

GOVERNMENT OF HARYANA

**HOUSEHOLD CONSUMER EXPENDITURE
IN HARYANA**

**NSS 62nd ROUND (JULY 2005-JUNE 2006)
STATE SAMPLE
2011**

ISSUED BY :

**DEPARTMENT OF ECONOMIC &
STATISTICAL ANALYSIS, HARYANA**

FOREWORD

The present report is based on the State Sample data on household consumer expenditure collected through annual survey of National Sample Survey 62nd round (July, 2005 to June,2006). The estimates of prevalent key indicators in Haryana i.e. Demographic features, Aspects of living conditions and Household consumer expenditure have been presented in this report. The estimates generated in this report are acknowledged and accepted widely as indicators for working out the standard of living.

I hope this report would be useful in providing information to the planners, policy makers, researchers and academicians. This report is placed on the Department Website also which can be accessed at WWW.esaharyana.gov.in.

I appreciate the efforts made by Director, Department of Economic and Statistical Analysis, Haryana and his staff for bringing out this survey report.

Chandigarh
Dated the 8th March, 2011

Ajit M. Sharan
Financial Commissioner and Principal Secretary
to Government Haryana, Planning Department

PREFACE

The present report on 'household consumer expenditure in Haryana' is brought out by Tabulation Section on the basis of sample survey conducted under the NSS 62nd round during the period July, 2005 to June, 2006.

Chapter-1 of the report serves as the introduction. Chapter-2 contains concepts and definitions of important terms used in the survey, which are relevant to this report. Chapter-3 analysis the household consumer expenditure. Chapter-4 presents an Executive summary of the findings of the report. Detailed tables are given at Appendix-A.

This report has been prepared by Shri R.S.Bhatia, Research Officer under the supervision of Shri Manoj Kumar Goel, Deputy Director and overall guidance of Shri. Bir Singh, Consultant. I feel obliged to the National Sample Survey Office, Ministry of Statistics and Programme Implementation, Government of India for providing detailed guidelines and assistance in table generation work on the basis of which this report has been prepared.

The acknowledgement is also made of the sincere efforts done by officers/officials of NSS and Tabulation Section for timely completion of scrutiny, data entry and data validation work of this survey. The credit also goes to Junior Field Investigators and Inspectors (NSS) for collecting information timely from the field against all odds.

Last but not least, credit also goes to all respondents of households, who provided the desired information to the field staff patiently during the survey.

Chandigarh
Dated the 8th March, 2011

R.K.Bishnoi
Director, Deptt. of Economic & Statistical Analysis
Haryana.

CHAPTER – 1

INTRODUCTION

The National Sample Survey (NSS) was set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods. The National Sample Survey Organisation, under Ministry of Statistics and Programme Implementation, Government of India, conducts countrywide socio-economic survey. Survey of household consumer expenditure provides first and the foremost indicator of human living standard namely monthly per capita consumption expenditure (MPCE). It also brings to light interstate rural-urban variation in constituent of Indian diet. This survey has multiple features to satisfy the thirst of various data user agencies despite the complexities involved in the collection of data. That is reason why this survey has come to stay as a regular component of NSS rounds.

1.2 This survey is now conducted in two different ways namely every five years with a much larger sample and annually with a relatively thin sample size. Household Consumer Expenditure survey conducted during NSS 62nd round (July,2005-June,2006) was an annual survey by integrating it with the multiple subject of enquiry viz. Employment & Unemployment and Manufacturing Enterprises. The annual series started from NSS 42nd round (1986-87). The current NSS 62nd round is seventeenth in this series.

1.3 Objective Scope and Coverage: The main objective of the survey was to ascertain the level and pattern of household consumer expenditure and also provide necessary data to the researchers for conducting further studies on poverty line, nutritional status, sufficiency of food, unemployment etc. The household consumer expenditure schedule used for the survey collected information on quantity and value of household consumption with a reference period of “last 30 days” for some items of consumption and “last 365 days” for some less frequently purchased items. Specially, these are items of clothing, bedding, footwear, durable goods, education and “institutional” medical care. To minimize recall errors, a very detailed item classification was, as usual, adopted to collect information, including 148 items of food, 13 items of fuel, 28 items of clothing, bedding and footwear, 18 items of educational and medical expenses, 52 items of durable goods, and about 85 other items. Besides the household consumer expenditure, information on some other household particulars including age, sex and educational level of each household number was also collected.

1.4 The estimates appearing in this report are of the following kinds:

- ❖ Distribution of households and persons by 12 classes of MPCE (household monthly per capita consumer expenditure). This is the indicator of living standards built up from the consumption data.
- ❖ Average MPCE
- ❖ Composition of MPCE by item category (cereals, pulses, clothing, etc.)
- ❖ Quantity and value of per capita consumption of different cereals

- ❖ Distribution of households or persons by other characteristics such as education level, structure and area of dwelling unit, and energy sources used for cooking and lighting.

1.5 Period of survey and work programme: The survey period (1st July,2005 to 30th June, 2006) of this round was divided into four sub-rounds of three months duration each to spread the survey workload uniformly. The sub-round were as follows.

Sub-Round	Period of Survey
1	July -September, 2005
2	October - December, 2005
3	January –March, 2006
4	April – June, 2006

A total number of 208 samples termed as First Stage Units (FSUs) were allotted to Haryana State by NSSO, Govt. of India to conduct this survey. Out of this, 112 samples were allotted for rural areas and 96 samples were for urban areas. An Equal number of sample villages/blocks (FSUs) was allotted for survey to each of these four sub-rounds with a view to ensuring uniform spread of sample FSUs over the entire period. Each FSU was surveyed during the sub-round to which it was allotted.

1.6 Schedules of enquiry: This round was devoted to multiple subjects viz. household and enterprise services. During this round, the following schedules of enquiry were canvassed.

S. No.	Schedule No.	Title of the schedule
1.	0.0	List of Households and non-agriculture enterprises
2.	2.2	Manufacturing enterprises
3.	1.0	Household Consumer Expenditure
4.	10.0	Employment and Unemployment

1.7 Subject Coverage: The main subject of the 62nd round of NSS survey was Unorganized Manufacturing. Enterprises covered were those under the two-digit codes 15 to 37 (Section ‘D’) of NIC-2004 and enterprises under cotton ginning, cleaning and bailing (NIC-2004, code 01405). The annual survey of consumer expenditure and the survey on employment-unemployment were additional enquiries conducted simultaneously.

CHAPTER - 2

CONCEPTS AND DEFINITIONS

The concepts and definitions of some important terms used in the survey and which are relevant to this report viz., those used to generate the tables and estimates on household consumer expenditure are explained in this section.

Household and related concepts

2.1 House: Every structure, tent, shelter, etc., is a house irrespective of use. It may be used for residential or non-residential purpose or both or even may be vacant.

2.2 Household : A group of persons normally living together and taking food from common kitchen constitute a household. The word 'normally' means that temporary visitors are excluded but temporary stay-aways are included. Thus a son or daughter residing in hostel for studies is excluded from household of his/her parents, but a resident employee or resident servant or paying guest (but just not a tenant in the house) is included in the employers/host's household. 'Living together' is usually given more importance than 'sharing food from a common kitchen' in drawing the boundaries of a household. In case the two criteria are in conflict; however in special case of person taking food with his family but sleeping elsewhere (say, in shop or a different house) due to space shortage, the household formed by such person's family members is taken to include the person also. Each inmate of mess, hotel, boarding house, etc. is considered as single member household but a family living in a hotel is considered to be one household only; the same applies to residential staff of such establishments.

2.3 Household Size: The number of normally resident members of a household is its size. It will include temporary stay-aways but exclude temporary visitors and guests.

2.4 Household Consumer Expenditure: The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. The household consumer expenditure is the total of the monetary value of consumption of various groups of items, namely: (i) food, pan (betel leaves), tobacco, intoxicants and fuels and light, (ii) clothing and footwear; and (iii) all other goods and services, including durable articles.

2.4.1 For group (i) and (ii), the total value of consumption is derived by aggregating the monetary value of goods actually consumed during the reference period. An item of clothing and footwear would be considered to have been consumed if it is brought into maiden or first use during reference period. The consumption may be out of (a) Purchase made during the reference period or earlier, (b) home grown stock, (c) receipt in exchange of goods and services, (d) any other receipt like gift, charity, borrowings; and (e) free collection. Home produce is evaluated at the ex farm or ex factory rate. For evaluating the consumption of the items of group (iii), a different approach is followed. In this case, the expenditure made during the reference period for the purchase or acquisition of goods and services is considered as consumption. However, for few items of expenditure such as rent, telephone charges, consumer taxes and railway season tickets, expenditure during the month is recorded.

2.4.2 It is pertinent to mention here that the consumer expenditure of a household on food items relates to the actual consumption by the members of the household and also by the guests, during ceremonies or otherwise. To avoid double counting, transfer payments like charity, loan, advance, etc., made by the household are not considered as consumption, for items of groups (i) and (ii), since transfer receipts of these items have been taken into account. However, meals prepared in a household and served to non-household members is an

exception to this rule. Meals prepared in the household kitchen and provided to the employees and/or others would automatically get included in domestic consumption of employer (payer) household. There is a practical difficulty in estimating the quantities and values of individual items used for preparing the meals served to employees or to others. Thus, to avoid double counting, cooked meals received as perquisites from employer household or as gift or charity are not recorded in the recipient household. As a general principle, cooked meals purchased from the market for consumption of the members and for guests and employees are also be recorded in the purchaser household.

2.4.3 This procedure of recording cooked meals served to others in the expenditure of the serving households only leads to bias-free estimates of average per capita consumption as well as total consumer expenditure. However, as the proportions of donors and recipients of free cooked meals are likely to vary in opposite directions over the expenditure classes, the nutritional intake derived from the consumer expenditure survey data may present a somewhat distorted picture. These derived nutrition intakes may get inflated for the rich (net donors) and somewhat understated for the poor (net recipients). This point has to be kept in mind while using the NSS consumer expenditure data for any nutritional studies relating to the nutritional status of households.

2.5 Monthly per capita consumer expenditure (MPCE): For a household, this is the total consumer expenditure over all items divided by its size and expressed on a per month (30 days) basis . A person's MPCE is understood as that of the household to which he or she belongs.

2.6 MPCE class: In the NSS 62nd round the lowest class of the society is categorized in the '0-235' class for the rural sector and in the '0-335' class in the urban sector. The uppermost classes are kept as '1155 and above' and '2540 and above' in the rural and urban sector respectively. The MPCE classes are formed separately for rural and urban. The upper limits of these classes correspond broadly to cumulative frequencies 5%, 10%, 20%, 30%, 40%, 50%, 60%, 70%, 80%, 90%, 95% and 100% of the population. The 12 MPCE classes so formed in the present round (62nd round) are given below for easy comprehension. These classes are based on a uniform reference period of 30-days for all the items of household expenditure.

S. No.	Rural (in Rs.)	Urban (in Rs)
1	0-235	0-335
2	235-270	335-395
3	270-320	395-485
4	320-365	485-580
5	365-410	580-675
6	410-455	675-790
7	455-510	790-930
8	510-580	930-1100
9	580-690	1100-1380
10	690-890	1380-1880
11	890-1155	1880-2540
12	1155 & above	2540 & above

Note :— The serial numbers of MPCE classes for rural and urban sectors as mentioned in the above table have been used in various tables incorporated in the Appendix for representing MPCE classes.

2.7 Reference period: Reference period means the period of time for which data on consumption was collected. The reference period used for the survey was a “moving” one, varying from household to household, although its pre-specified duration was fixed for each item. For items of category 1, the value of consumption from period of 30 days is obtained for a household by multiplying the recorded figure by the factor 30/365. The reference periods used for collection of consumption data for different groups of items are as shown in the following table.

Sr. No.	Item of consumption	Reference period
1.	Clothing, footwear, education, medical care (institutional) and durable goods	“last 365 days”
2.	All other items (viz, all food, pan, tobacco & intoxicants, fuel and light, miscellaneous goods and services including non-institutional medical care, rents and taxes)	“last 30 days”

2.8 Value of consumption: Consumption out of purchase is evaluated at the purchase price. Consumption out of home produce is evaluated at ex farm or ex factory prices. Value of consumption out of gifts, loans, free collection and goods received in exchange of goods and services is imputed at the rate of average local retail prices prevailing during the reference period.

OTHER DEFINATIONS

2.9 Adult: A person who has completed 15 years of age.

2.10 Educational Level : Ten educational levels are considered for classifying the population. These are listed as (i) not literate, (ii) literate without formal schooling, (iii) literate but below primary, (iv) primary, (v) middle, (vi) secondary, (vii) higher secondary, (viii) diploma/ certificate course, (ix) graduate and (x) post-graduate and above. For the purpose of determining educational level, the highest course successfully completed is considered. For instance, the level of a person who has studied up to, say, first year B.A., is “higher secondary”. The educational level of a person who has studied up to 12th standard but has not appeared for the final examination or has failed is “secondary”.

2.11 Flat : A flat, generally, is a part of a building and has one or more rooms with self-contained arrangements and normal housing facilities like water supply, latrine, toilet etc., which are used exclusively by the family residing therein or jointly with other facilities. It also includes detached room or rooms, which may or may not have other housing facilities.

2.12 Independent house: An independent house is one which has a separate structure and entrance with self-contained arrangements. In other words, if the dwelling unit and the entire structure of the house are physically the same, it is considered as an independent house. In some parts, particularly in rural areas, two or more structures together may constitute a single housing unit. While the main residence may be in one of the structures, the other structures may be used for sleeping, sitting and for store, bath etc. In such cases, all the structures together will form a single housing unit and will be treated as an independent house. Here dwelling unit means living rooms, kitchen, bathroom, latrine, store-room and verandah (both open and closed).

2.13 Literate : A person who can both read and write a simple message with understanding in at least one language is considered literate.

2.14 Structure types: katcha ,pucca, semi-pucca: These are defined as follows

katcha	A katcha structure is one whose walls & roof are made of katcha material, which means material such as mud, bamboo, grass, leaves, reeds, thatch or unburnt bricks etc.
pucca	A pucca structure is one whose walls and roof are made of pucca materials, which means materials such as burnt bricks, stone, cement, concrete, jackborad (cement-plastered reeds) and timber. Tiles, galvanized tin or asbestos cement sheets used in construction of roofs are regarded as pucca materials
semi-pucca	A semi-pucca structure is one of which either the roof or the walls but not both is made of pucca materials.

COVERAGE OF DIFFERENT CONSUMPTION ITEMS

The coverage of various categories of consumption items used in presenting the results of the survey in this report is explained below, with the categories arranged in alphabetical order.

2.15 Barley products: This includes sattu prepared by frying and powdering barley.

2.16 Beverages, etc.: This stands for “ beverage, refreshments and processed food.” It includes tea, coffee, mineral water, soft drinks, fruit juice (not prepared at home), green coconut water, soda water, other beverage such as cocoa, biscuits, cakes, pastries, pickles, sauce, jam, jelly, and other salted refreshments and sweets not prepared at home. Refreshments prepared at home are not included here, Instead, the ingredients of the refreshments (such as flour, sugar, milk, etc.) are accounted under “ cereals” (e.g. against “ wheat”), “sugar”, etc. Food purchased in the form of cooked meals is also included in “processed food”.

2.17 Cereals: Note that household consumption of cereals does not include consumption of cereals by livestock belonging to the household. Such expenditure, being part of farm expenditure, is excluded from household consumer expenditure altogether.

2.18 Cereal substitutes: Cereals are usually a person’s staple food in India. But sometimes, by choice or due to scarcity, a person may consume little or no cereals. The food requirement is partially or wholly met in such cases by consumption of food items which could be treated as substitutes for cereals. Tapioca, for example, is consumed in some parts of the country as a substitute for cereals. Similarly, jackfruit seed, mahua, etc. are also consumed as substitute for cereals. Potato or sweet potato consumed as substitutes for cereals are not, however, shown here. These are included in “vegetables”.

2.19 Clothing: The term “clothing” is used in this report as a short form of “clothing and bedding”. Besides clothing proper, it includes bedding (pillows, quilts, mattresses, mosquito nets, etc.), as well as rugs, blankets, curtains, towels, mats, cloth for upholstery, etc. It excludes footwear and raincoats. Expenditure on tailor-made clothing excludes tailoring charges, which are accounted in “consumer services”. Consumption of an article of clothing is considered to take place when it is brought into first use. However, clothing purchased

second-hand is considered as consumed as soon as it is purchased. Imported ready-made garments, even if purchased second-hand, are shown as first-hand purchase. Livery supplied by the employer is taken into account in household consumption of clothing even if used during duty hours only.

2.20 Conveyance: This includes expenditure incurred on account of journeys undertaken and/or transportation of goods made by any means of conveyance. The expenditure is the actual fare paid except in case of railway season tickets, for which expenditure is calculated as the cost of the ticket divided by the number of months for which it is valid. Expenditure on journeys undertaken by household members as part of official tours is not considered as consumer expenditure of the household. But journeys to commute to and from place of work are included here. The expenditure incurred on journeys undertaken under Leave Travel Concession, etc., even if reimbursed, is included. In case of owned conveyance, the cost of fuel (petrol, mobile oil, diesel, etc.) for power-driven transport and animal feed for animal-drawn carriage is considered.

2.21 Durable goods: Items included here all have a lifetime of one year or more. However, some petty durables such as spectacles, torches, locks, umbrellas, etc., are excluded. Note that glassware, earthenware and plastic goods such as buckets are excluded from durable goods and included in the “sundry articles” sub-group of “miscellaneous goods and services”. Consumption expenditure on durable goods includes both expenditure on purchase and expenditure on repair and construction of household durables. For land and residential building, only expenditure on repair and maintenance is included. Durable goods include furniture and fixtures, “entertainment” durable such as radios, TV, VCR/VCP/DVD players. Tape recorders and CD players, cameras, musical instruments, jewelry and ornaments, crockery and utensils, cooking and other household appliances such as fans, air conditioners, air coolers, sewing machines used for household work, washing machines, stoves, pressure cookers, fridges, water purifiers, electric irons, heater, toasters and ovens, household transport equipment including two-wheelers, and their parts, therapeutic appliances, clocks, watches, computers for household use, mobile phone handsets, and bathroom and sanitary equipment.

2.22 Edible oil: Edible oils used for toilet purpose by the household are not included here. Oilseeds are sometimes purchased or grown by a household for extracting edible oil (by crushing) for consumption. The value of oilseeds so used is included in “edible oil”.

2.23 Education : This includes expenditure on goods purchased for the purpose of education, viz., books and journals, newspapers, paper, pen, pencil, etc., and also magazines, novels and other fiction. It also includes fees paid to educational institutions (e.g., schools, colleges, universities, etc.) on account of tuition and other fees like game fees, library fees, etc., and payment of private tutors. Expenditure on Internet other than telephone charges is included here. Occasional payments to the schools fund made on account of charities, and donations generally, are not included here, as they are regarded as transfer payments.

2.24 Entertainment: This includes expenditure on cinemas, theaters, meals, fairs and picnics, expenditure incurred on processing, developing, etc., of photographic film, charges paid for hiring of video cassette/VCR/VCP, and charges for viewing video show. Expenses incurred on subscription to dish antenna, cable TV facilities, etc. are also included. Club fees are included here.

2.25 Footwear: This includes charges paid to a cobbler for getting a pair of shoes or other footwear made. It excludes the cost of straps purchased separately.

2.26 Gram: This includes gram products such as sattu obtained by frying and powdering of gram (whole grain). Besan made out of gram is, however, not included here, but in “other pulse products”.

2.27 Maize Product: This includes cornflakes, popcorn, etc., made of maize.

2.28 Medical expenses: This includes expenditure on medicine of different types and on medical goods; also, payments made to doctor, nurse, etc., as professional fees and those made to hospital, nursing home, etc. for medical treatment, and expenditure incurred for clinical tests, including X-rays, ECG, pathological tests, etc. Payment of medical insurance premium, which, in past rounds, was excluded from consumer expenditure, is also included. Expenditure on all family planning appliances included.

2.29 Medical: Institution and non-institutional expenditure : The distinction between institutional and non-institutional medical expenses lies in whether the expenses were incurred on medical treatment as an in-patient of a medical institution (institutional), or otherwise (non-institutional). Medical institution here covers private as well as Government institutions such as hospitals and nursing home.

2.30 Milk and milk products: Milk products include ghee, butter, curd, etc. Milk used in home preparation of sweetmeats, etc., is also accounted here. This category also includes those baby foods of which the principal constituent is milk. Further, milk (liquid) includes ice-cream of which the major component is milk. Ice with syrup but without milk sold under the name of ice-cream is not included in this category.

2.31 Miscellaneous goods and services: This is a residual category covering all items other than food, pan, tobacco, intoxicants, fuel and light, clothing, footwear, and durable goods. It includes, among other things, expenditure on education, medical care, entertainment, conveyance, rent, and consumer taxes and cesses. (Note, however, that in Schedule 1.0, the schedule of enquiry of data collection, education and institutional medical are separated out from the “miscellaneous goods and services” block to form a separate block. In Tables 4 and 5 of Appendix A, education, medical expenses, rents and taxes are shown separately, and the remaining part of “miscellaneous goods and services” shown in two parts: miscellaneous consumer goods, and services”)

2.32 Pan: This includes, pan (betel leaves), supari, lime, katha, other ingredients of “finished” pan, and pan purchased in finished form.

2.33 Rent: Rent includes house and garage rent, residential land rent and other consumer rent.

2.34 Rice product: Rice product are food like chira, khoi, lawa, muri, rice powder, etc. which are obtained by splitting, frying, powdering, or parching of the grain.

2.35 Wheat products: Bread is included here, but not wheat preparations like biscuits, cakes, etc., which are accounted in “beverages, refreshments and processed food”.

CHAPTER-3

HOUSEHOLD CONSUMER EXPENDITURE

This chapter is devoted to the analysis of results of household consumer expenditure survey held during July, 2005 to June, 2006. The main focus is on levels and pattern of consumer expenditure of households in Haryana. Besides this certain demographic and social features of sampled population are also discussed. The analysis of results depicted in this chapter is based on 448 rural and 380 urban sample households.

3.1 Demographic differences:

Table 3.1 presents differences in some key indicators of population in rural and urban Haryana.

Table: 3.1 Demographic differences between rural and urban Haryana.

S. No	Particulars	Rural	Urban
1	Average Household Size	4.9	4.5
2	Average No. of Adults Per Household	3.5	3.2
3	Average No. of Children Per Household	1.4	1.3
4	Sex Ratio	794	878
5	Sex-Ratio among adults	861	862
6	Sex-Ratio among children	651	915
7	Population	1,27,25,400	46,97,400
8	Households	25,88,000	10,40,500
9	% of Population	73.0	27.0
10	Average Household Size in Haryana	4.8	

The above table reveals that about 73% of the population of the Haryana was found to reside in rural sector and 27% in urban sector. The sex ratio in rural sector was 794 and it was found 878 in urban sector. The average household size was 4.9 in rural sector and 4.5 in urban sector. The overall average household size was 4.8 in Haryana. The average number of children per household was 1.4 in rural sector and 1.3 in urban sector. While the average number of adults per household were 3.5 in rural sector and 3.2 in urban sector.

3.2 Estimated number of persons according to social group:

Table 3.2 and graphs 1 & 2 shows the distribution of population by social group-wise in rural and urban sectors of the State.

Table 3.2 Percentage and estimated number of persons (in 00) by social group-wise

Sector	Social Group				
	ST	SC	OBC	OTHERS	TOTAL
Rural	-	35562 (27.9)	23767 (18.7)	67925 (53.4)	127254 (100.0)
Urban	-	11960 (25.4)	10461 (22.3)	24554 (52.3)	46974 (100.0)
Haryana	-	47522 (27.2)	34228 (19.6)	92479 (53.2)	174228 (100.0)

(Figures in brackets are percentages to total)

It may be seen from above table that about 27.2% of total population of Haryana belonged to 'Scheduled Caste' category, 19.6% to 'Other Backward Class' and 53.2% belonged to 'Other Social Groups' during 2006. It means that about half of population of Haryana belong to others. Scheduled Tribe population in Haryana is nil, because there is no area notified for ST. The table also reveals that the percentage population of SC is residing more in rural sector in comparison to urban sector. The percentage of population of OBC was 22.3% in urban sector as compared to rural sector 18.7%.

Graph 1: Percentage distribution of persons by social group-wise (Rural)

Graph 2: Percentage distribution of persons by social group-wise (Urban)

3.3 Distribution of households by household type:

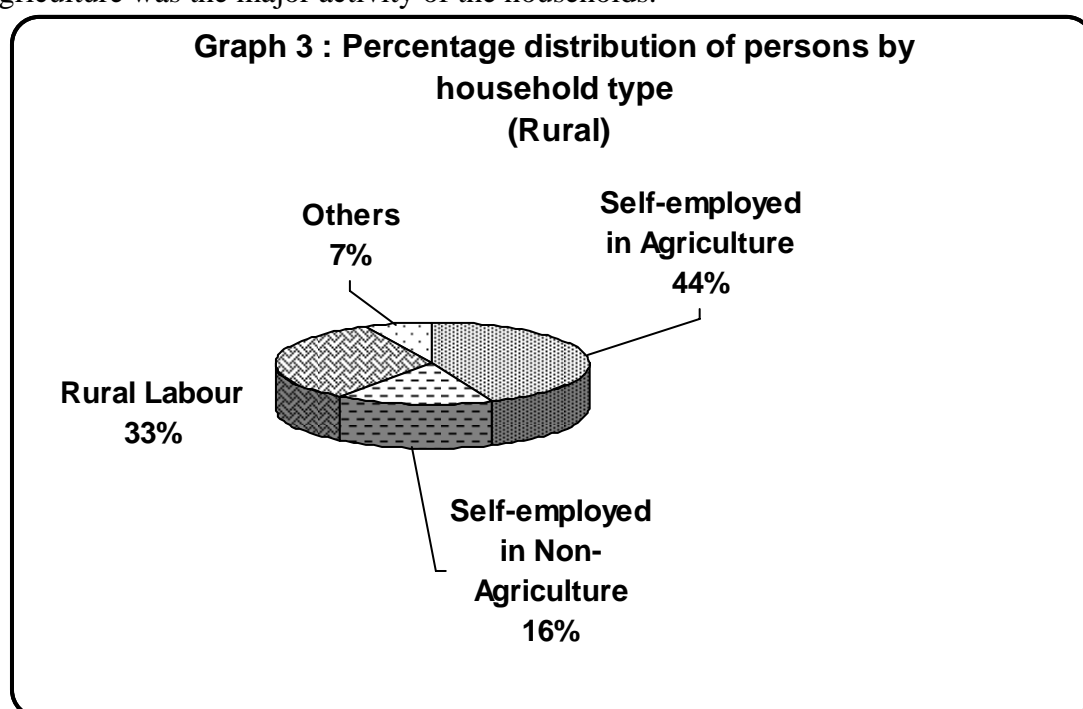

The nature and type of work from which a household derives its major income is an important indicator of the activity pattern of its members. Every sample household was, therefore, categorised into household types, depending on the economic activity of the members of the household during the last 365 days preceding the date of survey from which major income of the household was generated. Table 3.3 and graphs 3 & 4 shows the distribution of household by household type in rural and urban sectors of the State.

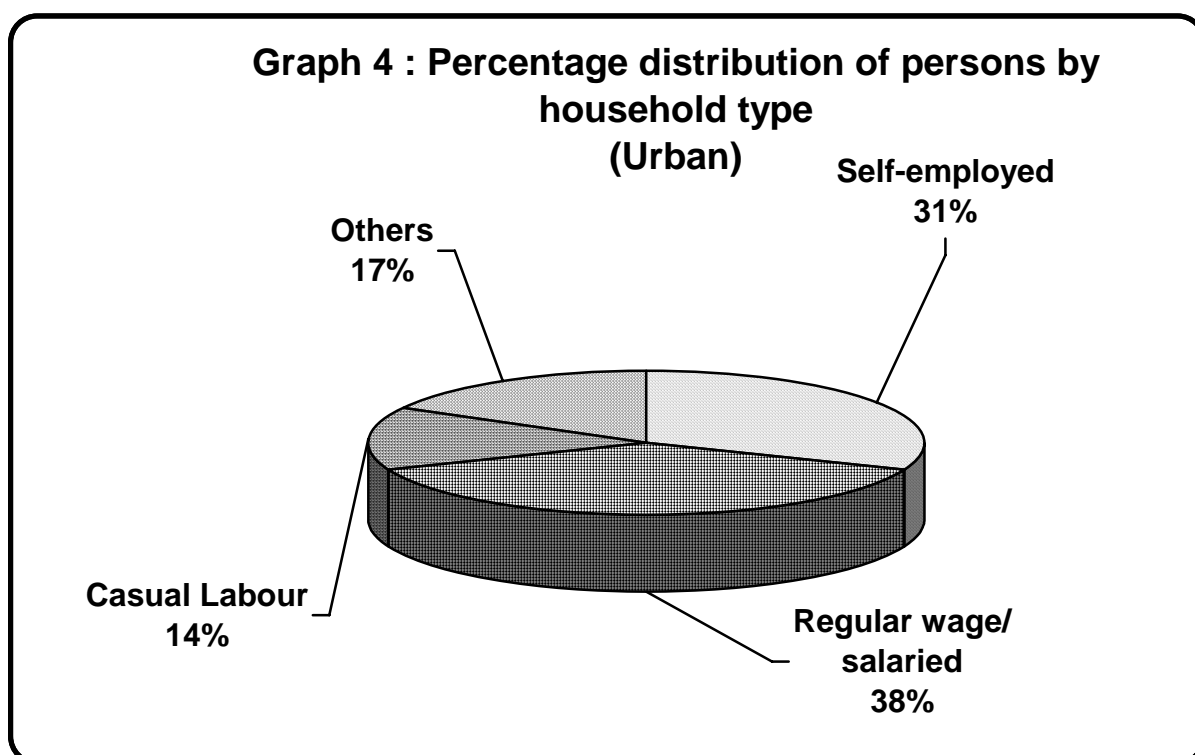

Table 3.3 Percentage distribution of households by Household Type

Sector	Household type	% of households
Rural	1. Self employed in non-agriculture	15.5
	2. Self employed in agriculture	44.0
	3. Rural Labour	33.6
	(i) Agriculture labour	20.1
	(ii) Other labour	13.5
	4. Others	6.9
	5. All	100.0
Urban	1. Self employed	31.2
	2. Regular wage/ salary earning	38.1
	3. Casual labour	13.6
	4. Others	17.1
	5. All	100.0

The above table reveals that in rural areas, 59.5% of the households were dependent on self employment either as self employment in agriculture (44.0%) or as self employment in non-agriculture (15.5%). The agriculture and other labour households in rural areas accounted for about 33.6% of household. In the urban areas, the casual labour households were only 13.6%.

In urban areas, the household belonging to self-employed was 31.2%. The regular wage/salary household accounted for about 38.1%. Hence, it can be observed that in rural sector, agriculture was the major activity of the households.

3.4 Literacy Level and Rate:

Table 3.4 and graphs 5 & 6 shows the percentage distribution of persons by education level for the age group 7 years & above in rural and urban sectors of the State.

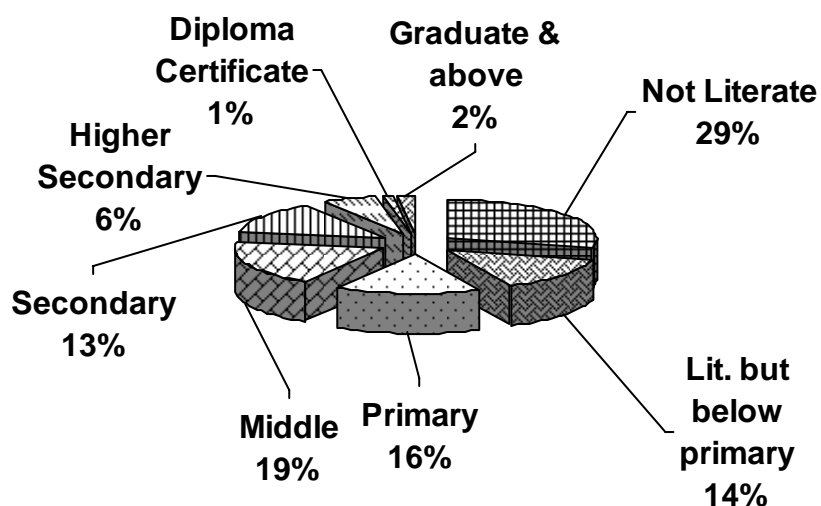

Table 3.4 Percentage distribution of persons by education level for the age group 7 years & above.

Education Level	Rural			Urban			State		
	Male	Female	Persons	Male	Female	Persons	Male	Female	Persons
A. Illiterate	18.7	41.0	28.6	8.0	29.8	18.3	16.0	38.0	25.9
B. Literate	81.3	59.0	71.4	92.0	70.2	81.7	84.1	62.0	74.1
1. Literate without formal schooling	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0
2. Literate below primary	15.3	14.0	14.7	13.1	11.2	12.2	14.7	13.2	14.0
3. Primary	16.9	15.5	16.3	17.6	16.6	17.2	17.1	15.8	16.5
4. Middle	21.1	17.4	19.4	22.4	12.8	17.9	21.4	16.0	19.0
5. Secondary	17.4	8.1	13.3	14.9	11.3	13.2	16.8	9.0	13.3
6. Higher Secondary	8.3	2.8	5.8	9.0	6.2	7.7	8.4	3.7	6.3
7. Diploma Certificate	0.2	0.2	0.2	2.8	0.4	1.6	0.9	0.3	0.6
8. Graduate	1.0	0.1	0.6	9.5	8.3	8.9	3.2	2.3	2.8
9. Post Graduate and above	1.1	1.2	1.1	2.7	3.4	3.0	1.5	1.8	1.6

It is observed from the above table that about 29 percent persons in rural area and 18 percent persons in urban area were found to be illiterate. About 71 percent persons in rural and 82 percent persons in urban were literate with different levels of educational attainment as shown in the above table. Sex wise literacy rate revealed that 81 percent of males and 59 percent of females in rural area were literate while 92 percent males and 70 percent females in urban areas were literates. The literacy rate of Haryana among male 84 percent was also found much higher in comparison to female 62 percent.

Out of total 74 percent literates in the state, 30 percent attained education upto primary, 32 percent up to secondary level, 10 percent completed higher secondary/diploma certificate/ graduate and only 2 percent completed post graduation and above.

Graph 5: Percentage distribution of persons by education level for the age group 7 years & above (Rural)

Graph 6 : Percentage distribution of persons by education level for the age group 7 years & above (Urban)

3.5 Rural household according to size class of land possessed:

Land being the main asset base in the rural sector, area of land possessed by a household is generally taken as a proxy to indicate the economic status of the households. The table 3.5 gives percentage distribution of rural households by size class of land possessed.

Table: 3.5 Percentage distribution of rural households by size class of land possessed.

Household Type	Size class of Land possessed (hectares)						Total
	< 0.01	0.01- 0.40	0.41- 1.00	1.01- 2.00	2.01- 4.00	4.01- & above	
All household	34.3	19.7	7.9	17.7	13.6	6.9	100.00

It may be seen from above table that almost 62% rural households had less than 1 hectare land for cultivation, 31% had 1-4 hectare and 7% households had land 4 hectares and more for cultivation. It concludes that rural farmers have small pieces of land for the purpose of cultivation and other activities related to agriculture.

3.6 Household occupancy position:

Occupancy position of households, or their break-up according to whether they owned, rented or otherwise occupied their dwelling units, is given in table 3.6 and graphs 7 and 8 gives the distribution of households by occupancy status of the dwelling unit.

Table: 3.6 Per 1000 distribution of households by occupancy status of the dwelling unit sector-wise.

Sector	Type of dwelling				Total
	Owned	Hired	No dwelling unit	Others	
Rural	997 (99.7)	2 (0.2)	-	1 (0.1)	1000
Urban	819 (81.9)	168 (16.8)	-	13 (1.3)	1000
Haryana	946 (94.6)	50 (5.0)	-	4 (0.4)	1000

The above table reveals that 99.7% of the households were residing in owned house, 0.2% in rented house in rural sector. In urban sector, 81.9% households were residing in owned, 16.8 % in rented and 1.3% were residing in neither owned nor rented dwellings.

Graph - 7 Percentage distribution of households by occupancy status of the dwelling unit (Rural)

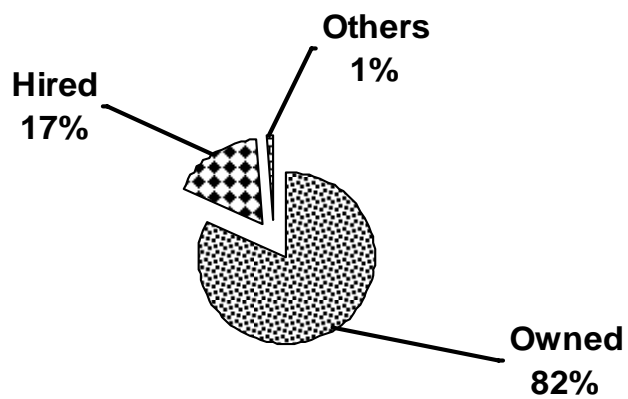

Chart -8 Percentage distribution of households by occupancy status of the dwelling unit (Urban)

3.7 Households according to covered area of dwelling unit:

The table 3.7 gives percentage distribution of households by covered area of dwelling unit sector-wise

Table : 3.7 Per 1000 distribution of households by covered area of dwelling unit.

Sector	Covered area of dwelling units (Sq. m)											
	<10	10-14	15-19	20-24	24-29	30-39	50-54	55-69	70-89	90-119	119 & above	n.r.
Rural	2	1	5	45	42	38	199	170	153	70	245	30
Urban	6	27	26	108	48	102	151	155	187	111	77	1
Haryana	3	8	11	63	44	57	186	166	163	163	191	22

Analysis revealed that households were relatively concentrated in the range 50 Sq.m and above in respect of covered area of dwelling unit. About 84% of rural households and 68% of urban households fell in this category.

3.8 Structure of dwelling unit:

The table 3.8 and graphs 9 and 10 shows the distribution of rural and urban households by structure type of dwelling unit.

Table : 3.8 Percentage distribution of households by structure type of dwelling unit.

Sector	Type of structure				
	Katcha	Semi-Pucca	Pucca	No structure	All
Rural	1.4	15.4	83.2	-	100
Urban	1.0	7.3	91.7	-	100
Haryana	1.3	13.1	85.6	-	100

Analysis revealed that Pucca structure formed the majority in both rural and urban areas; they were a feature of barely 83% of rural dwellings, compared to 92% for urban dwellings.

Graph-9 Percentage distribution of households by type of structure (Rural)

Graph-10 Percentage distribution of households by type of structure (Urban)

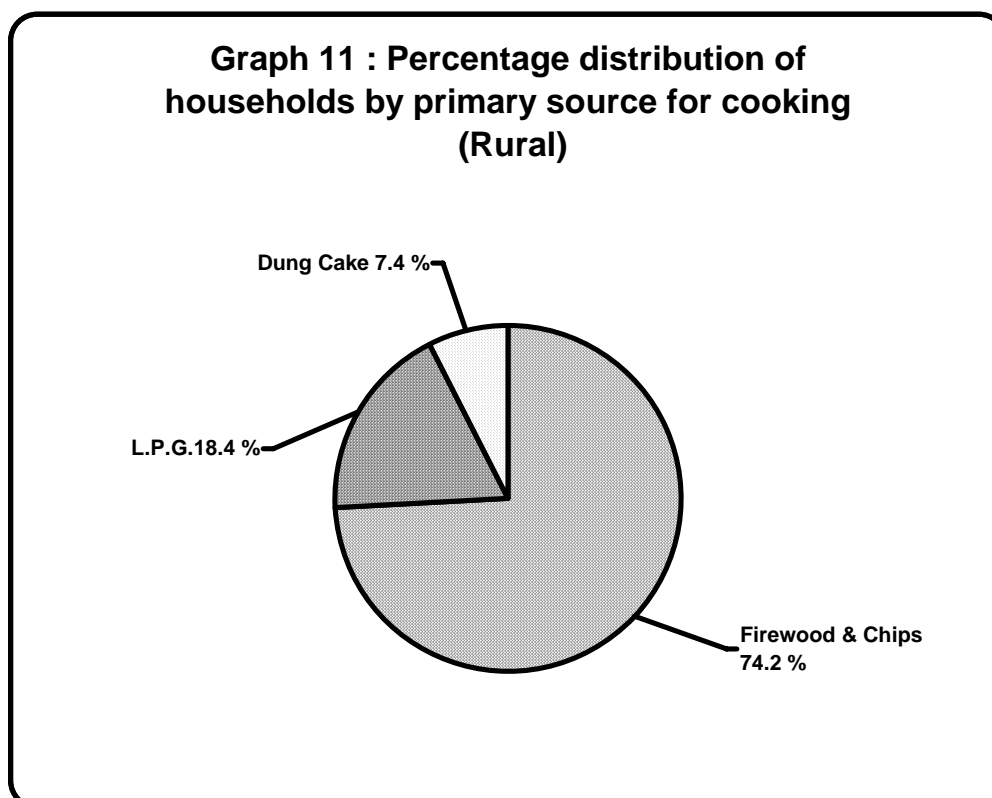

3.9 Primary source of energy for cooking:

The source of energy used by a household during the last 30 days preceding the date of survey has been ascertained and collected in the survey 62nd round NSS are Coke, Coal, Fire wood and Chips, LPG, Gobargas, Dung Cake, Charcoal, Kerosene, Electricity, Others. Table 3.9 and graphs 11 & 12 shows the percentage distribution of households by primary source of energy for cooking in rural and urban sectors of the State.

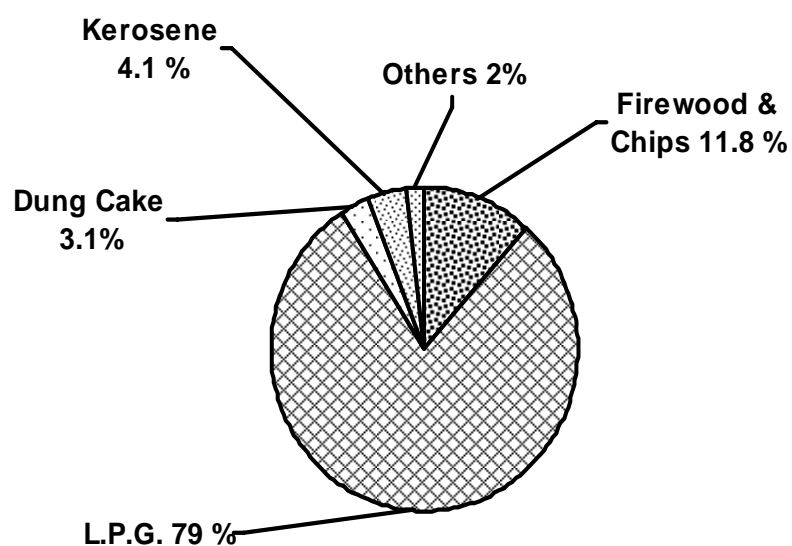

Table 3.9 Percentage distribution of households by Primary Source of Energy for cooking

S. No.	Primary Source of Energy for Cooking	Percentage		
		Rural	Urban	Haryana
1.	Coke, Coal	-	-	-
2.	Firewood & Chips	74.2	11.8	56.3
3.	L.P.G.	18.4	79.0	35.8
4.	Gobar Gas	-	-	-
5.	Dung Cake	7.4	3.1	6.2
6.	Charcoal	-	-	-
7.	Kerosene	-	4.1	1.2
8.	Electricity	-	-	-
9.	Others	-	2.0	0.6
10.	No cooking arrangement	-	-	-
Total		100.0	100.0	100.0

The above table shows that, 74.2% households used firewood & chips, 18.4% LPG, and 7.4% dung cake as the primary source of cooking in rural sector of Haryana. In urban sector, 79% households used LPG, 11.8% firewood & chips, 3.1% dung cake and 4.1% kerosene as the primary source of cooking.

Graph 12 : Percentage distribution of households by primary source for cooking (Urban)

3.10 Primary source of energy for lighting:

Table 3.10 and graphs 13 & 14 shows the percentage distribution of households by primary source of energy for lighting in rural and urban sectors of the State.

Table 3.10 Percentage distribution of households by Primary Source of Energy for lighting

S. No.	Primary Source of Energy for lighting	Percentage		
		Rural	Urban	Haryana
1.	Kerosene	6.1	4.0	5.5
2.	Other Oil	-	-	-
3.	Gas	-	0.5	0.1
4.	Candle	1.7	2.1	1.8
5.	Electricity	92.1	93.4	92.5
6.	Other	-	-	-
7.	No lighting arrangement	-	-	-
Total		100.0	100.0	100.0

The above table reveals that, 92.1% households were found to be dependent on electricity and 6.1% on kerosene in rural sector for their lighting needs. In urban sector, 93.4% households were dependent on electricity and 4.0% on kerosene for their lighting needs. There were found 100% lighting arrangement in Haryana.

3.11 Sector-wise monthly per capita/household consumer expenditure:

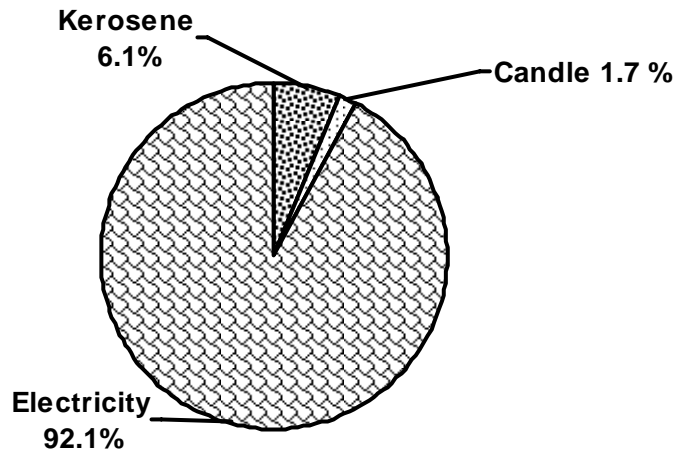

The main results of consumer expenditure survey with reference to per capita per household consumer expenditure both in rural and urban areas, distribution of expenditure under main heads namely food and non-food items are presented in Table 3.11 and graph 15. The analysis will help to ascertain the pattern of consumer expenditure in rural and urban areas of the State.

Table 3.11 Average Per Capita/Household Monthly Consumer Expenditure

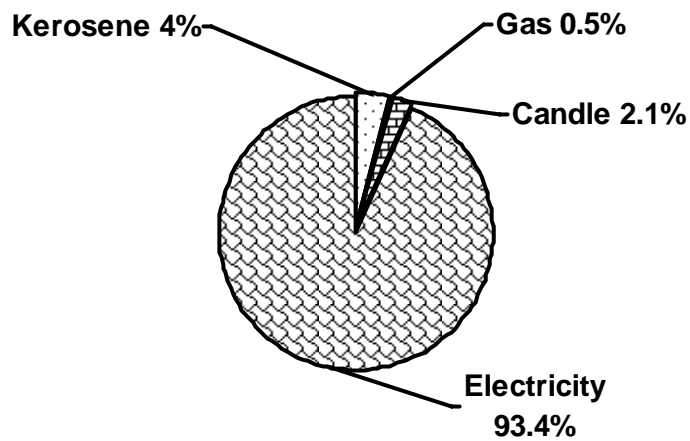

Sector	Food	Non-Food	Total
Average Monthly Per Capita Consumer Expenditure(Rs.)			
Rural	441 (54.0)	375 (46.0)	816 (100.0)
Urban	476 (46.3)	553 (53.7)	1029 (100.0)
Haryana	450 (51.5)	423 (48.5)	873 (100.0)
Average Monthly Household Consumer Expenditure(Rs.)			
Rural	2161 (54.0)	1838 (46.0)	3999 (100.0)
Urban	2142 (46.3)	2489 (53.7)	4631 (100.0)
Haryana	2160 (51.5)	2030 (48.0)	4190 (100.0)

(Figures in brackets are percentages to total)

Graph 13 : Percentage distribution of households by primary source of energy for lighting (Rural)

Graph 14 : Percentage distribution of households by primary source of energy for lighting (Urban)

Graph 15 : Per capita monthly consumer expenditure sector-wise

	Rural	Urban	Haryana
Food	441	476	450
Non-Food	375	553	423
Total	816	1029	873

The above table shows that average monthly per capita consumer expenditure for the State worked out as Rs. 873 and of household as Rs. 4190. The average monthly per capita expenditure as well as household expenditure was found higher in urban sector in comparison to rural sector. The monthly per capita expenditure in rural sector worked out to Rs. 816. Out of this expenditure, 54.0% (Rs. 441) was spent on food items and 46.0% (Rs. 375) on non-food items. In urban sector, it was worked out to Rs. 1029. Out of this expenditure, 46.3% (Rs. 476) was spent on food items and 53.7% (Rs. 553) on non-food items. This shows that expenditure on food items is more in rural sector (54.0%) in comparison to urban sector (46.3%). The expenditure on non-food items is less in rural sector (46.1%) in comparison to urban sector (53.7%).

3.12 Percentage distribution of MPCE of food and non-food items:

Table 3.12 and graphs 16 and 17 shows the percentage distribution of Monthly Per Capita Expenditure for broad groups of food and non-food items in rural and urban areas of the State

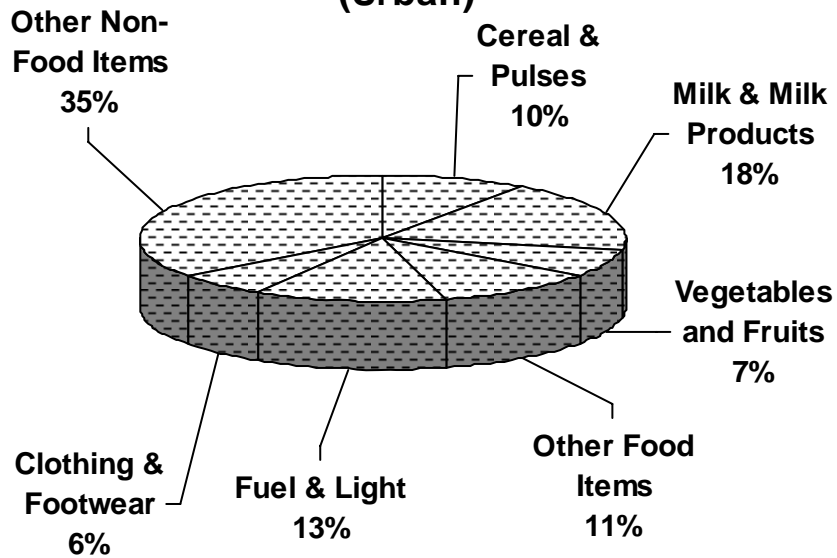

Table: 3.12 Percentage Distribution of MPCE according to Broad Groups of Food & Non-Food Items

Sr. No.	Items	Percentage	
		Rural	Urban
1.	Cereal	9.82	9.00
2.	Gram	0.08	0.16
3.	Cereal substitute	0.00	0.00
4.	Pulses & pulse products	2.24	2.06
5.	Milk & milk products	25.06	16.09
6.	Edible oil	2.33	2.40
7.	Egg, fish & meat	0.11	0.37
8.	Vegetable	5.17	5.44
9.	Fruits (Fresh)	1.45	2.13
10.	Fruits (Dry)	0.14	0.32
11.	Sugar	3.07	2.56
12.	Salt	0.19	0.16
13.	Spices	1.67	1.54
14.	Beverages etc.	2.72	4.07
	Food (Total)	54.05	46.30
15.	Pan, tobacco & intoxicants	2.07	1.67
16.	Fuel & Light	12.34	12.01
17.	Clothing	6.15	6.40
18.	Footwear	1.55	1.80
19.	Education	5.66	4.96
20.	Medical-Institutional	0.72	0.04
21.	Medical-non-Institutional	2.18	2.77
22.	Misc. cons. goods and services	12.26	21.59
23.	Durable goods	3.02	2.47
	Non-food (Total)	45.95	53.71
	Total Consumer expenditure	100.00	100.00

Graph 16 : Percentage composition of consumer expenditure (Rural)

Graph 17 : Percentage composition of consumer expenditure (Urban)

The above table reveals that the percentage expenditure on food items was higher in rural sector (54.05%) in comparison to urban sector (46.30%). While on non-food items, percentage expenditure was higher in urban sector (53.71%) in comparison to rural sector (45.95%). Milk & milk product items constitute the major part of food items in both sectors. The expenditure on milk & milk product was higher in rural sector (25.06%) as comparison to urban sector (16.09%). The expenditure on beverages was more in urban sector (4.07%) in comparison to rural sector (2.72%). The expenditure on cereals and pulses was more in rural sector (12.14%) in comparison to urban sector (11.22%). As far as non-food items are concerned, the maximum share to total expenditure in rural area was on Fuel & Light (12.34%) and in urban area it was found to be in miscellaneous goods and services (21.59%) of the State.

3.13 Per capita consumption and value of cereals:

Table 3.13 and graph 18 shows the per capita consumption of cereals over a period of 30 days in rural and urban sectors of the State.

Table 3.13 Per capita consumption of cereals over a period of 30 days

Sector	Per capita consumption (Kg. 0.000) of cereals							
	Rice	Wheat	Bajra	Maize	Barley	Other Cereals	Total Cereals	Gram
Rural	0.54	9.15	0.13	-	0.01	-	9.83	0.02
Urban	0.74	8.97	0.01	0.01	-	-	9.73	0.06

The above table reveals that the average per capita monthly consumption of cereals was 9.83 Kg. in the rural sector and 9.73 Kg. in the urban sector. Wheat is the major cereal item of consumption both in rural and urban area. It means that the people of Haryana consumed more wheat in comparison to any other cereal. The rural population also consumed more Bajra & Barley in comparison to urban population. The consumption of gram was also very low. Only 2 Gms. was consumed per person per month in the rural sector and 6 Gms. for the urban sector.

Table 3.14 and graph 19 shows the per capita value of consumption of cereals over a period of 30 days in rural and urban sectors of the State.

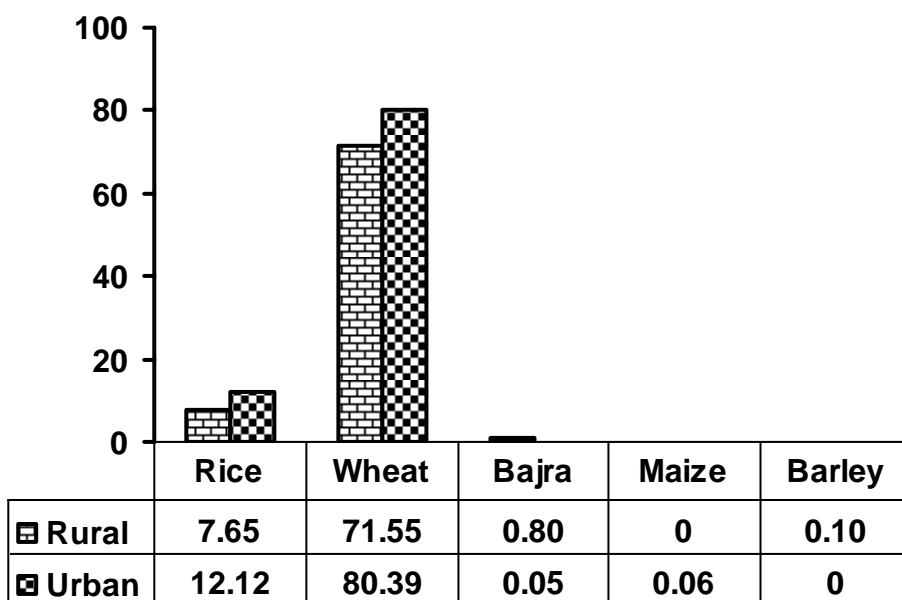

Table 3.14 Per capita values of consumption of cereals over a period of 30 days

Sector	Per capita value (Rs.0.00) of consumption of cereals						
	Rice	Wheat	Bajra	Maize	Barley	Total Cereals	Gram
Rural	7.65	71.55	0.80	0.00	0.10	80.10	0.69
Urban	12.12	80.39	0.05	0.06	-	92.62	1.68

Graph 18 : Per capita consumption (Kg.) of cereals

Graph 19 : Per capita values (Rs.) of consumption of cereals

The value of average monthly consumption of cereals per person was around Rs. 80 for rural sector and Rs. 93 for the urban sector. It is evident from the above table that the per capita values of consumption of cereals in urban sector were higher than that in rural sector. Although per capita consumption of cereals was less in urban sector in comparison to rural sector. It concludes that the cereals are cheaper in rural sector in comparison to urban sector.

3.14 State-wise MPCE:

State-wise MPCE in respect of States including Haryana is given in table 3.15 and graphs 20 and 21 represent the data of other states pertains to central sample of 62nd round.

Table 3.15 State-wise Monthly Per Capita Expenditure

Sr. No.	States	MPCE (Rs.)	
		Rural	Urban
1.	Andhra Pradesh	704	1304
2.	Assam	626	1352
3.	Bihar	465	684
4.	Gujarat	684	1105
5.	Haryana Central Sample	743	1156
	State Sample	816	1029
6.	Himachal Pradesh	896	1686
7.	Jammu and Kashmir	819	1258
8.	Karnataka	573	1154
9.	Kerala	1056	1566
10.	Madhya Pradesh	487	982
11.	Maharashtra	697	1342
12.	Orissa	460	900
13.	Punjab	1010	1520
14.	Rajasthan	701	1004
15.	Tamil Nadu	688	1171
16.	Tripura	510	1185
17.	Uttar Pradesh	570	908
18.	West Bengal	583	1233
19.	Jharkhand	469	1093
20.	Chhatisgarh	429	1214
	All India	625	1171

The perusal of the above table shows that Kerala occupied 1st position in rural and Himachal Pradesh occupied 1st position in urban areas. Haryana occupied 5th position in rural areas. In urban areas, Haryana occupied 12th position. The data of Haryana in graphs 20 and 21 relates to State Sample.

Graph 20 : State-wise MPCE (Rural)

Graph 21 : State-wise MPCE (Urban)

3.15 Food availability status:

The table given below reveals that the proportion of chronically hungry (not getting enough to eat even some months of the year) households was estimated as nil in rural as well as urban sector of the Haryana. The seasonal hunger (getting enough to eat for only some months of the year) was also estimated as nil in both sectors.

Table 3.16 Per 1000 distribution of households by food availability status sector-wise.

Sector	Per 1000 of households getting enough food			
	Through out the year	Only some months of the year	No	All
Rural	1000	0	0	1000
Urban	1000	0	0	1000

The results of above table conclude that the people of Haryana were getting enough food to eat through out the year. It means that there is no shortage of food in Haryana.

CHAPTER -4

EXECUTIVE SUMMARY

The following are the main highlights of the survey conducted during NSS 62nd round carried out during July, 2005 to June, 2006.

A. DEMOGRAPHIC FEATURES:

- Estimated numbers of households in Haryana was about 38.08 lakh, and out of which 25.88 lakh were in rural and 10.41 lakh in urban areas.
- Average household size in rural, urban and Haryana worked out to 4.9, 4.5 and 4.8 persons per household respectively.
- Of the total persons, 27.2% belong to Scheduled Caste, 19.6% Other Backward Classes and 53.2% to other social groups.
- Occupational distribution of the rural households revealed that, 15.5% were self employed in non-agriculture, 44.0% self employed in agriculture, 20.1% Agriculture labour, 13.5% other labour and 6.9% others.
- Occupational distribution of the urban households revealed that, 31.2% were self employed, 38.1% regular wage, 13.6% casual labour and 17.1% others.
- 74.1% of the population in the age group 7 years and above were literate with different levels of education attainment.
- Out of total literates in the age group 7 years and above, 16.5% attained Primary level education, 19.0% Middle level, 13.3% Secondary level, 6.3% Higher secondary level, 3.4% diploma & graduate and Post Graduate & above 1.6%.
- 84.1% of males and 62.09% of females in Haryana were literate in the age group 7 years and above.

B. ASPECTS OF LIVING CONDITIONS :

- In rural sector, 74.2% households were using Firewood & chips, 18.4% LPG, 7.4% Dung Cake as the primary source of energy for their cooking.
- In urban sector, 79.0% households were using LPG, 11.8% Firewood and chips, 4.1% Kerosene, 3.1% Dung cake, 2.0% others as the primary source of energy for their cooking.
- The electricity was being used by 92.1% households in rural areas and 93.4% households in urban areas.
- About 99.7% and 81.9 % households were residing in owned house in rural and urban sector respectively.
- About 83.2% and 91.7 % households were residing in pucca house in rural and urban sector respectively.

C. CONSUMER EXPENDITURE:

- Average per capita monthly consumer expenditure was worked out to Rs. 873. Out of this Rs. 450(51.5%) was spent on food items and Rs. 423(48.5%) on non-food items.

- For rural sector, average MPCE of Rs. 816 comprised Rs. 441 for food and Rs. 375 for non-food articles.
- For urban sector, average MPCE of Rs. 1029 comprised Rs. 476 for food and Rs. 553 for non-food articles.
- Per Capita monthly consumption of cereals in rural and urban areas was 9.47 Kgs. and 9.05 Kgs respectively.
- Average value of cereals consumed per person per month was Rs. 80.10 in rural areas and Rs. 92.62 in urban areas.
- Average monthly consumer expenditure per family was estimated as Rs. 4190.
- No chronically hungry household (not getting enough to eat even some months of the year) was found in rural as well as urban areas of Haryana. The seasonal hunger (getting enough to eat for only some months of the year) household was also estimated as nil in both sectors during 2006.

LIST OF TABLES

- 3.1 Demographic differences between rural and urban Haryana.
- 3.2 Percentage and estimated number of persons (in 00) by social group-wise.
- 3.3 Percentage distribution of households by household type.
- 3.4 Percentage distribution of persons by education level for the age group of 7 years & above.
- 3.5 Percentage distribution of rural households by size class of land possessed.
- 3.6 Per 1000 distribution of households by occupancy status of the dwelling unit sector-wise.
- 3.7 Per 1000 distribution of households by covered area of dwelling unit.
- 3.8 Percentage distribution of households by structure type of dwelling unit.
- 3.9 Percentage distribution of households by primary source of energy for cooking.
- 3.10 Percentage distribution of households by primary source of energy for lighting.
- 3.11 Average per capita/household monthly consumer expenditure.
- 3.12 Percentage distribution of MPCE according to broad groups of food & non-food items.
- 3.13 Per capita Consumption of cereals over a period of 30 days.
- 3.14 Per Capita value of consumption of cereals over a period of 30 days.
- 3.15 State-wise Monthly Per Capita Expenditure.
- 3.16 Per 1000 distribution of households by food availability status sector-wise.

LIST OF GRAPHS

1. Percentage distribution of persons by social group-wise (Rural).
2. Percentage distribution of persons by social group-wise (Urban).
3. Percentage distribution of persons by household type (Rural).
4. Percentage distribution of persons by household type (Urban).
5. Percentage distribution of persons by education level for age group 7 years & above (Rural).
6. Percentage distribution of persons by education level for age group 7 years & above (Urban).
7. Percentage distribution of households by occupancy status of the dwelling unit (Rural).
8. Percentage distribution of households by occupancy status of the dwelling unit (Urban).
9. Percentage distribution of households by type of structure (Rural).
10. Percentage distribution of households by type of structure (Urban).
11. Percentage distribution of households by primary source of energy for cooking (Rural).
12. Percentage distribution of households by primary source of energy for cooking (Urban).
13. Percentage distribution of households by primary source of energy for lighting (Rural).
14. Percentage distribution of households by primary source of energy for lighting (Urban).
15. Per capita monthly consumer expenditure sector-wise.
16. Percentage composition of consumer expenditure (Rural).
17. Percentage composition of consumer expenditure (Urban).
18. Per Capita Consumption (kg.) of cereals.
19. Per Capita values (Rs.) of consumption of cereals.
20. State-wise MPCE (Rural).
21. State-wise MPCE (Urban).

APPENDIX – A

DETAILED TABLES

**Table 1(R) : Distribution of households and persons by MPCE class and number of adults and children
By sex per thousand households in different MPCE classes.**

No. of sample Villages/Blocks : 112

MPCE Class	No. of Households per 1000 Households	No. of persons per 1000 persons	No. of persons per 1000 households				Sex Ratio	Estd. No. of persons (00)	Sample No. of hhs

APPENDIX – B

SCHEDULE ON CONSUMER EXPENDITURE 1.0

RURAL			CENTRAL	
URBAN			STATE	

GOVERNMENT OF INDIA

**NATIONAL SAMPLE SURVEY ORGANISATION
SOCIO-ECONOMIC SURVEY
SIXTY-SECOND ROUND : JULY 2005 – JUNE 2006**

SCHEDULE 1.0: CONSUMER EXPENDITURE

[0] descriptive identification of sample household	
1. state/u.t.:	5. hamlet name:
2. district:	6. ward/inv. unit/block:
3. tehsil/town:	7. name of head of household:
4. village name:	8. name of informant:

[1] identification of sample household							
item no.	item	code			item no.	item	code
1.	srl. no. of sample village/ block				11.	sub-sample	
2.	round number	6		2	12.	FOD sub-region	
3.	schedule number	0	1	0	13.	segment number (1/2)	
4.	sample (central-1, state-2)						
5.	sector (rural-1, urban-2)				14.	second-stage stratum	
6.	state-region				15.	sample household number	
7.	district				16.	srl. no. of informant (as in col.1, bl. 4)	
8.	stratum				17.	response code	
9.	sub-stratum				18.	survey code	
10.	sub-round				19.	reason for substitution of original household (code)	

CODES FOR BLOCK 1

item 17: response code : informant: co-operative and capable -1, co-operative but not capable -2, busy -3, reluctant - 4, others - 9

item 18: survey code: original - 1, substitute - 2, casualty - 3

item 19: reason for substitution of original household : informant busy -1, members away from home -2, informant non-cooperative -3, others - 9

** tick mark (S) may be put in the appropriate place.*

[2] particulars of field operations												
Sl. No.	Item	investigator/ senior investigator			senior investigator/ superintendent			superintendent/ senior superintendent				
(1)	(2)	(3)			(4)			(5)				
1.	(i) name (block letters)											
	(ii) code											
2.	date(s) of :	DD	MM	YY	DD	MM	YY	DD	MM	YY		
	(i) survey/inspection											
	(ii) receipt											
	(iii) scrutiny											
	(iv) despatch											
3.	number of additional sheets attached											
4.	total time taken to canvass schedule 1.0 (in minutes)											
5.	Signature											

[13] remarks by investigator/ senior investigator												

[14] Comments of supervisory officer(s)												

[3] household characteristics										
1. household size							9. type of dwelling (code) (<i>independent house —1, flat —2, others —9, no dwelling —3</i>)			
2. principal industry (NIC-2004)	description					10. type of structure (code)				
	code (5-digit)					11. covered area (sq. m.: whole number)				
3. principal occupation (NCO-1968)	description					primary source of energy for		12. cooking (code)		
	code (3 -digit)							13. lighting (code)		
4. household type (code)							14. monthly per capita expenditure (Rs.0.00) [item 37, bl. 12]			
5. religion (code)										
6. social group (code)							15. did the household perform any ceremony during the last 30 days? (yes —1, no —2)			
7. land possessed (code)							16. no. of meals served to non-household members during the last 30 days			
8. dwelling unit (code) (<i>owned —1, hired—2, no dwelling unit —3, others —9</i>)							17. did the household purchase any cereal from ration/ fair price shop during the last 30 days? (yes —1, no —2)			

CODES FOR BLOCK 3

Item 4 : household type : for rural areas: self-employed in non-agriculture-1, agricultural labour-2, other labour-3, self-employed in agriculture-4, others-9 for urban areas: self-employed-1, regular wage/salary earning-2, casual labour-3, others-9

Item 5 : religion : Hinduism-1, Islam-2, Christianity —3, Sikhism-4, Jainism-5, Buddhism-6, Zoroastrianism-7, others-9

Item 6 : social group : scheduled tribe-1, scheduled caste-2, other backward class-3, others-9

Item 7 : land possessed (class intervals in hectares):

<i>less than 0.005.....</i>	<i>01</i>	<i>2.01 — 3.00</i>	<i>07</i>
<i>0.005 - 0.01</i>	<i>02</i>	<i>3.01 - 4.00</i>	<i>08</i>
<i>0.02 - 0.20</i>	<i>03</i>	<i>4.01 — 6.00</i>	<i>10</i>
<i>0.21 - 0.40</i>	<i>04</i>	<i>6.01 - 8.00</i>	<i>11</i>
<i>0.41 - 1.00.....</i>	<i>05</i>	<i>greater than 8.00</i>	<i>12</i>
<i>1.01 - 2.00</i>	<i>06</i>		

Item 10 : type of structure: pucca-1, semi-pucca-2, serviceable katcha —3, unserviceable katcha —4, no structure-5

Item 12 : primary source of energy for cooking : coke, coal and charcoal -1, firewood and chips-2, LPG-3, gobar gas-4, dung cake-5, kerosene-6, electricity-7, others-9, no cooking arrangement-8

Item 13 : primary source of energy for lighting : kerosene-1, other oil —2, gas-3, candle-4, electricity-5, others-9, no lighting arrangement-6

Note: 1 acre = 0.4047 hectare; 1 sq. metre= 10.76 sq. feet
