

- **ServicePlus** is an open-source, **highly customizable** service delivery framework which can be used to **streamline government-citizen interactions** by enabling online access to public services.
- ServicePlus offers **pluggable modules**, designed to empower government agencies to integrate the required functionalities without needing to write any code.
- The **modular approach** allows departments to easily configure and deploy services according to their needs, making ServicePlus an **adaptable, user-friendly platform** for digitizing service delivery.
- ServicePlus enhances **accessibility, transparency, and efficiency** in delivering government services.

DBT Disbursement	5.3 Billion

(Data as on 18/11/2024)

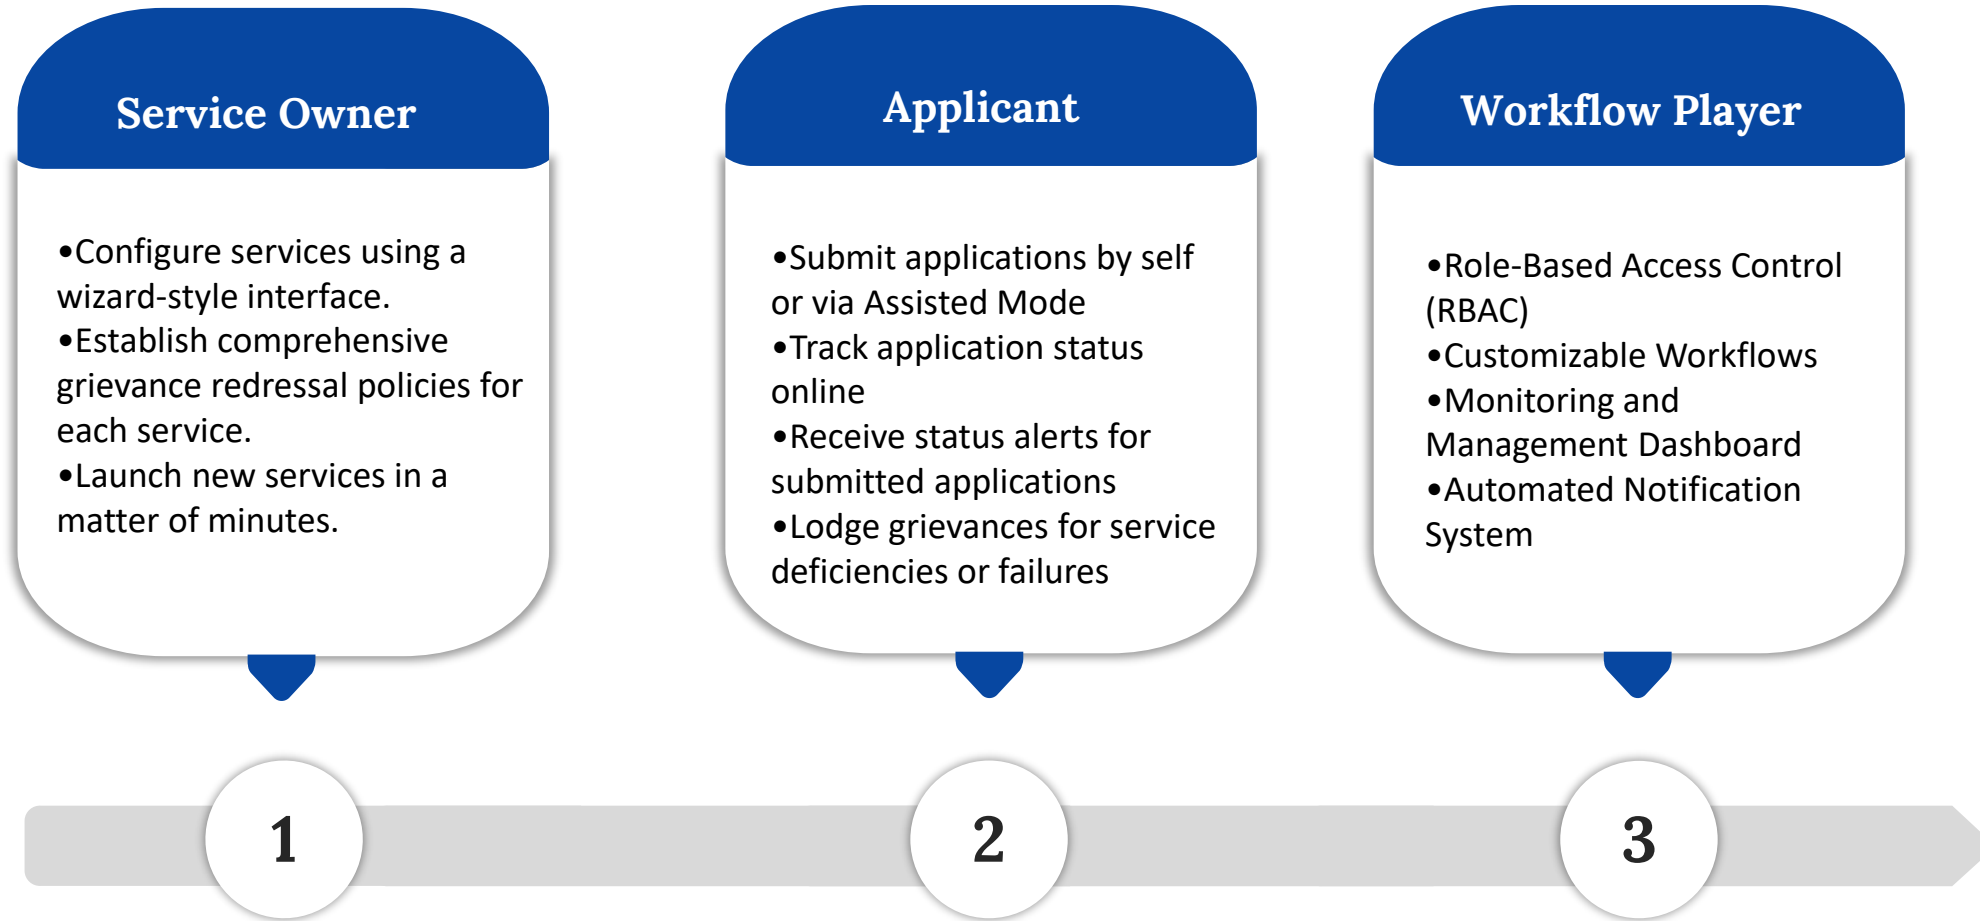

ServicePlus – Journey at a Glance

Growing adoption of ServicePlus by states and departments has been paralleled by technical evolution of the platform

ServicePlus

Common platform for actors with varying needs

Critical Components of ServicePlus

- ✓ **Form Designer**
 Design and customize dynamic forms effortlessly
- ✓ **Notification Designer**
 Design and automate customized notifications for seamless communication
- ✓ **Process flow Designer**
 Streamline and automate the workflows
- ✓ **Document Designer**
 Design, customize, and generate documents
- ✓ **External System Integration**
 Seamless Integration through API
- ✓ **Mobile Enablement**
 integrate Services with mobile apps for enhanced accessibility

Core Functionalities of ServicePlus

•Advanced Integrations

- Single Sign-On (SSO), Aadhaar Integration, eKYC, and Digital Signatures (eSign and dongle-based).
- Integration with DigiLocker, SMS & Email notifications, and Language Services (translation and transliteration).

•Payment Gateway Integration

- Supports multiple payment methods including IFMS Tamil Nadu for smooth, secure transactions.

•Citizen & Admin Portals

- User-friendly portals designed to optimize both citizen access and administrative operations.

•Service Analytics & Reporting

- Built-in tools for data analysis and progress monitoring in real-time.

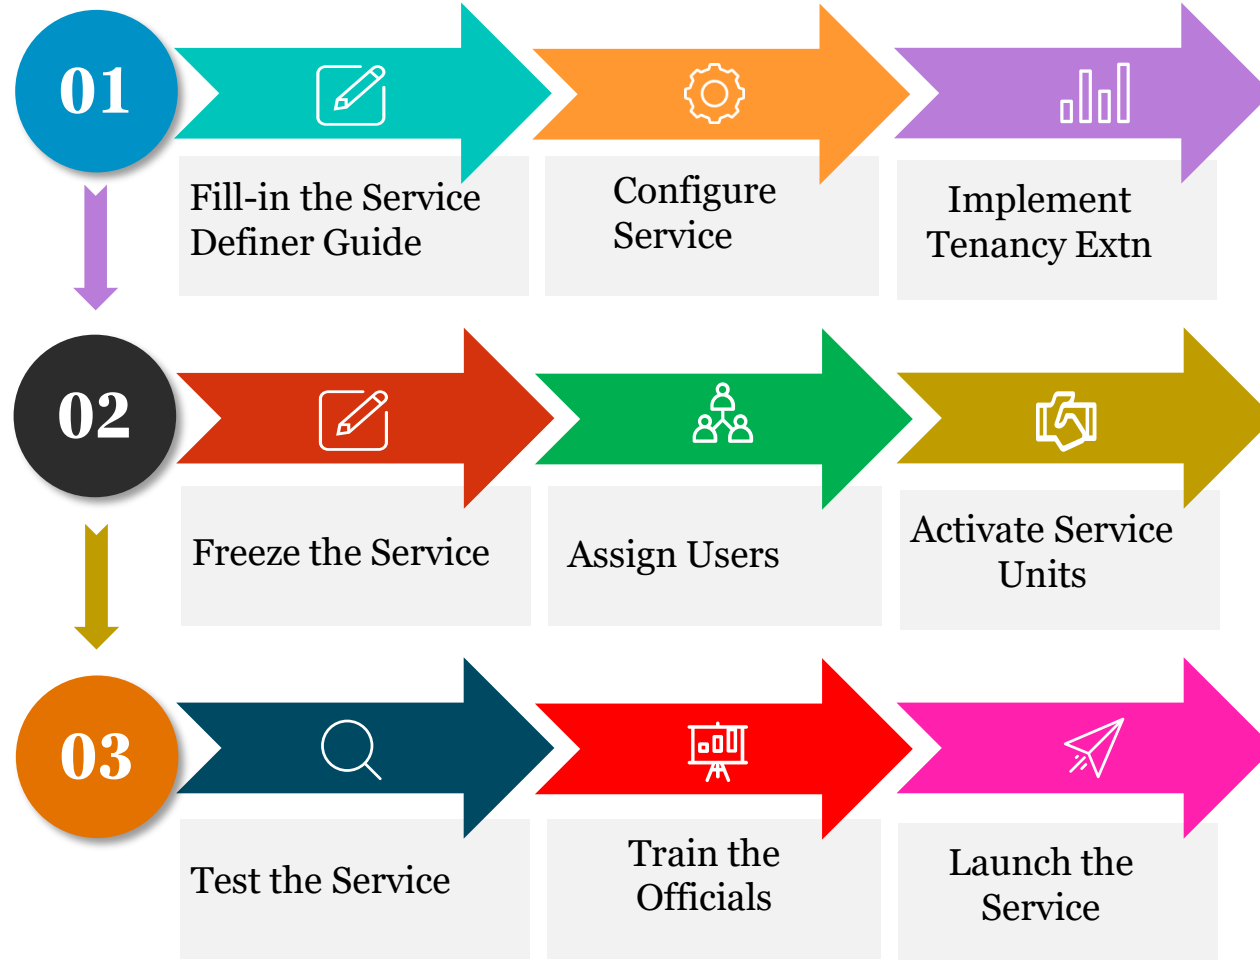

Grievance Redressal

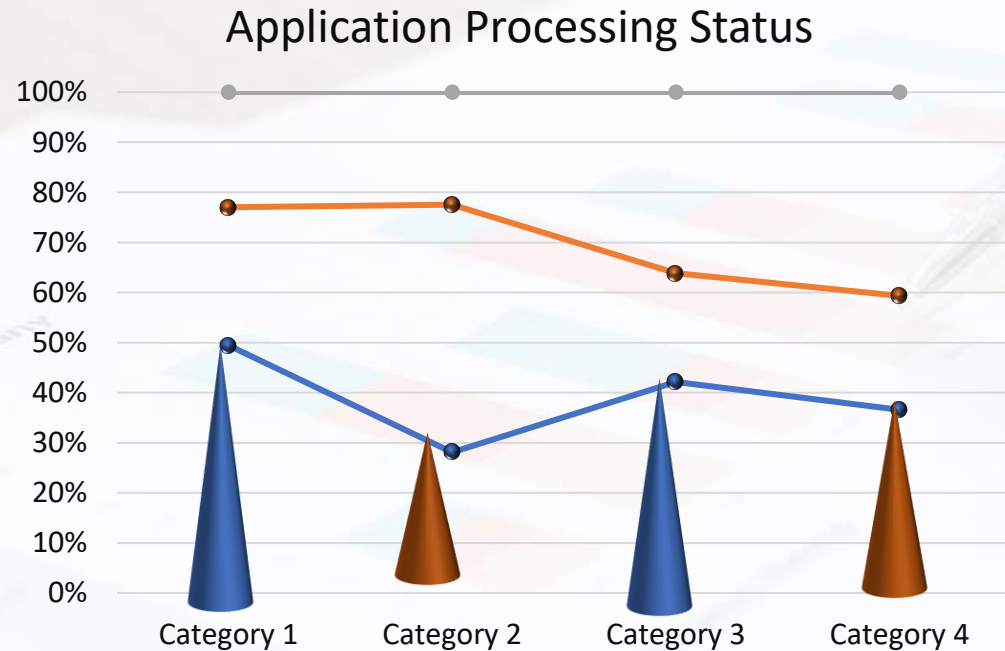

Empowering citizens with ServicePlus: Where grievances meet resolutions for seamless service delivery

Service Definition Lifecycle

ServicePlus ensures a holistic service experience through meticulous definition, management, access, support, and delivery across the entire service lifecycle.

Reports

- **SPReport** module to generate service-specific analytical and monitoring reports for insights into service delivery.
- **Customize report** templates and filters to meet the unique needs of different departments and services.
- **Interactive dashboards** and visualizations for clear data presentation and data-driven decision-making.
- **Integrate with external data** sources to provide a consolidated view of service delivery performance, with role-based access controls and export options in various formats.

SPReport - where data meets clarity for informed decisions

Supported Implementations

END TO END DIGITISED SERVICES

Application submission, Processing and Delivery through ServicePlus.

CUTTING EDGE SERVICES

ServicePlus at frontend. Processing at external System. Configurable asynchronous web-services to capture the flow/status and other details of the submitted application.

BACKEND SERVICES

External system at frontend. Processing at ServicePlus. Configurable synchronous web-service to push the flow/status and other details with External System.

EXTERNAL SYSTEM INTEGRATION

End-to-End service configuration at ServicePlus. Applicant's interfaces shared dynamically to external system. Status and other details are shared with external system.
