NexGen DARPAN 2.0 is multilingual, generic and configurable copyright product of NIC to provide administration at a glance the status of different departmental activities and monitoring of schemes at different level. DARPAN Dashboard will transform complex government data into compelling visuals and insightful analytics. DARPAN empowers administration with real-time dynamic project monitoring without coding or programming through secure web API integration. It enhances the analytical capabilities through data collection by consolidating multiple data sources into one centralized, easy to access platform.

Currently, 588 schemes of 53 departments are registered. Data Quality Index (DQI) & Star Rating has been generated based on the data received from departments on the CM's dashboard, and accordingly, monthly Ranking & Grading (Project/Departments/Districts & Composite) will be compiled. A Data Quality Index has been generated to ensure the quality of departmental data, and its monthly evaluation will also be displayed.

## DASHBOARD OF TRANSPARENCY

The command centre and dashboard will capture data and help accelerate UP's economy. It will facilitate in solving people's problems in a time-bound manner:

- Currently, 588 schemes of 53 departments are registered
- There will be no manual feeding of data
- To be integrated with portals of govt departments for real time integration

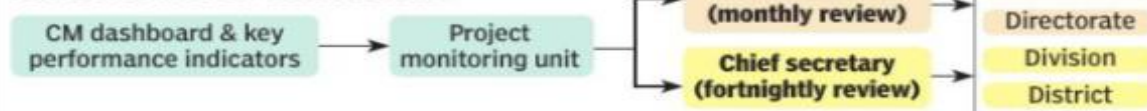

CM Yogi and DyCMs during the launch of dashboard on Sunday
