GOVERNMENT OF HARYANA

INDEX

OF

INDUSTRIAL PRODUCTION

IN

HARYANA

1999-2000 to 2005-06

(BASE YEAR 1993-94)

Issued by

ECONOMIC AND STATISTICAL ADVISER,
PLANNING DEPARTMENT, GOVERNMENT OF HARYANA
2007

PREFACE

Index of Industrial Production is one of the Prime indicators of the economic development for the measurement of trend in the behaviour of the Industrial Production over a period of time with reference to a chosen base year. In fact, the Index of Industrial Production is the yardstick for measuring the industrial growth of the State. It indicates the relative change of physical production in the field of industries during a specified year as compared to previous year.

The first report on Index of Industrial Production at the State level, with base year 1970-71 was released in March 1977 which contained Index of Industrial Production from the year 1971-72 to 1974-75. Thereafter this department regularly published this report till 1988-89. The present report for the year 2005-06 is the fourth issue of the series with base year 1993-94. The Index of Industrial Production is confined to Manufacturing and Electricity Sectors only, with an analysis of Use-Based Classification of the Index Numbers.

This report provides an useful information for planning and formulating industrial programmes for the State and for the industrialists/entrepreneurs who are concerned with the production, planning and industrial development of the State.

I take this opportunity to thank to the Officers of Central Statistical Organization (IIP unit), Government of India for providing valuable guidance. The co-operation extended by National Sample Survey Organisation (Field Operation Division), Govt. of India and various industrial units of the State in timely providing the production data is also highly appreciated and acknowledged.

This report has been prepared by Sh. I.S.Mann, Research Officer with the help of Sh. Dharam Pal Madan and Sh. Lachhman Dass, Assistant Research Officers, Smt. Aruna Chopra, Field Assistant and Smt. Krishna Sharma, Steno typist under the guidance of Sh. Deep Chand, Deputy Economic and Statistical Adviser, Sh. Gajanand Aggarwal, Joint Economic and Statistical Adviser and over all supervision of Sh. O.P. Dhankar, Additional Economic and Statistical Adviser to Government, Haryana.

Dated, Chandigarh June 15, 2007 R.K. BISHNOI Economic and Statistical Adviser to Govt. Haryana

of

Index of Industrial Production

in

Haryana

INTRODUCTION

Industrial Sector occupies an important position in Indian Economy and has pivotal role to play in the rapid and balanced economic development. Index of Industrial Production is one of the tools for measuring the growth of the industrial sector at a particular point of time. The index shows the relative change over time in the volume of industrial production and is an effective tool to measure the trend of current industrial production.

At the National level, Central Statistical Organisation, (CSO) prepares all India Index of Industrial Production. The Economic and Statistical Organisation, Haryana is preparing Annual Index of Industrial Production (IIP) of Haryana since the year 1971-72. Industrial sector plays a vital role in the State economy. Due to liberal industrial policy and close proximity of the State to National Capital, the industrial sector is growing rapidly. There is need to continuously measure the growth of industrial sector with a view to assess industrial development in the State.

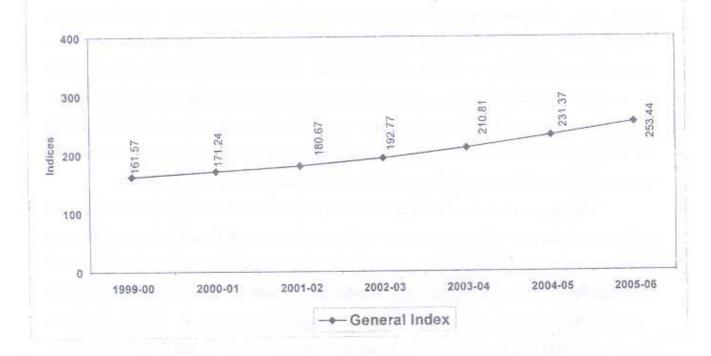

A number of State Directorates of Economic & Statistics are also engaged in compiling the State level Index of Industrial Production (IIP) but this effort on their part lacks comparability due to differences in the choice of base year, periodicity for releasing indices, data sources used etc. The need for comparable State level IIPs to facilitate comparative studies of the Statewise performance of industrial sector has been felt for quite some time. The Govt. of India has constituted a Technical Advisory Committee (TAC) in June, 1995 for an in-depth examination of various technical issues such as identification of representative items basket for individual State, development of corresponding weighting diagram with an appropriate linkage with the weighting diagram of all India's Index of Industrial Production etc. The TAC resolved technical issues relating to IIP and provided technical guidance in the matter of shifting the base year of current series to new series with 1993-94 as base.

The recommendations of Technical Advisory Committee on comparable Index of Industrial Production were examined by the Central Statistical Organisation (G.O.I.) and based on various recommendations, the guidelines on compilation of State level Index of Industrial Production were prepared and issued to all the State Directorates of Economic and Statistics. According to criteria laid down in the guidelines issued by Central Statistical Organisation (G.O.I.), the Economic and Statistical Organisation, Haryana had identified the items basket and prepared the weighting diagram for preparation of comparable State level Index of Industrial Production with 1993-94 as base year.

In the present report the State indices of Industrial Production for Manufacturing and Electricity Sectors have been prepared for the years 1999-2000 to 2005-06 with base year 1993-94. Mining and Quarrying Sector has been excluded due to its insignificant contribution in the State Domestic Product. The General Index of Industrial Production for the series with base year 1993-94 is as under:-

Year	General Index of Industrial Production (Base Year 1993-94 =100)
1999-00	161.57
2000-01	171.24
2001-02	180.67
2002-03	192.77
2003-04	210.81
2004-05	231.37
2005-06	253.44

General Index of Industrial Production in Haryana (Manufacturing + Electricity) (Base Year 1993-94)

METHODOLOGY

Scope and Coverage

The Annual Index of Industrial Production of Haryana is being prepared on the basis of ASI returns received from National Sample Survey Organisation (Field Operation Division), Govt. of India, Haryana Wing at Chandigarh. The Annual Index of Industrial Production with 1993-94 as base year covers two sectors namely Manufacturing and Electricity. The Manufacturing Sector covers the industries registered under section 2m (i) and 2m (ii) of the Factory Act 1948 and functioning within jurisdiction of Haryana. This section 2m (i) refers to the units employing 10 or more workers with power and section 2m (ii) refers to the units employing 20 or more workers without power on any day of the preceding twelve months.

The registered factories are divided into two groups for the purpose of survey i.e.

Census and Sample

Census Sector

The newly defined census sector consists of the following categories:-

- A. For industrially less developed States/UT's.
 - Category. -I: All Industrial Units (IU's) of less industrially developed 12 States/UT's
- B. For States/UT's other than those industrially less developed States/UT's
 - Category-II: Industrial Units / Industries having 200 or more workers excluding Category-I
 - Category-III: All Electricity Undertakings and PSU's not covered under Category-II
 - Category-IV: Additional Industries / IU's excluding Category II and III having significant Input /Output/GVA/NVA which would jointly contribute with Category-II and III not less than 90% of NVA within a State.

Categorization of States for ASI survey is same as per existing practice, namely, Category-I will mean the twelve States where there will be only census sector and Category-II will consist of remaining sixteen states having both census and sample sectors.

The list of less industrially developed 12 States/UT's and remaining States is as under: -

Classification of States for ASI Survey

CENSUS SECTOR STATES Category-I		BOTH CENSUS AND SAMPLE SECT			
Sr.No.	State	Code	Sr.No.	State	Code
1.	Goa	06	1	Andhra Pradesh	02
2.	Himachal Pradesh	09	2	Assam	04
3.	Jammu and kashmir	10	3	Bihar	05
4.	Manipur	15	4	Gujarat	07
5.	Meghalaya	16	5	Haryana	08
6.	Nagaland	18	6	Karnataka	11
7.	Tripura	24	7	Kerala	12
8.	A & N Island	27	8	Madhya Pradesh	13
9.	Chandigarh	28	9	Maharashtra	14
10.	Dadra & Nagar Haveli	29	10	Orissa	19
11.	Daman & Diu	30	11	Punjab	20
12.	Pondichery	33	12	Rajasthan	21
-			13	Tamil Nadu	23
			14	Uttar Pradesh	25
			15	West Bengal	26
			16	Delhi	31

The ASI survey for above categories I, II and III is conducted on complete enumeration basis.

Sample Sector

All industrial units in the entire ASI frame excluding the industrial units already covered under the census sector as defined above are included in sample sector. In the sample sector a part of industrial units are surveyed and the remaining units are covered by applying the variable multipliers at item level.

Non-Response Units

The production of non-response industrial units is calculated on the basis of growth rate of production of response industrial units. The number of workers of non-response industrial units contained in the ASI frame are multiplied with the per worker production of response industrial units to calculate the production of non-response industrial units.

Base Year

The base year of Index of Industrial Production is revised in accordance with the guidelines issued by the Central Statistical Organisation, New Delhi. The main aim of revision of the base year is to eliminate the items that are no longer in production process and to include relevant products which have been added over a period of time reflecting the changing pattern of the industries sector. The Haryana State has prepared the Index of Industrial Production from the year 1971-72 with 1970-71 as a base year, which was revised to 1985-86 for compiling the Index for the years 1992-93 to 1996-97. Presently, the Index of Industrial Production (IIP) is prepared with 1993-94 as base year.

Source of Data

The production data for Manufacturing Sector is based on the Annual Survey of Industries (ASI) returns obtained from National Sample Survey Organization (Field Operation Division), Govt. of India. The NSSO, FOD has discontinued sending a copy of ASI returns from the year 2004-05. Therefore, IIP for the year 2004-05 and 2005-06 has been prepared provisionally on the basis of production data collected from the selected industrial units. The information regarding generation of electricity is obtained from Central Electricity Authority of India through Central Statistical Organisation, New Delhi.

Selection of Items Basket

The Annual Index of Industrial Production with 1993-94 as base year covers two sectors namely, Manufacturing and Electricity. Mining and Quarrying Sector has been excluded due to its insignificant contribution in the State Domestic Product which was 0.26 percent to Gross State Domestic Product in 1993-94 at current prices. The generation of electricity in the State represents the Electricity Sector.

As per recommendations of Technical Advisory Committee on comparable State level Index of Industrial Production, the number of items for the State IIPs are to be selected in such a manner that about 80 percent of the value of output of the respective State's Manufacturing Sector is captured by the selected items. For this, all the items have been

arranged in the descending order of their respective gross value of output obtained from ASI detailed results for 1993-94 and 117 items have been selected for the items basket of Index of Industrial Production covering 81 percent of gross value of output of the State's registered manufacturing sector. Some ambiguous items such as other products, by-products, own construction and items whose flow of data is not regular in ASI are excluded from the items basket and items having identical nature and same unit of measurement have been clubbed together for this purpose.

While selecting items it would not be possible to apportion zero weight to constituent items. It was also not considered desirable to leave out these items, since in many cases their contribution to employment and output was substantially large. The TAC discussed the issue at length and was of the view that by ignoring the groups/sub-groups with negative/zero GVA, many items with large value of output will not find place in the items basket for State IIP's. After detailed deliberations, the Committee decided that instead of GVA, value of output might be taken for preparation of weighting diagram.

Lists of 117 selected items arranged in the descending order of their respective gross value of output have been shown in Table No. 1.1. Table No. 1.2 depicts the gross value of output of organized and unorganized manufacturing sector of the State at two-digit level for the year 1993-94.

Weighting Diagram

As per recommendations of TAC, the contribution of unorganized sector, based on follow up surveys of the Economic Census has been taken into account for allocation of weights at the sectoral level and two digit level. The proportion of gross value of output at current prices for these two sectors has been converted into sectoral weights in such a manner that their total is equal to 1000. The value of output figures of Electricity Sector has been taken from the National Accounts Statistics (NAS) and for the Manufacturing Sector has been taken from the ASI detailed results 1993-94 (after adjustment for non-response).

The pre-requisite for sound construction of any weight is the determination of relative importance of its various constituents. Therefore, the necessary weights in respect of different industries covered under the index have been determined in proportion to their value of output in the base year as revealed by ASI 1993-94 returns. While tabulating the data from the ASI returns, items of similar nature have been clubbed together in their respective industry group where it was difficult to collect production data on individual item.

The weights were assigned to 117 selected items (Table No.1.1) which contribute 81% of the total gross value of output of the State Manufacturing Sector. The weights at sector level and two digit level are allocated on the basis of gross value of output of Manufacturing Sector supplied by the C.S.O., which is further distributed at item level in proportion to gross value of output of registered manufacturing sector.

The contribution of unorganized manufacturing sector has also been taken into consideration while calculating the weights at major group (2 digit) level. The value of output of organized manufacturing sector was clubbed with the value of output of the unorganized sector based on the survey of Directory Manufacturing Enterprises (DME), Non-Directory Manufacturing Enterprises (NDME) and Own Account Manufacturing Enterprises (OAME) undertaken by Central Statistical Organisation, New Delhi.

Table No. 1.3 shows the distribution of weights at sector level. Distribution of weights among selected groups at two-digit level for the year 1993-94 of manufacturing sector (Organized and Unorganized) has been shown in Table No. 1.4. Item level distribution of weights for manufacturing sector is available at Table No. 1.5.

Computation of Index Number

The Index is computed by using the Laspeyre's Formula: -

 $I = \sum_{i \in V} RiWi$ $\sum_{i \in V} Wi$

Where I = Index Number

Ri = Production relative of ith selected item

Wi = Weight assigned to ith item

Σ = Summation of all items within each group upto major group (2 digit) level.

The production relative of an item is defined as percentage growth of the production compared to the base year production.

 $Ri = \underbrace{Pei}_{Poi} X 100$

Where Ri = Production relative of ith selected item.

Pci = Current year production of ith item

Poi = Base year production of ith item.

The production relatives are thus calculated at product (4 digit) level of NIC code and the ultimate indices are calculated up to major group (2 digit) level. Sectoral Indices and General Index are based on weighted Laspeyre's Index Number.

Review

of

Index of Industrial Production

in

Haryana

Review of Index of Industrial Production in Haryana 2005-06

The industry sector recorded an annual growth of 9.54 percent in 2005-06 over the previous year as the Index of Industrial Production has increased from 231.37 in 2004-05 to 253.44 in 2005-06. The sector wise and group wise details of IIP are given below: -

Manufacturing Sector

The Index of Manufacturing Sector has increased from 229.65 in 2004-05 to 251.16 in 2005-06 registering an annual growth of 9.37 percent over the previous year. Manufacture of beverages, tobacco and related products recorded the highest growth of 20.86 percent followed by other manufacturing industries recorded growth of 18.98 percent. Manufacturing of textile products (including wearing apparel) recorded growth of 18.59 percent, manufacturing of machinery and equipment other than transport equipment, scientific equipment, photographic/ cinematographic equipment 14.55 percent and manufacturing of leather and products of leather, fur and substitutes of leather 13.56 percent. Manufacture of rubber, plastic, petroleum and coal products, processing of nuclear fuels and wool, silk and man made fibre textile maintained low rate of growth of 2.36 percent and 2.13 percent respectively.

Electricity Sector

The Index of Electricity Sector has increased from 333.13 in 2004-05 to 388.55 in 2005-06 registering an annual growth of 16.64 percent over the previous year.

Index of Industrial Production at Major Group (2-digit level) of Manufacturing Sector

1. Manufacture of Food Products (20-21)

The food manufacturing industries carry the second largest weight of 162.15 in the Manufacturing Sector. The index of this group has increased to 177.04 in 2005-06 from 166.92 in 2004-05 indicating a growth of 6.07 percent.

Starch all kind exhibited the highest growth of 39.41 percent followed by vanaspati ghee 28.93 percent, cake all kind 21.03 percent and poultry and cattle feed 16.00 percent. The Index of biscuits, sugar, desi ghee and milk powder all kind indicated decline as compared to the previous year.

2. Manufacture of Beverages, Tobacco and Related Products (22)

Beverages, tobacco and related products industries group carry a weight of 10.30 in the Manufacturing Sector. The index of this group has increased from 152.49 in 2004-05 to 184.31 in 2005-06 and recorded a growth of 20.86 percent. The highest growth of 24.92 percent was recorded by beer. During this year lowest growth of 19.59 percent was recorded by spirit all kind.

3. Manufacture of Cotton Textiles (23)

The cotton textile industries carry a weight of 34.50 in the Manufacturing Sector. The index of this group increased from 147.38 in 2004-05 to 158.18 in 2005-06 recording an increase of 7.33 percent. The index of cotton yarn and cotton seed recorded increase of 15.49 percent and 5.07 percent respectively as compared to the previous year. Cotton pressed and cotton ginned recorded negative growth of 7.03 and 16.30 percent respectively during the year 2005-06.

4. Manufacture of Wool, Silk and Man-made Fibre Textiles (24)

The manufacture of wool, silk and man-made fibre textiles industry carries the weight of 38.24. The index of this group has increased from 180.25 in 2004-05 to 184.08 in 2005-06 recording a growth of 2.13 percent. The index of shoddy/woollen yarn and carpet yarn recorded growth of 3.54 percent and 1.84 percent respectively whereas index of synthetic/polyester yarn recorded lowest growth of 1.67 percent.

5. Manufacture of Textile Products including Wearing Apparel (26)

Textile industry has captured the weight of 45.87 in the Manufacturing Sector. The index of this group has increased from 337.54 in 2004-05 to 400.29 in 2005-06 indicating a growth of 18.59 percent over previous year. Manufacturing of readymade garments and woollen carpets recorded growth of 20.88 and 0.82 percent respectively during 2005-06 over the previous year.

6. Manufacture of Paper and Paper Products and Printing, Publishing and Allied Industries (28)

The paper industry has been assigned the weight of 29.51 in the Manufacturing Sector. The index of this group has increased to 187.38 in 2005-06 from 172.48 in 2004-05 recording growth of 8.64 percent. Manufacture of corrugated boxes and card board recorded the highest growth of 24.27 percent during 2005-06 as compared to previous year. Lowest growth of 5.99 percent was recorded by paper all kind over the previous year.

7. Manufacture of Leather and Products of Leather, Fur and Substitutes of Leather (29)

The leather industry has been allotted a weight of 8.09. The index of this group rose from 198.81 in 2004-05 to 225.77 in 2005-06 registering a growth of 13.56 percent over the previous year. The leather shoes and chappals is the single product selected in this group.

8. Manufacture of Basic Chemicals and Chemical Products except Products of Petroleum and Coal (30)

The chemical and chemical products industry group carries a weight of 60.65. The index of this group increased from 173.22 in 2004-05 to 187.52 in 2005-06 which indicates a growth of 8.25 percent. The fertilizers, insecticides, pesticides, gases, medicines and soaps are the main items in this industry group. The dyes and colours industry having the weight of 0.66 in the manufacturing sector recorded highest annual growth of 52.31 percent followed by capsules 46.34 percent, while the formaldehyde and fertilizers recorded negative growth during this year.

9. Manufacture of Rubber, Plastic, Petroleum and Coal Products processing of nuclear fuels (31)

The rubber, plastic, petroleum and coal products industry carries the weight of 54.21 in the Manufacturing Sector. The index of this group has increased from 173.09 in 2004-05 to 177.17 in 2005-06 recording a growth of 2.36 percent. The manufacture of plastic sheets recorded highest growth of 9.88 percent followed by rubber shoes and chappals 6.89 percent. Tyres for motor vehicles recorded negative growth of 6.90 percent.

10. Manufacture of Non-Metallic Mineral Products (32)

This industry group covers mainly the production of construction material like bricks, cement and allied products and carries a weight of 32.93. The index of this group increased from 146.34 in 2004-05 to 162.00 in 2005-06 recording a growth of 10.70 percent. Building bricks recorded the highest growth of 41.58 percent followed by ceramic tiles 11.99 percent and sanitary wares 9.86 percent during 2005-06 as compared to previous year.

11. Manufacture of Basic Metal and Alloys Industry (33)

Basic metal and alloys industry group carries a weight of 89.31 in the Manufacturing Sector. The index of this group has increased to 172.82 in 2005-06 as compared to 159.63 in 2004-05 recording a growth of 8.26 percent. S.S. ingot recorded the highest growth of 21.16 percent within this group followed by ordinary casting 19.73 percent. Brass sheets and strips recorded lowest growth of 2.28 percent over the previous year.

12. Manufacture of Metal Products and Parts except Machinery and equipment (34)

This industry group carries a weight of 34.07 in the Manufacturing Sector. The index of this group has increased from 152.79 in 2004-05 to 163.52 in 2005-06 recording a growth of 7.03 percent. The production of aluminum utensils recorded the highest growth of 38.03 percent in this industry group followed by forging and stamping 16.05 percent. The index of gas cylinders, tin containers and hand tools declined as compared to previous year.

13. Manufacture of Machinery and Equipment other than Transport Equipment etc. (35-36)

Machinery and equipment industry other than transport equipment carries the weight of 146.83 in the Manufacturing Sector. The index of this industry group has increased from 148.19 in 2004-05 to 169.75 in 2005-06 recording a growth of 14.55 percent. The index of electric capacitor recorded highest growth of 59.88 percent followed by transformers 52.73 percent. The index of cranes recorded negative growth rate of 13.19 percent over the previous year.

14. Manufacture of Transport Equipment and Parts (37)

The transport equipment and parts industry carries the highest weight of 225.39 in the Manufacturing Sector. The index of this group has increased to 452.66 in 2005-06 as compared to 416.33 in 2004-05 recording growth of 8.73 percent. The production of helmets recorded the highest growth of 60.79 percent followed by bicycle parts 28.78 percent and auto parts and accessories 25.51 percent while the lowest growth rate of 2.68 percent was recorded by motor cars as compared to previous year.

15. Other Manufacturing Industries (38)

This group covers medical and scientific instruments and sports goods. This group carries a weight of 11.30. Index of this group has increased from 289.19 in 2004-05 to 344.07 in 2005-06 recording a growth of 18.98 percent as compared to previous year.

Table No. 2.2 shows the Annual Index of Industrial Production at group level for the years 1999-00 to 2005-06 whereas the Item level Index for the same years has been given in Table No. 2.3.

Part-III

Use - Based Classification

of

Index of Industrial Production

in

Haryana

Index of Industrial Production in Haryana Use-Based Classification

The Use-Based Classification represents the changing pattern of customer's needs, based on the tastes and habits towards the purchase of industrial products. The industrial products have been clubbed into four major groups comprising of Basic Goods Industries, Capital Goods Industries. Intermediate Goods Industries and Consumer Goods Industries with a view to analyse the movement of growth rate of different groups of industries and their achievements within the frame of organized sector.

The Use-Based Classification represents the classification of the industrial products according to the product applications. Each industry group reflects the variations in the production of a particular class of industries based on product usage. The industries are classified into four groups viz., Basic Goods, Capital Goods, Intermediate Goods and Consumer Goods with sub-groups such as Consumer Durable and Consumer Non-Durable Goods. Concepts and definitions for Use-Based Classification are given below.

(i) Basic Goods

Any bulk raw material product used for further production of new items in manufacturing and agriculture.

(ii) Capital Goods

Plants, machinery and goods used for further investments.

(iii) Intermediate Goods

Any goods product produced as incomplete product or which goes as input in production for further finishing.

(iv) Consumer Goods

a) Consumer Durable Goods

Products directly used by consumers and having a larger durability (say more than 2-3 years).

b) Consumer Non-Durable Goods

Products that are directly used by consumers and that cannot be preserved for long periods.

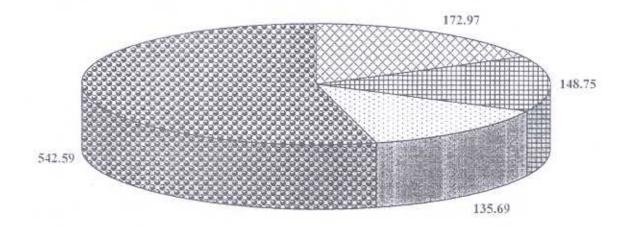

The share of each use-based industry group to the industry sector of the State and the number of industrial groups and items covered representing the use-based groups are as under: -

Share of each Use-Based Industry Group to the Industry Sector and Number of Industrial Groups and Items Covered

^{*} Provisional

During the year 2005-06, Capital Goods Industries has recorded the highest growth of 14.32 percent followed by Consumer Goods Industries 9.93 percent, Basic Goods Industries 8.26 percent and Intermediate Goods Industries 3.74 percent.

A. Basic Goods Industries

Basic Goods Industries recorded growth of 8.26 percent during the year 2005-06 as compared to the previous year. The index of this industry group has risen from 168.10 in 2004-05 to 181.98 in 2005-06. Cement, fertilizer, pesticides & insecticides, M.S. pipes and tubes and generation of electricity are the major products in this group. These items have significantly effected the index of this group. Pesticides and insecticides (Liquid), S.S. ingot,

ordinary casting, electricity and forging & stamping recorded a notable increase during the year 2005-06. Index of fertilizer, formaldehyde and narrow cold rolled steel strips recorded negative growth over the previous year.

B. Capital Goods Industries

The Index of Capital Goods Industries has increased from 155.83 in 2004-05 to 178.14 in 2005-06 showing an increase of 14.32 percent. Tractors, motor vehicle parts and accessories, machine screw all types, loaders, switch gear & control gear and PVC insulated wire & cables are major products of this group. Electric capacitors recorded the highest growth of 59.88 percent followed by Transformers and ACSR conductors which recorded growth of 52.73 percent and 41.43 percent respectively. Manufacturing of cranes and hand tools recorded negative growth rate of 13.19 percent and 0.36 percent respectively.

C. Intermediate Goods Industries

The Index of Intermediate Goods Industries has increased from 170.37 in 2004-05 to 176.75 in 2005-06 recording an increase of 3.74 percent. This increase in the index is due to increase in the production of dyes and colours, building bricks, cotton yarn, plastic sheets and ceramic tiles. The manufacturing of dyes and colours recorded the highest growth of 52.31 percent followed by building bricks 41.58 percent, cotton yarn 15.49 percent and ceramic tiles 11.99 percent during the year 2005-06 over the previous year.

D. Consumer Goods Industries

Consumer Goods Industries recorded the annual growth of 9.93 percent during the year 2005-06 as the index of this group has increased from 287.51 in 2004-05 to 316.05 in 2005-06.

(a) Consumer Durable Goods Industries

The Index of Consumer Durable Goods Industries has increased from 387.12 in 2004-05 to 422.26 in 2005-06 recording annual growth of 9.08 percent. Cars, motor cycles, domestic refrigerators, electric fans, bicycles and auto parts are the main products of this group. Manufacturing of helmets recorded the highest growth of 60.79 percent followed by sport goods 39.76 percent, aluminium utensils 38.03 percent, electric fans all type 36.12 percent and switches all type 34.64 percent during the year 2005-06 as compared to previous year. The manufacturing of microscopes recorded negative growth of 1.38 percent.

(b) Consumer Non -Durable Goods Industries

The Index of Consumer Non-Durable Goods Industries has increased from 200.15 in 2004-05 to 222.91 in 2005-06 and recorded a significant growth of 11.37 percent as

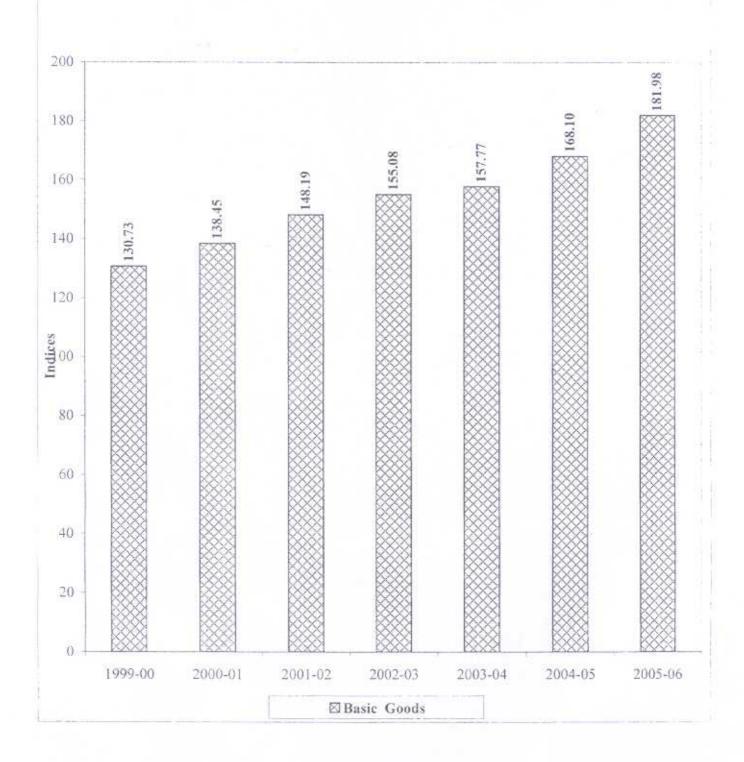

compared to previous year. Rice, desi ghee, vanaspati ghee, atta, sugar, edible oils, crockery, kitchan ware, readymade garments, leather shoes & chappals and paper all kind are the major products of this group. The production of capsules has recorded the highest growth of 46.34 percent followed by starch all kind 39.41 percent, sampoo 37.00 percent, syrup 35.71 percent, and vanaspati ghee 28.93 percent during 2005-06 as compared to previous year.

Index of Industrial Production according to Use-Based Classification for the years 1999-00 to 2005-06 for Basic Goods Industries, Capital Goods Industries, Intermediate Goods Industries and Consumer Goods Industries (Durable and Non-durable Goods separately) has been represented in table No. 3.1.

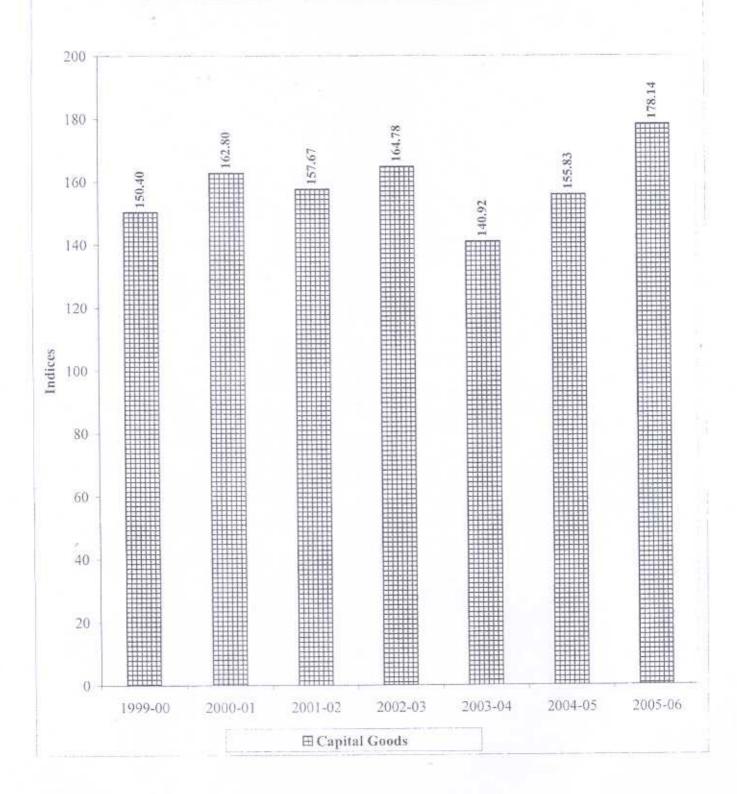

Limitations

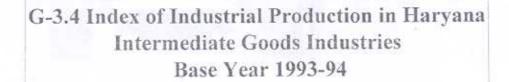

- (i) The Index of Industrial Production in Haryana State prepared by Economic and Statistical Organisation covers both the large and small manufacturing (registered under Indian Factories Act 1948) units located in the rural and urban area of the State. It represents only the Manufacturing and Electricity Sector because mining and quarrying sector is not included.
- (ii) The Unorganized part of Manufacturing Sector including small-scale industries (which are not covered in the ASI survey) are not covered due to non-availability of data.
 - (iii) Non-Responsive units have not been covered due to reporting difficulties.
- (iv) The Index is based on the physical volume of production and not on value of production.
