Utkal University gets e-office

Hemanta Pradhan / Dec 30, 2021, 04:47 IST

Bhubaneswar: An e-office was launched at the [Utkal University](#) on Wednesday under the 5T initiative of the state government in a bid to make office work paperless and ensure more transparency and greater efficiency.

Avaya Kumar Nayak, registrar of the university, said e-office has proved to be useful for remote work, especially during the pandemic. "With the implementation of e-office, the 5Ts (transparency, technology, teamwork, time and transformation) can be achieved," he added.

[Kavita Roy Das](#) from the National Informatics Centre (NIC) said e-office is a project under the National e-Governance Plan initiated in 2009. "It has been developed by the NIC and is being implemented through the Centre for Modernizing Government Initiative (CMGI), a society under the administrative control of the general administration and public grievances department of the [Odisha](#) government," she added.

[Ravenshaw University](#) in Cuttack was the first varsity under the higher education department to implement the e-office initiative. "The Utkal University is the third institution to do so," Sabita Acharya, vice-chancellor of the Utkal University, said.

An official said the digital files cannot be tampered with. "These e-files cannot be misplaced like paper documents. If anybody wants to tamper with a file, the system will show the digital footprint. Sometimes paper documents get damaged in fire accidents. But it will not happen in the case of the e-files," he added.

e-office launched in Bhubaneswar's Utkal University

Launching the initiative, Vice-Chancellor of the university Sabita Acharya said that e-office is an effective tool for transparency, efficiency and accountability.

By Express News Service

BHUBANESWAR: To bring in transparency in administration, the Utkal University launched e-office system on Wednesday.

Launching the initiative, Vice-Chancellor of the university Sabita Acharya said that e-office is an effective tool for transparency, efficiency and accountability. Under the 5T initiative, e-office which has been developed by National Informatics Centre (NIC) will be implemented by Centre for Modernising Government Initiative (CMGI) - a society under GA department.

In February this year, the Higher Education department had asked all its 12 public universities to implement the e-office system. Under it, digital workplaces will be created and files would be stored in the cloud as a result of which, they cannot be tampered with.

Utkal University is the third varsity in the State to implement the e-office system after Ravenshaw University, Cuttack, and Maharaja Sriram Chandra Bhanja Deo University in Baripada. CMGI project coordinator Pinaki Mohanty said that the e-Office is a very convenient system for the employees and it will reduce their work load.
