## PREFACE

The present report relates to the annual series on "Family Budgets of Cultivators in Haryana" and it refers to the agricultural year 2001-02 (July,2001 to June,2002). It contains a comprehensive analysis of family budgets of 81 selected cultivator households.

The study attempts to provide a comprehensive analysis of cultivator's household income and expenditure. It also highlights in detail their sources of income, dietary habits, consumption pattern and availability of goods obtained from farm and procured from market.

The study inter-alia reveals an average annual income per household of Rs.1,38,072 and expenditure of Rs.1,12,347 leaving an annual surplus of Rs.25,725 during 2001-02. The main source of household income was farm cultivation which contributed as much as 47.55% of the household income. A major portion i.e. 45.83% of the total expenditure was incurred on food items whereas the remaining 54.17% accounted for non-food items.

The report has been prepared by Smt. Bimla Devi Panchal, Research Officer with the assistance of Smt. Sushma Kapoor, Field Assistant, Sh. Shamsher Singh, Junior Field Investigator and Smt. Prem Lata, Junior Scale Stenographer under the supervision of Sh. B.S. Yadav, Deputy Economic and Statistical Adviser and overall guidance of Sh. R.K Bishnoi, Additional Economic and Statistical Adviser.

I hope this report will prove useful to planners, policy makers, sociologists and administrators who are interested in socio-economic development of the cultivators.

I thank all the selected cultivators of Haryana for maintaining the requisite information on voluntary basis and District Statistical Officers in the State for undertaking the work of scrutiny of records pertaining to day-to-day agricultural operations as maintained by the cultivators.

## **CHAPTER -I**

### **INTRODUCTION**

#### **1.0 General**

The present report relates to the annual series on "Family Budgets of Cultivators in Haryana 2001-02" and it is a comprehensive study of budget accounts of 81 selected cultivators spread throughout the state and was undertaken with a view to study their source of income, pattern of household expenditure and domestic consumption. The cultivating families whose budgets have been studied here were the same as those covered under the study on "Economics of Farming in Haryana 2001-02".

#### **1.1 Objectives of the study**

The objectives of the study are as under:-

- i) To find out the extent of contribution by different sources to household income.
- ii) To study the pattern of their domestic expenditure.
- ii) To find out the proportion of consumption of goods produced at farm and of those procured from outside.
- iii) To examine the dietary habits of cultivators and their overall standard of living.
- v) To study the impact of the size of holdings on income and expenditure.

#### **1.2 Methodology and sampling technique**

To carry out the main study i.e. "Economics of Farming in Haryana" 161 holdings were selected from different agro-climatic zones of the state. Out of these 161 households, 81 were selected for conducting the study on "Family Budgets of Cultivators in Haryana" keeping in view the size of holdings, willingness and capability of the cultivators in maintaining the day-to-day record of their income and domestic expenditure in the prescribed format. The results extracted in this study are purely indicative in nature and may not represent the actual situation prevailing in the state because the size of sample is very small.

The study is based on the data collected from selected cultivators through District Statistical Officers of the respective district. The selected cultivators were improved necessary training in recording the necessary data. Each cultivator was given

an incentive Rs.110/- per annum as an honorarium for recording the data on income and expenditure of the household in the prescribed schedules. To ensure proper recording and accuracy of data, timely supervision was done by the staff of Headquarter and District Statistical Agencies.

### **1.3 Reference period**

The study was conducted in the agricultural year 2001-02 i.e from 1<sup>st</sup> July, 2001 to 30<sup>th</sup> June, 2002.

### **1.4 Presentation of the report**

Chapter -I of the report on " Family Budgets of Cultivators in Haryana 2001-02" is introductory and provides details about its objectives, sampling technique and methodology adopted and reference period.

Chapter-II deals with various sources of income of selected cultivators i.e. income from farm cultivation, milk and milk products, interest on capital investment and miscellaneous sources. To assess the impact of size of holding on the income of the households, the income from each source has also been classified according to different size of holdings.

Chapter-III contains information pertaining to household expenditure on food as well as non-food items and quantity of various items consumed by the households during the year. The cost of production of milk per quintal has also been worked out for buffaloes and cows separately alongwith the pattern of disposal of milk. The data pertaining to possession of household assets has been analysed to throw light on the level of living standard of the selected cultivator families.

Chapter-IV Indicates the main findings of the report. The household-wise details have been presented in appendices attached with the report.

## CHAPTER-II

### Sources of Income of Cultivators

#### **General**

Haryana is predominantly an agricultural state. Introduction of improved technology to the field of agriculture has encouraged the Haryana cultivators to adopt latest farm practices, thus enabling them to increase their farm yield per hectare as well as incomes. To augment the earnings, the cultivators have also diversified their economic activities into dairy farming, poultry and other small enterprises. The present chapter highlights the various sources of income of selected farming households.

#### **2.1 Household size**

The family size of the selected cultivators under study varied considerably. It ranged from 2 to 20 members. The average size of family was, however, 7.81. Since this simple average does not provide a true picture of household size as it gives equal weight to the Children and Women. Therefore, the Atwator's scale of Adult Male Unit (Appendix -II) has been applied to work out of family size of the cultivators. In common parlance, Children and Women do not equalize male adult and are, therefore, to be reduced to adult male units in order to ascertain their real capacity of earn and spend. This Conversion is universally applied in National Sample Survey and other allied surveys conducted through out the country. According to the "Atwator's Scale of Adult Male Unit of the Chinese Farm Economy by Buck", the average size of family worked out to 6.35. The data regarding number of household and household members was collected from the cultivators and is shown in Table 2.1.

**Table 2.1 Number of households and household members according to size of holdings**

Sr.No	Size of Holdings (Hectares)	Total number of			Average member per household male	Average adult unit household
		Households	Members	Adult male unit		
1	2	3	4	5	6	7
1.	Below 2.0	19	127	102.9	6.68	5.42
2.	2.0-4.0	31	217	175.5	7.00	5.66
3.	4.0-7.5	27	240	196.4	8.89	7.27
4.	7.5-10.0	2	32	25.2	16.00	12.60
5.	10.0 & Above	2	17	14.2	8.50	7.10
Total		81	633	514.2	7.81	6.35

The above table reveals that average member per household of 81 selected families was 7.81. The maximum number of members per family was 16.00 falling in the range of holdings i.e. 7.5-10.0 hectares. The minimum number of members per family was 6.68 in the lowest group of below 2.0 hectares.

## 2.2 Sources of income

The different sources of income of cultivators have been classified into following four broad categories:-

- i) Farm cultivation.
- ii) Milk and milk products.
- iii) Interest on capital investment (It includes farm equipments and machinery, farm and residential buildings, milch animals and durable household goods).
- iv) Income from miscellaneous sources such as rent received from leased out land, remittances received from outside, imputed value of fuel, wood and dung cakes, sale of farm yard manure and income from sources other than farm cultivation, etc.

## 2.3 Net Income of selected cultivators

The source-wise average annual net income per household, per capita and per adult male unit is presented in Table 2.3.

**Table 2.3 Net Income of selected cultivators**

(In Rs.)

Sr. No.	Source	Total income (All households)	Household	Average income per Capita	Average income per Adult male unit
1	2	3	4	5	6
1.	Farm cultivation	5317220 (47.55)	65645	8400	10341
2.	Milk & milk products	860981 (7.70)	10629	1360	1674
3.	Income from capital investment	2039239 (18.23)	25176	3222	3966
4.	Miscellaneous*	2966371 (26.52)	36622	4686	5769
	Total	11183811 (100.00)	138072	17668	21750

Note: Figures in brackets indicate the percentages to the total.

\*Miscellaneous includes items such as remittances received from outside, income from leased out land, family labour, rent & pension, etc.

It may be observed from the above table that the main source of income of farming families during 2001-2002 was farm cultivation which accounted for 47.55% of their total income. The contribution of the other three sources i.e. (i) Miscellaneous (ii) Interest on capital investment and (iii) Milk and Milk products was 26.52, 18.23 and 7.70 percent respectively. The average annual income per family, per capita and per adult male unit during 2001-2002 worked out to Rs. 1,38,072, Rs. 17,688 and Rs. 21,750 respectively. The source-wise analysis of income of the cultivators are given below:-

#### 2.4 Net Income from farm cultivation

The net income from farm cultivation has been worked out after taking into account gross income and the expenditure on various items of input like hired manual labour, bullock labour, seeds, fertilizers, implements/machinery and tubewells/pumping sets etc. Table 2.4 gives in brief the gross income, total expenditure and net income of selected cultivators.

**Table 2.4 Income from farm cultivation**

(In Rs.)

Sr. No.	Items	Total farm income (All families)	Average farm income per		
			Household	Capita	Adult male unit
1	2	3	4	5	6
1.	Gross Income	10431803	128788	16480	20287
2.	Total Expenditure	5114583	63143	8080	9946
3.	Net Income	5317220	65645	8400	10341

Inferences can be drawn from the above table that the average net farm income per household, per capita and per adult male unit was worked out to Rs.65645, Rs.8400 and Rs.10341 per annum, respectively.

#### 2.4 (a) Income from farm cultivation and size of holdings

In order to assess the impact of size of holdings on the annual farm income of a household, the size-wise average income per household, per capita and per adult male unit were also worked out. The details in this regard is presented in Table 2.4 (a).

**Table 2.4 (a)Income from farm cultivation (Size-wise)**

(In Rs.)

Size of holdings (Hectares)	Total farm income	Average net income per		
		Household	Capita	Adult male unit
1	2	3	4	5
Below 2.0	506245	26644	3986	4920
2.0-4.0	1701165	54876	7839	9693
4.0-7.5	2527298	93604	10530	12868
7.5-10.0	243087	121544	7596	9646
10.0 & above	339425	169713	19966	23903
Total	5317220	65645	8400	10341

It will be seen from the above table that the average income per household from farm cultivation for the households belonging to the size group of below 2.0 hectares was minimum (Rs. 26644) whereas the maximum average income (Rs.169713) was recorded in the size group of 10.0 hectares & above. The average per

capita income was lowest (Rs. 3986) in the size group of below 2.0 hectares and it was highest (Rs. 19966) in the size group of 10.0 hectares and above.

### 2.5 Income from milk and milk products

Dairying was another important source of income. The total income accrued from milk and milk products was worked out to Rs. 860981 during agricultural year 2001-02. The following table indicates the total number of milch animals owned, milk produced and the income accrued therein.

**Table 2.5 Average number of milch animals owned, milk produced and income accrued.**

Sr.No.	Item No.	Cows	Buffaloes	Cows and Buffaloes	Without Milch Animals	Total
1	2	3	4	5	6	7
1.	No.of households	4	61	15	1	80
2.	Total number of milch animals	7	83	38	-	128
3	Total milk produced (Qtls)	76.62	1334.86	517.03	-	1928.51
4.	Milk produced per annum per household (Qtls)	19.16	21.88	34.47	-	24.11
5	Total income from milk & milk products (Rs.)	90880	1564744	548750	-	2204374
6.	Total expenditure on maintenance of milch animals (Rs.).	68650	866653	408090	-	1343393
7.	Net Income (Rs.)	22230	698091	140660	-	860981
8.	Net income per household (Rs.)	5558	11444	9377	-	10629

Table 2.5 shows that the cultivators normally prefer to keep buffaloes for milk production because they yield more milk as compared to cows. The cows were mainly kept for the purpose of supplying male calves to be ultimately used as bullocks in the fields. The annual milk production of all 128 milch animals possessed by 80 households was 1928.51 Qtls. worth value of Rs. 22,04,374 and the milk produced per

annum per family was 24.11 Qtls. The net income per household from milch animals after meeting out all the maintenance expenditure on milch animals was Rs.10629.

### 2.5 (a) Income from milk production

The total income from milk production of all the selected households has further been classified according to size of holdings to find out the correlation between the income from milk production and the size of holding pertaining to a household. This has been shown in the following Table:-

**Table 2.5 (a) Income from milk production according to size of holdings**

(In Rs.)

Size of holdings (Hectares)	Total income (All families)	Average income per		
		Household	Capita	Adult male unit
1	2	3	4	5
Below 2.0	159828	8412	1258	1553
2.0-4.0	324586	10471	1496	1849
4.0-7.5	316628	11727	1319	1612
7.5-10.0	29484	14742	921	1170
10.0 & above	30455	15228	1791	2145
Total	860981	10629	1360	1674

Table 2.5 (a) reveals that the minimum average income from milk production per household was Rs 8412 in the size group of below 2.0 hectares which rose to the maximum of Rs.15,228 in the size group of 10.0 hectares and above. The table further shows that the average income from milk production per household, per capita and per adult male unit has been worked out to Rs.10629, Rs.1360 and Rs.1674, respectively during the year 2001-02.

### 2.6 Income from capital investment

The annual income of the selected households accrued from capital investment was 18.23%. The imputed income by way of interest @ 12.5% per annum from capital investment on items such as milch and drought animals, farm equipment and machinery, farm and residential buildings, cattlesheds, wells, tubewells & pumping sets, and durable goods is given in table 2.6.

**Table 2.6 Imputed Income from capital investment**

(In Rs.)

Item	Total income ( All households)	Percentage to total	Average income per household
1	2	3	4
A- Animals			
i) Milch	172703	8.47	2132
ii) Drought	12568	0.61	155
B- Farm equipment and Machinery	659230	32.33	8139
C- Farm and residential Buildings	596873	29.27	7369
D- Sheds for animals			
i) Milch	120960	5.93	1493
ii) Drought	6885	0.34	85
E- Wells , Tubewells & Pumping-sets	188995	9.27	2333
F- Others (durable goods)	281025	13.78	34.69
Total	2039239	100.00	25176

The average imputed income per household during 2001-02 from capital investment was Rs. 25,176. The major contribution of 32.33% was from farm equipment and machinery followed by farm and residential buildings 29.27%, milch and drought animals 9.08%, sheds for animals 6.27% and wells, tubewells & pumping sets 9.27% and 13.78% on durable goods.

### 2.6 (a) Income from capital investment according to size of holdings

To assess the impact of size of holdings on capital formation, the total imputed income from capital investment has been further classified according to various size of holdings in Table 2.6 (a).

**Table 2.6 (a) Income from capital investment (Size-wise )**

(In Rs.)

Size of holdings (Hectares)	Total income farm capital investment	Average income per		
		Household	Capita	Adult male unit
1	2	3	4	5
Below 2.0	154270	8119	1215	1499
2.0-4.0	766558	24728	3533	4368
4.0-7.5	963851	35698	4016	4908
7.5-10.0	53734	26867	1679	2132
10.0 & above	100826	50413	5931	7100
Total	2039239	25176	3222	3966

The above table reveals that the average income per household, per capita and per adult male unit from capital investment was Rs.25176, Rs.3222 and Rs.3966, respectively. It may also be observed that the lowest average income of Rs.8119 per household was recorded in the size group of below 2.0 hectares and the highest of Rs.50413 was registered in the size group of 10.0 & above hectares.

## 2.7 Income from miscellaneous sources

The contribution of miscellaneous sources to the total income of cultivators was 26.52 percent. The income from miscellaneous sources has been classified into nine different occupations such as remittances received from outside, income from leased out land, fuel, rent, manure and pension etc. The details are presented in Table 2.7.

**Table 2.7      Income from miscellaneous sources**

( In Rs.)

Sr.No.	Item	Income	
		All households	Per household
1	2	3	4
1.	Remittances received from outside	1687785 (56.90)	20837
2.	Income from leased out land etc.	20500 (0.69)	253
3.	Fuel	115350 (3.89)	1424
4.	Rent	75600 (2.55)	933
5.	Manure	54250 (1.83)	670
6.	Honorarium for keeping records of Economics of Farming and Family Budgets.	27135 (0.91)	335
7.	Income from family labour	429400 (14.47)	5301
8.	Pension	536910 (18.10)	6505
9.	Others (gardening, poultry, piggery, lottery, dowry gifts and services, etc.)	19491 (0.66)	240
Total		2966371 (100.00)	36622

Table 2.7 indicates that the total income from miscellaneous sources amounted to Rs.29,66,371. An average income of a family from this source was Rs. 36,222..The highest contribution of 56.90% came from remittances received from outside followed by 18.10% income from pension, 14.47% family labour, 4.09% from fuel and, 2.55% from rent etc. The remaining contribution of 3.7 9% was from leased out land, manure, honorarium for keeping records of farm accounts and family budgets and other sources.

#### 2.7 (a)    Income from miscellaneous sources according to size of holdings

In order to study the effect of size of holdings of a household on its income from miscellaneous sources, the total income from this source has further been classified in table 2.7 (a).

**Table 2.7 (a) Income from miscellaneous sources (size-wise)**

(In Rs.)

Size of holdings (Hectares)	Total Income from miscell- aneous sources	Average income per		
		Household	Capita	Adult male unit
1	2	3	4	5
Below 2.0	794421	41812	6255	7720
2.0-4.0	911560	29405	4201	5194
4.0-7.5	1066720	39508	4445	5431
7.5-10.0	100020	50010	3126	3969
10.0 & above	93650	46825	5509	6995
Total	2966371	36622	4686	5769

Table 2.7 (a) depicts that the highest average income of Rs.50010 per household from miscellaneous sources was observed in the size group of 7.5-10.0 hectares whereas it was lowest of Rs.29405 in the size group of 2.0-4.0 hectares. However, the average income per household, per capita and per adult male unit worked out to Rs. 36622, Rs.4686 and Rs.5769, respectively.

## 2.8 Income of cultivators from all sources and size of holdings

The analysis made in the foregoing table reveals that the size of holdings has a significant effect on the income of the cultivators. Generally, the average income of cultivators increases with the increase in the size of holdings because farmers with large holdings follow better agricultural practices and can afford a better package of inputs. The details of income of cultivators according to size of holdings are given in Table 2.8.

**Table 2.8 Income of cultivators according to size of holdings from all sources  
( In Rs.)**

Size of holdings (Hectares)	No.of holding	Total income (All families)	Average income per		
			Household	Capita	Adult male unit
1	2	3	4	5	6
Below 2.0	19	1614764	84988	12715	15693
2.0-4.0	31	3703869	119480	17069	21105
4.0-7.5	27	4874497	180537	20310	24819
7.5-10.0	2	42635	213163	13323	16918
10.0 & above	2	564356	282178	33177	39743
Total	81	11183811	138072	17668	217502

It is observed from the above table that the average income of a selected family in the size group of below 2.0 hectares was Rs. 84988 while it progressively increased to Rs.119480 in holdings 2.0-4.0 hectares, Rs. 1,80,537 in holdings of 4.0-7.5 hectares and Rs.21,3163 in holdings of 7.5-10.0 hectares, and Rs. 282178 in the size group of 10.0 hectares & above which was about 3.32 times higher than the income of Rs. 84988 in the holding size of below 2.0 hectares. The table further shows that the total per capita and per adult male unit was observed Rs.17668 and 21750, respectively during the year 2001-02.

**CHAPTER-III**  
**Household Expenditure of Cultivators**

**General**

3.0 This chapter deals with the household expenditure incurred by selected cultivators during 2001-2002. It throws light on the expenditure made on food and non-food items, sources of supply of items annual and daily consumption of food, input and output of milk production and their consumption, size of holdings of cultivators and overall financial position of the selected cultivators. The detailed study of the household expenditure of cultivators has been made under the twelve major heads.

**3.1 Household expenditure of selected cultivators**

The household expenditure per family, per capita and per adult male unit under the below mentioned heads is shown in Table 3.1.

**Table 3.1 Household expenditure of selected cultivators**

(In Rs.)

Sr.. No.	Items	Total expenditure	Expenditure per		
			Household	Capita	Adult male unit
1	2	3	4	5	6
1.	Food	4170243 (45.83)	51484	6588	8110
2.	Fuel	429391 (4.72)	5301	678	835
3.	Clothing	1069992 (11.76)	13210	1690	2081
4.	Housing	823043 (9.04)	10161	1300	1601
5.	Lighting	265402 (2.92)	3277	419	516
6.	Health	351416 (3.86)	4338	555	683
7.	Transport	343576 (3.78)	4242	543	668
8.	Marriage & Social Ceremonies	979120 (10.76)	12088	1547	1904
9.	Education	466435 (5.12)	5758	737	907
10.	Religious ceremonies	91402 (1.00)	1128	144	178
11.	Recreation	46103 (0.51)	569	73	90
12.	Others (Litigation Charges, House & Chowkidar Taxes, Fees & Fines etc.)	64018 (0.70)	790	101	124
	Total	9100141 (100.00)	112347	14376	17698

Note: Figures in brackets indicate percentages to total expenditure.

It is seen from Table 3.1 that the average annual expenditure per household, per capita and per adult male unit was Rs.112347, Rs.14376 and Rs.17698, respectively. Analysis of total expenditure shows that the food claimed the highest expenditure i.e. 45.83% of the household expenditure followed by clothing 11.76%, marriage & social ceremonies 10.76%, housing 9.04% education 5.12%, fuel 4.72% Health 3.86% and transport 3.78%, etc. The expenditure on basic necessities of life i.e. "Roti, Kapra and Makan" accounted for 71.35% of the total household expenditure.

### 3.2 Expenditure of households according to size of holdings

The distribution of expenditure per family, per capita and per adult male unit under different size of holding is presented in the table given below :-

**Table 3.2 Expenditure per household, per capita and per adult male unit under different size of holdings.**

(In Rs.)

Size of holdings (Hectares)	All households 1	Expenditure per		
		Household 2	Capita 3	Adult male unit 4
Below 2.0	1273839	67044	10030	12379
2.0-4.0	3018213	97362	13909	17198
4.0-7.5	4014923	148701	16729	20443
7.5-10.0	343021	171511	10719	13612
10.0 & above	450145	225073	26479	31700
Total	9100141	112347	14376	17698

The above table shows that the size of holding has a great impact on the expenditure of cultivators. The average expenditure of a family with land holding 10.0 hectares and above was the highest (Rs. 225073). The lowest per family expenditure was recorded under the size group of below 2.0 hectares (Rs.67044).

### 3.3 Sources of availability of household items

The value and proportion of the household expenditure on goods and services procured from farm and purchased from outside are presented in Table 3.3.

**Table 3.3 Value and proportion of household expenditure on goods and services procured from farm and purchased from outside**

(In Rs.)

Sr.No.	Item	Total expenditure of all families	Expenditure on items	
			Produced from own farm	Purchased from outside
1	2	3	4	5
1.	Food	4170243 (45.83)	2606763 (62.50)	1563480 (37.50)
2.	Fuel	429391 (4.72)	288990 (67.30)	140401 (32.70)
3.	Clothing	1069992 (11.76)	-	1069992 (100.00)
4.	Housing	823043 (9.04)	-	823043 (100.00)
5.	Lighting	265402 (2.92)	-	265402 (100.00)
6.	Health	351416 (3.86)	-	351416 (100.00)
7.	Transport	343576 (3.78)	-	343576 (100.00)
8.	Marriage & Social ceremonies	979120 (10.76)	-	979120 (100.00)
9.	Education	466435 (5.12)	-	466435 (100.00)
10.	Religious ceremonies	91402 (1.00)	-	91402 (100.00)
11.	Recreation and Other amenities	46103 (0.51)	-	46103 (100.00)
12.	Others	64018 (0.70)	-	64018 (100.00)
Total		9100141 (100.00)	2895753 (31.80)	6204388 (68.20)

Note: Figures in brackets indicate percentages to total.

The above table reveals that the bulk of cultivator's household requirements (68.20%) were met from the goods and services purchased from outside while the household requirements met from the goods produced at their farms constituted 31.80 percent. The table further shows that 63% and 67% requirements of food and fuel were met from his own farm respectively. For the remaining items, the farmers were totally dependent on outside sources.

The above table also highlights the fact that food, clothing and shelter, the three basic necessities on life accounted for 71.35% of the household total expenditure of the cultivators. The expenditure of the health and education was minimal i.e. 3.86% and 5.12%, respectively.

### 3.4 Expenditure on food items

45.83% of the total household expenditure was incurred on food items only. Thus, it has become imperative to further study the pattern of household expenditure on various food items. All the food items have been summarized into various broad groups which are as under :-

Cereals include	i) Wheat and wheat products ii) Rice iii) Maize and other cereals
Millets include	Jowar and Bajra
Pulses include	Gram, Moong, Moth, Mash, Arhar and other pulses.
Milk & milk products include	Desi Ghee and Milk
Edible oils include	Vegetable oils ,Rape & mustard oil and other edible oils
Meat and poultry products include	Eggs and meat of all types
Sugar includes	Gur, Shakkar, Khandsari and refined sugar.
Fruits and vegetables include	All types of fruits and vegetables
Salt and spices include	Salt, Red chillies, Turmeric and other spices.
Intoxicants include	Liquor, Tobacco, Opium, Beverages and other intoxicants.
Miscellaneous include	Jams and pickles, sweets and other articles of food not included under any other head.

The cultivator's household expenditure per family, per capita and adult male unit is given in Table 3.4.

**Table 3.4 Expenditure on food items**

(In Rs.)

Sr.No.	Items	Total Expenditure (All families)	Percentage to total expend- ture	Household	Expenditure per Capita	Adult male unit
1	2	3	4	5	6	7
1.	Cereals	670700	16.08	8280	1060	1304
2.	Pulses	141803	3.40	1751	224	276
3.	Milk & Milk products	2136356	51.23	26375	3375	4155
4.	Edible oils	102855	2.47	1270	162	200
5.	Sugar	258601	6.20	3193	409	503
6.	Vegetables	219928	5.27	2715	347	428
7.	Fruits	128383	3.08	1585	203	250
8.	Intoxicants	101245	2.43	1250	160	197
9.	Meat & Meat products	21856	0.52	270	35	42
10.	Miscellaneous	388516	9.32	4796	6141	756
Total		4172243	100.00	51484	6588	8110

The above table depicts that the annual expenditure on food items during 2001-02 per household, per capita and per adult male unit was Rs.51484, Rs.6588 and Rs.8110, respectively. The table also throws light on the dietary habits of cultivators and clearly establishes that Haryana Cultivator is primarily a vegetarian. His expenditure on milk and milk products was the highest i.e. 51.23% followed by cereals 16.08%, fruits/vegetables 8.35% and sugar 6.20%. The expenditure on meat and meat products was only 0.52%. It is found that 76.91% of the household expenditure was on cereals, pulses, milk and sugar.

### 3.5 Consumption of food articles

In order to study the dietary habits of Haryana cultivators' the annual and daily consumption of various food articles like cereals, pulses, milk & milk products and sugar, etc. has also been worked out in Table 3.5.

**Table 3.5 Annual and daily consumption of food articles per household per adult male units**

Items	Annual consumption (Qtls)			Daily consumption(Grams)	
	Total	Per house-hold	Per adult male unit	Per house-hold	Per adult male unit
1	2	3	4	5	6
<b>A- Cereals</b>					
i) Wheat	918.95	11.35	1.79	3108	490
ii) Rice	67.17	0.83	0.13	227	36
iii) Gram	16.01	0.15	0.02	40	6
IV) Maize & other cereals	10.23	0.13	0.02	35	5
<b>B- Millets</b>					
i) Bajra	36.11	0.45	0.07	122	19
<b>C- Pulses</b>					
i) Gram	15.01	0.20	0.03	54	9
ii) Others	32.12	0.40	0.06	109	17
<b>D- Milk and Milk products</b>					
i) Milk & milk product	1355.05	16.73	2.64	4583	722
ii) Desi ghee	32.16	0.40	0.06	109	17
<b>E- Edible oil</b>					
	29.35	0.36	0.06	99	16
<b>F- Sugar</b>					
i) Sugar	121.24	1.50	0.24	410	65
ii) Gur & Shakkar	47.76	0.59	0.09	162	25

It may be observed from the above table that wheat is the stable food of Haryana cultivators because its daily consumption per adult male unit was 490 grams as compared to 36 grams than that of rice. Incidentally, the daily consumption of desi ghee was 109 grams and edible oil was 99 grams per household, daily consumption of sugar was 410 grams as against 162 grams of gur & shakkar. The daily consumption per adult male unit of gram, milk and milk products and desi ghee/ edible oil was 9 grams, 722 grams, 17 grams and 16 grams, respectively.

### 3.6 Cost of production of milk

51.23% of the total expenditure on food items was incurred on milk and milk products only. Hence, it has become essential to discuss in detail the cost of production of milk. The cost of milk production per quintal both for buffaloes and cows has been worked out by taking into account the various variable and fixed costs. Variable cost includes expenditure on items such as fodder, concentrates, labour ( family and

hired) medical care, etc, and fixed cost includes interest and depreciation on capital investment made on milch animals and cattlesheds etc. The details are as under :-

The cost per quintal and quantity of milk produced is given in the following table:-

**Table 3.6 Input/output of milk production**

(In Rs.)

Item	Total input/output		Average input/output	
	Buffaloes	Cows	Buffaloes	Cows
1	2	3	4	5
<b>I- Variable cost</b>				
1. Fodder	406083 (31.00)	31768 (23.25)	3831	1444
2. Concentrate	478348 (36.52)	50683 (37.10)	4513	2304
3. Labour	-	-	-	-
i) Family	161050 (12.30)	18608 (13.63)	1519	846
ii) Hired	-	-	-	-
4. Medical care	2760 (0.21)	-	26	-
5. Miscellaneous	3928 (0.30)	780 (0.57)	37	35
<b>A- Total variable cost (1 to 5)</b>	<b>1052169 (80.33)</b>	<b>101839 (74.55)</b>	<b>9926</b>	<b>4629</b>
<b>II- Fixed Cost</b>				
i) Depreciation of fixed cost	134048 (10.23)	13865 (10.15)	1265	630
ii) Interest on fixed capital	123632 (9.44)	20910 (15.31)	1166	950
<b>B- Total fixed cost (i+ii)</b>	<b>257680 (19.67)</b>	<b>34775 (25.45)</b>	<b>2431</b>	<b>1581</b>
<b>C- Total Cost A+B</b>	<b>1309849 (100.00)</b>	<b>136614 (100.00)</b>	<b>12357</b>	<b>6210</b>
Total Milk Produced (Qts)	1713.43	215.08	16	10
Cost per quintal	764.46	635.18	-	-
<b>III- Income (Output)</b>				
i) Income from sale of young stock	27160 (1.36)	2970 (1.40)	256	135
ii) Income from dung	45240 (2.27)	5798 (2.74)	427	264
iii) Estimated income from milk	1920324 (96.37)	202882 (95.86)	18116	9222
<b>D- Total Income</b>	<b>1992724 (100.00)</b>	<b>211650 (100.00)</b>	<b>18799</b>	<b>9620</b>
Income per quintal	1163.00	984.05	-	-
Net Income per quintal	398.54	348.87	-	-

Note:1. For calculation of average input/output, figures of total buffaloes (129) and cows (25) have been used  
2. Figures in brackets indicate percentages to total.

Table 3.6 shows that it is the variable cost which almost determines the cost of milk production. Fodder and concentrates are the major components of variable cost. It constitutes about 3/4<sup>th</sup> of the total cost of milk production. The cost of production of milk per quintal in case of buffaloes and cows worked out to Rs 764.46 and Rs. 635.18 as against the income of Rs. 1163 and Rs. 984 thus resulting a net income of Rs. 399 and Rs. 349 per quintal, respectively. It is fact that the net income per quintal of buffaloes milk was significantly more than that of cows which clearly indicates that Haryana Cultivator does not keep cows for commercial gains.

### 3.7 Disposal of milk

Table 3.7 presents the quantity of buffaloes and cows milk produced, milk sold and consumed in the liquid form or as milk products.

**Table 3.7 Disposal of milk**

Item	Buffaloes milk		Cows milk.	
	Quantity (In Qtls.)	Percentage	Quantity (In Qtls.)	Percentage
1	2	3	4	5
Total milk produced	1713.43	100.00	215.08	100.00
Total milk sold	63.76	3.72	1.33	0.62
i) Milk liquid	58.40	91.59	-	-
ii) Milk products	5.36	8.41	-	-
Total milk consumed	1649.67	96.28	213.75	99.38
i) Milk liquid	841.99	51.04	178.46	83.49
ii) Milk products	807.68	48.96	35.29	16.51

The above table indicates that 96.28% of the total buffaloes milk produced was consumed at home and only 3.72% was sold. Further, 51.04% of the buffaloes milk was consumed in the liquid form and remaining 48.96% was converted into curd, butter, ghee etc. Out of the total 63.76 qtls. of buffaloes milk sold, 91.59% was sold in the form of liquid and the remaining 8.41% as milk products. Similarly, out of the total cows milk consumed at home 83.49% was used in liquid form and the remaining 16.51% in the form of milk products. The table also shows that cow's milk was not sold in the form of liquid and milk products.

### 3.8 Annual consumption of sugar, gur & shakkar

6.20% of the total food expenditure was incurred on sugar, gur and shakkar. Therefore, it has become essential to work out the annual consumption of sugar, per household. The following table depicts the average quantity and current value of sugar consumed per household, per capita and per adult male unit.

**Table 3.8 Annual consumption of sugar**

Quantity	Purchased			Consumption of sugar per household				
	Gur & Shakkar	Sugar	Total (2+3)	Raw	Refined	Total (5+6)	Per capita	Per adult male unit
1	2	3	4	5	6	7	8	9
A-Quantity (Kgs.)	4776	12124	16900	58.96	149.68	208.64	26.70	32.87
B-Value at current prices (Rs.) 2001-02	62188	194240	256428	767.75	2398.03	3165.78	405.10	498.69

Table 3.8 reveals that the annual consumption of sugar during 2001-02 per household, per capita and per adult male unit worked out at 208.64 Kgs, 26.70 Kgs., and 32.87 Kgs. valued at Rs.3166, Rs.405 and Rs.499, respectively. Out of total, 16900 Kgs Sugar 12124 Kgs. Sugar and 4776 Kgs Gur and Shakkar was consumed by the selected cultivators during the year 2001-02.

### 3.9 Size of holdings and expenditure on food items

The expenditure on food items per household, per capita and per adult male unit according to size of holdings is presented in Table 3.9.

**Table 3.9 Expenditure per household/capita/adult male unit on food items under different size of holdings**

Size of holdings (Hectares)	Total expenditure	Expenditure per			(In Rs.)
		Household	Capita	Adult male unit	
1	2	3	4	5	
Below 2.0	727712	38301	5730	7072	
2.0-4.0	1516718	48926	6989	8642	
4.0-7.5	1596492	59129	6652	8129	
7.5-10.0	166056	83028	5189	6590	
10.0 & above	163265	81633	9604	11498	
Total	4170243	51484	6588	8110	

It may be seen from the above table that the expenditure per household, per capita and per adult male unit on food items was Rs.51484, Rs.6588 and Rs. 8110, respectively. The highest per household expenditure on food items (Rs.83028) was observed in the size group of 7.5-10.0 hectares and it was lowest (Rs.38,301) in the size group of below 2.0 hectares.

### 3.10 Expenditure on non – food items

A bulk of 54.17% of the total household expenditure of selected cultivators was spent on non-food items .Among the non-food items, the clothing and housing claimed 11.76% and 9.04% of the total expenditure, respectively. Hence, it is desirable to analyse the expenditure on these items in details.

#### 3.10 (a) Expenditure on housing

The expenditure on housing includes expenditure on house construction/repairs, alterations and additions, utensils, furniture & fixtures, machinery and tools etc. The item-wise break up of the expenditure on housing is given in Table 3.10 (a).

**Table 3.10 (a) Expenditure on housing**

Sr.No.	Item	Total expenditure	Percentage	Expenditure per Household	(In Rs.) Capita
1	2	3	4	5	6
1.	House construction and repair	638660	77.60	7885	1008
2.	Utensils	70043	8.51	865	111
3.	Furniture & fixtures	107310	13.04	1325	170
4.	Misc. including machinery & tools etc.	7030	0.85	87	11
	Total	823043	100.00	10161	1300

It is observed from Table 3.10 (a) that per household and per capita expenditure on housing was Rs.10161 and Rs.1300, respectively. 77.60% of the total expenditure on housing was incurred on house construction and repairs, 13.04% on furniture & fixture 8.51% was on utensils and the remaining 0.85% was on miscellaneous items including machinery and tools etc.

### 3.10 (b) Expenditure on clothing

Expenditure on clothing includes expenditure on readymade garments, bedding, footwear, cosmetics and other miscellaneous items. The details are as under:-

**Garments** These include shirts, pants, dhotis, turbans, underwears, sweaters, coats, towels, needles, thread and buttons etc.

**Beddings** Bedding includes bed sheets, bedcovers, quilts, blankets etc.

**Footwears** All types of leather, rubber, plastic and canvas shoes and chappals, boot polish and brush etc. are included under footwear.

**Cosmetics** These include bathing soap, comb, tooth brush, mirror, face powder/cream and bangles etc.

**Miscellaneous** These include services rendered by tailor, barber, washerman, cobbler, dry cleaner and weaver etc.

The item-wise break up of the expenditure on clothing is set out in Table 3.10 (b).

**Table 3.10 (b) Expenditure on clothing**

Sr. No.	Items	Total expenditure	Percentage	Expenditure per (In Rs.)	
		3	4	Household	Capita
1	2	3	4	5	6
1.	Garments	516472	48.27	6376	816
2.	Beddings	102764	9.60	1269	162
3.	Toilets and Cosmetics	141301	13.21	1744	223
4.	Footwears	145161	13.57	1792	229
5.	Miscellaneous	164294	15.35	2028	260
	Total	1069992	100.00	13210	1690

It is clear from the above table that 48.27% of the total expenditure was incurred on garments, 13.57% on footwears, 13.21% on toilets and cosmetics, 9.60% on beddings and the remaining 15.35% was spent on miscellaneous items. The expenditure on clothing per household and per capita worked out to Rs.13220 and Rs.1690 per annum, respectively.

### 3.11 Expenditure on important non-food items according to the size of holdings

Expenditure in housing, clothing, marriage & social ceremonies and education constituted 36.68 percent of the total non-food expenditure of families. It has been presented according to size of holdings in Table 3.11.

**Table 3.11 Expenditure on some non-food items according to size of holdings.**

Size of holdings (Hectares)	(In Rs.)							
	Housing		Clothing		Education		Marriage & Social Ceremonies	
	Per house hold	Per capita	Per house hold	Per capita	Per house hold	Per capita	Per house hold	Per capita
1	2	3	4	5	6	7	8	9
Below 2.0	1597	239	8903	1332	2102	315	1222	183
2.0-4.0	5769	824	11288	1613	3701	529	12027	1718
4.0-7.5	20500	2306	15607	1756	10361	1166	19327	2174
7.5-10.0	7925	495	28885	1805	7550	472	3650	228
10.0 & above	22250	2618	35875	4221	8450	994	26975	3174
Total	10161	1300	13210	1690	5758	737	12088	1547

Table 3.11 reveals that the expenditure incurred by the household on housing, clothing and social ceremonies had no direct relation with the size of holdings. The highest per household expenditure on housing was observed (Rs.22250 in the size group of 10.0 hectares and above whereas it was minimum (Rs.1597 in the size group of below 0.2 hectares .

The highest per capita expenditure on clothing was recorded i.e. Rs.4221 in the size group of 10.0 hectares and above followed by Rs.1805 in the size group of 7.5 –10.0 hectares, Rs.1756 in the size group of 4.0-7.5 hectares and the lowest of (Rs.1332) in the size group of below 2.0 hectares. The households belonging to the size group of 4.0-7.5 hectares incurred the highest per capita expenditure of Rs.1166 on education where as the lowest expenditure of Rs.315 was recorded in the size group of below 2.0 hectares. Per capita expenditure was worked out to Rs.1718, Rs.2174 and Rs.3174 in the size groups of below 2.0-4.0 hectares, 4.0-7.5 hectares 10.0 and above hectares, respectively under marriage and social ceremonies.

### 3.12 Expenditure on non-food items according to size of holdings

54.17% of the total household expenditure was incurred on non-food items by the selected households. The expenditure on these items has further been classified according to the different size of holdings in the table given below:-

**Table 3.12 Expenditure per family/capita/adult male unit on non-food items under different size of holdings**

(In Rs.)

Size of holdings (Hectares)	Total expenditure of all families	Expenditure per		
		Household	Capita	Adult male unit
1	2	3	4	5
Below 2.0	546127	28744	4300	5307
2.0-4.0	1501495	48435	6919	8556
4.0-7.5	2418431	89572	10077	12314
7.5-10.0	176965	88483	5530	7022
10.0 & above	286880	143440	16875	20203
Total	4929898	60863	7788	9588

It is evident from Table 3.12 that the per household, per capita and per adult male unit expenditure on non-food items was Rs.60863, Rs.7788 and Rs.9588,

respectively. The per capita expenditure on non-food items was maximum Rs. 16875 in the size group of 10.0 hectares and above followed by Rs. 10077 in the size group of 4.0-7.5 hectares. The lowest per capita expenditure of Rs. 4300 was recorded in the land holding of size 0-2 hectares.

### 3.13 Possession of household assets

The possession of various household assets by the selected families is an indicative of their financial position and clearly reflects their standard of living. To study the improvement in standard of living of the selected households, the information pertaining to the possession of various household items collected from the selected households in the year 2001-2002 is presented in Table 3.13

**Table 3.13 Possession of household assets by selected cultivators during the year 2001-02**

Sr.No.	Item	No.of households	Percentage
1	2	3	4
1.	Bicycle	70	86.42
2.	M.Cycle/Scooter	26	32.10
3.	Television	66	81.48
4.	Fan	80	98.77
5.	Press	67	82.72
6.	Refrigerator	35	43.21
7.	Gas	44	54.32
8.	Kerosene stove	53	65.43
9.	Pressure cooker	53	65.43
10.	Sewing machine	71	87.65

The above table reveals that 32.10% of the total households were found in possession of motor cycle/ scooter in the year 2001-02. 43.21% of the total households were having refrigerators. Television has become the main necessity for the cultivator households in Haryana as 81.48% of the households were possessing of a television for entertainments under reference period. The table has further revealed that

bicycle was the common means of transport . 86.42 percent selected families were having bicycles.

### **3.14 Financial position of the selected households**

The overall financial position of the households has been worked out taking into account their gross income and expenditure. The net surplus income according to size of holdings has also been worked out in Table 3.14.

#### **3.14 Income and expenditure of selected cultivator households according to size of holdings during the year 2001-02**

(In Rs.)

Size of holdings (Hectares)	Income		Expenditure		Surplus	
	Per house hold	Per capita	Per house hold	Per capita	Per house hold	Per capita
1	2	3	4	5	6	7
Below 2.0	84988	12715	67044	10030	17944	2685
2.0-4.0	119480	17069	97362	13909	22118	3160
4.0-7.5	180537	20310	148701	16729	31836	3581
7.5-10.0	213163	13323	171511	10719	41652	2604
10.0 & above	282178	33197	225073	26479	57105	6718
Total	138072	17668	112347	14376	25725	3292

The above table reveals that on an average, a household spent Rs.1,12,347 against the income of Rs.1,38,072 thus showing an annual surplus of Rs.25,725 during 2001-02. This shows that families with large size of holdings were economically better off than the families with small size of holdings.

## CHAPTER - IV

### Summary and Conclusion

The present report on 'Family Budgets of Cultivators in Haryana' provides a comprehensive analysis of Haryana cultivator's household income and expenditure for the year 2001-2002. It also highlights the consumption pattern of a household, dietary habits and extent of dependence on goods other than those produced at his own farm.

The main findings of the study based on the analysis of data collected from 81 sampled cultivators are as under :-

1. The household size of selected cultivators ranged from 2 to 20 members. The average size of the household was worked out to 7.81 members. According to Atwator's scale, the average size of the family was 6.35 adult male unit.
2. The average income per household was Rs.84,988 in the holding size group of 0.2 hectares which progressively increased to maximum Rs.2,82,178 in the size group of 10.0 hectares & above.
3. Income from farm cultivation (47.55%) and dairying (7.70%) together accounted for 55.25% of the total income accruing to the cultivator households. Out of the remaining income of 44.75%, income generated from imputed interest on capital investment was 18.23 % and from other miscellaneous sources such as remittances from outside, income from labour, etc was 26.52%.
4. During 2001-02, the average annual income and expenditure of the sampled households was Rs.1,38,072 and Rs. 1,12,347, respectively leaving an average annual surplus of Rs. 25,725. The corresponding figures of per capita income, expenditure and surplus were Rs.17,668, Rs.14,376 and Rs.3,292, respectively.
5. 45.83% of the cultivator household expenditure was on food alone clothing accounted for 11.76%, marriage & social ceremony 10.76%, housing 9.04% and education 5.12% of the total domestic expenditure. The remaining 17.49% was on fuel, lighting, health, transport and recreations, etc.

6. Milk and milk products formed the major portion of normal intake of a cultivator's food as 51.23% of the total food expenditure on food items was incurred on milk & milk products, 19.48% on cereals & pulses, 8.35% on fruit & vegetables, 6.20% on sugar and remaining 14.74% on miscellaneous items.
7. 31.80% of the total consumption requirements of a selected household were met from the farm and the rest i.e. 68.20% procured from outside.
8. Haryana cultivator is primarily vegetarian and his expenditure on non-vegetarian items was negligible i.e. 0.52% of the total expenditure on food.
9. The study reveals that a farming family sold 3.72% of buffaloes milk and the rest was retained to meet domestic requirements. The daily consumption of milk and milk products per adult male unit was 722 grams.
10. The cost of production of milk per quintal in respect of buffaloes and cows worked out to Rs.764.46 and Rs.635.18, respectively.
11. Bicycle was the most common mode of domestic transport and 32.10% of the households were having motor cycle/scooter.
12. The main source of entertainment of the cultivator families ( 81.48%) was television.

It is interesting to note that the standard of living of the cultivators in Haryana is improving as the percentage of sampled cultivators owning items of comforts and luxuries is increasing as 98.77% cultivators owned fans, 43.21% refrigerators, 54.32% LPG connections, 87.65% sewing machines and 65.43 % pressure cookers.
