## **SECTION V**

### **VITAL STATISTICS**

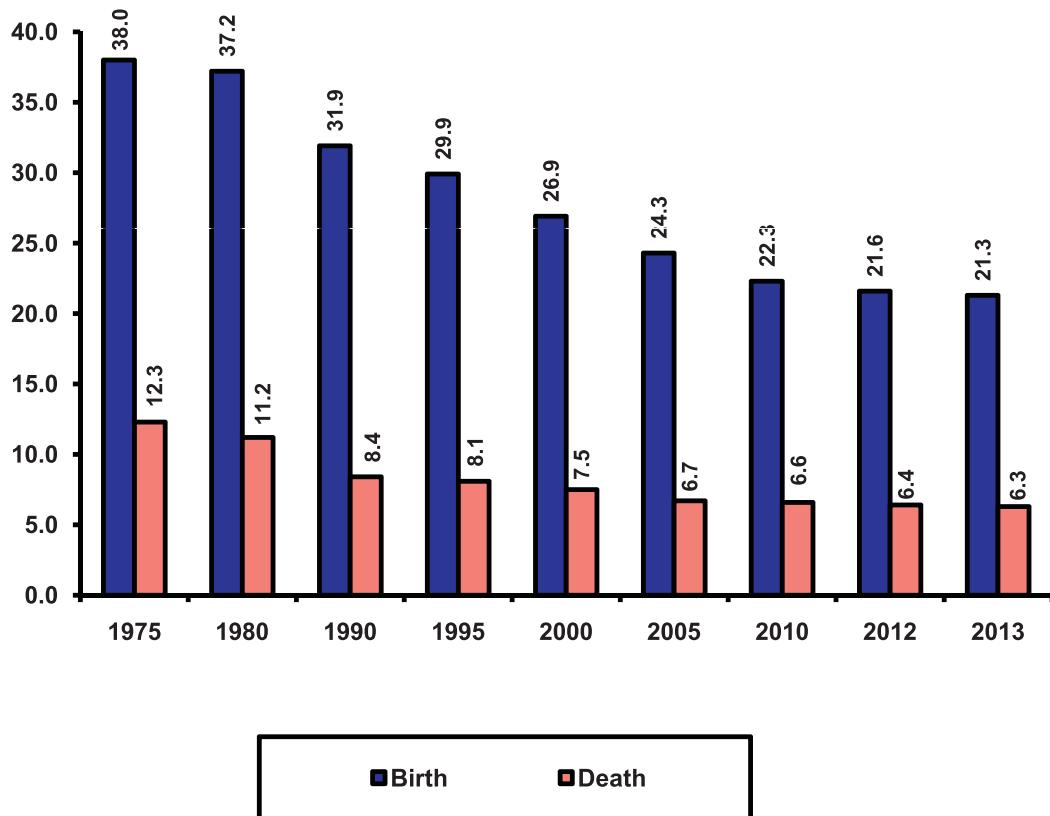

Vital Statistics—Registration of Births and Deaths is compulsory in Haryana State under Civil Registration Scheme and is governed by Registration of Births and Deaths Act, 1969 enacted by Government of India which was enforced in Haryana in 1970. In addition, information on birth and death rates is also collected under Sample Registration Scheme. The data collected under Sample Registration Scheme is more reliable because there is under-coverage in the Civil Registration Scheme.

The information in Table 5.1 is according to the Sample Registration Scheme whereas the data in Tables 5.2 to 5.7 on birth and death rates is according to the Civil Registration Scheme.

The Table 5.8 explains the estimated age specific death rate for Haryana and India.

## SECTION X

### STATE INCOME OF HARYANA

State Income refers to the aggregate of factor incomes originating within the boundary of the State. For estimating the State Income, the entire economic activity has been classified into thirteen sectors, viz., Agriculture and Animal Husbandry, Forestry, Fishing, Mining and Quarrying, Registered Manufacturing and Unregistered Manufacturing, Construction, Electricity, Gas and Water-Supply, Transport, Storage and Communication, Trade, Hotels and Restaurants, Banking and Insurance, Real Estate and Ownership of Dwellings, Public Administration and Other Services.

The total State Income of a year divided by the population of that year gives per capita income which is an index of the level of living of the people.

These estimates are revised and are based on data available at the moment and are subject to revision necessitated by the availability of additional information and change in methodology.

The figures of per capita income have been arrived at on the basis of population data supplied by Registrar General of India.

The first table (10.1) in this section shows the comparison of movement of Gross and Net State Domestic product at factor cost at current and constant (2004-05) prices.

Tables 10.2 and 10.3 show the industry-wise Gross State Domestic Product at current and constant (2004-05) prices respectively.

Tables 10.4 and 10.5 show the industry-wise Net State Domestic Product at current and constant (2004-05) prices, respectively.

Table 10.6 shows the indices (2004-05=100) of Net State Domestic Product at factor cost by major sources.

Table 10.7 depicts the percentage change in Gross State Domestic Product over the previous year.

Tables 10.8 and 10.9 show the per capita income of various states and the country at current and constant prices.

## SECTION XI

### GROSS FIXED CAPITAL FORMATION IN HARYANA

Gross fixed capital formation in Haryana consists of additions to the assets of producers of tangible reproducible goods which have an expected life time use of one year or more. The main object of these estimates is to assess the pace of development brought out as a result of investment both in public and private sectors. These estimates also provide insight as to the quantum of expenditure that has been made for the creation of capital assets during the year. For estimating the gross fixed capital formation, the entire economic activity has been classified into thirteen sectors, viz. Agriculture, Forestry, Fishing, Mining and Quarrying, Registered Manufacturing and Un-Registered Manufacturing, Construction, Electricity, Gas and Water Supply, Transport, Storage and Communication, Trade, Hotels and Restaurants, Banking and Insurance, Real Estate and Ownership of Dwellings (Residential part only) Public Administration and Other Services.

These estimates are based on data available at the moment and are subject to revision necessitated by the availability of additional information and change in methodology.

Table 11.1 and 11.2 show the Gross Fixed Capital Formation in Haryana by Industry of Use at current and constant (2004-2005) prices respectively.

Table 11.3 and 11.4 show the Gross Fixed Capital Formation in Haryana by Type of Institutions at current and constant (2004-2005) prices respectively.

Table 11.5 and 11.6 show the Gross Fixed Capital Formation in Haryana by Type of Assets at current and constant (2004-2005) prices respectively.

## SECTION XII

### AGRICULTURE

Agriculture statistics regarding classification of area and production of principal crops and yield per hectare of major crops for some years from 1966-67 to 2012-13 for the State as a whole and district-wise data only for the year 2012-13 have been presented in this section. It also contains information in respect of land revenue assessment, area under high yielding varieties, area under fruits and vegetables, consumption of fertilizers, agricultural machinery and implements including tractors and consolidation operations, etc. The information has been collected from Deputy Commissioners, Director of Land Records and Director of Agriculture, Haryana and the data relates to agricultural year (1st July to 30th June.)

**Area according to Village papers**—It is based on the returns of area prepared by village staff for revenue purposes in the districts.

**Area under forests**—This includes actually forested area on the lands classed or administered as forest under any legal enactment dealing with forests whether state owned or private. Besides, the forest area along roads, railways and canals have also been included. The area under forests given in this section will not tally with that of the Forest Department shown in section XV, owing to the fact that certain lands though not wooded are taken as forest by the Forest Department whereas these are not treated as such by the revenue authorities.

**Land not available for cultivation**—This includes absolutely barren and unculturable land like mountains, deserts, etc. which cannot be brought under plough except at exorbitant cost, land covered by buildings, roads and railways and water or otherwise appropriated for non-agricultural purposes.

**Other uncultivated land excluding fallow lands**—This denotes land available for cultivation, either not taken up for cultivation or abandoned later on for one reason or the other and includes culturable waste, permanent pastures and other grazing lands and lands under miscellaneous trees, crops and groves.

**Fallow land**—It denotes cultivable land which after abandonment remains uncultivated over a long period called 'old fallows' and those kept uncultivated during the current year are called 'current fallows'.

**Net area sown**—It is the net area sown under crops, the areas sown more than once during the year being counted only once.

**Total Cropped area**—It includes total area covered with crops during the year. In case, different crops are raised on the same land during the year, the same area is counted more than once.

## SECTION XV

### FORESTS

Area under forests is classified according to type of ownership. Forests owned by corporate bodies and private individuals have been included under private forests. Further the area under forests has also been classified according to its legal status, such as 'Reserved', 'Protected' and 'Unclassed'. Reserved forests are permanently dedicated either to the production of timber or other forest produce and the grazing and cultivation is not permitted. In protected forests these rights are allowed subject to certain restrictions. Unclassed forests include non-exploitable forests which owing to physical conditions or for other reasons have no prospect of being used as forests, area serving only protective purposes and area permanently destroyed as forests but yet not converted to other land uses.

The area under Forests shown in this section will not tally with the figures shown under the section 'Agriculture' supplied by the Director of Land Records due to different definitions followed by the Forest and Land Records Departments. The Forest Department reckons entire area including non-wooded area under its control as the forest area whereas the Land Records Department calculates on the basis of actual area under forests.

The data have been obtained from the Principal Chief Conservator of Forests, Haryana.

Table 15.1—gives area under Forests—According to type of ownership in Haryana.

Table 15.2—indicates percentage of area under forests and forest area per lakh of population.

Table 15.3—major forest produce out – turn from State – owned forests of Haryana.

Table 15.4—presents value of Minor Forest Produce in respect of State Forests only.

Table 15.5—presents forest area protected against fire and cattle grazing.

Table 15.6—relates to revenue and expenditure of Forest Department, Haryana.

## SECTION XX

### ELECTRICITY AND POWER

This section contains statistics relating to electricity in the State of Haryana. Haryana is the first State in the country to achieve 100 per cent electrification of all its 6841 villages and 154 towns (according to 2011 census). Uchani (Karnal) was the last village of Haryana which got electrified on 29th November, 1970. The data has been collected from the Central Electricity Authority, Government of India, U.H.B.V.N.L. and D.H.B.V.N.L.

Table 20.1 shows the L.T. and 11 K.V. lines in Haryana.

Table 20.2 shows Consumption of electric power for different uses in Haryana.

Table 20.3 shows the number of connections using electricity for various purposes in Haryana.

Table 20.4 shows the number of pending applications for electric connections by uses.

Table 20.5 shows the number of the Tubewells energised in Haryana.

Table 20.6 indicates units sold and the per capita consumption of Electricity.

Table 20.7 gives information on installed generation capacity and Power availability in Haryana.

Tables 20.8 and 20.9 show installed plant capacity, electricity generated, utilised and number of consumers in India (State-wise) and installed plant capacity and consumption per square kilometre and per thousand of population in India (State-wise).

Table 20.10 depicts annual per capita (State-wise) consumption of electricity in India.

Table 20.11 indicates the number of villages electrified in various states.

## SECTION XXI

### TRANSPORT STATISTICS

This section contains information relating to road transport, development of roads and the railways. The information of road transport has been collected from the State Transport Controller, Haryana, Police (C.I.D.), Haryana, Engineer-in-Chief, Public Works Department, Building and Roads, Haryana, Ministry of Surface Transport (Transport Research Division), Government of India and Northern Railway, New Delhi.

The Railway system in India is divided into various zones which are further sub-divided into Divisions. The Divisions are not co-terminus with the State territories. On the re-organisation of the Punjab State, about 1,220 kilometres of rail length came to the share of Haryana State as against the total rail length of 3,312 kilometres in the erstwhile Punjab State. The railway administration prepares the railway statistics divisionwise and not stationwise or sectionwise. They have, therefore, shown their inability to supply the sectionwise data on goods booked and number of passengers originating and earnings accruing therefrom, sectionwise. In this section, the data have, therefore, been presented for Delhi, Ambala and Ferozepur divisions as a whole. This data will not thus provide a clear idea about the working of railways in Haryana.

Table 21.1 shows the districtwise number of different types of vehicles registered in Haryana.

Table 21.2 shows the districtwise number of different types of vehicles on road in Haryana State for different years.

Table 21.3 shows districtwise road accidents in Haryana for different years.

Table 21.4 shows the districtwise number of Professional and Non-Professional driving licences in Haryana for different years.

Table 21.5 presents the depotwise data relating to Commercial Wing of Haryana Roadways.

Table 21.6 reflects comparative position in respect of number of various types of vehicles on road in the different States of India.

Table 21.7 shows the number of Motor vehicles per 100 sq. km. of area and per lakh of population in different States of India.

Table 21.8 gives metalled and unmetalled road length maintained by Public Works Department in Haryana.

Table Nos. 21.9 and 21.10 furnish districtwise information by types of road length maintained by Public Works Department and Local Bodies in Haryana.

Table 21.11 shows the length of surfaced roads in Haryana.

Table Nos. 21.12 and 21.13 give number and percentage of villages connected with metalled roads in Haryana.

Table Nos. 21.14 and 21.15 provide State-wise information in respect of total length of different Highways and surfaced roads in India respectively.

Table 21.16 shows road length per 100 square Kilometres of area and per lakh of population.

Table 21.17 includes Route Kilometres of the Railways. In calculating route Kilometres, double or triple lines are counted only once.

Table 21.18 gives number of wagons loaded with important commodities on broad gauge.
