CHAPTER-I

INTRODUCTION

The Financial Statement and the Demands for Grant in a Government Budget are drawn up in accordance with the provision of the Constitution and the needs of Legislative control. The expenditure in the Government Budget is generally classified department-wise in order to secure legislative control, administrative accountability, booking and auditing of any act of spending. Though the Budget is divided into revenue and capital accounts, many items of consumption expenditure are included in the capital account and vice-versa. Moreover, the magnitudes shown in the Budget are too detailed and scattered and not necessarily based on distinctions and groupings required for understanding the economic significance of various items of revenue and expenditure. For instance, from the study of Budget documents as they are, it is not possible to get a clear idea of capital formation out of budgetary resources, savings of the government, and contribution of the government towards net product from public administration for the estimation of State Income etc. The government's transactions are significant only in terms of such items and so, they have to be sorted out, reclassified and re-grouped into meaningful economic categories.

The economic classification groups together the primary items of consumption expenditure, commodities and services, maintenance, current and capital transfers, capital formation out of budgetary resources whereas the purpose classification groups these according to the particular purpose or functions it performs such as general public services, education affairs and services, health affairs and services, social security and welfare affairs and services, housing and community amenity affairs and services, cultural, recreational and religious affairs and services, economic affairs and services etc., These two types of classifications are integrated into "Economic-cum-Purpose Classification" which presents in a consolidated statement, the economic-cum-purpose characteristics of the government budgetary transactions.

CHAPTER-II

PRINCIPLES OF ECONOMIC CLASSIFICATION

The Central Statistical Office has been preparing economic classification of the government budget documents and publishing related accounts in the annual publication "National Accounts Statistics" (NAS) every year. Similar economic classification of the budgetary transactions is also being prepared by the Department of Economic & Statistical Analysis, Haryana.

The Government Sector (excluding public sector corporations) can be broadly divided into Administrative Departments and Departmental Commercial Undertakings (DCUs). For budget analysis, we are concerned with both of them. Administrative departments comprise government departments/organizations whose function is to produce and provide for the community public goods and services which otherwise can not be provided conveniently or economically by the market. It is expected to act as an administrative agency for the social and economic policy of the State. Departmental Enterprises, also known as Departmental Commercial Undertakings (DCU), are un-incorporated enterprises owned, controlled and run directly by the public authorities. The criterion to distinguish enterprises from administrative activity is the use of commercial accounting methods to determine profit and loss and control of productive capital in the form of equipment like plant, machinery and stock. For administrative departments, both economic and purpose classification is done, whereas for DCUs only economic classification is done in the budget documents. However, the grant, subsidies, financial assets, loans etc. shown under commercial head (DCU), are classified under the relevant purpose categories.

It is only after reclassification and re-grouping on the lines indicated above that it has been possible to analyse the economic impact of the State Government's budgetary transactions on the rest of the economy. The term "rest of the economy" refers to all the entities other than State Government and includes the Central Government, other State Governments, local bodies, statutory public undertakings, private commercial and non-commercial corporations or companies and individuals.

This system of classification is adopted for analysing the economic impact on the rest of the economy. According to this classification current transactions are distinguished from capital transactions and in both the cases, transactions in goods and services are separated from transfer. The current transactions of the departmental commercial undertakings are at par with those of producers, and that of the purely administrative departments with those of consumers. Current receipts of the former constitute sale proceeds of goods and services supplied to the rest of the economy while purely administrative departments have little or no income of their own and largely rely upon the incomes of other sectors to meet their expenditure. Current expenditure of commercial undertakings like working expenses of productive enterprises are intermediate expenses that go to form prices of goods and services supplied. These are different in character from the current expenditure on wages and salaries and goods purchased by the administrative departments which are in the nature of consumer outlays and represent demand for goods and services for final consumption.

In Economic Classification each transactions of the revenue and expenditure scattered over the budget has been sorted out and reclassified according to the appropriate economic categories in to a set of three accounts viz.,

CHAPTER-IV

PRINCIPLES AND DETAILED FUNCTIONAL/PURPOSE CLASSIFICATION

The objective of the purpose classification is to reclassify expenditure in accordance with the immediate or short term social needs of the state and it relates only to general government excluding departmental commercial undertakings. The departmental commercial undertakings (DCUs) may briefly be defined as agencies engaged in the production and distribution of goods and services that are meant for marketing. As a result these DCUs are expected to function like any commercial organization and meet most of their costs from their sale proceeds. However, it does not include independent statutory corporations and boards set up by the state government and hence are excluded from the purview of commercial undertakings.

Entire government expenditure is recorded annually in the budget documents issued by the Central and State Governments. As mentioned earlier, the arrangement with regard to the presentation of the expenditure in the budgets is generally in accordance with the requirements of the legislative control, administrative accountability and auditing.

The budgets are presented under a few standard account heads of the functional character such as education, health, agriculture, industries, defence, etc. The expenditure shown under these account heads are not strictly in accordance with the principle of purpose classification. For instance, expenditure on medical colleges and other education institutions are generally shown under account head Medical; expenditure on water supply is shown under Public Health and so on. Further, there are various account heads which pertain to many purpose categories such as Public Works Department, Community Development, National Extension Services, Co-operation etc. The expenditure under these heads are not confined to a single purpose category. It becomes, therefore, essential to classify these heads of expenditure afresh.

The purpose classification presented in this document is broadly in conformity with the United Nations' recommendations.

The entire expenditure of the state government has been broadly divided into ten major categories. The major categories are (i) General Public Services (ii) Civil Defence (iii) Education Affairs and Services (iv) Health Affairs and Services (v) Welfare Affairs and Services (vi) Housing and Community Amenity Affairs and Services (vii) Cultural, Recreational and Religious Affairs and Services (viii) Economic Affairs and Services (ix) Environmental Protection, (x) Relief on Calamities.

The following table presents the detailed functional/purpose classification of the State government budgetary expenditure for the years 2010-11, 2011-12 (R.E.) and 2012-13 (B.E.).

CHAPTER-V

ECONOMIC-CUM- PURPOSE CLASSIFICATION

The Economic-cum- Purpose Classifications have been combined into a single two-way cross-classification by significant economic purpose categories. This classification shows how expenditure for particular purpose is divided between economic categories such as current expenditure on goods and services, capital formation and various types of transfers and loans. It also shows how expenditure in a particular economic category is divided according to different purposes or types of services provided by the Government. Economic-cum- Purpose Classification of transactions provides macro-economic data and is useful mostly at the policy formulation level and enable the decision makers to review in broad terms, the pattern of resource allocation and its impact on rest of the economy. Such a cross classification of the Government's budgetary expenditure is of great value in drawing up a programme of projected expenditure covering a period of years and in evaluating the progress of actual expenditure.

Present Economic-cum- Purpose Classification of Haryana Government budgetary transactions relates to the years 2010-11 (Actuals), 2011-12 (Revised Estimates) and 2012-13 (Budget Estimates). The table classifies horizontally the expenditure on each service for the year under review into significant economic categories and vertically into different functional categories.

APPENDIX

1- Notes on the Accounts and their Derivations

Account -1: Income and Outlay Account of Administrative Departments

This account deals with the current revenue and expenditure of government administrative departments. All departments, other than those which are commercial in nature, are considered as administrative for the purpose of economic classification. These include organs of the State, collection of taxes, other fiscal services, interest payments and servicing of debts, administrative services like police, jails, supply and disposal, pensions, social security and welfare and relief on account of natural calamities etc. and economic services like agriculture, animal husbandry, industries and community development. The management of expenditure of various funds like those of famine relief funds etc are also included. The current expenditure of administrative departments consists of the final outlays of government on current account which represent government's current consumption. Besides, final outlays government makes transfer payments, such as interest, grants, subsidies etc., to the rest of the economy which are added indirectly to the disposable income of the community. To meet these current expenditures, government appropriates a part of the income of the community through a variety of taxes, miscellaneous fees, etc., accruing in the course of administration. In addition, government has an investment income from property and entrepreneurship and also receives revenue grants, contributions and recoveries from the Union Government and the rest of the economy. The excess of current receipt over current expenditure denotes the 'Saving' of the Government administration available for domestic capital formation. Some of the items included in this account are explained below:

Compensation of Employees.

This item comprises the remuneration of general government employees such as salaries-pay of officers, and establishment, wages, allowances and honorarium other than traveling and daily allowances, contributions to Provident Fund by the government as well as all pension payments to government employees are included. Conceptually, appropriation to the pension fund should actually be treated as wages and salaries and not actual pension payments. But in the absence of any information on appropriation during the year, the actual pension payments are treated as wages and salaries.

Commodities and Services.

This includes all contingent expenditure on contingency such as office supplies, rent, rates and taxes, fuel and light, printing, travel expenses, telephone and telegraph charges and other items of current operations less sales by general government of goods and services to enterprises and households. Other benefits (Leave Travel Concession) in cash. The items like compassionate allowance, family pension, leave encashment, gratuities, commuted value of pension and other retirement benefits currently given under the account head 2071 are also covered under this category. Payments in kind e.g. cost of liveries and uniforms: ration supplied to police personnel etc. are to be treated as benefits in kind.

Interest Paid

Interest payments comprise interest on public debt and other obligations other than on commercial debt. The interest paid to or received from other public authorities is shown separately.

Subsidies

These are grants on current account, which entrepreneur ₹ receive from the Government. These may take the form of direct payments to producers or differentials between the buying and selling prices of Government trading organisations. Rebate on the sale of handloom cloth, loss on the sale of fertilizers, improved seeds, pesticides and agricultural implements, loss suffered by the Co-operative

Societies etc. are also treated as subsidies. The losses by e.g. irrigation, transport, forest etc. are to be treated as imputed subsidies.

Current Transfers

Firstly, these can be to other Governments like Central government, State governments and Local Authorities, secondly to the rest of the world (Foreign) and thirdly to other sectors including households (grants to aided schools, scholarships and stipends. Welfare of the Weaker sections of the society), Private institutions and autonomous bodies.

However, it does not include independent statutory corporations and boards set up by the state government and hence these are excluded from the purview of departmental commercial undertakings

The departmental enterprises or Government trading enterprises may briefly be defined as Government agencies producing commodities and services, that are not provided free of charge. The operation of these enterprises, are in the nature of entrepreneurial activities of Government. Current expenditure of these enterprises, like working expenses of productive enterprises, constitute intermediate expenditure that enter into prices of commodities and services, as these are sold to the other sectors of the economy. Hence, expenditure of these

enterprises is different in character from final outlays by administrative departments which have no income of their own and draw upon incomes of other sectors to meet their expenditure .Other main characteristics are :-

- i) Departmental Enterprises are subject to market forces i.e., demand and supply.
- ii) The activities of such enterprises are subordinate to legislative control and are owned, run and managed by the Government.
- iii) The intention to make profit is not the essential characteristic and the activities of such enterprises may be carried on deliberately at a loss.
- iv) The operation of departmental enterprises usually involves the use of expensive capital equipment and the holding of stocks which may be subject to large fluctuations and the provision for depreciation may, therefore, be a significant element in the total cost of operations.
- v) Commercial accounting methods have to be used to determine the profit or loss.
- vi) To maintain their operations, departmental enterprises must both give and receive commercial credit.

The following departments have been classified as departmental commercial undertakings:-

Irrigation, Education (Only Sale of Text Books), Road Transport. Forests Civil Aviation , Printing and Stationery
