PREFACE

Integrated Child Development Services scheme, launched by the Govt. of India on 2nd October, 1975, was also adopted simultaneously in the State of Haryana with specific objective of improving the nutritional and health status of children in the age group of 0-6 years and enhancing the capabilities of mother to look after the normal health and nutritional needs of the child. This scheme is being implemented in all the community blocks of the State. Under this scheme, a package of services, consisting of supplementary nutrition, immunization, health check-up, referral services, health education and non-formal pre-school education is provided to children below 6 years of age and pregnant women and nursing mothers in the age group of 15-45 years in an integrated manner.

An evaluation study of the programme was undertaken to assess the working, performance and impact of the various services provided under the programme. This department has already done an evaluation study in 1991. This study also shows follow up action taken by ICDS department on suggestions/recommendations of the study conducted in 1991. The study has brought into focus certain bottlenecks/shortcomings in the implementation of the programme, corrective measures have been suggested to cover/minimize these short-comings. It is hoped that the findings/recommendations contained in the study report would prove useful to the policy makers and implementing departments.

I wish to extend my special thanks to Director, Women & Child Development, Haryana and his officers/official staff for their co-operation and assistance in supplying the required data.

This report has been prepared by Sh. Karan Chanda, Research Officer with the assistance of Sh. K. S. Tanwar, ARO, Sh. M.S. Panchal, ARO, Sh. N.S. Rathee, ARO, Sh. Mohinder Singh, Jr. Scale Stenographer and Smt. Rajwanti, JFI under the kind supervision of Sh. S.S. Bhoria, Dy. ESA and overall guidance of worthy Sh. R.K.Bishnoi, Addl. ESA to Govt. Haryana.

Dated: Chandigarh
The dated 15th Feb., 2007

R.C. SHARMA
Economic & Statistical Advisor
to Government, Haryana.

CHAPTER-I

INTRODUCTION

Integrated Child Development Services scheme was launched by the Govt. of India on 2nd October, 1975, was also adopted simultaneously in the State of Haryana with specific objective of improving the nutritional and health status of children in the age group of 0-6 years and enhancing the capabilities of mother to look after the normal health and nutritional needs of the child. This scheme is being implemented in all the community blocks of the State. Under this scheme, a package of services, consisting of supplementary nutrition, immunization, health check-up, referral services, health education and non-formal pre-school education is provided to children below 6 years of age and pregnant women and nursing mothers in the age group of 15-45 years in an integrated manner.

Under this scheme, supplementary nutrition items @ 95 paise and 115 paise per day per child between 6 months to 6 years of age and pregnant & nursing mothers respectively are being provided in the State. The state government is also giving honorarium @ Rs. 200/- per month to anganwadi workers and Rs. 100/- per month to helpers out of the state budget in addition to honorarium being paid by Govt. of India. Economic & Statistical Organisation, Planning Department conducted a study on ICDS in 1991. After this study, Women & Child Development Department has adopted various innovative measures like 'Ready to Eat' supplementary nutrition, introduction of "Ankur Manual" in order to make the non-formal pre-school education more interesting and attractive, with supply of aids and equipments in anganwadis of Mahendragarh district in particular by IWEDP and training of ICDS functionaries in DPEP districts by Prathmik Shiksha Priyोजना Parishad. On the approval of Financial Commissioner & Principal Secretary, Planning the study on ICDS was again conducted by the Evaluation Wing of Economic & Statistical Organisation during October, 2002 to April, 2003.

1.1 Objectives of the Study:-

- (i) To assess the impact of supplementary nutrition in improving the health of child and level/quality of knowledge among 15-45 years women about health & nutrition of child and self.
- (ii) Role of ICDS on enrolment of children in Primary School with special reference to girl child.
- (iii) To assess the retention of children of 3-6 years age group in anganwadi centres i.e. at what age they leave anganwadis (AWC) to join Primary Schools.
- (iv) To assess the availability and use of service delivery equipment in anganwadis with special reference to "Ankur Manual".
- (v) Effect and role played by co-ordination committees at various levels.
- (vi) To assess the community involvement and its participation in ICDS Programme.

1.2 Methodology of the Study:-

This study is based on primary and secondary data, collected from the Women & Child Development (W&CD) department at state level, Programme Officers (POs) at district level, Child Development & Project Officer (CDPO) at block level and anganwadis as well as village elders at village level, through various schedules designed for this purpose. In order to collect primary data the following multi stage sampling design was adopted for the selection of districts, blocks and villages for the field survey. Two blocks from each selected district taking one block at district Headquarter and another at random out of the blocks arranged in alphabetic order. Thus, adopting this procedure, the following districts and blocks were selected.

Sampling Design

<u>Division</u>	<u>Districts selected</u>	<u>Blocks selected at Random</u>	
1. Ambala	1. Kaithal 2. Kurukshetra	1. Kaithal	2. Pundri
2. Gurgaon	1. Mahendragarh 2. Rewari	1. Thaneshar	2. Pehowa
3. Hisar	1. Mahendragarh 2. Rewari	1. Mahendragarh	2. Ateli
4. Rohtak	1. Bhiwani 2. Hisar	1. Rewari (U)	2. Jatusana
	1. Karnal 2. Panipat	1. Bhiwani	2. Tosham
		I Hisar	2. Narnaund
		1. Karnal	2. Nissing
		1. Panipat (U)	2. Panipat (R)

Out of sixteen selected blocks, One village having single AWC and another village having more than one anganwadi was selected at random from each block. In this way a total of 32 villages were selected for the purpose of study. Further, one AWC from each selected village having single AWC while two anganwadis, where more than one AWC in a village, were selected at random, in all 48 anganwadis were selected. At anganwadi level, 12 beneficiaries were selected i.e. three out of each type of beneficiaries. The survey work was done as per selection given below:-

Division	Sampled Districts	Sampled Blocks	Sampled Villages	Sampled AWCs	Total No. of Sampled Beneficiaries
4	8	16	32	48	576 (@ 3 beneficiaries each from 4 categories of beneficiaries in sampled AWCs)

1.3 Tools of the study:-

For collecting relevant data, the following five types of schedules were used:-

Schedule A- The schedule was canvassed from CDPOs for collecting wide range of information regarding implementation/ execution of the scheme.

Schedule B- Canvassed from anganwadi workers.

Schedule C- (Beneficiary Schedule)-“Canvassed from mothers of the child” of 6month-3 & 3-6 years.

Schedule D- (Beneficiary Schedule)-“Canvassed from pregnant women and nursing mothers”.

Schedule E- “Canvassed from Village Sarpanch/Lady Panch/Mahila Panch/ Mahila Mandal Pradhan”

Total No. of schedules canvassed are given below:-

Particulars of schedules	No. of schedules filled in
(1) Project schedules –A	16
(2) Anganwadi Workers –B	48
(3) Beneficiaries schedules (one of each type of beneficiary C+D)	48X12= 576
(4) Village Elders schedule -E	<u>32</u>
	Total <u>672</u>

Names of the selected villages, blocks and districts covered under the study are given at Annexure-A.

1.3 Reference Period:-

Secondary data was collected for the study from the Director Women and Child Development Department, Haryana, Programme officers (P.O) of selected districts and CDPO's of the concerned block for the year 1999-2000 to 2001-2002.

CHAPTER-II

Programme Implementation

The Integrated Child Development Services scheme is being implemented in the State to promote nutritional and health status of children below 6 years of age, pregnant women, nursing mothers and other women in the age group of 15-45 years. Under this scheme, a package of services consisting of supplementary nutrition, immunization, health check-up, referral services, health education, nutrition and non-formal pre-school education is provided to children from +6month-3 years and 3 years-6 years of age, pregnant women, nursing mothers and other women in the age group of 15-45 years in an integrated manner.

This chapter highlights the implementation and progress of the ICDS Scheme being implemented in the State and in the sixteen sampled projects. The analysis given is based on information collected from Director, Women and Child Development Department, Haryana, Programme Officer at District level and CDPOs functioning at Block Level of the sixteen sampled projects. The chapter consists of two parts, Part-I deals with the progress of ICDS scheme in Haryana and Part-II gives the performance of the sixteen ICDS projects working in sampled districts.

Part-I

2.1 A Brief Note on I.C.D.S. in Haryana:-

At present 116 ICDS blocks are sanctioned with 13546 anganwadis. The scheme is fully operational in all the sanctioned blocks. All post of PO's were filled, while 7(6%) posts of CDPO's, 5 (1%) of supervisors, 155(1%) of anganwadi workers & 110(1%)of helpers were vacant (please see Annexure, table No.-S-I).The Govt. of India is providing funds for implementation of ICDS scheme while expenditure on supplementary nutrition is being borne by the State Govt. There was an increasing trend in expenditure incurred both on ICDS and SNP. During the years 1999-2000, 2000-01 & 2002-02 expenditure was Rs. 5873.60, 6230.74 and 6630.70 lakhs, respectively as shown in the table No. 2.1. It is also observed that expenditure on I.C.D.S. was more than SNP. Expenditure on ICDS was 57% where as on SNP 43% for 1999-2000, 58% and 42% for 2000-01 and 57% and 43% for 2001-02 respectively.

Table- 2.1

Outlay & Expenditure on ICDS Projects in Haryana during 1999-2000 to 2001-02 (Rs. in lakh)

<u>Sr.No.</u>	<u>Year</u>	<u>Budget received</u>			<u>Expenditure & %age</u>					
		<u>ICDS</u>	<u>SNP</u>	<u>Total</u>	<u>ICDS</u>	<u>%</u>	<u>SNP</u>	<u>%</u>	<u>Total</u>	<u>%age</u>
1.	1999-2000	3345.51	2528.09	5873.60	3345.51	57	2528.09	43	5873.60	100
2.	2000-01	3592.06	2638.68	6230.74	3592.06	58	2638.68	42	6230.74	100
3.	2001-02	3767.14	2863.56	6630.70	3767.14	57	2863.56	43	6630.70	100

Note:- %age on total.

It depicts from the above table that State Government share was 42-43% of the total expenditure while central govt. share was 57 to 58%.

2.2 Supplementary Nutrition:-

Under this scheme, nutrition items worth 95 paise and 115 paise per day per child in the age group of +6 months to 6 years and pregnant women & nursing mothers are being provided respectively. It depicts from table-2.2 given below that under supplementary nutrition programme 1005667, 1005171 and 992443 children were benefitted against the target of 919224, 919224 and 919224 during the year 1999-2000, 2000-2001 and 2001-02 which is 109, 109 and 108 percent of the target in respective years. However there was decreasing trend in number of children getting SNP during the period i.e. 0.69% & 1.31%. It is also observed that there is down ward trend in availing the SNP by expected women & nursing mother though achievement was more then the target fixed.

Table-2.2
Total No. of Beneficiaries Covered under SNP Programme in Haryana during
1999-2000 to 2001-2002

	<u>1999-2000</u>	%	<u>2000-2001</u>	%	<u>2001-2002</u>	%
Supplementary Nutrition Programme.						
Children (6 Months-6 Years.)						
Target	919224		919224		919224	
Achievement	1005667	109	1005171	109	992443	108
Pregnant women and Nursing mothers						
Target	216288		216288		216288	
Achievement	236765	109	234913	109	233367	108

Note: Percentage on Target.

2.3 Immunization Programme:-

Table No. 2.3 given on page 6 shows that the achievements under immunization (children) programme, was 100% or above. The achievement under BCG, DPT and Polio was 413724, 410515 and 411472 against the target of 403519 which is 103, 102 and 102 % respectively, while under measles achievement was 384124 against target of 403519 which is 95% of the target for the year 1999-2000. Achievement under TT (mothers) against the target of 479549, 449383 & 440557 were 369560, 368394 and 369235 which is 77%, 82% and 84% during the reference years 1999-2000, 2000-2001 and 2001-02. As the amount of targets is on increasing trend but the number of beneficiaries are decreasing while the population is also on increasing trend.

Table 2.3
Total No. of Beneficiaries covered under Immunization Programme in Haryana during 1999-2000 to 2001-2002

<u>Immunization(Children)</u>	<u>1999-2000</u>		<u>2000-2001</u>		<u>2001-2002</u>	
Target	403519	%	379907	%	373122	%
Achievement						
BCG	413724	103	392547	103	392326	105
DPT	410515	102	383238	101	379933	102
Polio	411472	102	386384	102	379933	102
Measles	384124	95	371360	98	364917	98
Target (TT)	479549		449383		440557	
Achievement						
TT(Mothers)	369560	77	368394	82	369235	84

Note: Percentage on Target.

2.4 Non-Formal Education:-

Under Non-formal pre-school education programme, 567494, 537008 and 530736 children, under age group (3-6) year, had been benefited against the target of 540720 children during the year 1999-2000, 2000-01 and 2001-02 respectively which is 105, 99 and 98%. However in this programme achievement had been observed satisfactory but percentage coverage of targets were on decreasing trend as shown in table-No.-2.4 given below:-

Table 2.4
Total No. of Beneficiaries Covered under Non-formal Pre-school education Programme in Haryana during 1999-2000 to 2001-2002

<u>Non-formal Pre-school education 1999-2000</u>	<u>2000-2001</u>		<u>2001-2002</u>			
Target (3-6 years Children)	540720	%	540720	%	540720	%
Achievement						
	567494	105	537008	99	530736	98

Note: Percentage on target.

PART-II

Working of sampled projects

Total population covered by 16 sampled ICDS Projects was 22,39,047 out of which 1,36,236 (6%) was in urban areas and 21,02,811 (94%) in rural areas. There were 2040 sanctioned anganwadis in 16 sampled ICDS projects. As many as 2038(99.90%) anganwadis were functioning during study period. The posts of 100 supervisors, 2040 AWWs and helpers were sanctioned but 75(75%) supervisors, 2029 (99%) anganwadi workers and 2039 (99%) helpers were actually working in the sampled anganwadis. The number of supervisors in position differs from the data supplied by the department for the whole state as in 2040 sampled anganwadis 25 posts of supervisors were vacant as given in table No. A-1 (Annexure) but data supplied by the department shows only 5 posts of supervisors as vacant in the state as shown in table No. S-1 (Annexure).

2.5 Building status of sampled Anganwadi centres:-

Out of 2040 anganwadis in 16 sample ICDS blocks, 158 (8%) anganwadis were in government buildings, 941(46%) in community buildings, 329 (16%) in rented buildings and 612 (30%) in privately owned buildings. Thus buildings of 46% anganwadis were either rented or privately owned. So the Govt. should provide Govt./Community buildings for all the anganwadis as some workers as well as beneficiaries do not like to go in private buildings due to their strained relations with the owner of the buildings.

2.6 Financial Position:-

Table-2.5

**Funds received and expenditure incurred on ICDS /SNP during
1999-2000to 2001-02 in sampled blocks.**

Sr.No.	Year	Fund received			Expenditure					
		ICDS	SNP	Total	ICDS	%	SNP	%	Total	%
1.	1999-2000	428.82	430.23	859.05	470.59	110	338.41	79	809.00	94
2.	2000-01	472.33	328.44	800.77	486.32	103	359.84	110	846.16	106
3.	2001-02	473.87	252.47	726.34	490.29	103	393.30	156	883.59	122

Note: Percentage on Total.

It is observed from the table No. 2.5 that expenditure incurred by the State Govt. and the Central Govt. was increasing i.e. Rs. 809.00, 846.16 and 883.59 lakh during 1999-2000, 2000-2001 and 2001-2002 respectively, while total funds received during 1999-2000 to 2001-2002 decreased from Rs.859.05 to 800.77 lakh during 1999-2000 to 2000-2001 and again to Rs.726.34 lakh during 2001-2002. The expenditure incurred on ICDS scheme during the last 3 years' proceeding the date of survey was Rs 470.59, 486.32 & 490.29 lakh against the release of Rs. 428.82, 472.33 & 473.87 lakh which is 110%, 103% and 103% respectively during 1999-2000, 2000-2001 and 2001-2002. Thus, an accelerated trend is revealed on ICDS side during the reference period while on SNP it was on decreasing trend. Expenditure on SNP was 338.41, 359.84 and 393.30 against the budget of Rs. 430.23, 328.44 and 252.47 which is 79

%, 110% and 156% during reference period. In case of SNP, funds received from the Govt. are on decreasing trend while expenditure is more than the funds received during 2000-2001 & 2001-2002 .

2.7 Supplementary Nutrition Programme:-

Supplementary nutrition, the main objective of the scheme, is an important component of the package of services under the ICDS Scheme. The scheme envisaged provision of supplementary nutrition to the children below 6 years of age as well as to the expectant women and nursing mothers. The Programme of supplementary nutrition for children as well as for women is analysed as under:-

2.7.1 Child Beneficiaries:-

+6 Months-3 Years & 3 Years to 6 years Children.

The information regarding numbers of children enrolled and provided SNP benefit to two different age groups i.e. between +6months-3 years and 3 years-6 years in sixteen sampled projects during the last three years was collected from sampled CDPO's offices, as are given in table No. 2.6 below:-

Table-2.6

Children benefitted under Supplementary Nutrition Programme in Sampled I.C.D.S Projects during 1999-2000 to 2001-02.

Year	Children between .								
	6 Months-3 years			3Years -6 years			Total		
	Enroll.	Ach.	%	Enroll.	Ach.	%	Enroll	Ach.	%
1	2	3	4	5	6	7	8	9	10
1999-2000	117398	71301	61	126921	79162	62	244319	150463	62
2000-01	114796	71617	62	126535	79665	63	241331	151282	63
2001-02	115491	70860	61	124490	78614	63	239981	149474	63

It will be seen from above table that enrolment of both groups of beneficiaries were decreasing in successive years where-as achievements during the year was almost stagnant at 63%. Under age group of +6 months-3 years in 1999-2000 to 2000-2001 beneficiaries increased from 71301 to 71617 while there was a slight decrease from 71617 to 70860 in 2001-2002. During this period in age group of 3 years-6 years also these beneficiaries increased from 79162 to 79665 in 2000-01 where as in 2001-02 decreased to 78614. The percentage of child beneficiaries in 3 years-6 years age group was more as compared to children in the +6months-3 years age group during the sample period. The low percentage of beneficiaries benefitted under the programme shows reluctance in the implementation and it would be desired that attendance of the beneficiaries should be ensured.

2.7.2 Women Beneficiaries -Pregnant and Nursing women:-

The enrolment and achievement in respect of pregnant women and lactating mothers who were benefitted under the supplementary nutrition programme during three years i.e. 1999-2000 to 2001-02 is in table No. 2.7 given below:-

Table-2.7
Number of Pregnant & Nursing Mothers benefitted in sampled Anganwadis during 1999-2000 to 2001-02.

Year	<u>Pregnant Women</u>		%	<u>Lactating Mothers</u>		%	<u>Total</u>		%
	Enrolled	benefitted		Enrolled	benefitted		Enrolled	benefitted	
1	2	3		4	5		6	7	
1999-2000	23724	16074	(68)	27350	19437	(71)	51074	35521	(70)
2000-01	23759	16679	(70)	25918	18715	(72)	49677	35394	(71)
2001-02	24005	16646	(69)	26607	18887	(71)	50612	35353	(70)

Table No.-2.7 depicts that pregnant women beneficiaries were 16074, 16679 and 16646 during the year 1999-2000, 2000-2001 & 2001-2002 which is 68%, 70 % and 69% respectively of women enrolled in sampled districts. While lactating mother beneficiaries were 19437, 18715 and 18887 against the enrolment of 27350, 25918 and 26607 which were 71%, 72% and 71% during 1999-2000, 2000-2001 & 2001-2002 respectively. Overall pregnant and nursing mother beneficiaries were 70%, 71% and 70% of the enrolment in sampled blocks while state achievement is 109%. So department should examine the gap. For district-wise more detail please see table A-3-I, A-3-II & A-3-III (Annexure). It is suggested that the implementation of the programme needs more efforts for the 100 percent coverage of lactating mothers & pregnant ladies enrolled in the anganwadis as coverage is found only 68% to 72% of the sampled blocks.

2.8 Immunization Programme:-

In this programme, children of +6 Months - 6 yrs of age as well as expectant women and nursing mothers of 15 years to 45 years of age group were to be covered. The progress under this programme is given in table- 2.8 for children and pregnant/lactating women.

(a) Immunization of Children:-

The scheme provides for immunization against small Pox, polio, tuberculosis, diphtheria, whooping cough, tetanus and typhoid for all children under six years of age. The progress of immunization of children in the sampled projects from 1999-2000 to 2001-02 is given below:-

Table-2.8

Children covered under Immunization Programme in sampled Projects during 1999-2000 to 2001-02.

Year	0-1 years. Covered				1 Year-3 years. Covered				3 years-6 years. Covered

1999-2000	71400	53395	75	3819	8								
2000-01	-do-	52092	73	4632	9								
2001-02	-do-	51171	72	4673	9								

It is observed from the table 2.8 that under BCG, against the target of 61200 children of 0-1 year, 52726, 50856 and 53885 had been covered during the year 1999-2000, 2000-2001 & 2001-02 respectively which is 86%, 83% & 88%. Coverage during 2000-2001 decreased from 86% to 83% while during 2001-02 it increased to 88%.

In the case of DPT/Polio Booster dose for children of 0-1 year, 53131, 51952 and 54243 children had been immunized during 1999-2000, 2000-2001 & 2001-2002 against the target of 61200 which is 87%, 85% and 89% of the target respectively. But DPT/Polio/ Boosters doses given to 18799, 19909 and 21300 children which is 31%, 33% & 35% in age group of 1-3 years during 1999-2000, 2000-01 and 2001-02 respectively while 4865, 4003 and 4851 children were covered in age group of 3 years-6 years during 1999-2000, 2000-2001 and 2001-2002 respectively which is low and need special attention.

In measles immunization 49389, 49281 and 50587 children were covered in the reference period against the target of 61200 which is 81, 81 & 83 percent respectively during the study period. For district-wise detail please see table A-4.I & A 4.II (Annexure). As per data supplied by the department coverage was 100% or above while in sampled projects the coverage is 81% to 83% as per information supplied by CDPOs. It shows that proper monitoring of the scheme was not done and for the success of any plan scheme monitoring of the scheme is also more important. So it needs more attention and care in

implementation to get 100% achievement in real sense. In all the anganwadis complete record of SC children was not maintained so the results could not be drawn for SC beneficiaries. It is also observed that during 2000-2001 over all progress decreased.

(b) T.T.Mothers:-

Table No.2.8 depicts that against the target of 71400 mothers under T.T. immunization programme 53395, 52092 & 51171 expectant mother beneficiaries had been covered during 1999-2000, 2000-2001 & 2001-2002 which is 75%, 73% & 72% respectively while secondary data supplied by Director, Women and Child department, Haryana shows 83% highest coverage. For district wise detail please see table No.4-III (Annexure).

M/garh=Mahendragarh

Data of SNP items as shown in the forgoing table No. 2.9 reveal that protenious items were made available to the target group for up gradation of their health status which is the sole objective of the programme. During 1999-2000, Panjiri, Alpahar Postik/Sweets/ Namkeen, Biscuits, Sweets Ready Mix, High Protein Snacks /Mixture, Giri-Tosha, were distributed in all study districts. Channa Kheel/Bhuna were supplied in Karnal and Rewari districts, Mungfali Bhuni was supplied in Bhiwani, Karnal, Kurukshetra and Kaithal and other items namely Murmara Laddu, Balbhog, HPS, Soyanuts/Sweets/bin were supplied in Karnal, Kurukshetra, Kaithal and Mahendragarh districts. In Karnal district all the items were supplied and also in more quantity comparative to all the districts during 1999-2000.

During 2000-2001 also the position of supply of items was almost same. In Mahendragarh district all the items were supplied, while in Karnal except biscuits all items were supplied .

But during 2001-02 only Panjiri, Alpahar postic/sweets Namkeen and Channa Kheel/Bhuna were supplied in all selected districts. In Panipat district Mungfli Bhuni and Murmara Laddu were also supplied while other items were not supplied in any district.

It is concluded from the above facts that supply of all items were not given to all districts in all the three years and during last year of the study only three items were supplied.

2.10 Information regarding Supervision and Control:-

Norms of supervisions defined by ICDS and Health department as per Annexure-B (Norms), 2040 visits of 2040 anganwadi centres must have been done each by PO's, CDPO's and Supervisors of ICDS Deptt. and Medical Officer (M.O.), Lady Health Visitors (LHV) and Multi Purpose Health Workers (MPHW) of Health Department. Visits done by these departments are given in table given below:-

Table -2.10

Total No. of visits prescribed/actually done by CDPO during three months of the study.

Sr. No.	Name of District	No. of AWCs	Prescribed visits during month	Visits Actually done & coverage %						Visits Actually done along with					
				1 st M	%	IInd M	%	IIIrd M	%	PO. Yr.	Qtr.	Month	M.O. Yr.	Qtr.	Month
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
1.	Bhiwani	292	97	111	(114)	100	(103)	97	(100)	-	-	-	50	13	37
2.	Hisar	245	82	60	(73)	58	(71)	68	(83)	2	1	-	57	12	-
3.	Kaithal	351	117	93	(79)	95	(81)	94	(80)	5	3	1	8	5	3
4.	Karnal	271	90	91	(101)	92	(102)	90	(100)	66	13	-	60	13	4
5.	KKR	291	97	43	(44)	57	(59)	78	(80)	16	4	-	34	6	1
6.	M/garh	253	84	110	(130)	82	(98)	55	(65)	4	4	4	20	5	1
7.	Panipat	161	54	54	(100)	72	(133)	72	(133)	27	15	5	37	10	4
8.	Rewari	176	57	90	(152)	108	(183)	100	(169)	50	10	6	72	18	6
Total		2040	678	652	(96)	664	(98)	654	(96)	170	50	16	338	82	56

Note: Percentage on col. No.4

Table No. 2.10 depicts that number of visits made during last 3 months are as in 1st month 652, in 2nd 664 and in 3rd Month 654 by CDPOs which were 96%, 98% & 96% of the requirement, so it may be concluded that visits done by CDPO of the ICDS were found satisfactory. But visits in Kurukshetra and Hisar districts were too less 44%, 59% and 80% in Kurukshetra and 73%, 71% and 83% in Hisar district in the last three months. In Kaithal district also in the first month visits were 79% of the requirement. So prescribed schedule of field visits by supervisory staff should be adhered to. Both CDPO and PO should ensure that supervisors visit each anganwadi during each month and also increase their visits in anganwadis so that intended benefits of the scheme may be ensured. Visits done by PO were nil in Bhiwani district and PO's of Hisar, Karnal and Kurukshetra had not visited in the last month of the study. During their visits they found 22 Anganwadis closed in Ist month, 19 in IInd month and 16 in IIIrd month which is 1.0%, 0.9% & .0.8% of the total sampled anganwadis. During these three months of sample period 38, 35 and 23 AWWs were found absent in Ist, IInd and IIIrd months respectively which is 1.8, 1.7 and 1.1 percent of the sampled anganwadis. So it seems that AWWs take keen interest in implementation of the scheme.

2.11 Training courses/ Community Participation:-

Out of 8 selected districts, AWWs and their helpers are fully trained in 6 (75%) districts as they attended all refresher courses. But in 2 districts namely Panipat and Mahendragarh such training courses were not attended by the anganwadi workers and helpers. Community participation in the programme was revealed as participatory because in 12 blocks Coordination committee meeting were held as per requirement and in remaining 4 ICDS Projects these meetings were not organised. These four projects were spread in district Kurukshetra (2), Rewari (1) and Mahendragarh (1). In one of the blocks of the project one half yearly meeting, 6 monthly meetings were held under the Chairmanship of Additional Deputy Commissioner. As many as 7 quarterly meetings were also organised during the study period by the PO/CDPO's in sampled ICDS blocks. So it would be desirable that these meeting should be streamlined by ICDS department.

Chapter-III

Sample Survey of the ICDS Programme

This chapter reviews the working of the anganwadis, which is the focal point for delivery of services under the ICDS scheme. This analysis is based on survey of beneficiaries selected for the sample i.e. canvassing of 3 beneficiaries each from 4 categories of schedules in a sampled AWC. A total number of 9302 households were covered in all selected 8 districts, out of these 2873 belongs to scheduled castes which is 31% of the total households. The population of these households was 56442 persons out of which 29625(52%) were male and 26817(48%) female. As many as 17112 persons (30%) belonged to Scheduled Castes having 9116(53%) male and 7996(47%) female.

3.1 Basic Strata of Anganwari workers & Helpers:-

The anganwadi worker is grass root level functionary in an ICDS Project at village level. The success of the programme in terms of delivery of the package of services wholly depends upon the efficiency and competency of the AWWs. Therefore, it was considered essential to obtain information regarding their age, educational qualifications, marital status and work experience.

Out of 48 sampled AWWs and Helpers, 11(23%) anganwadi workers and 15(31%) helpers belonged to scheduled castes, 45 anganwadi workers belong to the same village and only 3 anganwadi workers and 2 anganwadi helpers belong to other near by villages located at distance of less than 2 kms. away from anganwadi centres.

3.1(a) Training/Refresher courses of AWWs & Helper:-

All anganwadi workers were fully trained while 33(69%) helpers were not trained. Only 15(31%) helpers received training from Haryana Government. All anganwadi workers were fully experienced. Refresher course were attended by 42(88%) anganwadi workers, while only 6(12%) anganwadi workers did not get such refresher courses. Only 14(29%) helpers were not sent for refresher courses. So it would be liked to recommend ICDS department that such refresher courses should be given to all helpers so that intended benefits of the scheme may be taken.

3.1(b) Academic Qualification of Aww/Helpers:-

All the AWWs were in age group of 18 to 40 years. As many as 20 AWWs (42%) were in the age group of 28-30 years while other 28 (58%) workers were in the age group of 31-40 years which reflects the maturity and experience in the line. Regarding the educational qualifications of anganwadi workers, only 1(2%) anganwadi worker was primary pass, 4(8%) were middle, 31(65%) were matric and 12(25%) were 10+2 and above. It shows that most of the workers 90% were well educated and (above matric).

3.2 Status of Anganwadis building:-

The findings of the study reveal that 12 (25%) anganwadis existed in rented buildings, 5(10%) in Govt. buildings 24(50%) in community buildings, 6(13%) in individual buildings i.e. anganwadi worker's building and rest only 1(2%) in private buildings. It can be derived that despite implementation of the scheme for the last 30 years, only 60% anganwadis existed in Govt./community buildings where as the remaining 40% anganwadis have to seek private roof for the existence which many a time involve

litigations with the owner and communal disputes due to strained relations particularly in case of lower caste strata.

3.3 Supplementary nutrition:-

The supplementary nutrition items were required to be provided for 25 days in a month and 300 days in a year to children, nursing mothers and expectant women in order to combat with adverse effects of mal-nutrition. In order to assess the coverage of supplementary nutritional services, the number of beneficiaries provided supplementary nutrition during a period of three months prior to the date of survey was collected and indicated in the following Table 3.1

Table-3.1
Category wise number of beneficiaries under SNP during last three months.

Category of Beneficiaries	December, 2001			January, 2002			February, 2002		
	Eligible	Enrolled	Received	Eligible	Enrolled	Received	Eligible	Enrolled	Received

%age	(36)	(92)	(79)	(36)	(86)	(77)	(34)	(87)	(82)

(a) Children beneficiaries(6 months-6 years):-

It will be seen from the above table that out of 2721 eligible children in the age group of 6 months to 3 years 2062 children were enrolled during Dec.2001 and 1622 children received SNP which is 60% of the eligible and 79% of the enrolled. During January, 2002 and February,2002, 2159 and 2068 children were enrolled out of 2702 and 2550 eligible children while 1634 and 1555 children received SNP items which is 60% and 61% of eligible and 76% and 75% of enrolled children respectively. Out of 912, 895 and 805 eligible SC children as many as 758, 757 and 743 children were enrolled and 599, 594 and 597 children got SNP items which was 79% in Dec.2001, 78% in January, 2002 and 80% in February, 2002 of the enrolled.

Above table shows that 1546, 1623 and 1587 children in the age group of 3-6 years actually received SNP which was 54%, 57% and 55% of eligible children and 82%, 86% and 82% of the total enrolled children during Dec.2001, Jan.2002 and Feb. 2002 respectively. The coverage of SC beneficiaries was 86, 88 and 85 percent of the enrolled children while 60, 65 and 60 percent of the eligible children during Dec.2001, January, 2002 and February, 2002 respectively.

So far as benefit to the enrolled pregnant women is concerned, 413 in Dec. 2001, 410 in Jan. 2002 and 408 in Feb.2002 were covered out of 549, 570 and 547 which is 75%, 72% and 75 % respectively, if we see the actual benefits to the eligible pregnant women it is 70%, 66% & 68%

respectively. The coverage of SC beneficiaries were 78%, 80% and 81% respectively in reference period of the enrolment while 71%, 71% & 70% of the total eligible.

Nursing mothers who had taken SNP from anganwadis were 450 in Dec. 2001, 430 in Jan.2002 and 438 in Feb. 2002 against 619, 596 and 567 enrolled which is 73%, 72% and 72% while 67%, 65% and 69% of the eligible respectively. Out of 202, 203 and 186 Scheduled Castes enrolled nursing mothers the beneficiaries were 160, 156 and 152 which is 79%, 77% and 82% respectively during the study period, but if we examine the benefits to the eligible nursing mothers it comes to 67%, 65% and 69% in the reference period. It is concluded here that however state Govt. showed 100% and above achievement in all categories of beneficiaries, according to our sample study the achievements were, 76% in 6months-3yrs. age group of enrolled children, 83% for 3yrs-6yrs. and 74% for pregnant and nursing mothers enrolled while benefits to the eligible was less as explained above. For district-wise result please see table No.B-1.1, B-1.2, B-1.3 and B-1.4.(Annexures). So we find a gap in achievements of targets. The intended benefits reach to 55% to 69% of target group in real sense to the eligible, so need some more efforts.

3.4 Single Ration and Double Ration:-

The selection of various items for distribution in anganwadis was made by the Programme Officers of concerned districts in consultation with the concerned CDPOs. Every child in normal, Ist grade and IInd grade was covered under single ration programme while IIIrd & IVth grade children were covered under double ration programme. The mal-nourished children of grade-III and IV were given double quantity or as advised by the Medical Officer. Table No.B-2 (Annexure) shows that 3168, 3257 and 3142 children were given SNP in single ration programme while 13, 12 and 12 children in double ration programme, during the month of December,2001, January,2002 and February,2002 respectively among total children found out in the sample blocks. On an average, 3189 children received single ration out of 3189 and 12 children double ration. Maximum numbers of mal-nourished children 10(77%) were found in Bhiwani District, while 2(15%) in Karnal District (in Ist, IInd & IIIrd month) and 1(8%) in Kurukshetra district (during Ist month). In Hisar district grading data was not available .

3.5 Nutrition Status by weight:-

By analysing table given below it is observed that during December 2001, January 2002 and February, 2002 total 16324 children were weighted and found that 6583 children were normal, 6105 in Ist grade, 3502 in 2nd grade and 127 in 3rd grade besides 7 in 4th grade which is 40%, 37%, 21%, 1% and 0.42% respectively, all children in IVth grade were found in Rewari district. According to survey report total of 134 children were found mal-nourished which included 48 during Dec.2001, 43 during Jan.2002 and 43 during Feb.2002 which is only 2% of total children weighted. However no proper record of SC children was maintained by anganwadi workers for I to IV grade. Out of 134 mal-nourished children only 37 children had received double ration which is only 28%, where as 100% mal-nourished children must have been provided with double dose of SNP items.

Table 3.2

Nutrition Status by weight of sampled Anganwadis during the three months

KKR =Kurukshetra M/garh=Mahendragarh

3.6 Referral services:-

It is revealed that in 1st month out of 13 children referred for better treatment to medical institutions, 10 children belonged to district Bhiwani alone, 2 from Karnal district and 1 from Kurukshetra district. In IInd month 12 such children were referred out of which 10 in Bhiwani district and 2 in Karnal district. Finally in IIIrd month of sample study 12 such children had been referred out of which 9 belonged to Bhiwani district, 2 to Karnal and 1 to Mahendragarh district. Thus during all the 3 months maximum referral cases were observed in Bhiwani district alone for detail see table No. B.3 (Annexure). So it may be concluded that Bhiwani and Karnal district need more attention in health check up and nutrition diet as maximum mal-nourished children were found in Bhiwani district.

In case of women referral services, 36 pregnant women were referred in Dec.2001, 46 in Jan.2002 and 23 in Feb.2002 to the PHCs for better medical advice and treatment. The table shows that highest no. of women referred to PHC/CHC were in Panipat and Karnal districts in the IInd and IIIrd month, so these two districts need more attention for health and nutrition of women.

3.7 Health Check-up:-

These services include:

- a) Care of children under six years of age.
- b) Post-natal-care of nursing mothers and new born.

The progress in the delivery of these services is summarized in the following table No. 3.3

Table-3.3

Total No. of children +6 months to 3 yrs. covered under Health check-up in sampled Anganwadis during last three months

Year	Enrolled	No. of +6 Months -3 Yrs. Children checked by												
		A.N.M.			L.H.V.			M.O.			Grand Total			
		M	F	T	M	F	T	M	F	T	M	F	T	%.
Dec. 2001	2062	233	217	450	94	95	189	15	11	26	342	323	665	32
Jan. 2002	2159	214	187	401	93	76	169	21	18	39	328	281	609	28
Feb.2002	2068	235	199	434	46	48	94	31	26	57	312	273	585	28
Total	6289	682	603	1285	233	219	452	67	55	122	982	877	1859	30

(A) Children (+6 Months–3 Yrs.)

It depicts from table No. 3.3 that during three sample months i.e. December,2001, January, 2002 & February,2002, total 1859 children had been covered under health check-up programme. Out of total 6289 enrolled in +6 months to 3 years age group of children which is 30%. This table shows that coverage under this age group had decreased from 665 in December, 2001 to 609 in January, 2002 and 585 in February,2002 which is 32%, 28% and 28% of the enrolled children in respective months which shows that health check-up facilities were not provided to all enrolled children whose numbers was 2062, 2159 & 2068 during these months respectively indicating below mark achievement.

(B) Children (3 Yrs – 6 Yrs.)

Table No. 3.4 shows that during last three months, health check-up under age group of 3 years to 6 years children was on decreasing trend i.e. 607, 575 and 506 in December, 2001, January 2002 and February, 2002 respectively while percentage to the enrolled children was 32, 30 & 26 during these respective months and during this period 29% children were covered.

Table-3.4

Total No. of children (3yrs. to 6 yrs.) covered under Health check-up in sampled Anganwadis during last three months

Year	Enrolled	No. of (3Yrs. to 6 Yrs.) Children checked by												
		A.N.M.			L.H.V.			M.O.			Grand Total			
		M	F	T	M	F	T	M	F	T	M	F	T	%
Dec.2001	1875	195	175	370	116	103	219	10	8	18	320	287	607	32
Jan. 2002	1895	180	166	346	114	86	200	16	13	29	310	265	575	30
Feb. 2002	1945	196	173	369	47	37	84	30	23	53	273	230	506	26
Total	5715	571	514	1085	277	226	503	56	44	100	903	782	1688	29

If total number of children's enrolment average is seen it comes out 2096 for +6month to 3 yrs. and taking total of health checked up during these months comes out 1859 which is 89% and the same position comes out for children in age group of 3 years to 6 years of during each month unchecked children were covered. For district-wise detail please see table B-4.1 & B 4.2 (Annexure). On the basis of average health check-up during the period of three months only 89

% children were checked-up out of total enrolled children during last three months whereas it is required under the scheme to check-up all the children once in a quarter at least. Hence it is observed as lack of co-ordination between Health and ICDS staff. So co-ordination between Health and ICDS staff should be strengthened.

Pregnant Women:-

Table 3.5 depicts that during sample period total 641 pregnant women were checked-up which included check-up of 233, 225 and 183 women in December 2001, January 2002 and February 2002 respectively covering is 42%, 39% & 33% of the enrolment during the reference period. But if we calculate the health check-up on average enrolment it comes out 100% coverage during these three months if health check-up was done during these three month of the uncheck-up women.

Table-3.5
No. of Pregnant Women covered under health check-up in sampled anganwadis during last three months checked by

Year	<u>Enrolled</u>		<u>ANM</u>		<u>LHV</u>		<u>MO</u>		<u>Grand Total</u>		<u>%</u>	
	T	SC	T	SC	T	SC	T	SC	T	SC	T	SC
Dec.2001	549	179	150	62	73	42	10	9	233	113	42	63
Jan.2002	570	195	139	53	75	45	11	7	225	105	39	53
Feb.2002	547	185	129	47	34	19	20	11	183	77	33	41
Total	1666	550	418	162	182	106	41	27	641	295	38	47

Note: % on total pregnant women enrolled in reference period

(D) Nursing Mothers:-

Table 3.6 shows that total 704 nursing mothers were covered during last three months under this programme which included health check-up of 259, 237 and 208 in December, 2001, January, 2002 and February,2002 respectively which is 42%, 40% & 37% of the enrolled during the above period, while during the same period health check-up of 120, 105 and 74 SC women was conducted which is 59%, 52% and 40% respectively. The analysis of above data shows that health check-up of 40% women as a whole was conducted while that of 51% nursing mothers of scheduled castes communities was conducted which requires improvement in this aspect and constant co-ordination between ICDS and Health staff should be maintained for the coverage of all enrolled beneficiaries to this end by both the departments.

Table-3.6**No. of Nursing mothers covered under health check-up in sampled anganwadi during last three months**

	<u>Enrolled</u>		<u>ANM</u>		<u>LHV</u>		<u>MO</u>		<u>Grand Total</u>		<u>%</u>	
	T	SC	T	SC	T	SC	T	SC	T	SC	T	SC
Dec.2001	619	202	181	79	72	38	6	3	259	120	42	59
Jan.2002	596	203	152	59	75	40	10	6	237	105	40	52
Feb.2002	567	186	158	47	30	19	20	8	208	74	37	40
Total	1782	591	491	185	177	97	36	17	704	299	40	51

Note: % on total nursing mothers enrolled in reference period.

During home visits by anganwadi workers in the areas they provide general health check-up and also awareness about other facilities to be provided under the scheme. From table No.3.5 & 3.6 it depicts that total 1345 pregnant & nursing mother's health was checked-up, out of which 909 were checked by ANM, 359 by LHV & 77 by M.O. In this programme total 594 i.e. 44% SC women were covered. So it reveals from above analysis that maximum health check-up had been done by ANMs and LHVs of Health department with the help of anganwadi workers. For district wise more detail please see Table B-4.3 and B-4.4.(Annexure).

3.8 Coverage of Total Health Check-up during last three months:-

It is observed from table 3.7 that during last three months of study period health check-up out of total 4892 beneficiaries 3547 were children, 641 were pregnant women and 704 were nursing mothers which is 73%, 13% and 14% respectively of the total checked-up. During 1st, 2nd & 3rd month 1272, 1184 and 1088 children respectively were covered under the scheme which shows, a decreasing trend.

Table-3.7**Coverage of Health Check-up during last three months.**

<u>Sr. No.</u>	<u>Months</u>	<u>Enrolled</u>	<u>Children</u>	<u>Pregnant women</u>	<u>N/ Mothers</u>	<u>G.Total</u>	<u>%</u>
1.	Dec.-2001	5105	1272	233	259	1764	35
2.	Jan.-2002	2520	1184	225	237	1646	32
3.	Feb.-2002	5127	1091	183	208	1482	29
	Total	15452	3547	641	704	4892	32

It is observed from the analysis of survey results given in above table No. 3.7 that a total number of 4892 beneficiaries were covered under health check-up schedule during the sample period which included 1764, 1646 and 1482 beneficiaries during Dec., Jan. & Feb, 2002,

respectively. Total beneficiaries included 3544 (72%) children in the age group of +6 month to 6 years, 641(13%) expecting women and 704(15%) lactating mothers whose opinion was taken in to view in the study. It can be revealed that only 4889 beneficiaries i.e. 32% were medically checked-up either by ANM/LHV and Medical Officer during three months. This coverage highlights the drawbacks in the coordination system of both the department which need more attention /motivation or continuous in-touch efforts by the ICDS Department.

3.9 Nutrition and Health Education (NHED):-

Table B-6 (Annexure) shows that during three months of study period total 4556 participants included women other than anganwadi beneficiary who took part in NHED programme to gain knowledge about the benefits of the scheme out of which 1078 (24%) were SC. In first month of the study period, total 1595 participants attended the meeting of which 370(23%) were SC participants and in subsequent months 1467 and 1494 participants took part in this programme of which 348 (25%) and 360 (24%) were SC participants.

3.10 Families visited during last three months:-

It is observed from table-.B-7 (Annexure) that during the three months of study period total 7323 families were visited by ICDS staff which is 79% of the total families (9302), out of which 6006 by AWWs, 1117 by Supervisors and 199 by CDPOs which is 65%, 12%, and 2% respectively of the total families. However only one family was visited by PO. The result shows that families visited by supervisors, CDPO and PO had been very low so it is suggested that these officers should increase their visits to anganwadi area families to ensure intended benefits to the target groups.

3.11 Pre School Education (P.S.E):-

The programme envisaged non-formal, pre-school education to children in the age group of 3yrs-6 yrs through the institution of anganwadis. The idea was to develop desirable attitudes, values and behaviour patterns in children, besides providing environmental stimulation. Table given below shows the enrolment and beneficiaries during last three months of the study.

Table-3.8
Number of children (3yrs-6Yrs.) provided pre-school education in sampled Anganwadis during last three months.

Month	Total No. of children enrolled for PSE						Total No. of children received PSE .					
	Total			SC			Total			SC		
	M	F	T	M	F	T	M	F	T	M	F	T
1	2	3	4	5	6	7	8	9	10	11	12	13
Dec.2001	1023	921	1944	342	334	676	853	747	1600	299	270	569
Jan. 02	1002	888	1890	314	300	614	836	750	1586	288	264	552
Feb.02	1057	960	2017	353	309	662	860	793	1653	276	252	528
Total	3082	2769	5851	1009	943	1952	2549	2290	4839	863	786	1649
%age	(53%)	(47%)		(52%)	(48%)		(53%)	(47%)		(52%)	(48%)	

The above table depicts that during last three months of study total 5851 children were on-roll for P.S.E. out of which 3082 were male and 2769 female which is 53% and 47% respectively. During this period, 4839(83%) children actually received PSE benefit under this programme, out of which 2549 were male and 2290 female which is 53% and 47% respectively while coverage is 56% of the total eligible 8615 children in anganwadis. It is observed that out of total 1952 SC children, 1649(84%) received PSE benefit. Out of these SC children 863(52%) were male and 786(48%) female. Out of 4839 children covered, 1649(34%) were SC beneficiaries. So ICDS department should either to increase anganwadis or to cover these enrolled beneficiaries in existing anganwadis so as to achieve 100% coverage of enrolled children under PSE programme. For district wise detail figures please see table B-8 (Annexure). About the usefulness of anganwadis in preparing children for primary school education, it is observed, out of 288 sample beneficiaries 160(56%) parents gave their opinion in favour of this programme.

Table-3.9
Knowledge gained by children from oriented programmes organised in anganwadis.

Sr. No.	Name of District	Capital letter	Counting System	Both	Cleanliness of cloth	Total Surveyed
1	2	3	4	5	6	7
1.	Bhiwani	18	16	16	16	36
2.	Hisar	16	18	16	17	36
3.	Kaithal	7	13	7	8	36
4.	Karnal	26	26	26	24	36
5.	Kurukshetra	15	16	15	15	36
6.	M/garh	18	18	18	18	36
7.	Panipat	17	17	17	16	36
8.	Rewari	18	18	18	18	36
Total		135(47%)	142(49%)	133(46%)	132(46%)	288

M/garh=Mahendragarh

Under pre-school education programme, out of 288 children in the age group of 3 years-6years 135 children had gained knowledge of capital letters, 142(49%) counting programme and 133(46%) had knowledge of both counting and capital letters. Similarly 132(46%) children had gained, knowledge of self-cleaning, nail/hair and clothes. Thus it would be observed that ICDS programme is proving helpful to the children for preparing them for pre-school education which is one of the main aim of this study.

3.12 Immunization status in Anganwadis for last one year:-

The ICDS scheme provided specific immunization schedule of vaccination of children +6 months of age against Measles, Polio, DPT, BCG and TT etc. in anganwadis. The extent of coverage of both children and expecting women in selected anganwadis indicated in the table No. 3.10.

Table -3.10

Immunization of children (+6 Month -6 years)/pregnant women in the sampled anganwadis during one year preceding the date of survey.

Sr. No.	Nature of Immunization	No. of Children provided immunization in Anganwadis									
		0-1 years			1-3 years			3-6 years			
		Target	Ach.	%	Target	Ach.	%	Target	Ach	%	
1	2	3	4	5	6	7	8	9	10	11	
1.	Measles	1344	1101	82	-	-	-	-	-	-	-
2.	Polio	1344	1312	98	-	-	-	-	-	-	
3.	BCG	1344	1330	99	-	-	-	-	-	-	
4.	DPT	1344									
	Ist Dose		1327	99	-	-	-	-	-	-	
	2 nd Dose		225	--	-	-	-	-	-	-	
	3 rd Dose		88	--	-	-	-	-	-	-	
5.	DPT Booster		--	--	-	693	-	-	-	-	
6.	Polio Booster		--	--	-	488	-	-	-	-	
7.	T.T.Pregnant 1536 women										
	Ist Dose		1043	68							
	IInd Dose		988	64							

It is revealed from above data that under immunization programme achievement was 82%, 98% & 99% in case of measles, Polio and BCG respectively in the age group of 0-1year children. But achievements under T.T. of expecting women was only 68% in case of 1st dose and 64% in case of 2nd dose which need more emphasis for 100% coverage in this sector. So AWWs with the help of helpers should try to contact each eligible expecting women for 1st and 2nd dose to avoid any adverse effect on the health of forth coming infant.

DPT :-

The children of 0-1 year age groups who were covered under DPT immunization programme for 1st, 2nd and 3rd doses were 1327, 225 and 88 respectively against the target of 1344. Booster doses of DPT vaccination were also given to 693 children of 1-3 years and 488 children of 3-6 years during that period. So it is stressed that 2nd & 3rd dose of DPT may be ensured to all the children as achievement is too poor.

3.13 Health Check-Up for Pregnant women and Nursing Mothers:-

Table-3.11

Motivation of Health Check-Up by AWW and ANM for expecting women

Sr. No.	District	AWW	ANM	Self knowledge	Total
1	2	3	4	5	6
1.	Bhiwani	15	2	1	18
2.	Hisar	14	4	-	18
3.	Kaithal	18	-	-	18
4.	Karnal	17	1	-	18
5.	Kurukshetra	18	-	-	18
6.	Panipat	11	7	-	18
7.	M/garh	16	-	2	18
8.	Rewari	18	-	-	18
	Total	127	14	3	144

AWW=Anganwadi Worker ANM= Auxiliary Nurse and Midwife. M/garh=Mahendragarh

It is observed from the Table- 3.11 that out of 144 expecting women beneficiaries 127 women were motivated for medical check-up by anganwadi workers, 14 by ANM while 3 by self knowledge which is 88%, 10% and 2% respectively. It is also observed that 126 (88%) pregnant women received folic-Acid from anganwadis. (Please see Annexure Table No B-10). Out of 144 sampled beneficiaries 128 (89%) expecting women got anti-natal care from AWWs and satisfied with their advice. It is found that out of 144 nursing mothers 139 i.e. 97% were visited by AWWs after delivery. Anganwadi workers helped in health check-up of 139 i.e. 97% nursing mothers and their baby against surveyed 144 nursing mothers and 144 babies. It is also observed that out of sampled beneficiaries 139 women gave their baby breast feeding and 141 children got polio drops which is 97% and 98% respectively with the advice of AWWs. Majority of women were found taking care of their children's health as 141 mother's children were found in good health condition which is 98%. Out of 144 sampled beneficiaries 127 i.e. 88% women were also found adopting family planning norms. Thus, AWWs visits proved very helpful to achieve the intended objectives. Children who were suffering from different diseases were given medicines as for diareherea 47 children, dysentery 145, infection 149, skin allergy 53, worm 117 and vitamin deficiency 58 children which is 16%, 50%, 52%, 53%, 41% and 20% respectively of the children surveyed (As Annexure table No.B.11).

3.14 Visits by Project and Medical Staff:-

During last year of the study period, 38 Visits were done by P.O, 211 by CDPOs and 632 by Supervisors while visits done by medical staff were 49 by MO, 77 by LHV and 719 by ANM in the anganwadis for detail please see in table No. B-12 (Annexure). Visits in sample anganwadis by ICDS & Health staff were as per norms except visits by Supervisors of Kaithal, Panipat, Rewari and Mahendragarh districts, their visits were 41, 70, 60 and 70 in the respective districts against the minimum requirement of 72 visits in a year of the sampled anganwadis, likewise ANM's visits in Hisar, Karnal, Kaithal and Bhiwani were 18, 37, 24 and 62 respectively against the requirement of 72 visits. Except PO's of Karnal and Mahendragarh districts none have visited the AWC's in last year of the study, visits done by CDPO's & Supervisors of Kaithal district were also below norms.

According to guidelines each anganwadi should be checked every month by supervisor of ICDS and ANM's in case of health department, whereas CDPOs & LHVs are required to pay visit in each anganwadis at least once a quarter & at least once in a year by PO and SMO. So visits of PO of ICDS department and SMO of Health Department were found less in respect of norms fixed by Govt, (Annexure-B) so their visits should be increased to achieve intended benefits of the scheme.

3.15 SNP provided by Anganwadi Workers:-

It is observed that in all sampled anganwadis SNP was distributed on an average 25 days in a month. As far as SNP eating habits are concerned, it is found that out of 288 sampled child beneficiaries 179(62%) children took SNP to their home and 109(38%), consume it in anganwadis themselves which means 62% children shared their SNP items with their family members defeating the very purpose of scheme. All sampled children had received SNP at appropriate time & 251(87%) children took SNP regularly. Out of 288 Children 276(96%), children's mother told that took SNP is of good quality where as only 12 opined the inferior quality of the SNP. Reasons for attending anganwadis by the children were also obtained and it was concluded that only 29(10%) children opined to come anganwadis for getting SNP items only, where as majority of children 90% come to anganwadis with other reasons like getting non formal education for learning tips on health care and other cleanliness habits. So, if the department wants to run this scheme smoothly, it is necessary to continue the supplementary nutrition programme in future also. The number of beneficiaries who used to take milk were 277, ghee 244, vegetables 241 and pulses 272 at their home which is 96%, 85%, 84% and 94% respectively, only 2% parents provided eggs, meat and fruits, to their children. Items distributed in anganwadis should be continued because this menu is favoured by a majority (96%) parents/children. Out of sampled 288 women beneficiaries, 268(93%) were found in favour of

the prevailing system of SNP. However, few women wanted to change in menu of SNP items which were distributed in anganwadis but these women did not suggest us what should be the menu.

After monitoring the view of 48 sampled anganwadis beneficiaries it is concluded that SNP distributed in 46(96%) anganwadis was found in good condition. Out of 48 sampled anganwadis, 46(96%) anganwadis had no complaint about the quality and quantity of S.N.P supplied.

3.16 Community Participation in ICDS:-

Out of the 32 sampled villages, only 6 had PHC's while 26(81%) were with sub-centres. It is observed that 78(85%) anganwadis out of 91 anganwadis found in these sample villages, were in possession of private building while remaining 15% anganwadis in the Govt. Buildings. As far as availability of drinking water facilities are concerned, it was revealed that this facility was available in anganwadis of 20 villages while remaining villages lacked this facility which should be ensured. Survey results show that literacy functions in anganwadis of (22%) villages were organised and village community meetings were organised in 13(41%) villages which also requires improvement. Similarly 18 Gram Panchayats extended help to AWWs in organising cultural functions in anganwadis to attract public participation for the success of this programme. It was seen that though members of Mahila Mandals and women folk take active part in AWC system yet there is lot of scope of improvement in this sphere.

3.17 Activities and other knowledge orientation programmes in AWC:-

Out of the sampled 48 anganwadis centers, in 7 anganwadis, children entertained themselves by jumping, 7 by handling hangings and in 34 by manipulating things which is 15%, 15% and 70% respectively. Children in 47(98%) anganwadis liked exhibiting these activities for shorter duration in view of their tender age. Similarly 90% children liked to perform seeing toys in groups. Each Saturday was being celebrated as Mother's day according to guidelines, as observed from evaluation study. In 43% AWWs children preferred sitting in rows as compared to 6% to 4% sitting in circle or in other-ways respectively. Sitting in row, as preferred most, will inculcate habit of keeping in discipline while finding Ist entry in the school which is the primary need at that stage. Such habits, if imbibed in tender age, would certainly develop sound feelings of patriotism, moral good character and respect towards elders.

In all sampled anganwadis children had been singing National Anthem. In 27 (56%) anganwadis, day started by doing greetings while in other anganwadis it was not adopted. Out of sampled 48 anganwadis in 42(88%) anganwadis, education kits supplied by Government were found intact. In order to gain knowledge about the children leaving anganwadis after attaining the age of 6 years, 26 AWWs (54%) opined that all children leaving anganwadis, have joined primary schools. 22 AWWs had no knowledge as to whether the children discharged from AWC

joined the school or not. It was also observed from the opinion of AWWs that some children attend the anganwadis even after their discharge in the enturement of getting SNP or due to penury conditions of their parents in getting them admitted in regular flow of school education. As per guidelines of the schemes, AWWs should keep regular contact with the parents of discharged children to get their wards admitted in the schools particularly with reference to girl child.

3.18 Anganwadis Building Status :-

According to survey report, it is observed that out of 48 sampled anganwadis 29 anganwadis were running in Panchayat/Govt. buildings and 19 in rented/private buildings. i.e. 60% and 40% respectively. Out of these only 11 i.e. (23%) anganwadis were electrified & 9 i.e.19% anganwadis have fan facility. In 37 anganwadis sanitary condition was found good while toilet facility was provided only in 18 anganwadis, in 30 anganwadis protected drinking water facility was provided while in 38 anganwadis facility of playground was available which is 77%, 38%, 63% and 79% respectively. It would be derived from the above data anganwadi centers existing in private buildings lack basic facilities like toilets, electricity, drinking water etc. which are essential in view of the tender age of children. So department should make elaborate arrangements for construction of Govt. buildings of anganwadis which may be clubbed with the funds of other rural development schemes like SJRY, PRI, LADT etc. if the ICDS department feels shortage of funds.

3.19 Maintenance of Anganwadis Record:-

Out of 48 sampled anganwadis in 47(98%), sampled anganwadis attendance registers were maintained properly. However in all 48 sampled anganwadis stock register, visitor book, immunization register and weight book etc. were found well maintained. In all sampled anganwadis B.P.L. beneficiaries were covered. Out of 288 sampled children 283 i.e. 98% accepted that in anganwadis weight record was maintained by register card system.

3.20 General Opinion about ICDS scheme:-

It is concluded that after gathering general opinion from 288 parents of child and 288 expecting/lactating mothers about the working process, policies implementation & service facilities provided by ICDS department, it was found that scheme is being implemented satisfactorily in the State with some unavoidable problems which if taken care of, with the help of Public Health Department/Gram Panchayats in particular, can be sorted out for successful implementation of this scheme.

CHAPTER -IV

Findings, Shortcomings and Recommendations

4.1 Findings: The main findings of the study are as under:-

Programme implementation (State Level)

1. All sanctioned 116 ICDS projects were working smoothly. All the post of PO's were filled in, while 7(6%) posts of CDPO's, 5 (1%) of supervisors, 155(1%) of anganwadi workers and 110(1%)of helpers were vacant.
2. There was an increasing trend in expenditure incurred both on ICDS and SNP. It was also observed that expenditure on I.C.D.S. was more than SNP which was 57% on ICDS and 43% on SNP.
3. It was observed that the trend of availing the SNP by expected Women/Nursing mothers during the years 1999-2000 to 2001-02 was decreasing against the allotted target.
4. The achievements under immunization (children) programme, was 100% or above where as in T.T. mothers its highest coverage was 84%.
5. In non formal pre-school education the achievement was 98% which was observed satisfactory.

Programme implementation (Sampled ICDS Project):

6. Total population covered by 16 sampled ICDS Projects was 22,39,047 out of which 1,36,236 (6%) was in urban areas and 21,02,811 (94%) in rural areas.
7. There were 2040 sanctioned anganwadis in 16 sampled ICDS projects out of as many as 2038(99.90%) anganwadis were functioning.
8. It was observed that 46% anganwadis were functioning either in rented or privately owned building.
9. Increasing trend of expenditure incurred was observed of ICDS where as on SNP it was on decreasing trend.
10. The percentage increase of child beneficiaries in the age group of 3 years-6 years was more as compared to the children in the age group of +6months-3 years during the three years 1999-2000 to 2001-02.
11. Overall the coverage of pregnant and nursing mother beneficiaries was 70%.
12. It was observed that under immunization including T.T. mothers the coverage was 72% to 89%.
13. It was also observed that all SNP items were not given to all districts during the years 1999-2000 to 2001-02. During last year 2001-02 of the study period only three items were supplied.
14. The visits done by CDPO of Anganwadis was found satisfactory.

15. It was observed that AWWs and their helpers were fully trained but the refresher courses were attended only in 6(75%) districts.

Sample Survey:

16. It was observed that 9302 households were surveyed. Out of these 2873 belongs to scheduled castes which is 31% of the total households. The population of these households was 56442 persons out of which 29625(52%) were male and 26817(48%) female. As many as 17112 persons (30%) belonged to Scheduled Castes having 9116(53%) male and 7996(47%) female.
17. It was observed that out of 48 sampled AWWs and Helpers, (23%) anganwadi workers and (31%) helpers belonged to scheduled castes.
18. It was observed that 45(94%) anganwadi workers belonged to the same village and 3 anganwadi workers and 2 anganwadi helpers belonged to other near by villages located at distance of less than 2 kms. away from anganwadi centres.
19. All anganwadi workers were fully trained while 33(69%) helpers were not trained.
20. It was found that 90% AWWs were well educated and (above matric).
21. It was observed that achievements under SNP was, 76% in 6months-3yrs. age group of enrolled children, 83% for 3yrs-6yrs. and 74% for pregnant and nursing mothers enrolled.
22. It was observed that during December, 2001, January, 2002 and February, 2002, a total of 16324 children were weighted and found that 6583 children were normal, 6105 in Ist grade, 3502 in 2nd grade and 127 in 3rd grade besides 7 in 4th grade which was 40%, 37%, 21%, 1% and 0.42% respectively.
23. It was found that only 4889 (32%) beneficiaries were medically checked-up either by ANM/LHV and Medical Officer during three months.
24. Out of the total families 9302, 7323 (79%) were visited by ICDS staff.
25. It was revealed that 4839(83%) children actually received Pre-School-Education benefit under this programme, out of which 2549(53%) male and 2290(47%) female respectively.
26. It was also observed that 126 (88%) pregnant women received folic-Acid tablets from anganwadis.
27. It was observed that out of 288, 178(89%) expecting women got anti-natal care from AWWs and satisfied with their advice.
28. It was found that out of 144 nursing mothers 97% were visited by AWWs after delivery.
29. It was also observed that out of 144 sampled beneficiaries women 139(97%) gave breast feeding to their babies.

30. It was found that 98% women taking care of their children and their children were found in good health.
31. It was observed that 88% women were also found adopting family planning norms.
32. SNP items were distributed on an average 25 days a month.
33. It is found that 62% children took SNP to their home defeating the very purpose of the scheme.
34. It was inferred that 96%, children's mother told that SNP items provided were of good quality.
35. 90% beneficiaries children came to anganwadis with other reasons like getting non formal education for learning tips on health care and other cleanliness habits.
36. Out of the total 93% beneficiaries under the scheme were found in favour of the prevailing system of SNP.
37. Only 18 (56%) Gram Panchayats extended help to AWWs in organising cultural functions in anganwadis to attract public participation for the success of this programme.
38. As many as 60% anganwadis were running in Panchayat/Govt. buildings whereas 40% in rented/private buildings.
39. The weight record of 283(98%) sampled children out of 288 children was maintained by register card system.

4.2 Shortcomings/Bottlenecks:-

The study has highlighted certain shortcomings/bottlenecks as per observation during the field survey in the smooth execution of the scheme which include (i) lack of trained helpers, (ii) lack of systematic and seasonal supply of SNP items, (iii) lack of storages arrangements, (iv) lack of drinking water, sanitary and electricity facilities, (v) lack of holding of meetings of co-ordination committees as per prescribed norms, (vi) lack of proper anganwadis buildings, (vii) lack of 100% coverage of health check up of the beneficiaries under the scheme, (viii) lack of staff in PHC/CHC of health deptt. i.e. ANM, LHV & MO, (ix) lack of involvement of local elected persons.

4.3 Recommendations :-

On the basis of various findings and observations the following recommendations have been proposed for qualitative improvement in the implementation of the scheme.

1. Women and Child Development department should construct anganwadi buildings to ensure 100% coverage of the functioning of the anganwadis.
2. Prescribed posts of health staff i.e. ANM, LHV, M.O. in all PHC/CHCs should be filled in by Health Department immediately to get the intended benefits of the scheme.
- 3 All the anganwadi helpers must be trained to get better results of scheme.

4. All helpers in anganwadis should be given refresher courses /training.
5. Honorarium should be increased both of AWWs and Helpers because entire functions of the scheme are being done by them.
6. AWWs and helper should make more efforts to achieve targets keeping in view the enrolment of children, expecting women and nursing mothers under various activities of scheme. In this regard special attention is needed in order to achieve 100% coverage.
7. Some more efforts are required in T.T. for mothers.
8. Inspections by POs and CDPOs should be increased so that working process of the scheme may be improved to get intended benefits.
9. The record of special component plan i.e. SC beneficiaries should be maintained properly.
10. Meeting of co-ordination committees should be held as per prescribed norms.
11. Facilities like, drinking water, electricity and sanitary should be provided in each and every anganwadi. This can be proved as remedy instrument for successful implementation of the scheme.

4.4 Conclusion:

However performance of ICDS was found satisfactory in SNP, Pre-School Education and immunization programmed which further have scope of improvement. Supervisory staff, P.O., CDPO and supervisors must increase their visits. Conditions of AWCs require more attention with participation of Local community, i.e. Panchayat, Public Health, PWD and Electricity Department.
