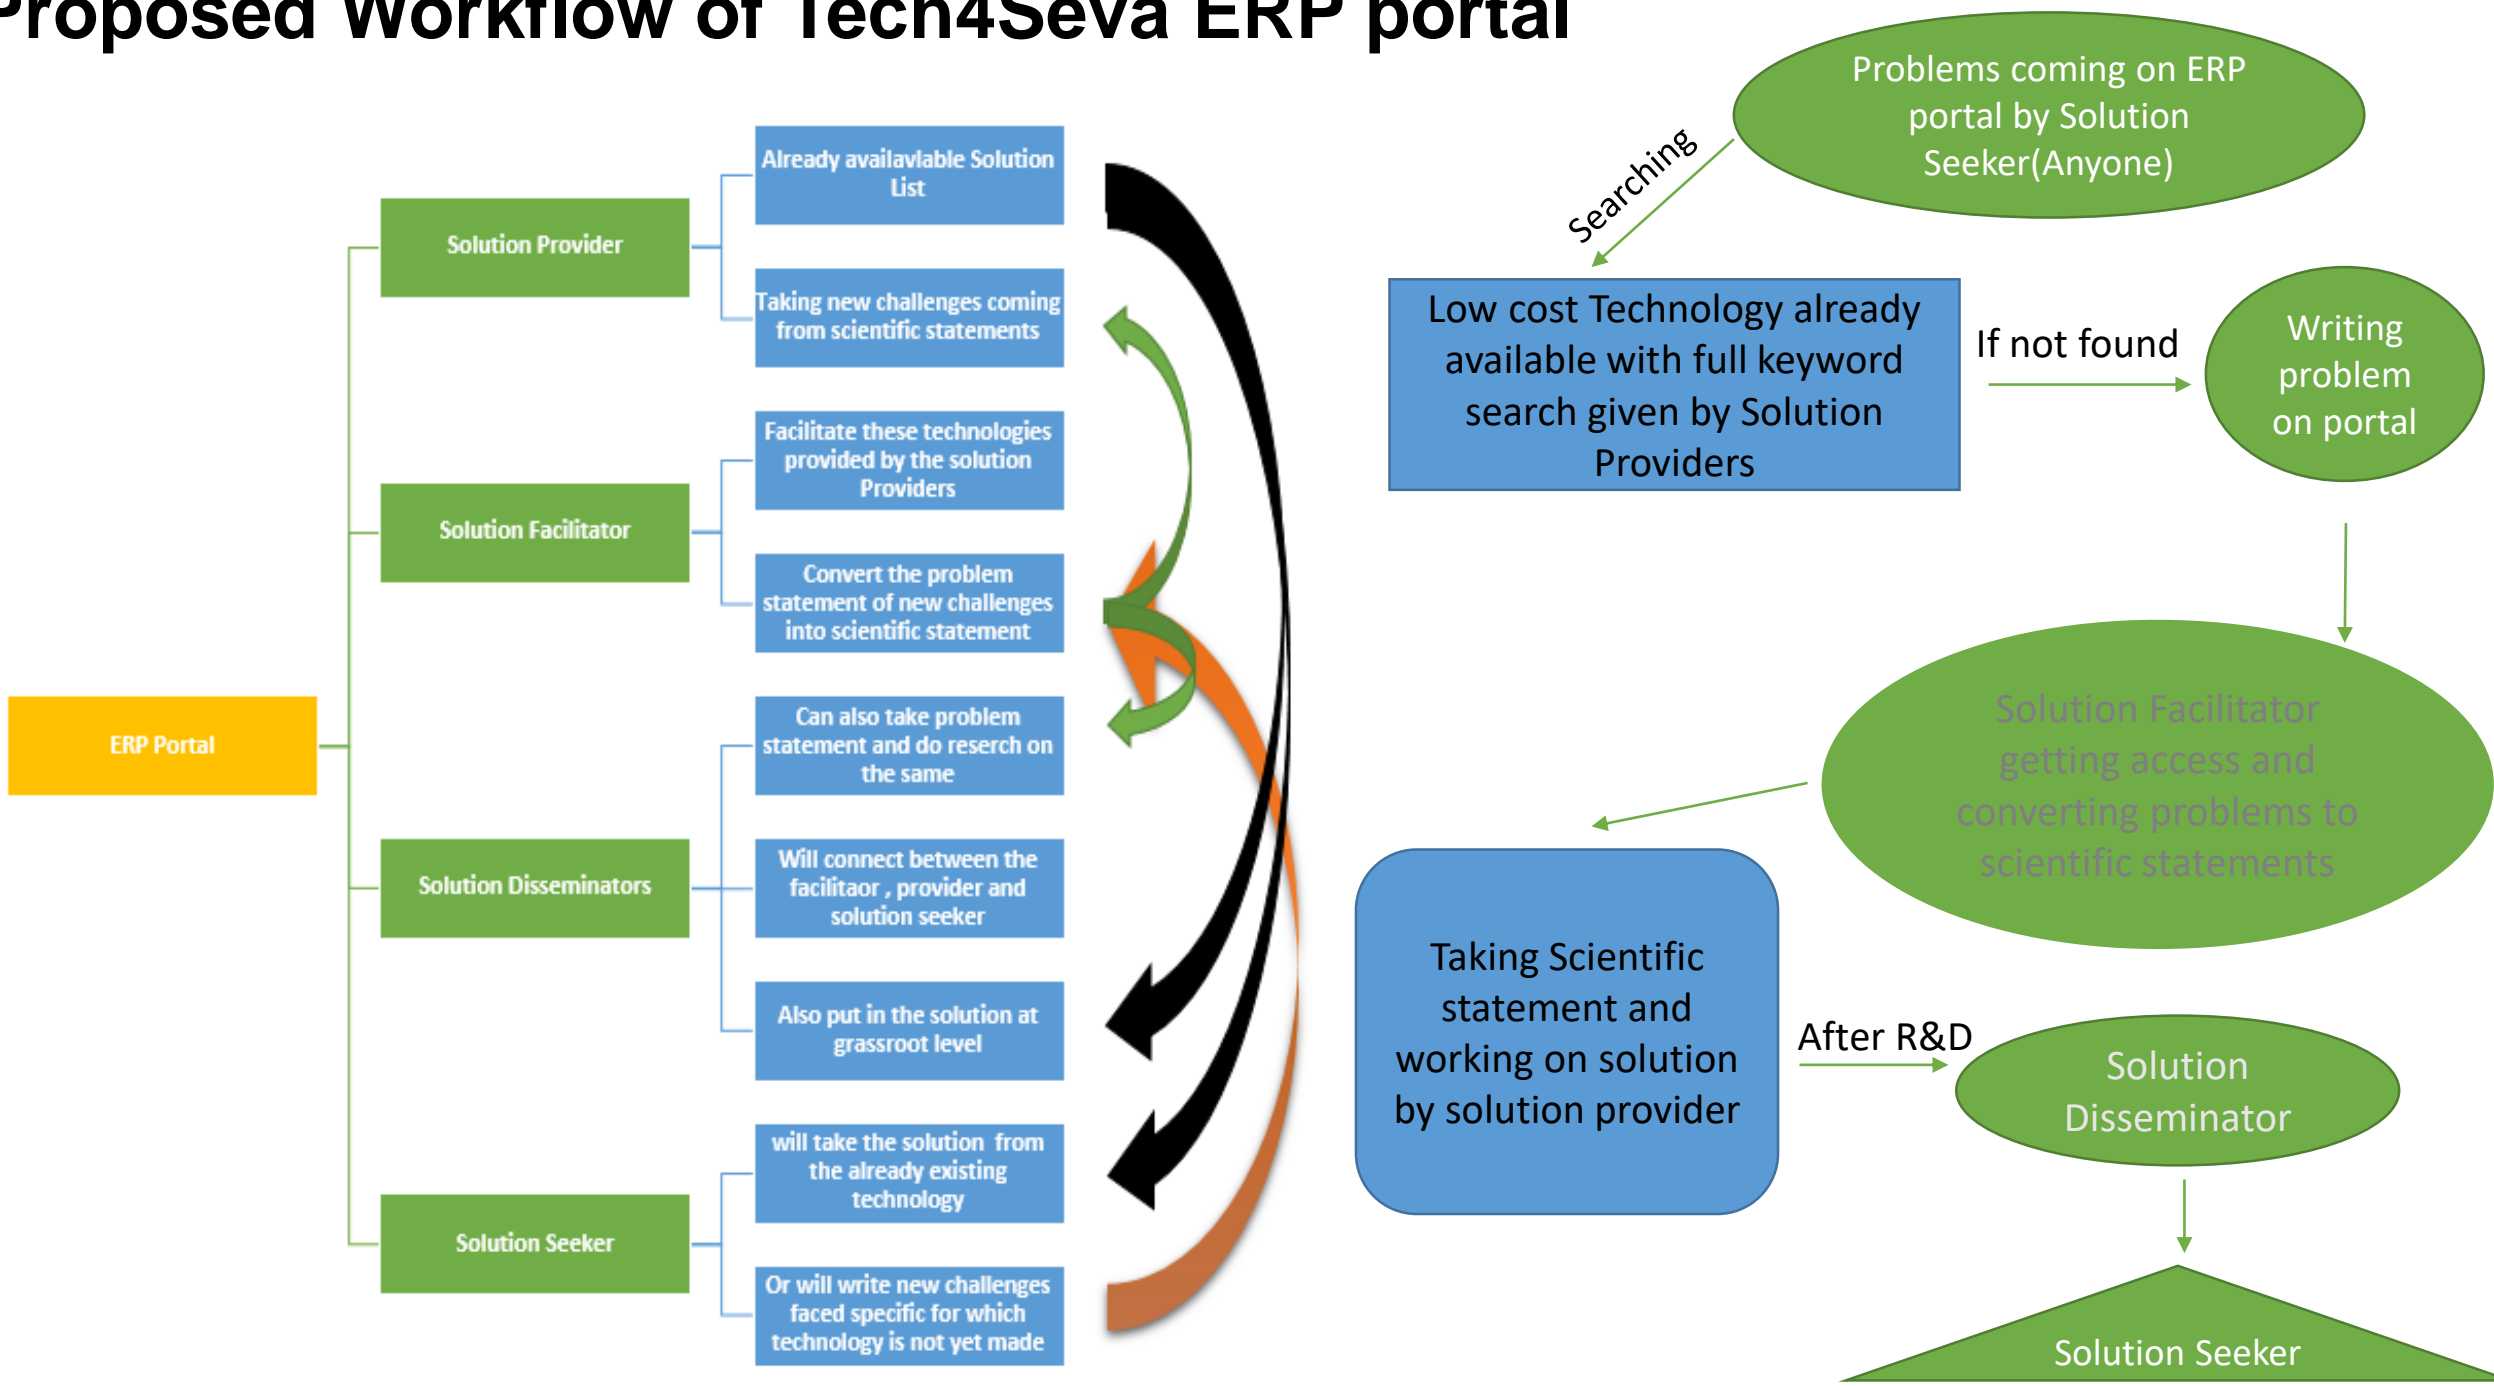

**Tech4Seva**

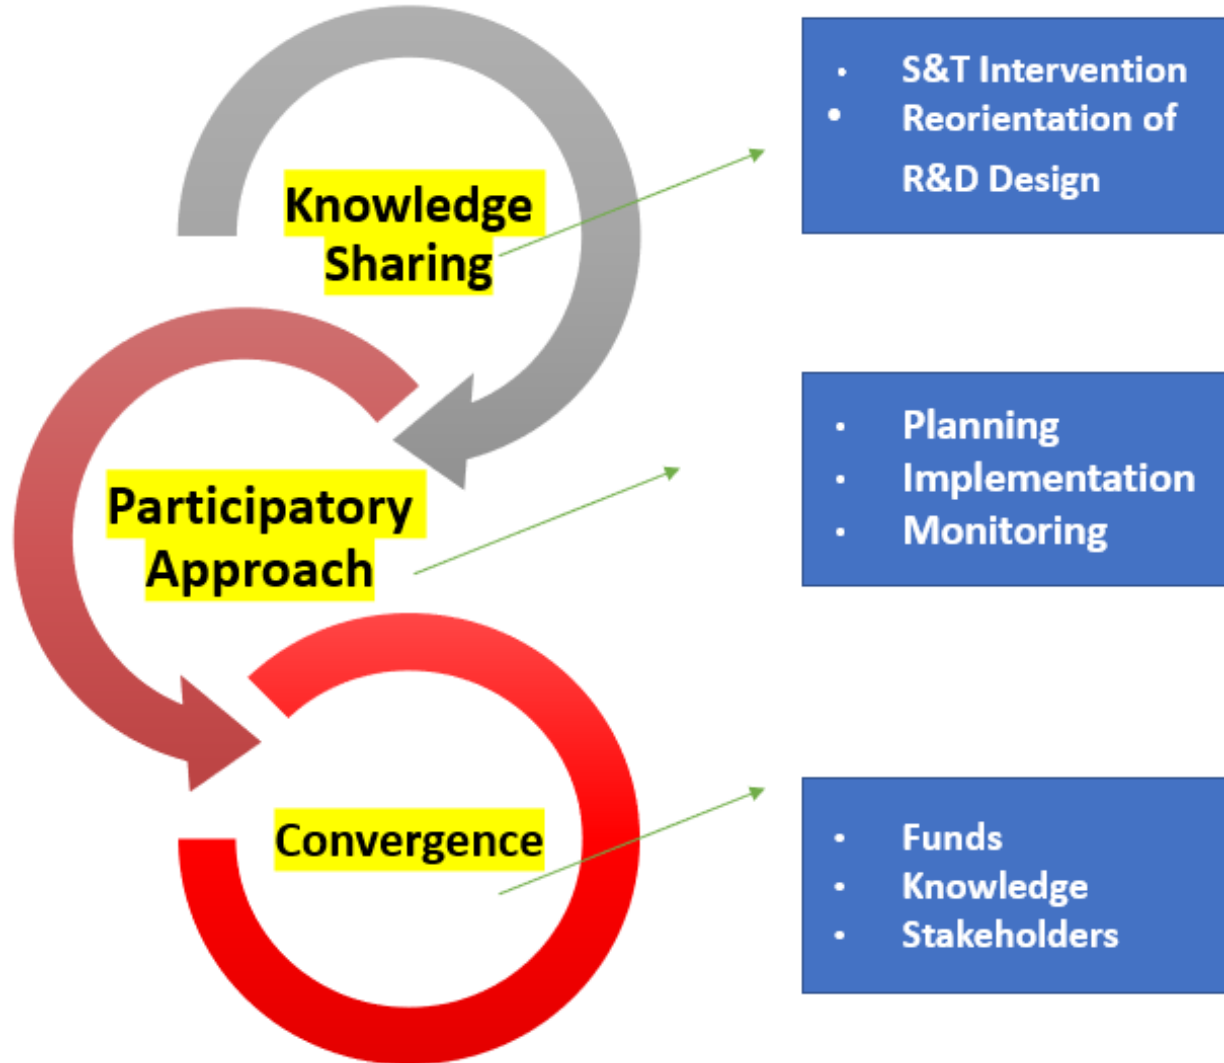

TECH4SEVA 2021

# Proposed Workflow of Tech4Seva ERP portal

# Ethos of UBA

# Unnat Bharat Abhiyan resonates with the UN 2030 Agenda and Atmanirbhar Bharat Abhiyan

Unnat Bharat Abhiyan is striving to **transform rural development** and **make villages self-reliant** through initiatives on:

- Transforming rural livelihood through S&T interventions
- Women empowerment and gender equality
- Sustainable food and water production and management
- Natural resource management and protection

“ If we have to build a nation,  
we should start from the villages ”

SHRI NARENDRA MODI,  
HONORABLE PRIME MINISTER OF INDIA

## Thematic Areas

**Sustainable Agriculture**

**Water Management**

**Renewable Energy System**

**Basic Amenities**

**Artisans, Industries and Livelihood**

# SUBJECT EXPERT GROUPS' **SYNERGY WITH**

# Subject Expert Groups: Synergy with UBA Themes, Panchayati Raj Subjects, and Sustainable Development Goals

**Organic Farming**

Sustainable agriculture systems

Agriculture including agricultural expansion  
Animal husbandry, dairying and poultry

Land improvement, implementation of land reforms, land consolidation and soil conservation

ZERO HUNGER

RESPONSIBLE CONSUMPTION AND PRODUCTION

**Water Management**

Water resource management

Minor irrigation, water management, and watershed development

Safe water for drinking

CLEAN WATER AND SANITATION

CLIMATE ACTION

**Renewable Energy**

Rural energy systems

Fuel and fodder

Rural electrification including distribution of electricity

Non-conventional sources of energy

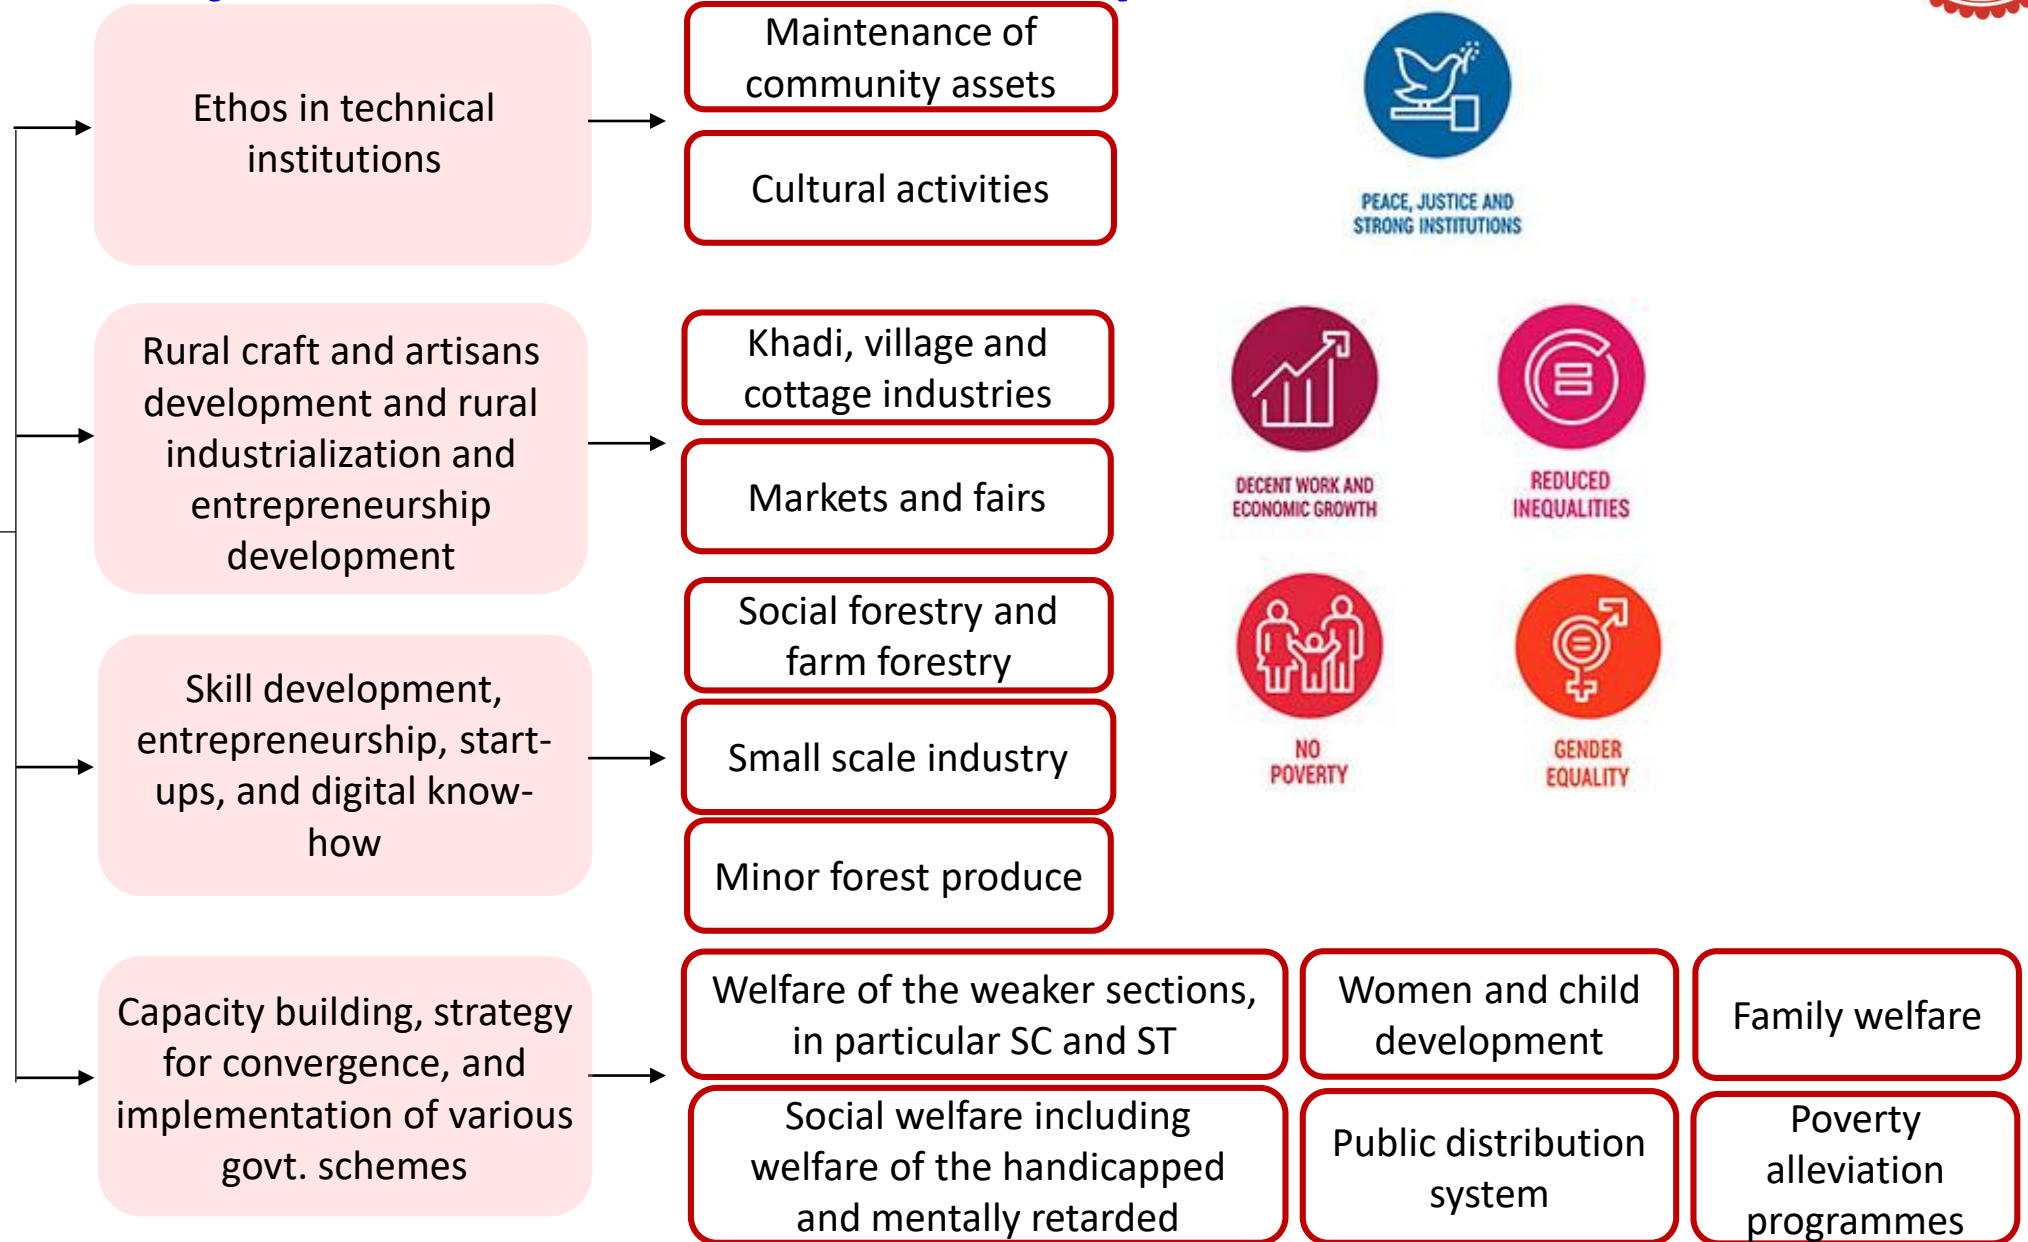

AFFORDABLE AND CLEAN ENERGY

# Subject Expert Groups: Synergy with UBA Themes, Panchayati Raj Subjects, and Sustainable Development Goals

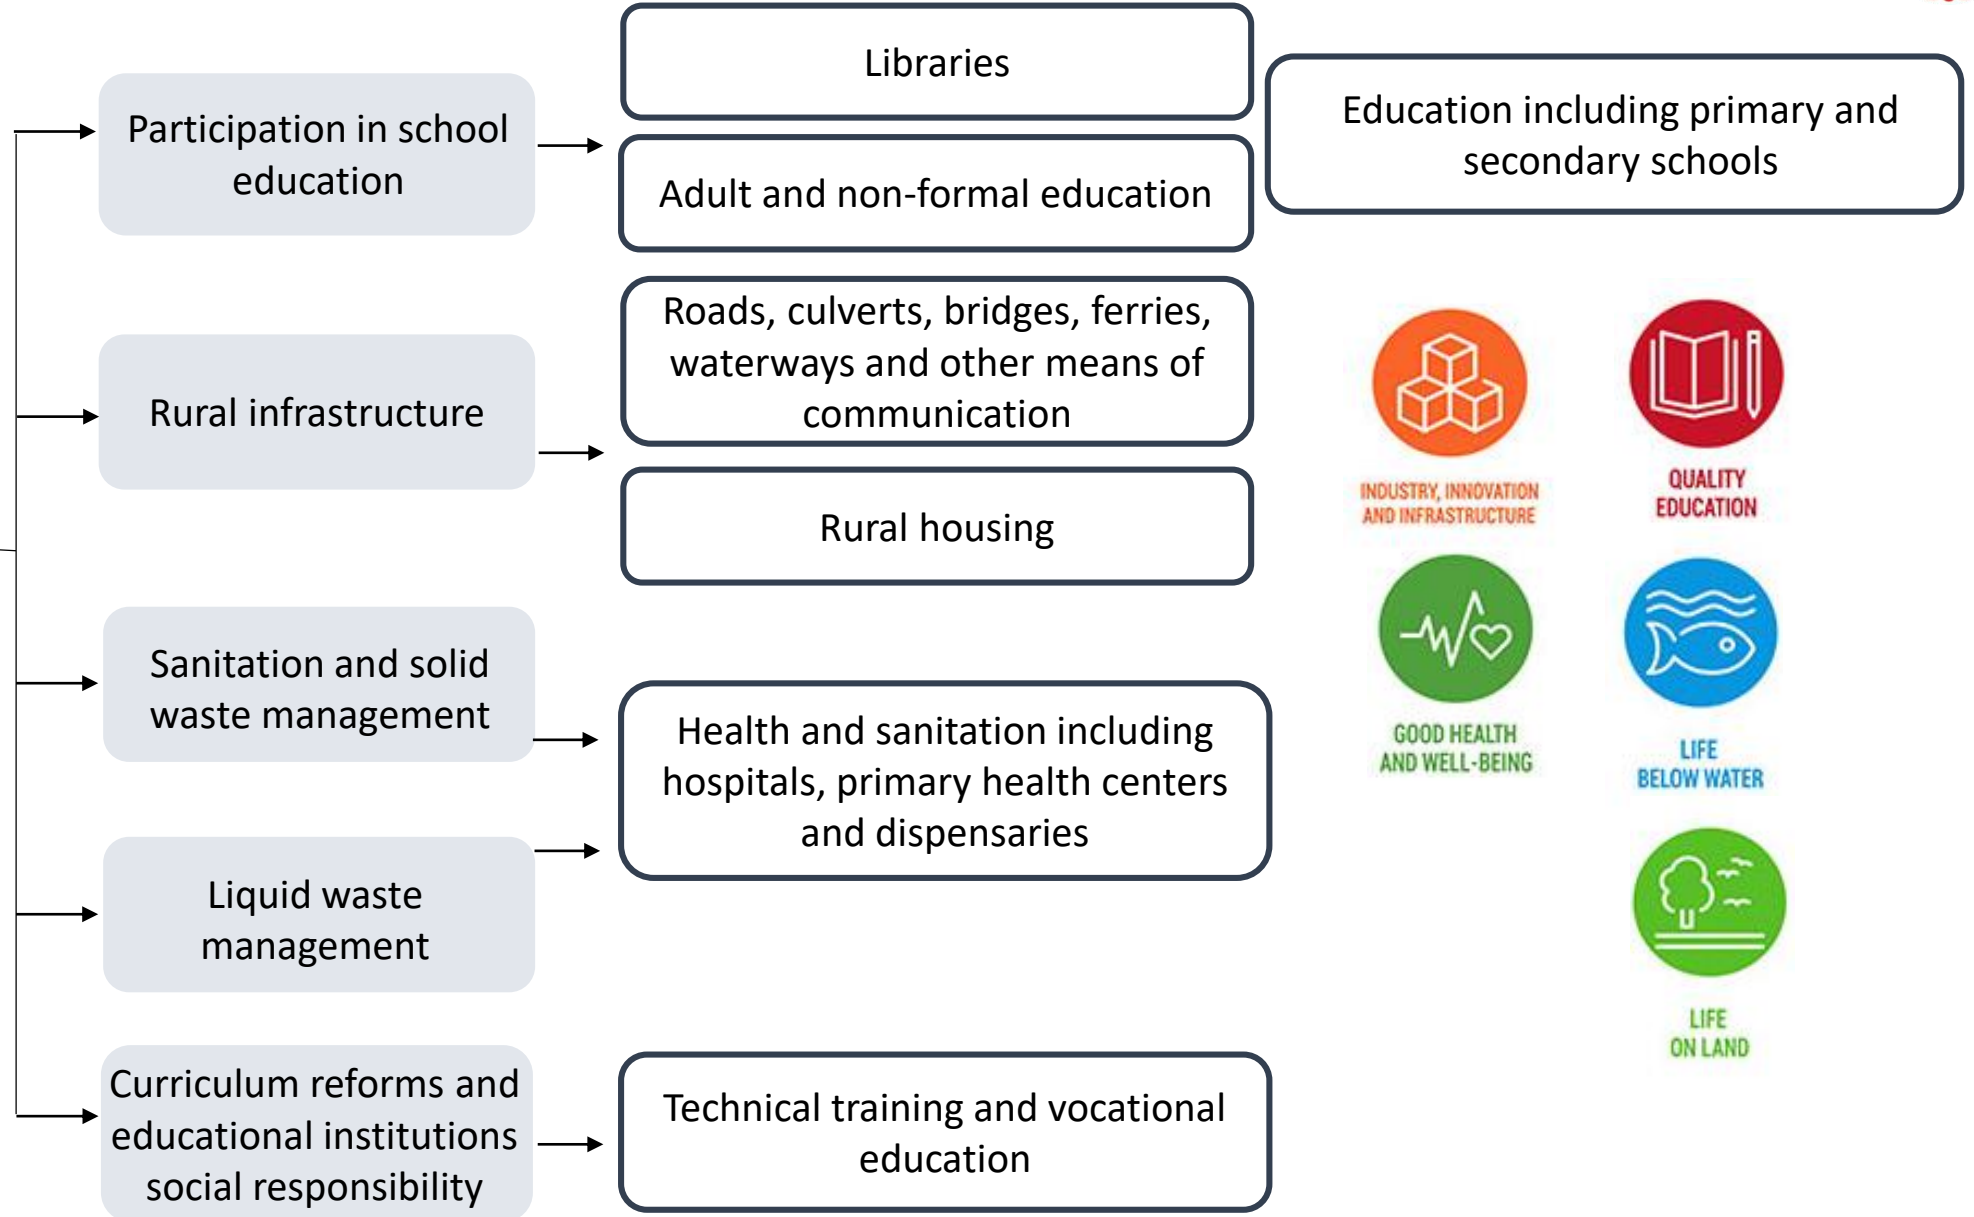

## Capacity Building Artisans, Industries and Livelihood

# Subject Expert Groups: Synergy with UBA Themes, Panchayati Raj Subjects, and Sustainable Development Goals

**Basic Amenities**

The future of India  
lies in its villages.

*Thank you!*
