PREFACE

The estimates of State Domestic Product (SDP) are also referred to as State Income estimates, which play a crucial role as reliable indicators for assessing overall growth and the level of development in various socio-economic sectors within a State. These estimates serve as a solid foundation for formulating development programmes and implementing effective economic policies.

At the National level, the estimates of Gross Domestic Product (GDP) or National Income are regularly prepared and published by the National Statistical Office (NSO), New Delhi. Similarly, at the State level, State Income estimates are diligently prepared and released by the Department of Economic and Statistical Affairs, Haryana. The initial series of estimates of State Income of Haryana for 1960-61 and 1965-66 to 1968-69 using 1960-61 as base year were introduced by this department in 1971. Since then, the annual estimates have been consistently prepared and released on a regular basis.

The National Statistical Office (NSO), New Delhi introduced the new series of National Accounts with base year 2011-12 in place of the previous series with base year 2004-05 in order to incorporate the latest data available from long term surveys and censuses, new economic activities, expansion of coverage of activities, improvements in procedures and to the extent possible, the latest international recommendations adopted in compilation of national accounts. Following the pattern set by NSO, the Department of Economic and Statistical Affairs has also transitioned from a base year of 2004-05 to 2011-12. The current publication marks the 7th brochure in the series, utilizing the base year 2011-12 and presenting the SDP estimates for Haryana from the year 2011-12 to 2023-24.

This brochure has been meticulously prepared by Sh. Kuldeep Singh & Sh. Om Parkash, Research Officers with the support of Sh. Ravi Kumar, Sh. Rakesh Bhatia & Sh. Satyender Singh, Assistant Research Officers, Ms. Rubin Verma, Statistical Assistant, Dr. Amita Rani & Sh. Bheem Singh, Young Professionals and Sh. Anil, Jr. Scale Stenographer under overall supervision of Ms. Lucky Arora, Deputy Director of this department. I express my gratitude to the entire team for their diligent efforts.

I would also like to take this opportunity to extend my appreciation to the Heads of Departments/Organizations and the District Statistical Officers for their cooperation in furnishing the necessary data required for these estimates. Furthermore, I would like to acknowledge the invaluable guidance provided by the National Statistical Office, which contributed significantly to this endeavor.

Dr. Rajvir Bhardwaj
Director
Department of Economic and
Statistical Affairs, Haryana

Panchkula,
Dated: 9th July, 2024.

EXECUTIVE SUMMARY

The estimation of State Domestic Product (SDP) serves as a vital economic indicator for assessing the level of economic development within a State. SDP represents the total value, measured in monetary terms, of all goods and services produced within the geographical boundaries of the State, without accounting for duplication, during a specific period.

The Department of Economic and Statistical Affairs, Haryana regularly compiles the SDP estimates for the State, following the technical guidance provided by the NSO, New Delhi. The initial series of State Income estimates for Haryana was released by this department in 1971, covering the years 1960-61 and 1965-66 to 1968-69 with 1960-61 serving as the base year. Subsequently, the series of SDP estimates for the State were revised using base years of 1970-71, 1980-81, 1993-94, 1999-2000 & 2004-05 aligning with the base year revisions made by the NSO at the National level.

The NSO lastly revised the base year from 2004-05 to 2011-12 and introduced the new series of National Accounts based on the revised year on Jan. 30, 2015. This revision aimed to incorporate the latest development, align with international practices, and enhance the accuracy of economic measurements.

In line with the revisions made at the National level, the Department of Economic and Statistical Affairs, Haryana also updated the base year of State GDP estimates from 2004-05 to 2011-12. The first release of the revised series estimates took place on March 1, 2016. Since then, the revised series estimates have been consistently published on an annual basis.

The estimates for the years 2011-12 to 2016-17 with a base year of 2011-12, which were released on Feb. 26, 2018, in a brochure, represented the first publication of the 2011-12 base series. The brochure presenting the estimates for 2011-12 to 2017-18 released on 18th February, 2019 was the second publication for the current series. The brochure including the estimates of Haryana State for 2016-17 and 2017-18 (Revised), 2018-19 (Provisional), 2019-20 (Quick) and 2020-21 (Advance) released on 19th February, 2021 is the 4th publication for the current series. The brochure includes the estimates of Haryana for 2017-18 and 2018-19 (Revised), 2019-20 (Provisional), 2020-21 (Quick) and 2021-22 (Advance) released on 21st February, 2022 was the 5th publication for the series with base year 2011-12. The 6th publication contains the estimates of the State for the years 2018-19 to 2019-20 (Revised), 2020-21 (Provisional), 2021-22 (Quick) and 2022-23 (Advance)

based on the reference year 2011-12. This brochure marks the 7th publication and contains the estimates of the State for the years 2019-20 to 2020-21 (Revised), 2021-22 (Provisional), 2022-23 (Quick) and 2023-24 (Advance) based on the reference year 2011-12. These estimates were released on 6th February, 2024.

The economy is typically categorized into three broad sectors: Primary, Secondary and Tertiary. The Primary Sector consists of Agriculture, Forestry, Fishing, Mining and Quarrying sectors. The Secondary sector comprises Manufacturing, Electricity, Gas, Water Supply & Other Utility Services and Construction sectors. Lastly, the Tertiary sector includes Trade, Repair, Hotels & Restaurants, Transport, Storage, Communication and Services related to Broadcasting, Financial Services, Real Estate, Ownership of Dwellings & Professional Services, Public Administration and Other Services Sectors.

The measurement of State Domestic Product (SDP) can be accomplished using three approaches: Production, Income and Expenditure. The choice of approach depends on the availability of data and the specific context of the analysis.

After perusal, it is observed that the Gross State Domestic Product (GSDP) of the State, at current prices, has increased from ₹ 2,97,538.52 crore in 2011-12 to ₹ 1095535.06 crore in 2023-24 marking a growth of 268.2 percent. At constant (2011-12) prices, the GSDP has grown from ₹ 297538.52 crore in 2011-12 to ₹ 634026.56 crore in 2023-24, reflecting a growth rate of 113.1 percent. The average annual growth rate of the GSDP during the period 2012-13 to 2023-24 is estimated at 11.6 percent at current prices and 6.6 percent at constant prices. Analysis reveals that the Primary Sector of State's economy has witnessed an average annual growth rate of 3.0 percent, while the Secondary and Tertiary sectors have grown at average annual growth rates of 6.7 percent and 7.4 percent respectively, in real terms from 2012-13 to 2023-24. This indicates that the Secondary and Tertiary Sectors have experienced faster growth as compared to the Primary sector.

In terms of per capita income, the State has seen an increase from ₹ 106085 in 2011-12 to ₹ 325759 in 2023-24 at current prices, indicating a growth of 207.1 percent. At constant prices, per capita income has risen from ₹ 106085 in 2011-12 to ₹ 185490 in 2023-24 reflecting a growth of 74.9 percent. Comparatively, the per capita income of the Indian Union has increased by 190.3 percent and 68.2 percent at current and constant prices, respectively during the period 2011-12 to 2023-24. This indicates that the State's economic development has outpaced that of India.

The sectoral composition highlights the shift in the State economy from Agriculture

to the Services sector, indicating a healthy economy. The share of Primary sector in the Gross State Value Added (GSVA) has declined from 23.6 percent in 2011-12 to 16.8 percent in 2022-23 at constant prices. The share of Secondary sector has slightly increased from 31.6 percent in 2011-12 to 33.1 percent in 2022-23, while the contribution of the Tertiary sector has risen from 44.9 percent in 2011-12 to 50.1 percent in 2022-23. These changes in the sectoral composition of GSVA over the years reflect the overall progress of the developing economy. It signifies that the State economy is advancing towards a stable and mature State.

In 2023-24, the share of the Primary sector decreased to 16.3 percent as compared to previous year, while the share of the Secondary sector reduced to 33.0 percent from its share of 33.1 percent recorded in the previous year. On the other hand, the share of the Tertiary Sector slightly increased to 50.7 percent in 2023-24 from 50.1 percent recorded in 2022-23. These changes indicate a shift in the State economy from the Primary sector to the Services sector, which signifies that the economic development of the State is progressing in the right direction.

INTRODUCTION

1.1 The estimates of State Domestic Product (SDP) play a crucial role in assessing the economic growth of a State. These estimates provide a comprehensive understanding of the outcomes resulting from various government policies and interventions. The SDP serves as an indicator of the State's economic development and its derivative "Per Capita Income" serves as a suitable measure of the well-being of its residents. Furthermore, the PCI is widely utilized in India by policymakers to allocate plan resources and distribute proceeds from union excise duties and additional excise duties among different States, making it an important tool for addressing regional disparities.

State Domestic Product

1.2 The SDP is a monetary measure that represents the total value of all goods and services produced within the State's boundaries during a specific time period without duplication. The goods encompass a wide range of items such as agricultural crops, livestock and their products, fish, forest products, minerals, manufacturing of consumer goods, machinery, transport equipments, defence equipments, construction projects like buildings, roads, dams, bridges etc. Services cover various activities including transportation, medical, educational, sanitary services, trade, real estate, Government services and more. The measures obviously are to be made in value terms as the different units of production and different measures of services are not directly additive. All goods and services produced during the period whether sold for money, bartered or used for personal consumption are included in the estimation. Another important feature of SDP is that it represents the unduplicated value of output. This means only the value added at each stage of processing is considered when calculating the total value of output.

1.3 The SDP estimates are prepared for all the sectors of economy, both on Gross and Net basis. The difference between the two is that in the gross estimates, no deduction is made for Consumption of Fixed Capital (CFC) whereas in the net estimates, CFC is deducted from the figures of Gross Value Added (GVA). The CFC is defined as that part of gross product which is required to replace the fixed capital assets i.e. plants, machinery and equipments employed in the process of production during the period of account. The CFC is also known as depreciation. This flow is based on the expected economic life of individual assets accounting for obsolescence, normal wear and tear and accidental damage that cannot be repaired. It is estimated on the basis of value and age of different fixed

capital assets. The estimates of CFC for all sectors of the economy are compiled and supplied by the National Statistical Office (NSO), New Delhi.

SDP at Current and Constant Prices

1.4 At the National level, the estimates of Gross Domestic Product (GDP) or National Income are regularly compiled and published by the NSO, New Delhi. The estimates of SDP or State Income of Haryana State are compiled by the Department of Economic and Statistical Affairs, Haryana at both current and constant prices as per the technical guidance provided by the NSO. The SDP estimates at current prices are obtained by evaluating the product at prices prevailing during the accounting year. The SDP estimates at current prices, over the time do not reveal the actual economic growth because these contain the combined effect of (i) changes in volume of goods and services and (ii) the changes in the prices of goods and services. In order to eliminate the effect of price changes or inflation, the estimates of SDP are also prepared by evaluating the goods and services at the prices prevailing during the certain fixed year known as base year. The estimates, thus, obtained are known as SDP at constant prices.

Revision of Base Year

1.5 The first series estimates of State Income of Haryana for 1960-61 and 1965-66 to 1968-69 with 1960-61 as base year were issued by this department in 1971. Thereafter, the series of SDP estimates of the State were revised with base years 1970-71, 1980-81, 1993-94, 1999-2000 and 2004-05 in conformity with the base year revisions made by the NSO, New Delhi at National level. The NSO lastly revised the base year from 2004-05 to 2011-12 and released the national accounts with base 2011-12 on 30th January, 2015. Accordingly, the Department of Economic and Statistical Affairs, Haryana also revised the base year of State GDP estimates from 2004-05 to 2011-12 and released the estimates of the State with base 2011-12 on 1st March, 2016. The brochure presenting the estimates of Haryana State for the years 2011-12 to 2016-17 released on 26th February, 2018 was the first publication for the series with base year 2011-12. The current brochure is the 7th publication for the series with the base year 2011-12. It includes the Haryana estimates released on 6th February, 2024 covering the periods of 2019-20 to 2020-21 (Revised), 2021-22 (Provisional), 2022-23 (Quick) and 2023-24 (Advance).

This exercise of base year revision has been carried out strictly as per the technical guidance provided by the NSO. The base year revisions differ from annual revisions in GDP estimates primarily because of nature of changes. In annual revisions, changes are made only on the basis of updated data becoming available without making any changes in

the conceptual framework or using any new data source, to ensure strict comparison over years. In case of base year revisions, apart from a shift in the reference year for measuring the real growth, conceptual changes, as recommended by the International guidelines, are incorporated. Further, statistical changes like revisions in the methodology of compilation, adoption of latest classification systems and inclusion of new and recent data resources are also made. The changes are also made in the presentation of estimates to improve ease of understanding for analysis and to facilitate international comparability. The three major components influencing the present revision exercise include (i) revision to the base year to a more recent year (for meaningful analysis of structural changes in the economy in real terms), (ii) complete review of the existing data base and methodology employed in the estimation of various macro-economic aggregates including choice of the alternative data bases on individual subjects and (iii) to the extent feasible, implementing the international guidelines on the compilation of national accounts as per the System of National Accounts (SNA), 2008 prepared under the auspices of the Inter Secretariat Working Group on National Accounts comprising the European Communities (EUROSTAT), International Monetary Fund (IMF), Organization for Economic Cooperation and Development (OECD), United Nations and the World Bank.

Choice of 2011-12 as the Base Year

1.6 The National Statistical Commission has recommended that all economic indices should be rebased at least once in every five years. The National Sample Survey (NSS), 61st Round Quinquennial, Employment and Unemployment Survey (EUS) conducted in the year 2004-05, on which the previous series of national accounts was based, was followed by a Quinquennial EUS in 2009-10. However, the year was not considered a normal year since it succeeded the global slowdown of 2008. Therefore, a fresh EUS was conducted in 2011-12. The results of this survey have been used for compilation of the estimates in the new series with base year 2011-12. The improvements in coverage, use of results of recent surveys, censuses and type studies, implementation of 2008 SNA and methodological changes in the new series have been given in the following paragraphs.

Improvements in coverage

1.7 Corporate Sector – In the 2004-05 series, the private corporate sector was being covered using the RBI Study on Company Finances, wherein estimates were compiled on the basis of financial results of around 2500 companies. In the current series, comprehensive coverage of corporate sector has been ensured in mining, manufacturing and services by incorporation of annual accounts of companies as filed with the Ministry of

Corporate Affairs (MCA) under their e-governance initiative, MCA21.

1.8 Financial Corporations – The financial corporations in the private sector, other than banking and insurance, in the earlier series were limited to a few mutual funds and estimates for the Non-Government Non-Banking Finance Companies as compiled by RBI were taken. In this series with base year 2011-12, the coverage of financial sector has been expanded by including stock brokers, stock exchanges, asset management companies, mutual funds and pension funds, as well as the regulatory bodies like SEBI, PFRDA and IRDA.

1.9 Local Bodies and Autonomous Institutions – Earlier, the estimates for local bodies and autonomous institutions were prepared on the basis of information received for seven autonomous institutions and local bodies of four States namely Delhi, Himachal Pradesh, Meghalaya and Uttar Pradesh. In this series, there has been an improved coverage of local bodies and autonomous institutions, covering around 60 percent of the grants/transfers provided to these institutions.

Use of results of recent surveys, censuses and type studies

1.10 In this series with base year 2011-12, efforts have been made to make use of as much current data as possible. Further, the results of latest available surveys have also been made use of. Some of the important sources of data, which have been used in the new series, are as follows:-

- a. NSS 68th round (2011-12): Survey on Employment and Unemployment and Consumer Expenditure;
- b. NSS 67th round (2010-11): Survey on Un-incorporated Non-agricultural Enterprises (Excluding Construction);
- c. All India Livestock Census, 2012;
- d. NSS 70th round (2013): All India Debt and Investment Survey (AIDIS) and Situation Assessment Survey;
- e. House-listing and Housing Census, 2010 and Population Census, 2011;
- f. Study on Yield Rates of Meat Products and By-products of Different Livestock Species Conducted by National Research Centre on Meat (NRCM), Hyderabad;
- g. Study on the Inputs in the Construction sector by Central Building Research Institute (CBRI), Roorkee; and
- h. Study on 'Harvest and Post harvest Losses of Major Crops and Livestock Products in India' conducted by Central Institute of Post-Harvest Engineering and Technology (CIPHET), Ludhiana.

Implementation of 2008 SNA

1.11 While revising the base year, the efforts have also been made to implement the recommendations of SNA 2008 to the extent data are available. Some of the important recommendations which presently form part of the new series are:-

- (i) The estimates of the institutional sectors – Non-financial and Financial Corporations, General Government and households are shown separately, in view of their ‘intrinsic differences in their economic objectives, functions and behaviour’.
- (ii) The unincorporated enterprises belonging to households, which have complete sets of accounts, tend to behave in the same way as corporations. Therefore, as recommended by SNA 2008, such enterprises have been treated as quasi-corporations. Some examples of quasi-corporations in the Indian context are proprietorship and partnership enterprises, maintaining accounts.
- (iii) The head office has been allocated to the non-financial corporation’s sector unless all or most of its subsidiaries are financial corporations, in which case it is treated as a financial auxiliary in the financial corporation’s sector. In the 2004-05 series, the recommendation had been adopted for service sector wherein estimates of GVA were compiled from enterprises in this sector. In the current series, this approach has been adopted for the mining and organised manufacturing sectors also.
- (iv) The sub-sectoring of Non-Profit Institutions (NPIs) in the corporate and government sectors has been done in respect of autonomous bodies and Section 25 companies.
- (v) The expenditure on Research and Development (R&D) has been capitalised in Government, Public Corporations and Private Corporations and hence has become part of Capital Formation.
- (vi) Financial Intermediation Services Indirectly Measured (FISIM) has been calculated using a reference rate for units engaged in financial intermediation.
- (vii) The output of Central Bank (RBI) is measured at cost.
- (viii) The non-financial assets in the earlier series were classified as ‘construction’ and ‘machinery’. In this series, as recommended by SNA 2008, non-financial assets have been classified as ‘dwellings, other buildings and structures’, ‘machinery and equipment’, ‘cultivated biological resources’ and ‘intellectual property products’.
- (ix) The CFC has been measured at the average prices of the period with respect to a constant-quality price index of the asset concerned.
- (x) In this series, GVA, NVA and related aggregates are evaluated at basic prices whereas GDP is worked out at market prices instead of factor cost. As per the press note on new series of National Income dated 30th January, 2015 issued by the Ministry of Statistics and Programme Implementation, Government of India, it is to be noted that Gross Domestic Product (GDP) at factor cost will no longer be discussed in the press releases. As is the practice internationally, industry-wise estimates will be presented as GVA at basic prices, while ‘GDP at market prices’ will henceforth be referred to as GDP. The estimates of GVA at factor cost (earlier called GDP at factor cost) can be compiled by using the estimates of GVA at basic prices and production taxes less subsidies. Like-wise, estimates of SDP of the State have also been presented as GVA or GSVA (Gross State Value Added) at basic prices and GDP or GSDP (Gross State Domestic Product) in this report in conformity with the procedure followed at the National level.

Methodological changes in compilation

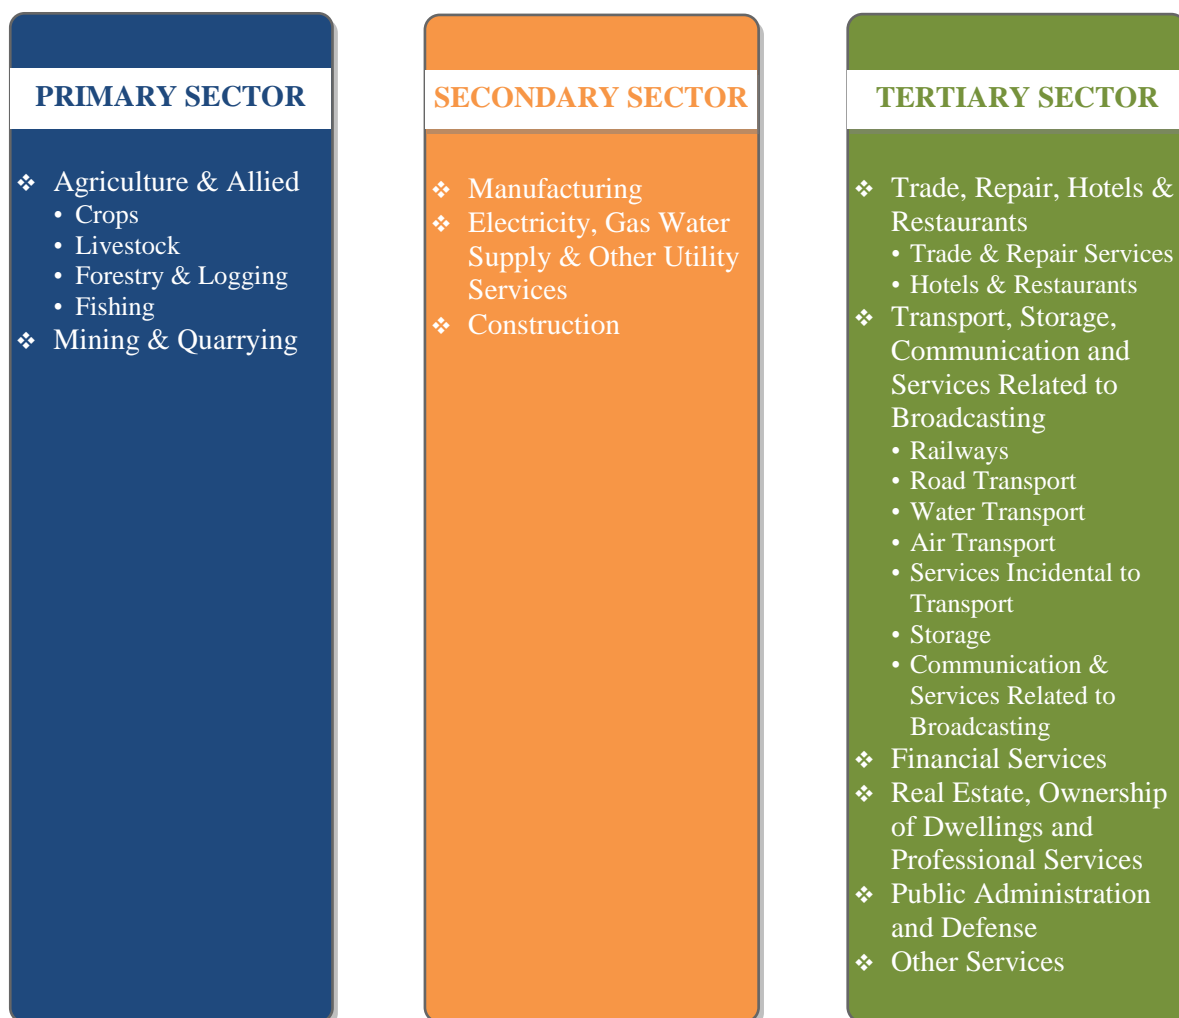

1.12 The following methodological changes have been made in this series with base year 2011-12:-

- (i) The activities, 'Recycling of metal waste and scrap + non-metal waste and scrap', which was earlier part of manufacturing and 'Sewerage and other waste management services' have been clubbed to form the category 'Remediation and other utility services', and will be reflected in the group 'Electricity, gas, water supply and other utility services'.
- (ii) 'Repair of computers', which was earlier part of computer related activities, will be a part of 'Repair of personal and household goods' and reflected in 'Trade & repair services'.
- (iii) 'Recording, publishing and broadcasting services' have been formed a new category and reflected in the group 'Communication & services related to broadcasting'.
- (iv) Sewage activities have been removed from services sector and made a part of 'Electricity, gas, water supply and other utility services'.
- (v) In this series, a new method called "Effective Labour Input Method (ELI Method)" has been adopted for the following enterprises:-
 - a) All un-incorporated manufacturing enterprises, except those covered under the Annual Survey of Industries (ASI).
 - b) Un-incorporated service enterprises, except those of 'Trade & repair services' 'Hotels and restaurants', 'Non-mechanized road transport' and 'Telecommunication'.
- (vi) In the earlier series, FISIM which gives an estimate of the 'net interest margin' of the financial corporations was based on the difference between total property receipts (dividend + interest + net profit on sale of investments) and total interest payments by the financial corporations. In this series, as recommended in the SNA 2008, the estimates of FISIM have been compiled, using the Reference Rate (RR) approach.
- (vii) The estimate of 'extraction of sand' as part of minor minerals in the earlier series was found to be negligible as compared to its apparent use in construction. Therefore, in this series with base year 2011-12, an indirect estimate of the value of output of 'extraction of sand' at basic prices has been derived through the value of commodities used for construction.
- (viii) In the earlier series, CPI (AL/RL/IW) was being used as an indicator for the movement in retail prices. In this series, these indices have been replaced by the broader based CPI (Rural/Urban/Combined) which have since become available.
- (ix) In the earlier series, the GVA of crop and livestock activities was being compiled together but in this series, these two activities have been segregated for estimation of GVA.

In addition to the above methodological changes given at points No. (i) to (ix), the other industry- wise changes including addition or deletion of the activity if any have been explained in the industry- specific chapters.

Division of State Economy by Industry of Origin

1.13 For the purpose of estimation of SDP, the whole economy of the State has been divided into 11 sectors and 21 sub-sectors in conformity with the procedure followed at the National level to estimate the National Income estimates. The twenty one sub-sectors have been further categorized into three broad sectors as follows:-

This procedure of classification is followed by each State and Union Territory of the country to make the estimates comparable.

Approaches adopted in estimation of SDP

1.14 The estimates of SDP can be conceptually prepared by adopting two approaches viz. income originating and income accruing. In the first approach, the measurement corresponds to income originating to the factors of production physically located within the geographical boundaries of a State and represents net value of goods and services produced within the State. The second approach relates to the income accruing to the normal residents of a State. Since, the measurement in the second approach corresponds to the

income that becomes available to the residents of a State; it provides a better measure of the welfare of the residents of the State. But due to non-availability of data on inter-state income flows, the compilation of estimates based on income accruing concept is not possible at present. The estimates that are presently being compiled by the State Statistical Bureaus (SSBs) refer to the income at factor cost, originating within the geographical boundaries of the respective States irrespective of the fact whether factors of production are owned by persons living inside or outside the State.

1.15 Theoretically, SDP can be measured by any one of the three alternative approaches viz. production, income and expenditure approach depending upon the availability of data:

(i) **Production approach** is followed in case of Crops, Livestock, Forestry & Logging, Fishing, Mining & Quarrying, Electricity, Railway, Storage, Financial Services and Public Administration sectors. This approach is also followed in case of organized component of Manufacturing, Gas, Water Supply, Other Utility Services, Trade, Repairs, Hotels & Restaurants, Transport other than Railway, Communication, Real Estate, Ownership of Dwellings & Professional Services and Other Services sectors and only public part of construction sector.

(ii) **Income approach** is followed in respect of un-organised component of Manufacturing, Gas, Water Supply, Other Utility Services, Transport other than Railway, Communication, Real Estate, Ownership of Dwellings & Professional Services, Trade, Repairs, Hotels & Restaurants and Other Services sectors.

(iii) **Expenditure approach** is followed in respect of private part of Construction sector only.

Supra-regional sectors

1.16 The different States prepare estimates of SDP by industry of origin by following the same classification of the sectors for which estimates are prepared at the National level. However, there are certain activities, which are managed by the Central Government and are not confined to the boundaries of a State. It is not possible to prepare independent estimates at State level in respect of some sectors namely Railways, Communication, Banking & Insurance and Central Government Administration where the activities are spread over to a number of States. These sectors are known as supra-regional sectors and State level estimates for these sectors are prepared by allocating the National estimates on the basis of data on gross earning, gross expenditure, wages & salaries, employment and other relevant indicators. The estimates for these sectors are prepared by the NSO and supplied to the SSBs so that the SSBs may suitably incorporate the same in their State Income estimates.

FISIM

1.17 An imputed income equivalent to interest and dividend receipt of banking and financial enterprises net of interest paid to depositors is defined as Financial Intermediation Services Indirectly Measured –FISIM (income earned in return for services rendered) and is entered as a receipt item in the output of the financial enterprises. The output of the financial enterprises, thus, includes interest received, which was paid by the producing industries. As the interest paid by the industries is already accounted for in the GVA of the respective industries, its inclusion in the GVA of Financial Services industry amounts to duplication. To avoid this duplication, FISIM is allocated to the user industries as intermediate input and thereby the GVA of the industries is reduced. In the previous series, the FISIM component of the output of financial intermediaries was based on the difference between total property receipts (dividend + interest + net profit on sale of investments) and total interest payments by the banking sector. In the current series, FISIM has been computed only on loans and deposits, using the Reference Rate (RR) approach, as recommended in the SNA 2008. In short, it is $(LR-RR)*$ average stock of loans + $(RR-DR)*$ average stock of deposits. 'RR' is equal to harmonic mean of lending rate (LR) and deposit rate (DR) for the banking sector. Moreover, FISIM, under the present method, does not include interest receipts on investments and debt securities, interest paid on borrowings and debt securities and net profit on sale of investments (POSI). These components have been considered as property income, which come directly under the gross savings of the financial corporations. The exclusion of receipts like POSI from the FISIM computation has also reduced the GVA of the banking sector. While compiling the State GVA in the new series, FISIM of an industry is worked out by using the industry-specific ratio supplied by the NSO to the GVA of that industry.

OVERVIEW OF STATE ECONOMY

2.1 The detailed methodology adopted and sources of data used in compiling the estimates of GSVA by economic activity in the series with base year 2011-12 have been discussed in the subsequent chapters separately. The estimates of the State with base 2011-12 for 2019-20 to 2020-21 (Revised), 2021-22 (Provisional), 2022-23 (Quick) and 2023-24 (Advance) have been released on 6th February, 2024. In this Chapter, the economic growth of the State has been analyzed on the basis of SDP estimates for 2011-12 to 2023-24 in the subsequent paragraphs.

2.2 As per **Table 2.1** the GSDP of the State at current prices has witnessed substantial growth from ₹ 297538.52 crore in 2011-12 to ₹ 984055.44 crore in 2022-23 indicating a growth rate of 230.73 percent. The average annual growth during the period 2012-13 to 2022-23 has been estimated at 11.6 percent. Notably, the lowest growth rate (-1.2%) was recorded in 2020-21 while the highest growth rate of (19.2%) was observed in 2021-22. During the years 2012-13 and 2013-14, the growth of GSDP stood at 16.6 percent and 15.1 percent, respectively. However, in 2014-15, the growth rate decreased to 9.5 percent due to slower growth in primary (1.2%) and secondary (6.8%) sectors. From 2015-16 to 2017-18, the annual growth fluctuated between 13.4 percent to 13.8 percent. In 2018-19 and 2019-20, the growth rates further slowed to 9.4 percent and 5.6 percent, respectively. The impact of the Covid-19 pandemic led to a negative growth rate of 1.2 percent in 2020-21. Further, the growth rate increased to 19.2% and 13.3% during the years 2021-22 and 2022-23. Growing trend of GSDP of Haryana from 2011-12 to 2023-24 is demonstrated in **Figure 2.1(i)**.

Table 2.1 - GSDP of Haryana at current and constant (2011-12) prices

Year	At Current Prices		At Constant (2011-12) Prices	
	GSDP (₹ Crore)	Growth Rate (%)	GSDP (₹ Crore)	Growth Rate (%)
2011-12	297539	--	297539	--
2012-13	347032	16.6	320912	7.9
2013-14	399268	15.1	347507	8.3
2014-15	437145	9.5	370535	6.6
2015-16	495504	13.4	413405	11.6
2016-17	561424	13.3	456709	10.5
2017-18	638832	13.8	482036	5.5
2018-19	698940	9.4	532996	10.6
2019-20	738052	5.6	545124	2.3
2020-21	729079	-1.2	496087	-9.0
2021-22	868905	19.2	544317	9.7
2022-23	984055	13.3	587198	7.9
2023-24	1095535	11.3	634027	8.0

2.3 Looking ahead, it is projected that the State's GDP at current prices will likely to be estimated at ₹ 984055.44 crore and ₹ 1095535.06 crore in 2022-23 and 2023-24, respectively reflecting an improvement of 13.3 percent and 11.3 percent.

2.4 The GSDP at constant (2011-12) prices for the State has shown significant growth, increased from ₹ 297538.52 crore in 2011-12 to ₹ 587197.69 crore in 2022-23 indicating a growth rate of 97.4 percent (**Table 2.1**). The average annual growth rate for the period 2012-13 to 2022-23 has been estimated at 6.5 percent. The growth of GSDP during 2012-13 and 2013-14 was recorded as 7.9 percent and 8.3 percent respectively. However, it decreased to 6.6 percent in 2014-15. The GSDP experienced a revival with the growth rate of 11.6 percent in 2015-16 and 10.5 percent in 2016-17. Subsequently, the growth rate recorded as 5.5 percent, 10.6 percent and 2.3 percent in 2017-18, 2018-19 and 2019-20, respectively. The year 2020-21 posed a significant challenge due to the impact of the Covid-19 pandemic. The performance of the State economy was adversely affected leading to a negative growth rate of 9.0 percent of the GSDP.

2.5 The GSDP of the State at constant (2011-12) prices reached as ₹ 587197.69 crore in 2022-23, with a growth rate of 7.9 percent and the growth of 9.7 percent witnessed in 2021-22. Further, in 2023-24, the GSDP is likely to be estimated as ₹ 634026.56 crore reflecting a growth rate of 8.0 percent.

2.6 It is obvious from **Table 2.2** that the contribution of State GDP in National GDP at constant prices was recorded as 3.41 percent in 2011-12. This contribution showed

consistent improvement from 2011-12 to 2022-23, reaching 3.65 percent in 2022-23. Furthermore, in 2023-24, it is estimated that the contribution will be 3.65 percent to National GDP.

Table 2.2 - Contribution of State GDP in National GDP at current and constant (2011-12) prices.

Year	At Current Prices			At Constant (2011-12) Prices		
	Haryana GSDP (₹ Crore)	All India GDP (₹ Crore)	Contribution (%)	Haryana GSDP (₹ Crore)	All India GDP (₹ Crore)	Contribution (%)
2011-12	297539	8736329	3.41	297539	8736329	3.41
2012-13	347032	9944013	3.49	320912	9213017	3.48
2013-14	399268	11233522	3.55	347507	9801370	3.55
2014-15	437145	12467959	3.51	370535	10527674	3.52
2015-16	495504	13771874	3.60	413405	11369493	3.64
2016-17	561424	15391669	3.65	456709	12308193	3.71
2017-18	638832	17090042	3.74	482036	13144582	3.67
2018-19	698940	18899668	3.70	532996	13992914	3.81
2019-20	738052	20103593	3.67	545124	14534641	3.75
2020-21	729079	19854096	3.67	496087	13694869	3.62
2021-22	868905	23597399	3.68	544317	15021846	3.62
2022-23	984055	26949646	3.65	587198	16071429	3.65
2023-24	1095535	29535667	3.71	634027	17381722	3.65

Figure 2.2(i) shows the contribution of State's GDP in National GDP at current and constant (2011-12) prices.

2.7 The per capita income is one of the important indicators to measure the living standard of the people. The per capita income of the State at both current and constant prices along with the percentage change over the previous year are shown in **Table 2.3**. The table clearly shows that the per capita income of the State at current prices as well as constant

prices has shown the increasing trend over the preceding years. The effect of prices on per capita income can well be gauged from the fact that the per capita income of the State at current prices increased from ₹ 106085 in 2011-12 to ₹ 296592 in 2022-23 indicating a significant growth of 179.6 percent whereas the per capita income at constant prices increased from ₹ 106085 in 2011-12 to ₹ 173973 in 2022-23 with the increase of 64.0 percent. During the period 2012-13 to 2022-23 the per capita income of the State witnessed the average annual growth of 9.9 percent and 4.8 percent at current and constant prices, respectively.

Table 2.3 - Per Capita Income of Haryana at current and constant (2011-12) prices

Year	At Current Prices		At Constant Prices	
	Per Capita Income (₹)	Growth Rate (%)	Per Capita Income (₹)	Growth Rate (%)
2011-12	106085	-	106085	-
2012-13	121269	14.3	111780	5.4
2013-14	137770	13.6	119791	7.2
2014-15	147382	7.0	125032	4.4
2015-16	164963	11.9	137833	10.2
2016-17	184982	12.1	150259	9.0
2017-18	208437	12.7	156200	4.0
2018-19	223022	7.0	169604	8.6
2019-20	232530	4.3	170765	0.7
2020-21	224587	-3.4	150754	-11.7
2021-22	264729	17.9	163285	8.3
2022-23	296592	12.0	173973	6.5
2023-24	325759	9.8	185490	6.6

Figure 2.3(i) illustrates the Per Capita Income of Haryana from 2011-12 to 2023-24 at current and constant (2011-12) prices.

2.8 It is obvious from **Table 2.4** that the per capita income of the State at both current and constant prices remained higher than that of India throughout the period 2011-12 to 2022-23. During this period, the per capita income of the State at current prices increased by 179.6 percent whereas that of India increased by 167.1 percent. Similarly, at constant prices the per capita of the State increased by 64.0 percent whereas that of India increased by 56.6 percent. It shows that the pace of economic development of the State remained faster than that of India during this period.

2.9 In 2023-24, the per capita income of the State at current and constant prices is likely to be estimated as ₹ 325759 and ₹ 185490 reflecting an increase of 9.8 percent and 6.6 percent, respectively. The per capita income of India increased by 8.7 percent and 7.4 percent at both current and constant prices as compared to the increase of 9.8 percent and 6.6 percent, respectively recorded by the State.

Table 2.4 - Per Capita Income of Haryana vis-à-vis All India

Year	At Current Prices		At Constant (2011-12) Prices	
	Haryana	All India	Haryana	All India
2011-12	106085	63462	106085	63462
2012-13	121269	70983	111780	65538
2013-14	137770	79118	119791	68572
2014-15	147382	86647	125032	72805
2015-16	164963	94797	137833	77659
2016-17	184982	104880	150259	83003
2017-18	208437	115224	156200	87586
2018-19	223022	125946	169604	92133
2019-20	232530	132341	170765	94420
2020-21	224587	127244	150754	86034
2021-22	264729	150906	163285	94054
2022-23	296592	169496	173973	99404
2023-24	325759	184205	185490	106744

2.10 The sector-wise growth rates of GSVA in real terms are given in **Table 2.5**. During the period 2012-13 to 2022-23, the primary sector has recorded the average annual growth rate of 2.9 percent whereas secondary and tertiary sectors have recorded the average annual growth rate of 6.7 percent and 7.3 percent, respectively. At National level, the primary sector has recorded the average annual growth rate of 3.6 percent whereas secondary and tertiary sectors have recorded the average annual growth rate of 5.3 percent and 6.8 percent, respectively. This indicates that secondary and tertiary sectors are growing at a much faster rate than primary sector.

2.11 The primary sector has recorded the annual growth rate of 4.5 percent in 2023-24 as compared to 2.0 percent in 2022-23. Similarly, secondary and tertiary sectors have recorded the growth of 7.2 percent and 9.0 percent, respectively in 2023-24 (**Table 2.5**).

Table 2.5 – Annual Growth Rates of GSVA by broad sectors at constant (2011-12) prices

Year	Primary	Secondary	Tertiary	Total
2012-13	-2.0	9.0	10.6	7.1
2013-14	3.1	7.2	10.1	7.6
2014-15	-2.1	4.6	10.4	6.0
2015-16	4.4	11.1	10.8	9.7
2016-17	8.6	12.6	8.6	9.9
2017-18	6.8	3.7	5.6	5.2
2018-19	8.3	13.4	8.5	10.0
2019-20	-2.8	5.0	2.6	-1.4
2020-21	-1.8	-7.3	-10.5	-7.9
2021-22	-1.4	14.3	11.3	9.7
2022-23	2.0	7.8	9.5	7.6
2023-24	4.5	7.2	9.0	7.6

2.12 The sectoral composition clearly indicates that the State economy is shifting from agriculture to services sector which is a sign of healthy economy. The share of primary sector comprising Crops, Livestock, Forestry & logging, Fishing and Mining & Quarrying sectors in the State GSVA has declined from 23.6 percent in 2011-12 to 16.8 percent in 2022-23 (**Table 2.6**). The share of secondary sector consisting of Manufacturing, Construction and Electricity, Gas, Water Supply and Other Utility Services slightly increased from 31.6 percent in 2011-12 to 33.1 percent in 2022-23. The contribution of tertiary sector comprising Trade, Repairs, Hotels & Restaurants, Transport, Storage & Communication, Financial Services, Real Estate, Ownership of Dwellings & Professional Services, Public Administration and Other Services sectors has increased from 44.9 percent in 2011-12 to 50.1 percent in 2022-23. The change in the sectoral composition of GSVA over the years points to general scenario of the developing economy. It clearly indicates that the State economy is moving ahead towards the sound and matured economy.

2.13 The share of primary sector declined to 16.3 percent in 2023-24 as compared to 16.8 percent recorded in 2022-23, which is lowest during 2011-12 to 2023-24. But the share of secondary sector has been estimated as 33.0 percent in 2023-24 as compared to 33.1 percent recorded in the previous year. The share of tertiary sector increased to 50.7 percent in 2023-24 as compared to 50.1 percent recorded in 2022-23. The composition of GSVA by broad sectors in 2011-12 and 2023-24 at current prices and composition of broad sectors in GSVA from 2011-12 to 2023-24 at constant (2011-12) prices are presented in **Figures 2.6(i) and 2.6(ii), respectively**.

Table 2.6 – Composition of GSVA by broad sectors of State economy at current and constant (2011-12) prices

Year	At Current Prices			At Constant (2011-12) Prices		
	Primary	Secondary	Tertiary	Primary	Secondary	Tertiary
2011-12	23.6	31.6	44.9	23.6	31.6	44.9
2012-13	22.4	32.4	45.2	21.6	32.1	46.3
2013-14	21.7	32.5	45.8	20.7	32.0	47.4
2014-15	20.1	31.9	48.0	19.1	31.6	49.4
2015-16	19.4	31.6	49.0	18.2	32.0	49.9
2016-17	19.4	31.4	49.1	18.0	32.8	49.3
2017-18	19.8	31.4	48.8	18.2	32.3	49.5
2018-19	19.6	32.0	48.5	17.9	33.3	48.8
2019-20	20.0	29.7	50.3	18.5	31.5	49.9
2020-21	21.7	29.5	48.8	19.7	31.7	48.5
2021-22	19.5	30.7	49.8	17.7	33.1	49.2
2022-23	18.4	30.5	51.1	16.8	33.1	50.1
2023-24	18.1	29.3	52.6	16.3	33.0	50.7

CROPS SECTOR

COVERAGE

3.1 This sector comprises agriculture proper and operation of Government irrigation system.

The economic activities included in agriculture proper are:

- (i) Growing of field crops, nuts, seeds, fruits, vegetables and medicinal plants.
- (ii) Management of tea, coffee and rubber plantations.
- (iii) Floriculture.
- (iv) Agricultural and horticultural services on a fee or on contract basis such as harvesting, baling and thrashing, preparation of tobacco for marketing, pest control, spraying, pruning, picking and packing.
- (v) Foreyard and backyard cultivations.
- (vi) Ancillary activities of cultivators such as gur making, transportation of own produce to primary markets, activities yielding rental income from farm buildings and farm machinery and interest on agricultural loans.

The operation of Government irrigation system comprises supply of water through various Government channels to the agriculturists.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

3.2 The estimates of GSVA from Crops sector including operation of Government irrigation system have been prepared by using the production approach. In case of agriculture proper, the estimation of GVA involves evaluation of gross value of the products, by-products and ancillary activities at the prices received by the producers and deducting the value of inputs of raw material and services consumed in the process of production from the gross value. In case of irrigation by Government sources, the total factor income generated as a result of providing the irrigation services has been estimated.

3.3 The district-wise statistics of area are available in respect of all agricultural crops but output data, however, is not so comprehensive. The output data is available only in respect of the following crops:

- (i) **Cereals:** Wheat, Barley, Rice, Maize, Bajra, Jowar
- (ii) **Pulses:** Gram, Moong, Mash, Massar, Arhar, Other Pulses
- (iii) **Oilseeds:** Sesamum, Groundnut, Rapeseed & Mustard, Sunflower
- (iv) **Fibers:** Cotton (American and Desi), Sunhemp
- (v) **Fruits, Vegetables & Flowers:** Potatoes, Onion, Tomato, Peas, Sweet Potatoes,

Cabbage, Cauliflower, Bhindi, Brinjal, Green Chillies, Raddish, Carrot, Mushroom, Other Vegetables, Mango, Grapes, Guava, Ber, Litchi, Chiku, Citrus Fruits, Other Fruits, Flowers

- (vi) **Drugs & Narcotics:** Tobacco, Medicinal Plants
- (vii) **Condiments:** Dry Chillies, Garlic, Dry Ginger, Turmeric, Coriander, Methi, Other Condiments
- (viii) **Sugarcane:** Sugarcane (Gur)
- (ix) **Miscellaneous Crops:** Guar Seed

The above mentioned crops account for about 86 percent of total value of output. For other cereals, other oil seeds, other fibers, fodder, other food and non-food crops, dyes and tanning material, grass, by-products etc., only area figures are available, but not out-turn.

3.4 All the agricultural commodities including various by-products have been grouped into four categories according to reliability of data, viz. (i) Principal Crops, (ii) Minor Crops (non- forecast), (iii) Miscellaneous and Unspecified Crops which have not been included in any of two categories mentioned above and (iv) Other Products and By-Products.

(i) **Principal crops:** The principal crops consist of Rice, Wheat, Jowar, Bajra, Maize, Gram, Barley, Other Kharif Pulses, Other Rabi Pulses, Groundnut, Sesamum, Rapeseed and Mustard, Sunflower, Cotton, Sunhemp, Sugarcane, Tobacco, Potatoes and Dry Chillies. The exhaustive district-wise statistics of area and output of all above crops are made available by the State Directorate of Land Records (DLR) in their publication, “Seasons and Crops Report” being published annually. The information regarding quantity of wheat and rice procured by the Government agencies is supplied by the Food, Civil Supplies & Consumer Affairs Department, Haryana. The information regarding utilization rates/ratios of sugarcane for seeding, chewing/juice making and preparation of khandsari has been supplied by the NSO. The quantity of sugarcane used for seed purpose has been estimated as 2.0858 MT per hectare of area under sugarcane. The estimates of sugarcane used for chewing and khandsari have been worked out as 2.5 percent and 0.12 percent, respectively of sugarcane production. The information on the quantity and value of sugarcane crushed by the mills during each year is available from the Cane Commissioner, Haryana.

(ii) **Minor crops:** Ragi, Small Millets, Jute, Mangoes, Guava, Ber, Litchi, Chiku, Aowla, Peach, Pear, Plum, Citrus Fruits, Sweet Potatoes, Grapes, Other Fruits, Onion,

Tomato, Cabbage, Cauliflower, Brinjal, Green Chillies, Bhindi, Raddish, Carrot, Green Peas, Mushroom, Other Vegetables, Flowers, Toddy, Dry Ginger, Turmeric, Garlic, Coriander, Methi, Other Condiments & Spices and Medicinal Plants have been included under this category. In case of Ragi, Small Millets and Jute, only the area figures are available and these are provided by the DLR. The data regarding area and production of Onion are supplied by the DLR. The data regarding area and production of Flowers, Medicinal Plants, all fruits, all vegetables and condiments & spices except Potato, Onion and dry chillies are supplied by the Horticulture Department. The value of output of toddy supplied by the NSO is based on NSS report of 68th round on consumption of some important commodities in India and census data on rural and urban population.

(iii) Miscellaneous and unspecified crops: Other cereals, other oil seeds, other fibers, other dyes and tanning material, other drugs & narcotics, fodder, miscellaneous food crops, miscellaneous non-food crops and foreyard & backyard cultivation have been covered under this category. In case of all above miscellaneous and unspecified crops, only the area figures are available and these are supplied by the DLR. However, the area under fodder also covers the area under guar. But the area under guar for which production of guar seed is available, is subtracted from the total area under fodder. From the remaining area, the production of green fodder has been worked out as 50 MT per hectare for irrigated area and 25 MT per hectare for unirrigated area under the crop. The production of guar seed is evaluated separately by using its price. The area under the crops in foreyard/backyard of houses has been estimated as 0.21 percent of the net area sown in the State.

(iv) Other products and by-products: This category comprises gur (indigenous production only), cane trash, bagasse, stalks & straw and grass. Out of the total out-turn of sugarcane, the quantity of sugarcane left over after allowing for the uses of crushing by mills, seeding, chewing/juice making and preparation of khandsari is assumed to be converted into gur. The production of gur is estimated as 10 percent of the sugarcane left over. The estimates of production of sugarcane bagasse have been prepared by taking 3.5 percent of sugarcane used for gur making. In case of grass, estimates of production for the year 1960-61 prepared and supplied by the NSO have been projected to other years on the basis of change in combined area under (i) permanent pasture and grazing lands, (ii) miscellaneous tree crops and groves, (iii) culturable waste land, (iv) fallow lands and (v) net area sown during the year by adopting the weights 4, 1, 2, 2 and 1, respectively for combining the area of these five categories.

Agricultural Prices

3.5 The district-wise data on weekly wholesale prices along with the quantity of market arrival of Paddy, Wheat, Jowar, Bajra, Barley, Maize, Gram, Moong, Arhar, Mash, Massar, Groundnut, Sarson, Toria, Taramira, Sunflower, Sesamum, Guar Seed, Cotton, Potato, Onion and Gur are collected by the offices of District Statistical Officers (DSOs) from the crop-wise selected primary markets during peak market arrival periods. The prices of flowers and condiments namely Dry Chillies, Dry Ginger, Turmeric, Garlic, Coriander and Methi are supplied by the NSO. The prices for the quantity of Paddy and Wheat procured by the Government agencies are provided by the Food, Civil Supplies & Consumer Affairs Department, Haryana. The prices at which the sugarcane is purchased by the sugar mills for crushing are available from the Cane Commissioner, Haryana. The district-wise wholesale prices of Mangoes, Grapes, Guava, Citrus, Ber, Litchi, Chiku, Aowla, Peach, Pear, Plum, Sweet Potato, Tomato, Cabbage, Cauliflower, Brinjal, Green Chillies, Bhindi, Radish, Carrot and Green Peas during peak market arrival periods are collected and supplied by the offices of District Statistical Officers (DSOs). The price of mushroom is worked out by moving the base year price of mushroom with the growth in the price of other vegetables. The data on prices of green fodder is obtained from the Farm Accounts Report being published annually by the Department of Economic and Statistical Affairs, Haryana. The base year price of Medicinal Plants is moved to the current year with the Wholesale Price Index (WPI) of Drugs and Narcotics.

Value of Agricultural Output

3.6 The district-wise weighted prices of those crops for which the data on weekly wholesale prices along with the arrival in selected primary markets during peak market period is available, has been worked out by adopting the following procedure:-

- (i) The arithmetic average of the wholesale weekly prices prevailing in each selected primary market within a district during peak market period has been calculated to get market/centre-wise prices.
- (ii) The weighted average price for a district has been obtained as a weighted average of the centre-wise prices derived at '(i)' above, weights being the centre-wise out-turn for sale.

The district-wise prices so arrived at have been used for evaluation of all those crops namely Paddy, Wheat, Jowar, Bajra, Barley, Maize, Gram, Arhar, Mash, Massur, Moong, Groundnut, Sesamum, Rapeseed & Mustard, Sunflower, Gur, Cotton, Potato, Onion, Sweet Potato and Guar Seed for which district-wise area and out-turn are available. The quantity of Paddy and Wheat procured by the Government agencies is evaluated at the

procurement price whereas the remaining production is evaluated at the district price derived at above. In case, out-turn of a certain commodity in the district is negligible and separate price for that district is not available, the price of adjoining district has been used.

3.7 In case of those fruits & vegetables except Potato, Onion and Sweet Potato for which wholesale prices are provided by the DSOs, the simple arithmetic average of all district-wise prices worked out for each crop is applied on the production data supplied by the Horticulture Department to work out the value of output. In case of flowers and condiments & spices, the data on production and prices as already explained in previous paragraphs are available for estimation of value of output. In case of medicinal plants, the data on production supplied by the Horticulture Department and prices worked out by the use of WPI (Drugs and Narcotics) are available for evaluation. The production of green fodder is evaluated at the prices available from the Farm Accounts Reports. The quantity of sugarcane purchased and value paid by sugar mills is available from Cane Commissioner, Haryana. The sugarcane used for seeding, chewing/juice making and preparation of khandsari has also been evaluated at the average cane price paid by sugar mills.

3.8 In case of those agricultural commodities for which the data either on prices or production or on both prices and production are not available, the deviation in the method of estimation of value of output has been done and the same has been briefed in the following paragraphs:

- (i) **Other Pulses:** On the basis of data given in NSS Report No. 32, the price of other pulses i.e. Moth, Horse Gram and Peas has been worked out as 85 percent of the weighted average price per tonne/weighted average value per hectare (VPH) of Arhar, Urad, Moong and Masur.
- (ii) **Other Cereals:** The gross value of output of other cereals has been estimated by applying weighted average VPH of Jowar, Bajra, Barley, Maize and Ragi to the area under other cereals.
- (iii) **Other Oilseeds:** The VPH of other oil seeds has been assumed as 85 percent of weighted average VPH of Linseed, Sesamum and Castor.
- (iv) **Sunhemp:** The VPH of Sunhemp for the year 1993-94 moved to the subsequent years with the wholesale price index of Jute, Sunhemp and Mesta Textiles has been used to estimate the value of output.
- (v) **Other Fibers:** The VPH of Sunhemp less 10 percent has been used to estimate the value of output of other fibers.
- (vi) **Other Condiments and Spices:** The average VPH of other condiments and spices

has been assumed to be equal to 90 percent of weighted average VPH of Dry Chillies, Dry Ginger, Cardamom and Black Pepper. As there is no production of Cardamom and Black Pepper in the State, 90 percent of weighted average VPH of Dry Chillies and Dry Ginger has been applied for the evaluation of output of other condiments and spices.

(vii) Other Fruits and Vegetables: The weighted average price of all fruits and vegetables for which the separate data is available has been used to evaluate the output of other fruits and vegetables.

(viii) Miscellaneous Food and Non-food Crops: For the evaluation of output of miscellaneous food and non-food crops, the all India estimates of yield per acre (converted to hectare) as estimated by the National Income Committee (NIC) have been projected to other years with the help of movement of composite WPI of 20 important agricultural commodities.

(ix) Other Dying and Tanning Material: The value of other dying and tanning material is estimated by using the VPH of miscellaneous non-food crops.

(x) Other Drugs and Narcotics: The VPH of other drugs and narcotics for the year 2004-2005 has been moved to the subsequent years with the growth in the value per tonne of Tobacco.

(xi) Foreyard/Backyard Cultivation: The output is estimated by using VPH of other fruits and vegetables.

(xii) Straw and Sticks: The VPH data based on the results of Cost of Cultivation Studies (CCS) has been used for evaluation of the by-products of Paddy, Wheat, Jowar, Bajra, Barley, Maize, Rapeseed & Mustard, Sunflower, Gram, Moong, Mash, Massur, Arhar, Cotton, Jute and Sesamum. The VPH of other pulses' straw is worked out by taking 85 percent of weighted average VPH of Moong, Mash and Massur.

(xiii) Sugarcane Trash and Bagasse: The output of sugarcane trash and bagasse is evaluated at the prices based on the results of Cost of Cultivation Studies (CCS).

(xiv) Grass: The all India price of grass for 1960-61 adjusted for the later years on the basis of price movement of wheat straw, has been used for evaluating the estimated output of grass.

Inputs

3.9 To arrive at the estimates of GVA from Crops sector, the necessary deductions on account of current cost of inputs have been made from the value of output. These consist of (i) cost of seed, (ii) cost of manure, (iii) current repair & maintenance of fixed assets and other operational costs, (iv) cost of livestock feed, (v) irrigation charges, (vi) market

charges, (vii) electricity charges, (viii) cost of pesticides & insecticides and (ix) cost of diesel oil. The detailed methodology and source material for the assessment of input cost have been briefed in the following paragraphs.

(i) Cost of Seed: In 2004-05 series, except for paddy, the farm harvest prices were used for estimation of value of seed. The methodology did not account for improved/hybrid variety of seeds being used by farmers for growing crops mainly in irrigated areas. In 2011-12 series, State-wise seed replacement rate (rate of replacement of ordinary seeds with hybrid seeds) has been used on the irrigated area to estimate the irrigated area under a crop for which hybrid seeds are used. For this part of irrigated area, price of seed as derived from CCS has been used for estimating the value of seed. For the remaining irrigated area and the un-irrigated areas, quantity of seed used per hectare has been evaluated with farm harvest price to estimate the value of seed. However, in case of Paddy, Sugarcane and Potato, price of seed as derived from CCS has been used for the crop cultivated in both the irrigated and un-irrigated areas. The seed rate (kg/hectare) is taken as average rate estimated from the latest five years data of CCS (2007-08 to 2011-12).

(ii) Cost of Manure: The manure consists of chemical fertilizers and organic manure. The material-wise quantity of chemical fertilizers consumed in the State and their prices are available from Fertilizer Association of India. In case of organic manure, the estimates of dung used for manuring purpose as evaluated in Livestock sector have been used.

(iii) Repairs and Maintenance of Fixed Assets: The repairs, maintenance and operational costs consist of expenditure on repair and maintenance in orchards & plantation resources, wells & irrigation, agricultural machinery & implements and transport equipments. These estimates have undergone change due to the adoption of AIDIS, 2013. The benchmark/base year estimates (as derived from AIDIS, 2013) are moved with the estimates of capital stock of farm business at current and constant (2011-12) prices.

(iv) Cost of Livestock Feed: The value of feed is worked out by using the per animal annual consumption rates of adult male cattle and adult male buffalo, current year prices of roughages and concentrates and projected population of these two categories of animals. The base year prices of roughages and concentrates available from the CCS are inflated with growth rate of WPI of fodder and food grains respectively to obtain current year prices. The per animal annual consumption rates of adult male cattle and adult male buffalo have been derived using the study on “India’s Livestock Feed Demand: Estimates and Projection” by the Centre of Economics and Social Research, New Delhi and National Centre for Agricultural Economics and Policy Research, New Delhi.

(v) **Irrigation Charges:** The annual data on irrigation charges payable to the Government in lieu of water supplied to the producers from Government canals and other means of irrigation have been culled out from the State Govt. Budget.

(vi) **Market Charges:** In the 2004-05 series, the estimates of market charges were based on the study of Market Margin conducted for 15 crops viz. Paddy, Wheat, Maize, Gram, Ginger, Mango, Potato, Onion, Arhar, Tobacco, Gur, Groundnut, Cotton, Apple and Tea during 2004-05 by the Directorate of Economics and Statistics (DES), Ministry of Agriculture, Govt. of India. It was found in the study that on an average, market charges are around 3.22 percent of the GVO. The same ratio has been used in 2011-12 series.

(vii) **Electricity Charges:** The expenditure on electricity used for agricultural purposes is considered as electricity charges. The estimates of electricity charges are based on the information regarding electricity consumption in the current year and current year price collected from the Central Electricity Authority, Govt. of India.

(viii) **Cost of Pesticides and Insecticides:** The cost estimates of pesticides and insecticides consumed in Crops sector in the State prepared by the NSO are based on the information regarding State-wise consumption and prices available from the Directorate of Plant Protection, Quarantine and Storage, Govt. of India.

(ix) **Cost of Diesel Oil:** The cost of diesel oil consumed in Crops sector has been compiled on the basis of number of diesel engines/tractors and consumption per diesel engine/tractor in value terms. The number of tractors is available in the report “Agricultural Research Data Book 2013” and number of diesel engines has been taken from the Indian Livestock Census. The number of tractors/diesel engines for the years beyond the survey period has been calculated using inter-survey/inter-censal growth rate. The value of diesel oil consumption per tractor and per engine has been taken from the CCS 2010-11.

Gross Value Added

3.10 The estimates of GVA from this sector have been arrived at by deducting the estimated total cost of inputs used in production from the total value of output. Since the operation of Government irrigation system is also an activity to be accounted for in the Crops sector, the GVA from such services has been added to obtain the corresponding total for the Crops sector. The GVA from the operation of Government irrigation system has been obtained as the sum of compensation of employees, interest payments, operating surplus and maintenance provisions (CFC). The details regarding compensation of employees, interest payments and operating surplus are available from the State Government Budget. It is observed that the operating surplus, which is taken to be the

excess of current receipts over the current expenditure, is generally found to be negative. Hence, the operating surplus is treated as zero and an equal amount is treated as irrigation subsidy. The information relating to depreciation of Government Irrigation system is supplied by the NSO.

Estimates at Constant Prices

3.11 For estimation of value added at constant prices, the double deflation method has been used and both the output of each crop along with their by-products as well as cost of inputs have been evaluated at 2011-12 prices. However, in case of seed, chemical fertilizers, feed of livestock, irrigation charges, electricity charges, pesticides & insecticides, current repairs & maintenance and cost of diesel oil, the estimates at both current and constant prices are supplied by the NSO. The GVA estimates from Government irrigation system at current prices are deflated with CPI (General) to compile the estimates at constant prices.

3.12 From the GVA obtained from Crops sector as a whole, FISIM has been deducted. The estimates of CFC supplied by the NSO are deducted to arrive at the Net Value Added (NVA).

Crops Sector at a Glance

3.13 Crops sector contributes about 8.6% to the total GVA of the State at current prices. The GVA of the Crops sector has increased from ₹ 4088737 lakh in 2011-12 to ₹ 7074647 lakh in 2021-22 and further estimated at ₹ 7513542 lakh during 2022-23 at current prices. For the year 2023-24 the GVA of this sector is estimated at ₹ 8119691 lakh and ₹ 4304340 lakh at current and constant (2011-12) prices with a growth of 8.1% and 4.7%, respectively.

Table 3.1 – GVA, GR and Contribution of Crops Sector at Current and Constant (2011-12) prices

Year	At Current Prices			At Constant (2011-12) Prices

LIVESTOCK SECTOR

COVERAGE

4.1 Livestock sector includes breeding and rearing of animals and poultry besides private veterinary services, production of milk, slaughtering, preparation and dressing of meat, production of raw hides and skins, eggs, dung, raw wool, honey and silkworm cocoons etc. The estimates of GSVA of this sector have been prepared by using the production approach.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

4.2 For the purpose of estimation of gross value of output, livestock products are divided into 7 sub-groups viz., (i) milk, (ii) meat group, (iii) dung, (iv) wool, hair and bristles, (v) eggs, (vi) honey and (vii) increment in livestock. The production estimates of main livestock products viz. milk, meat, eggs and wool are based on the results of the Integrated Sample Surveys conducted by the State Animal Husbandry Department on annual basis. In the absence of current direct information on output of various other livestock products, their annual production has been estimated with the help of yield rates obtained from relevant reports and estimated population of different categories of livestock. The main source of information on livestock numbers is Quinquennial livestock censuses held in the State. For the inter-censal and post-census years, the estimates have been arrived at by using the geometric growth rate observed for each category between the two latest consecutive livestock censuses.

(i) Milk: The data regarding milk production of buffaloes, cows and goats in the State is obtained from the State Animal Husbandry Department annually. The State Animal Husbandry Department does not estimate the production of camel milk. So, the production of camel milk has been worked out by applying the yield rate of milk per animal obtained from the NSO to the total number of animals.

(ii) Meat Group: The meat group comprises meat (animals & poultry), meat products (offal's & glands, fats, heads, legs etc.) and meat by-products comprising hides (cattle & buffalo), skin (goat & sheep), etc.

The production of goat meat, sheep meat and pig meat is made available by the State Animal Husbandry Department. The production of poultry meat has been calculated from the number of adult fowls, adult ducks, chickens and other poultry slaughtered by the

formulae given below:

- (a) **Chickens and ducklings killed** = total poultry of current year (chicks & ducks survived + 50% of hens & cocks population + 50% of ducks & drakes population + population of chickens & ducklings + 62.5% of other poultry) - total poultry of next year (population of hens + cocks + ducks + drakes + chickens + other poultry),
- (b) **Adult fowls killed** = 50% of population of hens and cocks,
- (c) **Adult ducks killed** = 50% of population of ducks and drakes and
- (d) **Other poultry** = 37.5% of other poultry.

The output of meat products and by-products i.e. offal's & glands, fats, head, legs, skin and other by-products from slaughtered animals has been estimated by using the animal-wise value of meat already worked out and ratios available from the study conducted by NRCM on meat products and by-products. The value of output from fats of fallen animals (only for cattle and buffalo) is estimated by using the number of fallen animals and yield rates available from the NSO, New Delhi. The output from cattle hides, buffalo hides, goat skin and sheep skin (fallen animals) is worked out by using the data regarding number of fallen animals. The data regarding number of fallen animals is derived from the livestock population by using the mortality rates supplied by the NSO.

(iii) **Dung:** The production of dung from cattle and buffaloes has been estimated by using the evacuation rates collected by Indian Agricultural Statistics Research Institute (IASRI) and State Animal Husbandry Department (1966-67). The production of dung from goat and sheep has been estimated by using the evacuation rates supplied by the NSO. The production of dung, thus estimated, has been divided into two groups (i) dung used as manure and (ii) dung used as fuel. The utilisation rates used are based on the results of IASRI report (1972). The quantity of dry dung-cakes has been taken as 40 percent of green dung.

(iv) **Wool, Hair and Bristles:** The production of wool clipped in the State is based on Integrated Sample Survey (ISS) conducted by Animal Husbandry Department on annual basis. The estimates of production of goat hair and camel hair have been prepared on the basis of yield rates provided by National Research Centre (NRC), Bikaner. The production of pig bristles has been worked out on the basis of yield rates available from the study conducted by the NSO in Uttar Pradesh.

(v) **Eggs:** The production of hen eggs in the State is based on the results of ISS conducted by the Animal Husbandry Department. The Animal Husbandry Department does not estimate the production of duck eggs. So, the production of duck eggs has been worked out by applying yield rate of eggs per duck obtained from the NSO to the total

number of ducks.

(vi) **Honey:** The production and prices of honey in the State are made available by the Khadi and Village Industries Commission (KVIC), Govt. of India.

(vii) **Increment in Livestock:** The annual net increase in the population has been calculated separately for each category of livestock on the basis of the projected population based on Livestock Censuses: 2003, 2007, 2012 and 2019.

Evaluation of Livestock Output

4.3 The gross value of livestock products has been obtained by evaluating the output of each commodity at the corresponding average annual wholesale price separately for urban and rural areas. The wholesale prices of different categories of livestock and livestock products are collected separately for urban and rural areas on bi-annual basis by the District Statistical Agencies. For this purpose, one centre in urban area and two centres in rural area have been selected in each district. Wherever the prices are not available or found unsatisfactory, corresponding prices of adjoining district have been used. The wholesale prices of some of the livestock products are not available from the markets. These commodities have been evaluated at the prices available from relevant reports and duly adjusted for subsequent years with the help of relevant indicators.

Inputs

4.4 To arrive at the estimates of gross value added from Livestock sector, necessary deductions on account of current cost of inputs have been made from the gross value of output. These consist of repair, maintenance & operational costs, market charges and feed of livestock.

(i) **Repair and maintenance for livestock and operational costs:** The benchmark estimates of repair and maintenance on barns, animal sheds and other miscellaneous costs (as derived from AIDIS, 2013) are moved with the estimates of capital stock of farm business. The operational cost is worked out by taking 0.25 percent of value of output from poultry meat, wool, hides and increment in livestock.

(ii) **Market charges:** The market charges for livestock are worked out on the basis of number of slaughtered animals and municipal charges per slaughtered animal.

(iii) **Feed of livestock:** The value of feed is estimated on the basis of data regarding species-wise and category-wise per animal value of annual feed consumption and species-wise and category-wise population. The per animal annual consumption rates for base year have been derived using the study on “India’s Livestock Feed Demand: Estimates and Projection” conducted by Centre of Economic & Social Research, New

Delhi and National Centre for Agricultural Economic and Policy Research, New Delhi. The per animal annual feed consumption value for subsequent years has been worked out by using the relevant indicators based on WPI of fodder and food grains. The age-wise and species-wise projected population is based on Livestock Censuses: 2003, 2007, 2012 and 2019.

Gross Value Added

4.5 The estimates of gross value added from this sector have been arrived at by deducting the estimated total cost of inputs used in production from the total value of output.

Estimates at Constant Prices

4.6 For estimation of value added at constant prices, both the output of live-stock products as well as cost of inputs have been evaluated at 2011-12 prices. However, the estimates of inputs at both current and constant prices are supplied by the NSO.

4.7 From the Gross Value Added obtained from Livestock sector, FISIM has been deducted. The estimates of CFC supplied by the NSO are deducted to arrive at the NVA.

Livestock Sector at a Glance

4.8 Livestock sector contributes 8.3% to the total GVA of Haryana at current prices. The GVA estimates for the Livestock sector at current prices stood at ₹ 6706898 lakh during 2021-22 and improved to ₹ 7236052 lakh during 2022-23. It is estimated at ₹ 7831933 lakh at current prices and ₹ 4099799 lakh at constant (2011-12) prices in 2023-24.

Table 4.1 – GVA, GR and Contribution of Livestock Sector at Current and Constant (2011-12) prices

FORESTRY AND LOGGING SECTOR

COVERAGE

5.1 The economic activities considered in this sector include:

- (i) Forestry (e.g. planting & conservation of forests, gathering of forest products, charcoal burning carried out in the forests and the like).
- (ii) Logging (e.g. felling and rough cutting of trees, hewing or rough shaping of poles, blocks, etc. and transportation of forest products to the sale depots/assembly centers).
- (iii) Farmyard wood (industrial wood & fuel wood collected by the primary producers from trees outside regular forests).

The forest products are classified into two broad groups, viz. (a) major products comprising industrial wood (timber, round wood, match and pulp wood) and fuel wood (fire wood and charcoal wood) and (b) minor products, comprising a large number of heterogeneous items such as bamboo, sandal wood, charcoal, lac, fodder, honey, resin, gum, tendu leaves, etc.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

5.2 The estimates of State Domestic Product from this sector have been prepared by following the production approach. The major sources of forest statistics are the O/o Principal Chief Conservator of Forests, Haryana and the NSO.

5.3 The data regarding value of output of industrial wood obtained from forest sources is provided by the State Forest Department. This data provided by the State Forest Department is for the recorded production and the considerable quantity of industrial wood escapes official recording. As suggested by the NSO, an allowance of 10 per cent of the recorded production of industrial wood has been made to cover the unrecorded production and unauthorized removal. The value of output of industrial wood obtained from social forests and trees outside forests (TOF) is compiled using projected production and current year price. The production from social forests and TOF is projected on the basis of potential production from TOF in the year of survey and growth rate of growing stock of TOF available from India State of Forest Report (ISFR), 2011 and 2013 from Forest Survey of India (FSI). The current year price is worked out by moving the base year price with the growth rate in price of industrial wood from forests. However, the data regarding the value of output of industrial wood obtained from social forests and TOF is compiled by the NSO.

5.4 The value of output of minor forest products has been estimated as 10 times of the revenue collected from minor forest products. In addition, output of fodder from forest sources is also included under minor forest products. The value of output of fodder is compiled by using value of roughages (as estimated for the feed of livestock in Crops and Livestock sectors) and percentage of livestock dependent on forest for fodder (0.02%). The percentage of livestock dependent on forest for fodder (0.02%) is available from ISFR, 2013 from FSI.

5.5 As the reliable estimates on production of fuel wood are not available, the output of fuel wood has been estimated through the consumption approach. The estimated production of fuel wood is based on three components, namely:

- (i) Household fuel wood consumption
- (ii) Agricultural by-products used as fuel
- (iii) Fuel wood consumed by industries and on funerals

The State-wise data on per head quantity of fuel wood (firewood and chips) consumed for 30 days separately for rural and urban areas is available from the NSS, 68th round (2011-12), Consumer Expenditure Survey (CES). To arrive at the total quantity of fuel wood consumed during the year 2011-12, the projected census population for rural and urban areas has been used. Similarly, the data on per head quantity of fuel wood consumed for 30 days separately for rural and urban area is available from the NSS, 61st round (2004-05). The per head quantity of fuel wood consumed for 30 days during the year 2011-12 has been projected to the subsequent years by using the compound growth rate observed between per head consumption of fuel wood based on 2004-05 and 2011-12 survey results. The total quantity of fuel wood consumed during the subsequent years is estimated by using the per head consumption (quantity) and population projected for those years. The total quantity of fuel wood consumed during different years as worked above is evaluated at the prices supplied by the State Forest Department.

From the total value of fuel wood consumption, the value of output of agricultural by-products namely arhar sticks, cotton sticks, jute sticks and sugarcane bagasse is subtracted to avoid the duplication as the value of output of these by-products is also accounted for in Crops sector.

5.6 As suggested by the NSO on the basis of the results of ASI 2011-12, the value of fuel wood consumed for industrial and religious purpose has been estimated as 7.64 percent of the value of fuel wood consumption of the households adjusted for the agricultural by-products.

5.7 To arrive at the estimates of gross value added, deductions have been made for the expenditure incurred on repairs, maintenance and other operational costs. As suggested by the NSO, expenditure on repairs, maintenance and other operational costs has been taken as 16.2 percent of the total value of output.

Estimates at Constant Prices

5.8 In case of TOF, fuel wood, by-products and roughages for which information on physical output is available, the constant prices estimates of value of output have been obtained by evaluating the output at the base year (2011-12) prices. In case of industrial wood obtained from forest sources and minor products worked out from revenue collected from minor forest products, the value of output at current prices has been deflated with the help of specially prepared index of wholesale prices of TOF and fuel wood, which is given as under:-

Item	TOF	Fuel Wood
Wholesale price in current year	P11	P12
Wholesale price in 2011-12	P01	P02
Out-turn during current year	Q1	Q2
Index number of implicit prices of TOF and fuel wood for current year with 2011-12 as base	$\frac{Q1. P11 + Q2. P12}{Q1. P01 + Q2. P02}$	

The same proportion of expenditure on repairs, maintenance and other operational costs (16.2%) to the total value of output as for estimates of current prices have been used to obtain the corresponding estimates of GVA at constant prices.

5.9 From the GVA obtained from Forestry and Logging sector, FISIM has been deducted. The estimates of CFC supplied by the NSO are deducted to arrive at the NVA.

Forestry and Logging Sector at a Glance

5.10 Forestry and Logging sector GVA has increased from the value of ₹ 389490 lakh during 2011-12 to ₹ 605271 lakh in the year 2021-22 at current prices. The GVA slightly increased in the year 2022-23 upto ₹ 639778 lakh and is estimated at ₹ 695933 lakh during 2023-24 at current prices and is estimated to grow by 8.8%. In real terms, the GVA is estimated at ₹ 465162 lakh during 2023-24.

Table 5.1 – GVA, GR and Contribution of Forestry and Logging Sector at Current and Constant (2011-12) prices

Year	At Current Prices			At Constant (2011-12) Prices		
	GVA (₹ Lakh)	Growth Rate (%)	Contribution to State GVA (%)	GVA (₹ Lakh)	Growth Rate (%)	Contribution to State GVA (%)

FISHING SECTOR

COVERAGE

6.1 The activities covered in the Fishing sector are:

- (i) Commercial fishing in (a) ocean, coastal and offshore waters & (b) inland waters, that include catching, tackling and gathering of fish from rivers, irrigation and other canals, lakes, tanks, fields in undated tracts, etc.
- (ii) Subsistence fishing in land waters and artificial ponds.
- (iii) Gathering of sea weeds, sea shells, pearls, sponges and other ocean and coastal water products.
- (iv) Fish curing viz., salting and sun drying of fish.
- (v) Production of prawn.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

6.2 The estimates of GVA have been prepared by following the production approach. The data on production and average wholesale prices of inland fish and prawn obtained from the State Fisheries Department have been used. As the production estimates are inclusive of subsistence fishing, no adjustment has been made on that account.

6.3 To arrive at GVA, deduction on account of repairs, maintenance and other operational costs has been made. In the absence of any data regarding repairs, maintenance and other operational costs, it is taken as 10 percent of the value of output in case of inland fish and 22.5 percent of value of output of prawn as suggested by the NSO.

Estimates at Constant Prices

6.4 For estimation of value of output at constant prices, production of fish for each year has been valued at 2011-12 prices. The same proportion of expenditure on repairs, maintenance and other operational costs as for estimates of current prices has been used to obtain estimates of GVA at constant prices.

6.5 From the GVA obtained from Fishing sector, FISIM has been deducted. The estimates of CFC supplied by the NSO are deducted to arrive at NVA.

Fishing Sector at a Glance

6.6 The GVA of Fishing sector was ₹ 85843 lakh during 2011-12. It has increased to ₹ 177459 lakh during 2022-23 and further estimated at ₹ 254132 lakh in 2023-24 with a tremendous growth of 43.2% at current prices. At constant prices, the estimated GVA of this sector during 2022-23 has stood at ₹ 177463 lakh and increased to ₹ 226392 lakh with a growth of 27.6% during 2023-24.

MINING AND QUARRYING SECTOR

COVERAGE

7.1 The economic activities covered under this sector comprise extraction of minerals which occur in nature as solids, liquids or gases, under-ground and surface mines, quarries and oil wells, with all supplementary operations for dressing and beneficiating ores and other crude minerals such as crushing, screening, washing, cleaning, grading, milling, floatation, melting, palletizing, topping and other preparations needed to render the material marketable. All these activities are covered to the extent they are carried on at the mine site. The production of 'rock salt' is included but production of salt obtained by way of evaporation of water from sea, lakes, etc. is excluded from the purview of this sector. Similarly, the expenditure incurred on preparing mining sites, prospecting and boring activities is not included under this sector.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

7.2 The estimates of this sector have been prepared by the production approach. Accordingly, the gross value of production has been estimated first and then deductions have been made for the inputs used in the production activity.

7.3 The methodology for compilation of GVA from major minerals has been revised in this series with base year 2011-12. In the old series, estimates of production and input costs were taken from the Indian Bureau of Mines (IBM). In this series, the GVA at basic prices has been computed first at National level using the annual financial statements of public sector companies, MCA21 database for the annual reports of private sector companies and input rates of major minerals supplied by the IBM Nagpur and then allocated to States on the basis of some suitable indicators.

7.4 The value of output of minor minerals for the year 2010-11 has been obtained from the Mines and Geology Department. The output for 2010-11 has been moved to subsequent years with the growth of revenue receipts of the Mines and Geology Department. The inputs rates supplied by the IBM, Nagpur are used for estimation of State GVA. Thus, there is no change in the estimation procedure of minor minerals in this series except that of sand. An indirect estimate of the value of output of 'extraction of sand' at basic prices is derived through the value of commodities used for 'construction'. As per the study conducted by the Central Building Research Institute, the value of output for sand at

National level is estimated as 7.21 percent of the total value of material inputs used in construction adjusted for Trade & Transport Margin (TTM). Further, the GVA of sand at National level is derived using the input rate obtained from IBM for sand and then allocated to States on the basis of value of production of sand received from the States.

7.5 The GVA compiled separately for major and minor minerals in the earlier paragraphs is then added to reach at total GVA of Mining and Quarrying sector at current prices.

Estimates at Constant Prices

7.6 The value of output of major minerals at constant (2011-12) prices has been derived by deflating the gross value of output of each mineral at current prices with the all India ratio of value of output of minor minerals at current to constant (2011-12) prices. The adjustment for value of inputs is done to arrive at GVA at constant prices.

7.7 From the GVA obtained from this sector, FISIM has been deducted. The estimates of CFC supplied by the NSO are deducted to arrive at NVA.

Mining and Quarrying Sector at a Glance

7.8 The GVA of the Mining and Quarrying sector has increased from ₹ 11882 lakh in 2011-12 to ₹ 87722 lakh in 2021-22 and further estimated at ₹ 89740 lakh during 2022-23 at current prices. For the year 2023-24 the GVA of this sector is estimated at ₹ 96639 lakh and ₹ 54037 lakh at current and constant (2011-12) prices with a growth of 7.7% and 8.4%, respectively.

MANUFACTURING SECTOR

COVERAGE

8.1 The manufacturing sector covers all manufacturing, processing and repairs & maintenance services units irrespective of their employment size, investment and location. In the old series, manufacturing was categorised into two segments- registered and unregistered manufacturing. The registered manufacturing sector covers all organised manufacturing and processing establishments which are registered under Section 2m (i) and 2m (ii) of the Indian Factories Act, 1948 which respectively refers to the factories employing 10 or more workers using power and those employing 20 or more workers but not using power on any day of the preceding 12 months and bidi and cigar establishments registered under Bidi and Cigar Workers (condition of employment) Act, 1966 and employing 10 or more workers using power or 20 or more workers not using power. The railway workshops, currency coinage & mints, ordnance factories and other manufacturing establishments of public sector, are covered under this sector. Further, output of liquefied petroleum gas (LPG) has also been included under this sector as the production of LPG is essentially a manufacturing activity. However, distribution of LPG in cylinders, which is a trading activity, is covered under Trade sector. The Unregistered Manufacturing sector being complementary to Registered Manufacturing sector, thus, by implication, covers all those units which are not covered under the Registered Manufacturing sector. In other words, the Unregistered Manufacturing sector covers all the manufacturing, processing, repairs and maintenance services units employing less than 10 workers and using power or less than 20 workers and not using power. It, by implication, also covers Own Account Enterprises (OAEs) engaged in the manufacturing activity. However, conversion of sugarcane into indigenous gur, slaughtering of animals and dressing of meat carried out by farmers and individuals are excluded from this sector as they are included under agriculture and allied activities. In the current series with base year 2011-12, the Manufacturing sector has been classified into Organised Manufacturing and Unorganised Manufacturing. One of the major changes in the current series is that 'Recycling' and 'Publishing of books, periodicals and other publishing activities' included in the manufacturing sector in the old series would be the part of 'Remediation Activities and Other Utility Services' and 'Services related to broadcasting' respectively in the current series.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

8.2 In the current series, there have been changes in the estimates due to adoption of National Industrial Classification – 2008 system (NIC-2008) for more contemporary industrial classification, enterprise approach for organised manufacturing and ‘Effective Labour Input Method’ for the unincorporated manufacturing enterprises.

Organised Manufacturing

8.3 In the old series, GVA estimates of registered manufacturing were compiled by following the production approach and total estimate was derived using the three data sources i.e. Annual Survey of Industries (ASI), Railway workshops and Currency, Coinage and Defence manufacturing. The establishment approach was followed in estimating the GVA in the Annual Survey of Industries i.e. the focus of survey is the factory, where primarily manufacturing activity takes place, implying thereby that other activities such as trading or other services of the head office conducted outside the surveyed factory were not included in 2004-05 series. However, enterprise approach was adopted for Railway workshops and Currency, Coinage and Defence manufacturing.

8.4 In this series, enterprise approach has been adopted for compilation of GVA. Till recently, the Annual Survey of Industries (ASI) was the only comprehensive source of data for the Registered Manufacturing sector. However, ASI provides estimates for the manufacturing establishments only, and therefore, does not provide any estimate for trading and other activities that may be provided elsewhere by the enterprise. Therefore, the services carried out by the manufacturing enterprises were not adequately covered in the national accounts. With the availability of the comprehensive MCA21 database, this data gap could be addressed by using the ‘enterprise approach’ for manufacturing also. In this series, estimates at National level have been derived using the annual accounts of Non Departmental Enterprises (NDE), MCA21 data base for private corporate sector and ASI data for quasi-corporations, apart from the budget documents of Departmental Enterprises (DEs), like railway workshops, GOI printing press and ordnance factories. ASI captures the data by type of organisation such as private and public limited companies, NDEs, proprietary and partnership factories, Hindu undivided family, KVIC etc. Annual accounts of DEs, NDEs and private corporate sector being already available, the estimates relating to the Non-Government unincorporated enterprises, which include partnership and proprietorship enterprises in ASI have been estimated and are classified as quasi-corporations. These enterprises being small in size, their coverage from ASI has been

treated as of enterprise even if the data is collected through establishment approach. In addition, in accordance with the recommendation of SNA 2008, unincorporated manufacturing enterprises maintaining accounts are quasi-corporations and therefore, their estimates have been included in organised manufacturing. For obtaining estimates of GVO/GVA by compilation category in case of private corporate sector, the estimates as obtained as the sum of all enterprises have been apportioned using the corresponding share in ASI. Thus, the estimates for organised manufacturing at National level are compiled using production approach by summing up the estimates from DEs, NDEs, private corporate sector enterprises, non-corporate manufacturing establishments covered under ASI and the quasi-corporations of the unincorporated enterprises.

8.5 The GVA of public corporations namely railway workshops and production units compiled at National level is allocated to States on the basis of sanctioned strength of employees in case of Railway workshops and State-wise salaries in case of production units. In case of other public corporations viz. Central DEs, estimate of GVA compiled at National level are allocated to the States on the basis of location of the DE. In the remaining public corporations i.e, NDEs, National GVA are allocated to States in the case of multi-state NDEs. Compensation of Employees (CE) is distributed on the basis of the State-wise number of employees in that NDE, while Operating Surplus (OS) is distributed in proportion to the State-wise gross block (value of assets) of that NDE. The estimates of GVA compiled for the private sector companies using MCA21 database are allocated to States (by compilation category) on the basis of State-wise value added in manufacturing (total, not institution-wise) as per the last available ASI. In case of quasi- corporations (factories covered under ASI but not registered under Companies Act), State-wise estimate of GVA (by compilation category) is obtained from ASI. Till ASI becomes available, estimates of the proceeding year are extrapolated using IIP and WPI.

Unorganised Manufacturing

8.6 The unorganised manufacturing consists of the household enterprises. In the old series, the GVA was estimated by following the income approach. The base year estimate of unregistered manufacturing was estimated as a combination of GVA from MSME sector and residual unregistered sector using the labour input method. The base year GVA of MSME (Micro, Small and Medium Enterprises) (other than those covered under ASI) was obtained by applying the GVA/GVO ratio of Directory Establishments (as derived from the NSS 62nd round Survey on Manufacturing Enterprises) to the GVO obtained from MSME Census of 2006-07 released by the Development Commissioner, MSME. The GVA of the

residual unregistered sector (the manufacturing activity not covered under ASI or MSME) was obtained by multiplying the GVA per worker (from 62nd round) and labour input from 61st round EUS after making suitable adjustments for the labour input in MSME. The above industrial group-wise gross value added compiled for base year (2004-05) was moved to subsequent years at current and constant prices with the help of group-wise index of industrial production and wholesale price index.

8.7 In the current series, the effective labour input method has been used for compilation category-wise estimation of base year GVA of unincorporated manufacturing enterprises at National level from the NSS 67th round. The NSS 67th round survey was conducted on Unincorporated Enterprises in 2010-11 and NSS 68th round was on Employment Unemployment Survey in 2011-12. GVA compiled at National level for the year 2011-12 is allocated using State-wise benchmark estimates of GVA compiled using value added per effective worker from NSS 67th round and number of effective workers from NSS 68th round. The benchmark State-wise estimates are then moved to subsequent years using the State's growth rate of GVA-manufacturing as estimated by ASI to get the State-level estimate. The compilation category-wise estimates are compiled by allocating the State's estimate using base year structure of the State's GVA by compilation category. For the year when ASI is not available, the proceeding year estimates are moved using IIP and WPI.

Estimates at Constant prices

8.8 The current prices estimates of GVA (compilation category-wise) in case of both organised and unorganised sectors are deflated with the relevant WPI to compile the estimates at constant (2011-12) prices.

8.9 From the GVA obtained from Manufacturing sector as a whole, FISIM has been deducted. The estimates of CFC supplied by the NSO are deducted to arrive at the NVA.

Manufacturing Sector at a Glance

8.10 In State GVA for the year 2023-24, the Manufacturing Sector is a major contributor with 19.0% contribution. The GVA of this sector decreased in 2019-20 and 2020-21 as compared to previous year and showed negative growth of 2.6% and 3.3%, respectively. It was due to decrease in production of all manufactured products affected by Covid-19 pandemic. Afterwards, in 2021-22, the GVA was estimated at ₹ 14991921 lakh at current prices showing a positive growth of 20.5%. However, at constant (2011-12) prices, the GVA for the years 2022-23 and 2023-24 is estimated at ₹ 12374397 lakh and ₹ 13187504 lakh with the growth of 7.5% and 6.6%, respectively.

ELECTRICITY, GAS, WATER SUPPLY AND OTHER UTILITY SERVICES SECTOR

COVERAGE

9.1 The economic activities covered in this sector in the previous series were:

- (i) Generation, transmission and distribution of electric energy.
- (ii) Manufacture of bio-gas and supply of gas through pipelines.
- (iii) Collection, purification and distribution of water for domestic and industrial consumers.

The operation of irrigation system is, however, excluded from this sector and is covered in 'Agriculture sector'. The output of Liquefied Petroleum Gas (LPG) has been included under manufacturing sector as the production of LPG is essentially a manufacturing activity.

- (i) In addition to the three activities as given at points No. (i), (ii) and (iii), one more activity viz. remediation and other utility services has also been included under this sector in this series with base year 2011-12.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

Electricity

9.2 The estimates of this sector have been obtained by following the production approach. The estimates are compiled through the enterprise approach, by aggregating the estimates for DEs, NDEs and companies in the private corporate sector. The GVA at National level from public corporations (DEs and NDEs) are compiled using their budget documents and annual reports. GVA of Central DEs is allocated to the States on the basis of the location of the DE. The estimates of GVA of NDEs viz; power generating companies are allocated on the basis of State-wise electricity generated. In case of National GVA of NDEs namely power grid corporations, CE is distributed to States in proportion to State-wise employment in that NDE, while OS is distributed in proportion to the State-wise gross block (value of assets) of that NDE. The estimates of National GVA from private corporations compiled using MCA21 data base for the annual reports of private sector companies are allocated on the basis of sum of number of units of electricity generated and number of units of electricity sold by private companies.

9.3 In case of Haryana State, the estimates of GVA from six separate bodies namely Haryana Vidyut Parsaran Nigam Ltd., Haryana Power Generation Corporation Ltd., Uttar

Haryana Bijli Vitran Nigam Ltd., Dakshin Haryana Bijli Vitran Nigam Ltd., Jhajjar Power Ltd. and Aravali Power Corporation Ltd. have been prepared by analyzing their annual accounts. The compensation to employees including basic wages, dearness allowance, overtime payments, gratuity, contribution to provident fund, pension, other social security and staff-welfare expenses, directors fee, etc. and operating surplus have been taken to form GVA from electricity. The GVA from other four bodies, i.e., Rural Electrification Corporation Limited, Satluj Jal Vidyut Nigam Ltd., Power Generation Corporation and National Thermal Power Corporation has been prepared and supplied by the NSO.

9.4 Further, companies engaged in production of electricity through ‘wind/renewable energy’ have been covered through the MCA21 database.

9.5 The GVA of all above ten bodies engaged in generation, transmission and distribution of electric energy in the State and GVA from wind/renewable energy are added to reach at the total GVA from electricity at current prices.

Gas

9.6 There is no change in the methodology and estimates are compiled by following the production approach through the enterprise approach, by aggregating the estimates for NDEs, companies in the private corporate sector and manufacturing of gas in households through bio- gas plants (gobar gas). The estimates for gobar gas have been classified under the ‘Households’ sector. Further, as in other cases, companies in the private corporate sector are being captured through the MCA21 database.

9.7 The estimates of GVA from NDE namely GAIL India Ltd. compiled from the annual report of the company is allocated to the States based on State-wise gas sold by the NDE. The estimates of State GVA in respect of gobar gas are prepared by multiplying the total number of plants installed up to the current year by value of production per plant. The State-wise data regarding number of plants installed is made available by the Ministry of Non-conventional Energy Sources and the State-wise value of production per plant is estimated on the basis of Khadi and Village Industry Commission (KVIC) data. This data is supplied by the NSO to the States. In the absence of input structure, the value of output of gobar gas is treated as value added. This is based on the assumption that the value of byproducts in the form of indigenous fertilizers (manure) resulted from the manufacturing of gas is equivalent to the value of gobar used therein.

Water Supply

9.8 The GVA estimates for Water Supply in the State are obtained by aggregating those for State Administrative Department, companies in the private corporate sector and private

unincorporated enterprises (unorganised sector).

9.9 The Public Health Department, Haryana plays the most important role in the maintenance of water supply services in urban and rural areas of the State for which the data on wages and salaries and other benefits to staff is available from the State Budget. The data regarding wages, salaries and other benefits for those urban areas in which the water supply services are maintained by the municipal committees/corporations is obtained from their annual budgets. The total expenditure on water supply services obtained from the State Budget and municipal committee budgets has been treated as net product from water supply services in the public sector. The GVA from private corporate sector compiled at National level using MCA21 data base for the annual reports of private companies is allocated to the States on the basis of State-wise annual wages of workers in the industry as per NSS 68th round. The base year estimates for the unorganised sector at National level have been compiled using the wages and the number of workers from the NSS 68th round Employment Unemployment Survey, duly adjusted for the population as per Census 2011. Then, the National level GVA of base year is allocated to the States on the basis of State-wise annual wages in the activity as per NSS 68th round. For subsequent years, the growth rate of GVA at current prices of private corporate sector at the National level is used. The GVA for subsequent years is allocated to States according to the base year proportions.

Remediation and other utility services

9.10 The estimates for this sector have been compiled by aggregating the estimates for recycling, sewerage, sanitation and other waste management services. The National estimates for recycling in the organised sector (public and private) have been obtained from ASI, while those for the remaining services (sewerage and sanitation) of organised sector have been compiled by aggregating the estimates of DEs obtained from analysis of budget document and estimates of the private corporations compiled using MCA21 data base. The National estimates for the unincorporated enterprises have been estimated using the NSS 67th round Survey on Unincorporated Enterprises, 2010-11 and NSS 68th round Employment and Unemployment Survey, 2011-12. The unincorporated enterprises are classified as quasi-corporations, if they are maintaining the accounts and otherwise, as household enterprises.

9.11 The State-wise GVA from recycling activity in case of public and private corporations including quasi-corporations is obtained from the results of ASI. For the year when ASI is not available, the previous year's estimates are moved using IIP and WPI. In

case of private unincorporated enterprises (household sector), the National GVA compiled for base year is allocated to the States on the basis of State-wise GVA as per NSS 67th round. Then the base- year estimates are moved to subsequent years using IIP and WPI.

9.12 In case of sewerage and sanitation, the State GVA of General Government including local bodies is compiled by the CSO using production approach and supplied to the State. The National GVA of private corporations from this activity is allocated to the State on the basis of base year State-wise GVA obtained from NSS 68th round. In case of private un-incorporated enterprises, the National GVA for base year is allocated to the State on the basis of State-wise GVA as per NSS 67th round. For the subsequent years, the growth rate of GVA of private corporate sector at current prices at the National level is used. The National GVA for subsequent years is then allocated according to the base year proportions.

Estimates at Constant Prices

9.13 The base year (2011-12) estimates of GVA from electricity sub-sector have been moved to the subsequent years with the help of quantum index prepared from the data on quantity of electricity consumed.

9.14 In case of gas sub-sector, the GVA at current prices has been deflated with CPI (Misc.) to compile the GVA at constant (2011-12) prices.

9.15 In case of water supply sub-sector, estimates of GVA at current prices has been deflated with CPI (Misc.) to compile the GVA at constant (2011-12) prices.

9.16 The estimates of GVA from remediation and other utility services at current prices have been deflated with CPI (General) to work out GVA at constant prices.

9.17 From the GVA obtained from this sector, FISIM has been deducted. The estimates of CFC supplied by the NSO have been used to work out the estimates of NVA.

Electricity, Gas, Water Supply and Other Utility Services Sector at a Glance

9.18 At current prices, the GVA of Electricity, Gas, Water Supply and Other Utility Services Sector has increased from ₹ 344604 lakh during 2011-12 to ₹ 1788222 lakh in 2021-22 and stood at ₹ 1953514 lakh during 2022-23 and at ₹ 2119991 lakh in 2023-24, witnessing growth of 9.2% and 8.5%, respectively. For the year 2023-24, the GVA is estimated at ₹ 587364 lakh anticipated to grow by 5.6% at constant (2011-12) prices.

Table 9.1 – GVA, GR and Contribution of Electricity, Gas, Water Supply and Other Utility Services Sector at Current and Constant (2011-12) prices

Year	At Current Prices			At Constant (2011-12) Prices		
	GVA (₹ Lakh)	Growth Rate (%)	Contribution to State GVA (%)	GVA (₹ Lakh)	Growth Rate (%)	Contribution to State GVA (%)

CONSTRUCTION SECTOR

COVERAGE

10.1 This sector covers contract construction by general builders, civil engineering contractors and special trade contractors together with own account construction carried out by independent units of enterprises or other organizations which are not part of construction industry proper. Thus, the activities covered are construction, repair and demolition of buildings, high-ways, streets, culverts, heavy construction, sewers, water mains, rail-road beds, rail road sub-ways, elevated high-ways, bridges, dams, drainage projects, hydro-electric plants, water power projects, sanitation projects, irrigation and flood control projects, land drainage, leveling and reclamation, water wells, communication lines and all other construction works whether undertaken by private bodies or governmental authorities. Due to lack of data, demolition activity has, however, been excluded from this sector.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

10.2 The Gross Value Added from Construction comprises the following components:-

- (i) Dwellings, Other Buildings & Structures (DOBS)
- (ii) Construction in plantations
- (iii) Mineral explorations.

10.3 GVA of Dwellings, Other Buildings & Structures further consists of two components namely (i) Pucca and (ii) Kutcha.

The former continues to be measured through the commodity flow approach and the latter through the expenditure approach at National level. However, in addition to these estimates, expenditure on construction activity in plantations and mineral explorations is separately estimated and included in GVA from construction. The broad methodology adopted in this series for estimating the total GVO and GVA from Construction Sector is broadly the same as the one used in earlier series except for some modifications and different data sources. The major revisions are due to the following:-

- (i) Use of financial reports as in MCA 21 database for estimation of GVA from Construction for private corporations.
- (ii) Revision in methodology for estimation of value of output for bricks and tiles used in construction.
- (iii) Estimation of value of output for bitumen and bitumen mixtures, and glass and glass products in addition to cement and cement products, iron and steel, bricks and

tiles, timber and fixtures and fittings used in Construction Sector.

- (iv) 'Other materials' to include service charges and therefore, presented as 'Other materials and Service charges' based on information received from study on cost of construction by CBRI.
- (v) Use of NSS 70th round, All India Debt and Investment Survey (AIDIS), 2013 for preparing benchmark estimates of rural residential buildings, urban residential buildings, non-residential buildings and other construction works.
- (vi) Use of NSS 65th round Survey on Housing Conditions, 2008-09, for obtaining ratios of pucca and kutcha construction for dwellings.
- (vii) Adjustment in the output of construction industry for the own account construction as included in the output of enterprises with major economic activity other than 'construction'.

Pucca Dwellings, Other Buildings & Structures

10.4 The estimates of pucca dwellings, other buildings & structures for the entire National economy are compiled first through the commodity flow approach on the basis of availability of basic construction materials and factor inputs. This forms the control figure of overall output of pucca dwellings, other buildings & structures for the country.

10.5 The output for pucca dwellings, other buildings & structures obtained through commodity flow approach includes both new construction and repair & maintenance. The approach covers the cost of basic materials, other materials and factor payments such as labour cost, contractor's profit, etc. In the current series, the construction costs incurred on seven basic materials used in construction activity have been captured as against five basic materials in the old (2004-05) series. The basic materials considered for construction in the 2011-12 series are (i) cement and cement products, (ii) iron and steel, (iii) bricks and tiles, (iv) timber and round wood (including imports of timber products and veneer plywood), (v) fixtures and fittings, (vi) bitumen and bitumen mixtures and (vii) glass and glass products. The item basket for the above construction materials has been finalized by analyzing the detailed results of Annual Survey of Industries (ASI) 2011-12 at commodity level of 7-digit National Product Classification for Manufacturing Sector (NPCMS). For estimating the value of output of these items from unorganised manufacturing sectors, NSS 67th round Survey on Unincorporated Enterprises, 2010-11 have been used. The estimates of basic materials compiled using ASI and NSS enterprise survey results have been appropriately adjusted with corresponding output estimated in the manufacturing sector. The Trade and Transport Margins (TTM) have been revised based on the Input Output Tables, 2007-08.

New/Revised Methodology for Bitumen & bitumen mixtures, Glass & glass products and Bricks & tiles:

10.6 Two new construction materials, namely, bitumen & bitumen mixtures and glass & glass products were included in the list of basic materials used for estimation of value of output of construction activity. The detailed results of ASI 2011-12 at 5-digit level of NIC 2008 along with 7-digit level of NPCMS code for commodities, have been analyzed for compilation of base year estimates of bitumen and bitumen mixtures and glass and glass products. The corresponding information from NSS 67th round has also been incorporated to account for manufacturing of glass & glass products in unorganised manufacturing sector. It is assumed that bitumen is not produced in the unorganised manufacturing sector. To these estimates, excise duty, net imports and import duty for the specific commodity has been added. Input ratios of these commodities in manufacturing obtained from ASI, 2011-12 have been applied to deduct the intermediate consumption thereby getting an estimate of use in construction. The methodology for compilation of estimates of “bricks & tiles” has been revised. For estimating the production of bricks & tiles in organised sector, detailed results of ASI 2011-12 for 7-digit level of NPCMS code for bricks & tiles at 5-digit level of NIC 2008 have been analyzed. For estimating the production of bricks & tiles in un-organised sector, results of NSS 67th round have been used. The methodology for compilation of estimates of remaining basic materials remains the same in the new series as in the old (2004-05) series.

10.7 It has been estimated from the results obtained from the study of cost of construction by CBRI that the seven basic material groups account for 74.96 percent of the total construction materials while the remaining 25.04 percent accounts for ‘other materials and service charges’. ‘Other materials and service charges’ include sand, kerosene oil, steam coal, cement primer, cement paint, driver charges, mixing charges, water charges, etc. After obtaining the estimated value of output of pucca construction from the basic materials, these ratios are used to estimate output from ‘other material sand service charges’. In other words, the total value of construction materials is estimated as total value of basic materials divided by the number ‘0.7496’. The revised norms for basic materials, other materials and factor inputs used in new series for construction activity are 48.7 percent, 16.3 percent, and 35.0 percent as against the norms of 49.5 percent, 15.7 percent, and 34.8 percent, respectively in old series. The factor incomes consist of wages of all type of construction workers, contractors' profits, etc.

10.8 The estimates of output of dwellings, other buildings & structures for different institutions namely General Government, public corporations, private corporations and households are also compiled independently from budget documents, annual reports, MCA21 database and results of AIDIS.

10.9 The estimates of output for General Government and public corporations are prepared using information available from budget documents and annual reports.

10.10 The estimates for private corporations are prepared using information on financial parameters of non-government companies from MCA21 database provided by Ministry of Corporate Affairs. In the 2004-05 series, these estimates were prepared on the basis of the sample studies of non-Government financial and non-financial Companies by RBI. In the earlier series, construction expenditure by new companies was used to supplement the estimates from RBI study. As the MCA21 database includes the new companies also, this adjustment has been done away with in the 2011-12 series.

10.11 In respect of 'Households', the estimates of new construction and repair and maintenance for (i) Rural Residential Buildings (RRB), (ii) Urban Residential Buildings (URB) and (iii) Non-Residential and Other Construction Works (NRB and OCW) are prepared initially for the benchmark year using the results of AIDIS 2013. The benchmark estimates for RRBs and URBs are extrapolated with various indicators such as inter censal growth rates of rural and urban dwellings, and composite price indices, for compiling the estimates for subsequent years. The above said estimates of RRBs and URBs are further apportioned to Pucca and Kutcha dwellings using the NSS Report, 65th round, 2008-09. The norms used for apportioning the RRBs into pucca and kutcha dwellings are 83:17 (as against 79:21 used in 2004-05 series) and for URBs, these ratios are 98:2 (as against 97:3 used in 2004-05 series). As regards NRB & OCW, expenditure on wells and other irrigation resources by households engaged in farm business and expenditure on workplace, workshop and other constructions by households engaged in non- farm business are shown under 'pucca buildings & structures'. The expenditure on barns and animal sheds and 'other construction works' under farm business, and development of land are shown under 'kutcha buildings & structures'.

Kutcha Dwellings, Other Buildings & Structures

10.12 In the current series, the kutcha DOBS includes kutcha construction undertaken in the General Government, public corporations and households. The value of output in kutcha DOBS from General Government and public corporations is compiled from the analysis of budget documents. No kutcha DOBS is constructed by private corporations.

The methodology for compilation of value of output from household sector has already been explained above.

Plantations

10.13 The capital expenditure incurred on cultivation of plantation crops during the gestation period is treated as output of the ‘Construction Industry’ for that year. Now, the coverage of capital expenditure in cultivation of plantation crops also include cardamom based on data available from NHB and NABARD for the year 2014-15 in this series. The estimates of expenditure of General Government and public corporations are compiled from the analysis of budget document and annual reports. The value of output of private corporations is estimated as per the information on fixed asset block available from annual reports contained in MCA21 database. For compilation of estimates of household sector, total capital expenditure on plantation is derived as a product of cost available from NABARD and increment in area under cultivation available from States’ DES/NHB. Thereafter, value of output in the household sector is worked out by residual approach.

Mineral exploration

10.14 As regards expenditure in mineral exploration, this is the expenditure incurred by all institutional sectors on mineral exploration asset. No mineral exploration is undertaken by General Government and households. The expenditure incurred by public corporations (NDEs) on mineral exploration is worked out from annual reports. The estimates of private corporations are compiled as per the balance sheet information available from MCA21 database. The estimates of mineral exploration are then added to the commodity flow estimates of construction.

10.15 The final estimate of Gross Value Added from construction at National level is compiled as sum of (i) factor payments (factor inputs) as 53.9 percent of total value of construction materials in pucca DOBS; (ii) 75 percent of total value of output in kutcha DOBS; (iii) 75 percent of expenditure incurred on plantations; and (iv) fixed proportion (75%) of expenditure on mineral exploration based on the information available from annual accounts of public and private corporations.

Estimation at State level

General Government: Administrative Departments

10.16 NVA of State Government in construction is taken from State Government budget documents. NVA of Central Government in construction is allocated to the States based on the information in the “works annexure” of the budget documents of Central Government. NVA of local bodies of the State are compiled and supplied by the NSO. CFC of General

Government is allocated on the basis of NVA as derived above. GVA is calculated as sum of NVA and CFC. These estimates of GVA are deflated with index of urban wages to compile GVA at constant prices.

Public Corporations: Departmental Enterprises

10.17 The estimates of GVA at current prices are compiled by the analysis of budget documents for Central and State Governments using production approach in the industry. The estimates of Central DEs are allocated to the States using State-wise outlay on construction. The GVA at constant prices is estimated by deflating the current prices estimate with index of urban wages.

Public Corporations: Non-Departmental Enterprises

10.18 The estimates of GVA compiled at National level by analysis of annual reports using production approach are allocated to States in the case of multistate NDEs. In case of single- state NDE, the entire GVA is allocated to that State where NDE is located. In case of NHAI, GVA is allocated using state-wise length of highways awarded under Public Private (PP) and Engineering, Procurement & Construction (EPC) projects in the year. In case of other NDEs, CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS is distributed in proportion to the State-wise gross block (value of assets) of that NDE. The above estimates of NDE at current prices are deflated with index of urban wages to arrive at estimates at constant prices.

Household sector

Rural/Urban residential buildings new construction outlays plus repair & maintenance

10.19 The base year State-wise estimates of expenditure on new construction and repairs & maintenance in respect of rural and urban residential buildings based on the results of AIDIS, 2013 are moved to later years with the help of inter-censal growth rate in the number of dwellings as per Census 2011. The price changes are imposed with the help of Rural/Urban Cost of Construction Index (CCI) to arrive at estimates of expenditure at current prices. Cost of Construction Index (CCI) for Rural/Urban Housing is a weighted index of prices of building materials (i.e. cement, iron & steel, bricks and timber) and labour. Additionally for the urban CCI, fixtures & fittings and 'other materials' are also considered. These estimates of expenditure at current and constant prices are converted into the estimates of GVA using the ratio of GVA to expenditure supplied by the NSO.

Rural/Urban non-residential buildings and other construction works (new construction plus repairs & maintenance)

10.20 The base year State-wise estimates of expenditure on new construction and repairs & maintenance in respect of rural and urban non-residential buildings based on the results of AIDIS, 2013 are moved to later years with the help of combined index of value of output from agriculture sector and manufacturing sector at current and constant prices. These estimates of expenditure at current and constant prices are converted into the estimates of GVA using the ratio of GVA to expenditure supplied by the NSO.

Plantations in the household sector

10.21 All India estimates of GVO of construction in plantations in the household sector are distributed to the States using State-wise information on increment in area under cultivation of the plantation crops. The eighteen plantation crops namely, coconut, tea, coffee, rubber, citrus fruits, pineapple, cashew nut, areca nut, banana, mango, grapes, papaya, apple, litchi, sapota, guava, pomegranate and cardamom are considered. The GVA estimates of plantation sector at current prices are supplied by the NSO. The estimates at constant prices are compiled by deflating the current prices estimates with Rural Cost of Construction Index (CCI).

Other households sector

10.22 Other households sector includes Non-Profit Institution Serving Household (NPISH) and unincorporated enterprises not covered in AIDIS. These estimates are obtained as residual through the commodity flow method of the household sector and allocated on the basis of a composite indicator using State-wise consumption of cement and iron & steel. The GVA estimates of this sector at current prices are supplied by the NSO. The estimates at constant prices are compiled by deflating the current prices estimates with Rural Cost of Construction Index (CCI).

Residual Sector

10.23 The residual sector includes data on private corporate sector and other un-allocated portion of GVA construction at the National level. The estimates are allocated on the basis of a composite indicator using State-wise consumption of cement (weight: 19.66%) and iron & steel (weight: 80.34%). The GVA estimates of this sector at current prices are supplied by the NSO. The estimates at constant prices are compiled by deflating the current prices estimates with Urban Cost of Construction Index (CCI).

10.24 The estimates of GVA for different components i.e. public sector, household sector, plantation, other households and residual sectors at both current and constant prices as compiled above are added to work out the total GVA from construction sector.

10.25 From the estimates of GVA so arrived, FISIM has been deducted. The NVA has been obtained after deducting CFC from GVA. The estimates of CFC have been supplied by the NSO.

Construction Sector at a Glance

10.26 Construction sector is contributor of 8.1% of the total GVA of Haryana. The GVA of this sector was ₹ 2975966 lakh during 2011-12. It has increased to ₹ 7041222 lakh during 2022-23 and further estimated at ₹ 7631253 lakh in 2023-24 with a growth of 8.4% at current prices. At constant prices, the estimated GVA of this sector during 2022-23 stood at ₹ 4317253 lakh and increased to ₹ 4709078 lakh with a growth of 9.1% during 2023-24.

XI**TRADE, REPAIR, HOTELS AND RESTAURANTS SECTORS****COVERAGE**

11.1 Trade activity includes wholesale and retail trade in all commodities whether produced domestically, imported or exported. The activities of purchase and selling agents, brokers and auctioneers are also included under this sub-sector. The wholesale trade covers units which resell without transformation new and used goods generally to the retailers and industries, commercial establishments, institutional and professional users or to other wholesalers. The retail trade covers units which mainly resell without transformation new and used goods for personal or household consumption. The repair services of computers, household goods and motor vehicles (including motor cycles) are also included in this section. In the earlier series, repair of computers was a part of computer related activities. It has been made a part of this category in the current series as per NIC 2008. Hotels and restaurants activity covers the services rendered by hotels and other lodging places, restaurants, cafes and other eating and drinking places.

METHODOLOGY AND SOURCE OF MATERIAL**Estimates at Current Prices****Trade and Repair Services**

11.2 The benchmark year estimates of GVA for this sub-sector in the old series were prepared separately for the public sector, private organised sector and households sector. For public sector trading units, GVA estimates were compiled by analyzing the annual accounts of public trading enterprises and budget documents. The estimates for private organised part comprising private corporate sector and cooperative societies engaged in trade were prepared using the results for the RBI study on company finances and total paid up capital of companies available from Ministry of Company Affairs and the information available from the NABARD publication viz “Statistical statement relating to the cooperative movement in India 2003-04” respectively. As the category of unorganised sector was not covered in the NSS 63rd round Enterprise Survey, the GVA of this sector for the year 1999-2000 was moved to 2004-05 using the index of gross turnover based on the total sales tax receipts in the State.

11.3 In this series, the estimates of GVA for trade and repair services have been prepared separately for the categories (as per NIC 2008 classification) namely (i) trade and repair of motor vehicles (including motor cycles) and retail sale of automotive fuel, (ii) wholesale

trade except of motor vehicles and motor cycles + wholesale of lottery tickets, (iii) retail trade except of motor vehicles and motor cycles + retail sale of lottery tickets and (iv) repair of computers and personal and household goods. The revision in GVA estimates of public, private and unorganised components in 2011-12 in this series has occurred due to the availability of latest data from different source agencies.

11.4 For public sector trading units, estimates of GVA are compiled using income approach in case of DEs and production approach in case of NDEs. In case of DEs and NDEs, GVA estimates have been compiled by analyzing the budget documents and the annual accounts of public trading enterprises, respectively. There is no change in the sources and methods of estimating the GVA of these enterprises. GVA of Central DEs are allocated to the States on the basis of the location of the DE. The estimates of GVA from Central NDEs are allocated to States in the case of multi-State NDEs. CE is distributed on the basis of the number of employees in each State in proportion to the State-wise employment in that NDE while OS is distributed in proportion to the State-wise gross block (value of assets) of that NDE.

11.5 The estimates of private organised part comprising private corporate sector, quasi-corporations and co-operative societies engaged in trade and repair services have been prepared as per the methodology given below.

In case of private corporate sector, estimates of GVA at current prices are compiled using production approach. The estimates of private incorporated enterprises at National level have been derived using the MCA21 database for the annual reports of private sector. The base year National GVA of private corporate sector is allocated to States on the basis of GVA estimated using Gross Value Added Per Worker (GVAPW) from NSS 67th round and labour input from NSS 68th round.

For subsequent years, GVA at current prices is obtained by extrapolation using index of sales tax. Thereafter, current prices GVA worked out for subsequent years is adjusted to NAS supplied by the NSO. The base year National GVA from cooperatives compiled using the information from NABARD publication, “Statistical statements relating to co-operative movement in India, 2004-05” is allocated to the States on the basis of LI in the sector from 68th round. For subsequent years, GVA at current prices is obtained by extrapolation using index of sales tax.

11.6 The estimates of the un-incorporated segment (quasi-corporations and household enterprises) have been compiled using the labour input method. The private un-incorporated sector (quasi-corporations and household sector) covers (i) maintenance and

repair of motor vehicles and motor cycles, (ii) sale of motor vehicles, (iii) whole sale trade except of motor vehicles, (iv) repair of personal and household goods and (v) retail trade (except motor vehicle). The base year National GVA is prepared by using the results of NSS 68th round Employment and Unemployment Survey (EUS), 2011-12, population census 2011 and NSS 67th round Employment Survey (ES), 2010-11. The base year State-wise GVA is allocated using GVAPW from NSS 67th round and labour input from NSS 68th round. For subsequent years, GVA at current prices is obtained by extrapolation using index of sales tax. Thereafter, current prices GVA worked out as above for subsequent years are adjusted to NAS.

Hotels and Restaurants

11.7 The methodology followed for estimating National GVA of public sector, private organised sector and households in the new series is same as that of trade and repair services.

11.8 The GVA of Central NDEs at current prices is allocated to States in the case of multi- State NDEs. CE is distributed on the basis of the number of employees in each state in proportion to State-wise employment in that NDE while OS is distributed in proportion to the State-wise gross block (value of assets) of that NDE.

11.9 The National GVA of private corporations at current prices is allocated to States on the basis of tourist arrivals (domestic + international tourists).

11.10 In case of private un-incorporated enterprises, base year State-wise GVA is compiled using GVAPW from NSS 67th round and labour input from NSS 68th round. For subsequent years, current prices estimates are obtained by using corporate growth in the corporate sector.

Estimates at Constant Prices

11.11 The estimates at constant (2011-12) prices in case of both Trade and Repair Services and Hotels and Restaurants have been prepared by deflating the current prices estimates with the wholesale price index of all commodities.

11.12 The estimates of GVA from Trade and Repair Services and Hotels and Restaurants are adjusted separately for FISIM. To arrive at NVA, estimates of CFC supplied by the NSO have been deducted from the GVA.

Trade, Repair, Hotels and Restaurants Sector at a Glance

11.13 Trade, Repair, Hotels and Restaurants sector is one of major contributors to the total GVA with contribution of about 12.9%. The GVA of this sector was ₹ 3310742 lakh during 2011-12. It has increased to ₹ 10710218 lakh during 2022-23 and further estimated at ₹ 12153157 lakh in 2023-24 at current prices. This sector has maintained a positive growth rate throughout from 2011-12 except 2020-21. For the year 2023-24, a positive growth rate of 13.5% is estimated at current prices. At constant prices, the estimated GVA of this sector during 2022-23 has stood at ₹ 7014421 lakh and increased to ₹ 8059360 lakh with a growth of 14.9% during 2023-24.

TRANSPORT, STORAGE, COMMUNICATION AND SERVICES RELATED TO BROADCASTING SECTORS

COVERAGE

12.1 The economic activities covered in this sector are:

- (i) Transport by railways,
- (ii) Transport by other means, namely; road transport (mechanized and non mechanized), water transport (coastal, ocean and inland), air transport and services incidental to transport,
- (iii) Storage and
- (iv) Communication services rendered by Post & Telecommunication Department and Overseas Communication Services.

12.2 Railway workshops and railway manufacturing establishments are included in the 'manufacturing' sector. Construction activity of the railways is taken into account in the 'construction' sector. Expenditure on education, medical and health services is also excluded here and included in 'other services'. Similarly, the activities relating to telecommunication workshops are excluded from communication and included in manufacturing sector.

12.3 In the current series with base year 2011-12, the activities of travel agencies and tour operators are no longer a part of category, 'Services incident to transport' as per NIC 2008. This will form a part of new category, 'Real estate, ownership of dwellings and professional services' group. In case of Communication and services related to broadcasting, a new category, 'Recording, publishing and broadcasting services' has been included in this category.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current and Constant Prices

Transport by Railways

12.4 There is no change in compilation procedure for estimation of GVA of Railway transport services at National level. The estimates of gross value added have been prepared by following the income approach in case of DEs and production approach in case of NDEs and private corporate companies. The National GVA is compiled on the basis of analysis of Annual Railway Budget in case of DEs and Annual reports in case of NDEs. However, in the current series, estimates of 'Railways' operated by the private companies, have been prepared using their accounts as available in the MCA21 database. National estimates of GVA are allocated to States on the basis of indicators like section-wise passenger and

freight earnings, State-wise number of employees and the capital-at-charge in each zone. The constant prices estimates at the National level are estimated using the Implicit Price Deflator (IPD). However, the State SDP estimates of this sub-sector at both current and constant prices are prepared by the CSO and are used by the State as such.

Transport by Other Means

12.5 This sub-sector covers all transport services other than railways. However, air transport and water transport do not exist in Haryana.

Road Transport

12.6 In the old series, public sector GVA estimates for mechanized road transport were compiled by analyzing the Budget documents of State Government. The base year estimates of GVA for private sector (private corporate and unorganised) of mechanised and non-mechanised road transport were compiled by the labour input method using the results available from NSS, 61st round, EUS 2004-05, population census 2011 and NSS, 63rd round 2006-07. The base year GVA was moved to subsequent years using different indicators.

12.7 In the current series, there is no change in the methodology for compilation of public sector estimates. The GVA estimates of State DE at current prices are compiled using production approach by the analysis of State budget document. In case of Central NDEs, estimates of National GVA at current prices are estimated by the production approach from the analysis of annual reports and allocated to States. CE is distributed on the basis of number of employees in each State in proportion to State-wise employment in that NDE while OS is distributed in proportion to the State-wise gross block (value of asset) of that NDE. The estimates of State DE and Central NDEs at constant prices are compiled by deflating the current prices estimates with CPI (T&C).

12.8 In case of private corporate sector, the National GVA is compiled by production approach using MCA21 data base for the annual reports of private sector companies whereas GVA of co-operatives is worked out on the basis of NSS 63rd round ES, 2006-07. The National GVA of private corporate sector and co-operatives is then allocated to the States on the basis of GVA estimated using GVAPW from NSS 67th round and labour input from NSS 68th round. The GVA at constant prices is worked out by extrapolation of base year estimate with the growth in vehicles.

12.9 In case of un-incorporated road transport, GVA for base year has been compiled by using the workforce estimated by the Department of Economic and Statistical Affairs, Haryana and GVA per worker available from the NSO. The workforce for 2011-12 has been compiled by employing either one or two persons to each vehicle of different

categories (private vehicles on road/in use provided by State Transport Department) depending upon the requirement of persons (driver/conductor) for each category. While estimating the workforce, it has been considered that all the private sector vehicles (data provided by State Transport Department) were engaged in private corporate, co-operatives and un-incorporated road transport. Therefore, the base year GVA for un-incorporated transport has been calculated by deducting the GVA of private corporate/cooperatives (provided by NSO) from the total GVA as worked out above. Then, the base year GVA for un-incorporated road transport has been moved to subsequent years on the basis of growth in private sector vehicles to work out GVA at constant prices. The GVA at current prices is compiled by inflating constant prices GVA with CPI (T&C).

Services Incidental to Transport

12.10 In the old series, the estimates of Services Incidental to Transport for private sector were worked out by multiplying the workforce based on NSS, 61st round EUS 2004-05 and population census, 2001 with GVA per worker available from the NSS, 63rd round 2006-07 adjusted for the base year. The benchmark year estimates of GVA were moved forward with the index of value of output of commodity producing sectors. In case of public sector, the estimates were supplied by the NSO.

12.11 In the current series, the methodology for compilation of public sector National estimates at both current and constant prices remains the same as in case of road transport. GVA of Central DEs at current prices are allocated to States on the basis of location of the DE. In the case of Central NDEs, estimates of National GVA at current prices are estimated by the production approach from the analysis of annual reports and allocated to States. CE is distributed on the basis of number of employees in each State in proportion to State-wise employment in that NDE while OS is distributed in proportion to the State-wise gross block (value of asset) of that NDE. The estimates of State DE and Central NDEs at constant prices are compiled by deflating the current prices estimates with CPI (T&C).

12.12 In case of private corporate sector, the National GVA at current prices is compiled by production approach using MCA21 data base for the annual reports of private sector companies whereas GVA of co-operatives is worked out on the basis of NSS 63rd round ES, 2006-07. The National GVA of private corporate sector and co-operatives is then allocated to the States on the basis of GVA estimated using GVAPW from NSS 67th round and labour input from NSS 68th round. The GVA at constant prices is worked out by extrapolation of base year estimate with the growth in vehicles.

12.13 In case of private un-incorporated enterprises, the base year GVA at National level

is prepared by effective LI method using the results available from NSS 68th round EUS, 2011-12, population census 2011 and NSS 67th round ES, 2010-11. The base year State-wise GVA at current prices is compiled using GVA from NSS 67th round and LI from NSS 68th round. The GVA at constant prices for subsequent years is worked out by extrapolation of base year estimate with the growth in vehicles. Then, the current prices estimates are compiled by inflating the constant prices estimates with CPI (T&C).

Storage

12.14 The activity of Storage is being carried out by State Warehousing Corporation (SWC) and Central Warehousing Corporation (CWC) in the State.

In case of SWC, GVA at current prices is obtained by the analysis of annual accounts. GVA at constant prices is compiled by the extrapolation of base year GVA with index of storage capacity of SWC. The GVA of CWC at current prices worked out from the analysis of annual accounts is allocated to the State in proportion to the capacity of CWC warehouses in the State to total storage capacity of CWC. The GVA of CWC at constant prices is compiled by extrapolating the base year GVA with index of storage capacity of SWC in the State.

Communication and Services Related to Broadcasting

12.15 Under this sub-sector, the GVA is prepared for Department of Posts and NDEs in public sector and courier activities, cable operators and other communication in private sector.

12.16 In the earlier series, the public sector GVA estimate was prepared by analyzing the budget documents and annual accounts of Department of Posts and NDEs. The estimates of private corporate and unorganised sector for both cable and courier services were compiled using the LI method. The GVO estimates of private corporate sector for other communication services (reclassified as telecommunication in new series) was compiled as a product of the annualized average revenue per user and number of subscribers. The GVO/GVA ratio of sampled private cellular companies was applied on the revenue so obtained to get the GVA for this activity. The estimates of unorganized part for other communication services were compiled using LI method.

12.17 In the current series, the National GVA of Department of Posts and Central NDEs at current prices compiled using production approach by the analysis of budget documents and annual reports is allocated to the States on the basis of indicators like receipts, rent, interest etc. In case of broadcasting (Prasar Bharati), it has been allocated on the basis of sanctioned strength. The constant prices estimates are obtained by deflating the current

prices estimates using CPI (T&C).

12.18 In case of private corporate sector enterprises, the National GVA for all categories of courier activities cable operators, telecommunication and recording, publishing and broadcasting services have been compiled using MCA21 data base. The National GVA from courier activities at current prices has been allocated on the basis of GVA of Posts. GVA of cable operators, recording, publishing and broadcasting services has been allocated to the State on the basis of population having television as per census 2011. GVA of telecommunication in the base year has been allocated on the basis of number of subscribers in the base year. This has been extrapolated using growth in subscribers and CPI (T&C) for the current prices estimates of subsequent years. The State estimates at constant prices for all categories have been obtained by deflating the current prices estimates with CPI (T&C).

12.19 In case of private un-incorporated sector, the National base year GVA at current prices as compiled using GVA from NSS 67th round and LI from NSS 68th round has been allocated to the State on the same criteria as adopted in the private corporate sector. The current prices estimates are deflated using CPI (T&C) to reach at constant prices estimates.

12.20 GVA as worked out above for Transport by other means, Storage and Communication and Services related to broadcasting has adjusted for FISIM separately. To arrive at NVA, estimates of CFC as supplied by the NSO have been deducted from the GVA.

Transport, Storage, Communication and Services related to Broadcasting Sector at a Glance

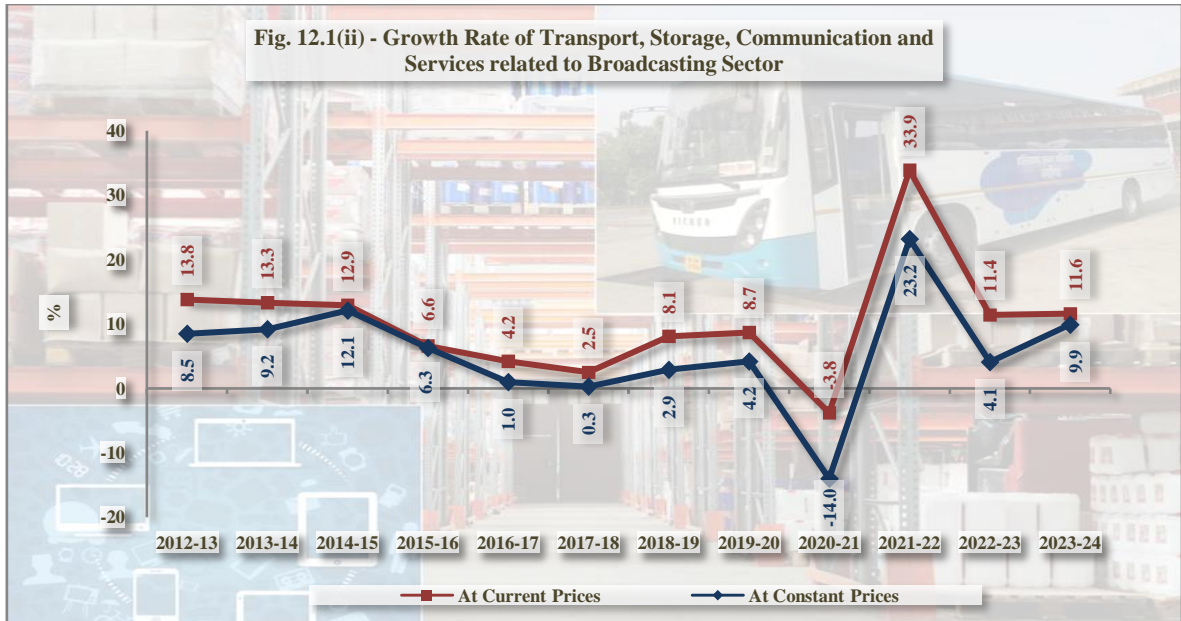

12.21 This sector contributes 5.7% to the total GVA of Haryana. The GVA estimates for this sector at current prices stood at ₹ 4333622 lakh during 2021-22 and improved to ₹ 4827165 lakh during 2022-23. It is estimated at ₹ 5387690 lakh with the growth of 11.6% at current prices and ₹ 3208700 lakh at constant (2011-12) prices with 9.9% growth in 2023-24.

Table 12.1 – GVA, GR and Contribution of Transport, Storage, Communication and Services related to Broadcasting Sector at Current and Constant (2011-12) prices

Year	At Current Prices			At Constant (2011-12) Prices		
	GVA (₹ Lakh)	Growth Rate (%)	Contribution to State GVA (%)	GVA (₹ Lakh)	Growth Rate (%)	Contribution to State GVA (%)

FINANCIAL SERVICES SECTOR**COVERAGE**

13.1 This sector covers:

- (i) Commercial Banks
- (ii) Banking and Issue Department of RBI
- (iii) Public Non-banking Financial Corporations
- (iv) Organized Non-banking Financial Companies such as stock exchanges and chit funds
- (v) Un-organized Non-banking Financial Undertakings such as professional money lenders and pawn brokers
- (vi) Post Office Saving Banks including operations concerning Cumulative Time Deposits and National Savings Certificates
- (vii) Co-operative Credit Societies and
- (viii) Life and Non-life Insurance Activities.

In the current series of national accounts, the following information has been incorporated for the first time:-

- (i) Annual accounts of the Mutual Funds (excluding UTI MF) registered with the Securities and Exchange Board of India (SEBI);
- (ii) Annual accounts of the stock brokers and stock exchanges registered with SEBI (who are also registered under the Companies Act);
- (iii) Annual accounts of the financial regulatory authorities, like SEBI, IRDA and Pension Fund Regulatory and Development Authority (PFRDA) ; and
- (iv) Annual accounts of the Pension Funds registered with the PFRDA.

METHODOLOGY AND SOURCE OF MATERIAL**Estimates at Current and Constant Prices**

13.2 Due to non-availability of State-wise data in respect of this supra-regional sector, the GVA of this sector is compiled first at National level and then allocated to States. The National estimates of GVA at current prices are split into CE, rent, profit, etc. and are allocated to States by the NSO at the enterprise level using the information like State-wise salaries, deposits, premiums and number of employees. The current price estimates are deflated by the implicit price deflator for financial services as derived at the National level to workout estimates at constant prices. However, the estimates of GVA and NVA of the State at both current and constant prices communicated by the NSO to the State are used as such to represent the income from this sector.

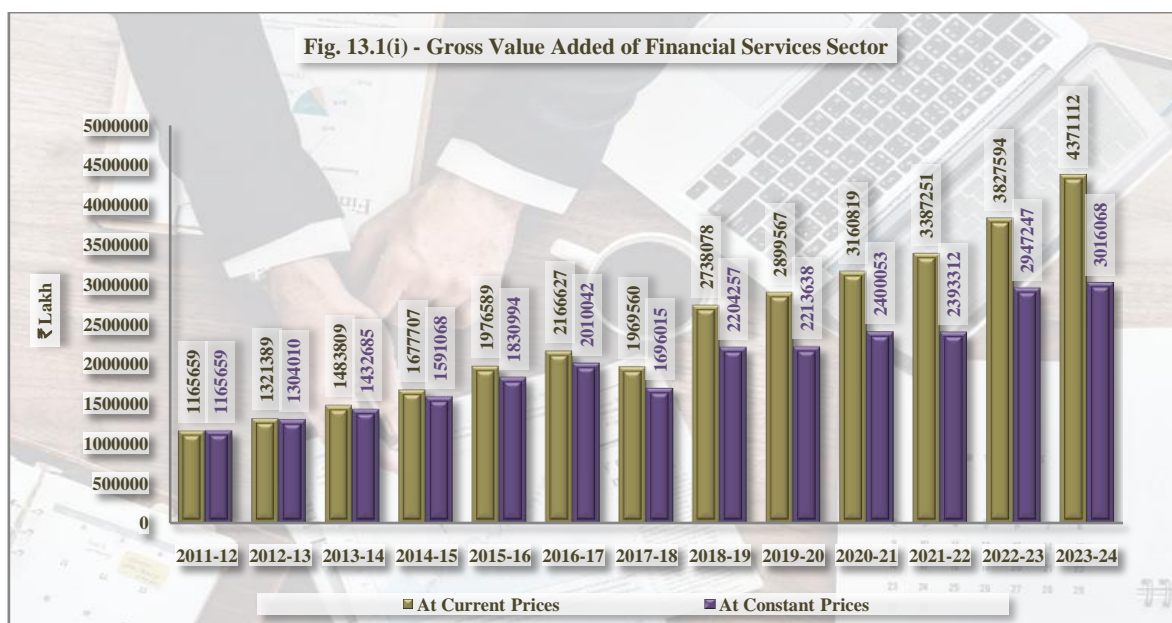

Financial Services Sector at a Glance

13.3 At current prices, the GVA of Financial Services Sector has increased from ₹ 1165659 lakh during 2011-12 to ₹ 3387251 lakh in 2021-22 and stood at ₹ 3827594 lakh during 2022-23 and at ₹ 4371112 lakh in 2023-24 witnessing growth of 13.0% and 14.2%, respectively. For the year 2023-24, the GVA is estimated at ₹ 3016068 lakh anticipated to grow by 2.3% at constant (2011-12) prices.

Table 13.1 – GVA, GR and Contribution of Financial Services Sector at Current and Constant (2011-12) prices

Year	At Current Prices			At Constant (2011-12) Prices

REAL ESTATE, OWNERSHIP OF DWELLINGS AND PROFESSIONAL SERVICES SECTORS

COVERAGE

14.1 In the previous series, the GVA estimates were prepared for the following economic activities separately:-

- i) **Real Estate Services:** This sub-sector includes buying, selling, renting and operating of self owned or leased real estate such as apartmental buildings and dwellings, non-residential buildings, developing and sub-dividing real estate into plots, developing and sale of land, etc.
- ii) **Renting of Machinery and Equipments without Operator and Personal and Household Goods:** The activities covered under this category are the activities of renting of machinery and equipments without operator and personal/household goods.
- iii) **Legal Activities:** The activities covered in this category are legal services such as those rendered by advocates, barristers, solicitors, pleaders, musketeers etc.
- iv) **Accounting and Book-Keeping:** The activities covered under this category are accounting, book-keeping, auditing and tax consultancy services.
- v) **Research and Development Activities:** This category includes research and development, market research and public opinion polling, business and management consultancy, architectural engineering & other technical activities, advertising and business activities.
- vi) **Computer and Related Activities/Information and Technology:** The activities covered under this category are hardware consultancy, software consultancy & supply, data processing, data base activities, maintenance & repair of office/accounting/computing machinery and other computer related activities.
- vii) **Ownership of Dwellings:** The economic activities covered in this sub-sector are ownership of dwellings (occupied residential houses) including imputed value of owner occupied dwellings also. The services rendered by non-residential buildings are considered to be a subsidiary activity of the industries, which occupy the buildings and, therefore, are not included in this sector.

14.2 In the current series, the economic activities of this sector have been classified as (i) real estate activities, (ii) computer and information related services, (iii) professional,

scientific and technical activities including R & D and (iv) administrative and support service activities and other professional activities. Under the category, ‘Computer and Information related Services’, ‘Repair of computers’ and ‘Software publishing’ are no longer a part of this category and have been moved to ‘Trade and repair services’ and ‘Communication and services related to broadcasting’ respectively in the new series. Under the category ‘Professional, scientific and technical activities including ‘R&D’, the category ‘research and development etc.’ in the old series has been modified with inclusion of veterinary activities and appropriately renamed. The ‘Administrative and support activities and other professional activities’ is a new category culled out from the certain activities of the previous category, ‘research and development etc.’ and includes all administrative and support service activities. It also includes legal and accounting activities.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

14.3 In the earlier series, the estimates for the public sector for all categories of real estate, ownership of dwellings and professional services were derived from the budget documents and annual reports of public sector companies. In case of ‘computer and information related services’, estimates for the private corporate sector in the earlier series were derived based on the information available from NASSCOM. For the unorganised sector of ‘computer and information related services’, as also for the private corporate and unorganised sectors of remaining categories, labour input method was used for compiling the base year (2004-05) estimates. The category-wise methodology followed for compilation of estimates in the current series is described in the following paragraphs.

Real Estate and Professional Services

14.4 The estimates of National GVA from Central NDEs at current prices are estimated by the production approach from the analysis of annual reports. In case of multi-State NDEs, it is allocated to States. CE is distributed on the basis of number of employees in each State in proportion to State-wise employment in that NDE while OS is distributed in proportion to the State-wise gross block (value of asset) of that NDE. In case of single State NDE, the entire GVA is allocated to that State.

14.5 In case of private corporations, the National GVA compiled by production approach using MCA21 data for the annual reports of private sector companies has been allocated to States on the basis of base year GVA as compiled using GVA from NSS 67th round and LI from NSS 68th round.

14.6 In case of private un-incorporated enterprises, the base year National GVA worked

out using the results from NSS 68th round EUS, 2011-12, population census 2011 and NSS 67th round ES, 2010-11 has been allocated on the basis of GVA as compiled using enterprise information from NSS 67th round and LI from NSS 68th round. For the subsequent years, estimates are moved using corporate growth (same as in organized sector).

Computer and Information related Services

14.7 The National GVA of computer and information related services from private corporations is worked out by production approach using MCA21 data base for the annual reports of private sector companies. The National GVA is allocated to States on the basis of information on State-wise software exports made by units registered under STPI.

14.8 In case of private un-incorporated enterprises, the National base year GVA is compiled using the results from NSS 68th round EUS, 2011-12, population census 2011 and NSS 67th round ES, 2010-11. The National base year GVA is then allocated to States on the basis of GVA as compiled using enterprise information from NSS 67th round and LI from NSS 68th round. For the subsequent years, estimates are moved using corporate growth.

Ownership of Dwellings

14.9 The GVA for the Ownership of Dwellings is equivalent to gross rental of the residential census houses less the cost of repair and maintenance. The GVA of this component has been worked out for rural and urban dwellings separately.

14.10 In case of urban dwellings, gross rental is worked out as the product of number of census houses (urban) available from population censuses and rent per household as obtained from NSS 68th round CES, 2011-12 for the base year. For the years subsequent to the base year, rent per household as in the base year is extrapolated using the index of house rent (urban areas) and the number of dwellings is extrapolated using the inter-censal growth rate of urban dwellings. The estimates of cost of repair and maintenance are provided by the NSO.

14.11 In case of rural dwellings, gross rental at the National level is estimated through user cost approach, using the capital stock of rural residential buildings. The National level estimates are allocated to States using State-wise stock of rural dwellings as estimated from AIDIS, duly extrapolated for the reference year using growth in the number of dwellings and CPI(R). However, the State-wise estimates are compiled and supplied by the NSO.

Estimates at Constant Prices

14.12 In case of real estate, professional services and computer and information related services, the constant prices estimates of public sector are obtained by deflating the current

prices estimates with CPI (General). The estimates of private corporations and private un-incorporated enterprises at constant prices are obtained by deflating the current prices estimates with CPI (Misc.). In case of urban dwellings, the estimates of gross value for constant prices are obtained by moving the base year estimates with inter-censal growth rate of dwellings. The estimates of repair and maintenance at constant prices are obtained by deflating the current prices estimates with the index of building material and labour. The estimates of rural GVA at constant prices are worked out by deflating the current prices estimates using CPI (R).

The total GVA as worked out above for real estate, ownership of dwellings, computer and information related services and professional services is adjusted for FISIM. To arrive at NVA, estimates of CFC as supplied by the NSO have been deducted from the GVA.

Real Estate, Ownership of Dwellings and Professional Services Sector at a Glance

14.13 This sector is a prime contributor with contribution of 20.9% to State GVA. During the year 2021-22 at current prices, the GVA estimates has witnessed an upward trend and stood at ₹ 14618651 lakh with excellent growth of 21.1 % and was estimated to increase to ₹ 17046925 in 2022-23. Further, it is estimated to be at ₹ 19642630 lakh in 2023-24 registering a growth of 15.2%. At constant (2011-12) prices, the GVA estimates of this sector stood at ₹ 9371410 lakh in 2022-23 and ₹ 10158522 lakh in 2023-24 with the growth of 8.4%.

PUBLIC ADMINISTRATION SECTOR

COVERAGE

15.1 The services included in Public Administration are those rendered by the administrative departments of Central Government, State Government, Autonomous Institutions, Municipal Committees, Notified Area Committees, Market Committees, Improvement Trusts, Zila Parishads, Village Panchayats, Panchayat Samities and Cantonment Boards. It may, however, be stated that this sector does not cover the entire field of activities of Government or local bodies. The activities of departmental commercial undertakings of Government such as, railways, communication, forest, road transport, electricity, irrigation, Government printing presses, milk schemes and defence manufacturing establishments are excluded from this sector and are included in the appropriate industry groups. Similarly, the construction activities undertaken by the Government are covered under the industry group of construction whereas education, medical and health services are included in the industry group of other services. The scope of this sector is, thus, practically the same as that of the industry 'government services' as defined in the Standard Industrial Classification.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

15.2 The estimates of State Domestic Product from public administration are prepared separately for various administrative services covered under this sector. The payments of wages and salaries have been taken to constitute NVA from administrative services. The wages and salaries include basic wages, allowances and honoraria (excluding travelling allowances), wages paid to contingency staff, pension actually paid, employer's contribution to provident fund, if any, and supplement to wages and salaries in cash or kind.

- (i) **Central Government:** The National GVA at current prices is compiled by the analysis of budget documents of Central Government using production approach. The National GVA is allocated to States on the basis of number of Central Government employees across States. However, the estimates of Gross/Net State Value Added from Central Government Administration under the supra-regional sectors have been prepared and supplied by the NSO.
- (ii) **State Government:** The estimates are compiled by the analysis of State

Government budget using production approach. The budget documents of the State Government provide the detailed information on the expenses incurred by the State Government on its various activities. The data on expenditure on wages and salaries have been culled out from the budget documents. The expenditure shown under pay of officers, pay of establishments, allowances and honoraria (other than travelling allowance) has been taken into account. The wages and salaries of staff engaged in departmental commercial undertakings, construction activities, and education, medical and public health have been excluded from this sector and accounted for in the respective industry groups. The expenditure on repairs and maintenance is considered as current expenditure and has been included under the industry 'Construction'. The wages and salaries component of contingent expenditure, where it is available, has been taken into account. In case where the details are not available, the same have been ignored.

(iii) Autonomous Institutions: The estimates of National GVA are compiled using production approach for the sampled Central autonomous institutions for the base year and these benchmark estimates have been projected for the subsequent years at the National level with the help of total grants given to all autonomous institutions. These estimates are allocated to the States on the basis of indicators like location of these institutions and State-wise public sector LI proportions as per NSS 68th round. The estimates of GVA of State autonomous institutions are also compiled by the analysis of annual accounts using production approach.

(iv) Local Bodies: The local bodies cover Municipal Committees, Zila Parisad and Panchayat Samities, Gram Panchayats, Market Committees, Improvement Trusts and Cantonment Boards. As per the recommendations of the Thirteenth Finance Commission (TFC), one of the milestones to be achieved by the States' Directorate of Economics and Statistics (DES), is the economic and purpose classification of expenditure of local bodies (LB) by collecting their receipt and payment accounts. Under TFC, eleven States namely Uttar Pradesh, Tamilnadu, Meghalaya, Maharashtra, Kerala, Karnataka, Himachal Pradesh, Delhi, Chandigarh, Andhra Pradesh and Telangana have collected the accounts of local bodies and analysed these accounts for the economic and purpose classification of their expenditure. On the basis of this information, which accounts for about 60 percent of the transfers to all local bodies, National level estimates are compiled. In the States where accounts of local bodies have not been analysed, the National level estimates are apportioned to the State based on the share of the transfers received by the State, after

making due adjustments for the actual estimates of the above mentioned eleven States.

Estimates at Constant Prices

15.3 The estimates of value added at constant prices have been obtained by deflating the current prices estimates with CPI (General) with base year 2011-12.

15.4 The estimates of CFC supplied by the NSO have been used.

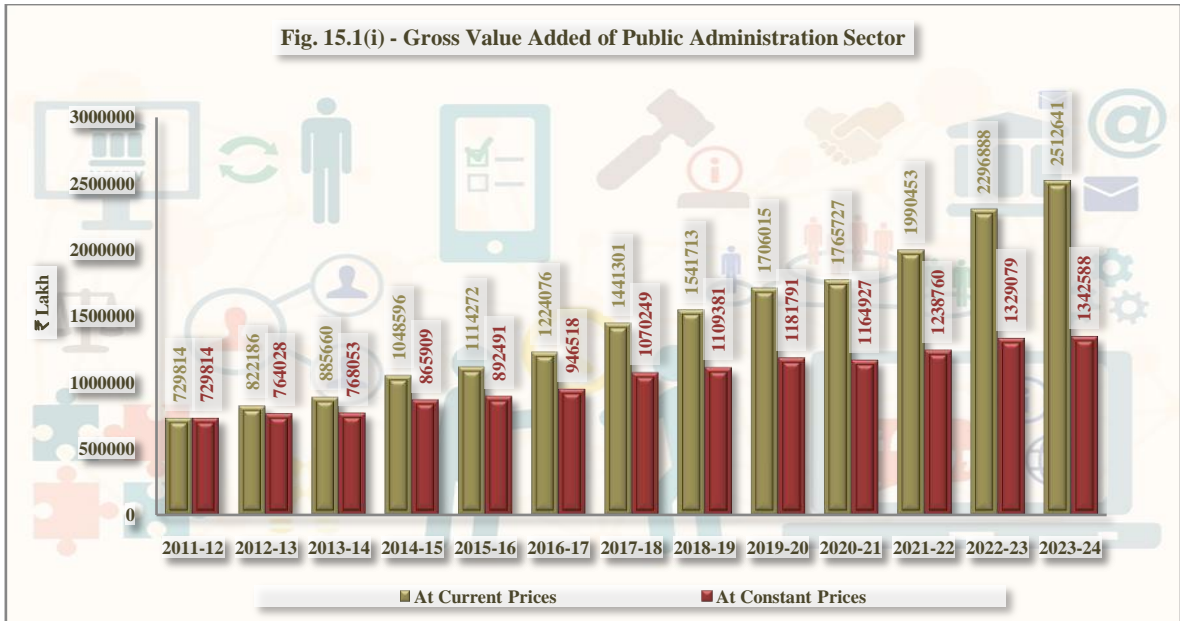

Public Administration Sector at a Glance

15.5 The GVA of Public Administration sector was ₹ 729814 lakh during 2011-12. It has increased to ₹ 2296888 lakh during 2022-23 and further estimated at ₹ 2512641 lakh in 2023-24 with the growth of 15.4% and 9.4%, respectively at current prices. At constant prices, the estimated GVA of this sector during 2022-23 stood at ₹ 1329079 lakh and increased to ₹ 1342588 lakh during 2023-24.

OTHER SERVICES SECTOR

COVERAGE

16.1 The economic activities covered under this sector are:

- (i) Education services
- (ii) Human health and care services
- (iii) Recreation, cultural and sporting activities
- (iv) Activities of membership organizations
- (v) Personal services including washing, hair dressing, custom tailoring and other personal service activities
- (vi) Private households with employed person

The activity of extra territorial organizations and bodies was the economic activity under this sector in the previous (2004-05) series. This activity is not a part of GDP and hence, have been excluded from this group. The categories 'Sewerage and refuse disposal' and 'Veterinary services' have been removed from this group and classified as a part of utility services in 'Electricity, gas, water supply and other utility services' group and 'Professional services' respectively. 'Social work with and without accommodation' which was part of activities of membership organizations in old series is now a part of 'Human health and care services'. Further, 'Broadcasting' which was earlier a part of 'Recreation' is now covered in the group 'Communication and services related to broadcasting'.

METHODOLOGY AND SOURCE OF MATERIAL

Estimates at Current Prices

16.2 In the earlier series, the base year estimates of value added of private corporate as well as unorganized parts for this activity were prepared using the labour input method. For the public sector part, estimates were compiled by analyzing the budget documents of Central and State Governments, reports of autonomous institutions and annual reports of public undertakings.

16.3 In the current series, there is no change in the estimation of public part. There is a deviation in the case of private corporate sector, which has now been covered under the MCA21 data base. For the private un-incorporated enterprises (quasi-corporations and household enterprises), the estimates of all categories except 'private households employing persons' have been compiled using effective labour input method for the current series. The value added generated by private households with employed persons relates to wages paid to 'employed persons' by the households. Therefore, the information related to

wages was estimated from the NSS 68th round, Employment and Unemployment, Survey 2011-12.

16.4 In case of Administrative Departments and Public Corporations, the estimates of State GVA at current prices from Education, Health and Recreation are estimated by the analysis of budget documents and annual reports using production approach. In case of Central NDEs, GVA is allocated to States. CE is distributed on the basis of the number of employees in each State in proportion to State-wise employment in that NDE, while OS is distributed in proportion to the State-wise gross block (value of assets) of that NDE.

16.5 In case of central autonomous institutions, the estimates of GVA from Education and Health are compiled using production approach for the sampled autonomous institutions for the base year and these benchmark estimates have been projected at the National level with the help of total grants given to all autonomous institutions. These are allocated to the States on the basis of indicators like location of these institutions and State-wise public sector LI proportions as per NSS 68th round. The estimates of GVA are compiled using production approach for the State autonomous institutions.

16.6 In case of private corporations, the National GVA from coaching centers, activities of the individuals providing tuition, education excluding coaching and human health activities and care services, the National GVA is compiled by production approach using MCA21 data base and allocated to States for the base year on the basis of LI from NSS 68th round. For subsequent years, previous year's estimate is moved using State-wise inter-survey growth in the expenditure on education/health between NSS 64th and NSS 71st rounds. For remaining social and personal services, the estimates of National GVA are compiled by production approach using MCA21 data base and allocated to States on the basis of LI from NSS 68th round.

16.7 In case of private unincorporated enterprises, base year National GVA from coaching centers, activities of the individuals providing tuition and education excluding coaching has been allocated to States on the basis of GVA from NSS 67th round and LI from NSS 68th round. For subsequent years, previous year's estimate is moved using State-wise inter-survey growth in the expenditure on education between NSS 64th and NSS 71st rounds. In case of human health activities and care services, base year National GVA has been allocated on the basis of GVA from NSS 67th round and LI from NSS 68th round. For subsequent years, previous year's estimate is moved using State-wise inter-survey growth in the consumer expenditure on health between NSS 61st and NSS 68th rounds. In case of remaining social and personal services, base year GVA has been allocated on the basis of

GVA from NSS 67th round and LI from NSS 68th round. For subsequent years, previous year's estimate is moved using inter-survey growth in consumer expenditure in non-food items (excluding education and health). In case of private households with employed persons, base year National GVA has been allocated on the basis of LI from NSS 68th round. For subsequent years, previous year's estimate is moved using inter-survey growth of LI between NSS 61st round and NSS 68th round and CPI (General).

Estimates at Constant Prices

16.8 The estimates of GVA from Education services at current prices are deflated with CPI (Education) to compile GVA at constant prices. The estimates of GVA from Health services at current prices are deflated with CPI (Health) to work out GVA at constant prices. In case of private households with employed person, base year's estimate is moved using inter-survey growth of LI between NSS 61st round and NSS 68th round. In the remaining services, the current prices estimates are deflated with CPI (Misc.) to reach at constant prices estimates.

16.9 The estimates of GVA are adjusted for FISIM. The estimates of CFC as supplied by the NSO have been used to compile NVA.

Other Services Sector at a Glance

16.10 The GVA of Other Services sector stood at ₹ 4146063 lakh during 2021-22 at current prices registering a growth of 13.9% over the previous year. For the years 2022-23 and 2023-24, the GVA of this sector at current prices is estimated at ₹ 4763144 lakh and ₹ 5400649 lakh with the growth of 14.9% and 13.4%, respectively. At constant (2011-12) prices, the GVA is estimated at ₹ 2500189 lakh during 2022-23 and ₹ 2632455 lakh in 2023-24.

Table 16.1 – GVA, GR and Contribution of Other Services Sector at Current and Constant (2011-12) prices

XVII**GDP AND PCI OF ALL STATES/UTS AND ALL-INDIA**

17.1 This chapter contains the Gross Domestic Product and Per Capita Income of various States and Union Territories of India along with All-India's Gross Domestic Product and Per Capita Income released by National Statistical Office, Ministry of Statistics and Programme Implementation, New Delhi.

The GSDP and PCI of Haryana State is taken from annual estimates prepared by Department of Economic & Statistical Affairs, Haryana. GSDP and PCI of other States and Union Territories are derived from data published as on 01.08.2024 and for All-India as per the data published as on 31.05.2024 by NSO, New Delhi.

17.2 All-India GDP was recorded at ₹ 26949646 crore and ₹ 16071429 crore in 2022-23 at current and constant (2011-12) prices. Haryana contributes about 3.65% with GSDP of ₹ 587198 crore at constant (2011-12) prices and ₹ 984055 crore at current prices in National GDP. Haryana has maintained its PCI higher than that of Nation i.e. ₹ 296592 and ₹ 173973 at current and constant (2011-12) prices during 2022-23. The PCI of All-India during the same period at current and constant (2011-12) prices was recorded at ₹ 169496 and ₹ 99404, respectively.

17.3 As per the data published by NSO on 01.08.2024, Maharashtra marks the highest GSDP in 2022-23 at ₹ 3645884 crore among the States at current prices. The lowest concerned GSDP among States for the same period at current prices is of Mizoram at ₹ 30690 crore. The highest and lowest GSDP marked at constant (2011-12) prices for the year 2022-23 by Maharashtra at ₹ 2241196 crore and Arunachal Pradesh at ₹ 18791 crore, respectively.

17.4 For Union Territories, Delhi recorded the highest GDP of ₹ 1014688 crore and ₹ 625981 crore in 2022-23 at current and constant (2011-12) prices, respectively and for the same period, Andaman & Nicobar Islands recorded the lowest GDP of ₹ 11669 crore and ₹ 7621 crore at current and constant (2011-12) prices, respectively.

17.5 Among all States/UTs, the highest PCI at current prices achieved by Sikkim of ₹ 520466 and at constant (2011-12) prices by Goa of ₹ 295114 during 2022-23. Adversely, Bihar has the lowest PCI during the same period i.e. ₹ 53478 and ₹ 29909 at current and constant (2011-12) prices, respectively. Haryana ranked 7th in context of PCI among all States/UTs.
