GOVERNMENT OF HARYANA

GROSS FIXED CAPITAL FORMATION IN HARYANA 2022-23

Issued by:
DEPARTMENT OF ECONOMIC AND STATISTICAL AFFAIRS
HARYANA
2025

PREFACE

Capital Formation is of paramount importance in a developing economy. It acts as a determinant of economic growth and serves as a yardstick for measuring capital stock. The productive capacity of the economy largely depends upon the Capital Formation i.e. more capital accumulation, results in higher productive capacity.

The national-level estimates of Capital Formation do not meet the requirements of the individual States due to regional variations. This necessitates the preparation of estimates of Capital Formation at the State level. These State level estimates are crucial indicators for measuring the growth of the productive potential of a State's economy. It is an important pre-requisite for the formulation of future developmental programmes for the State.

This report presents the estimates of Gross Fixed Capital Formation of Haryana at both current and constant (2004-05) prices for the year 2022-23. The estimates of Gross Fixed Capital Formation were prepared using the standard methodology suggested by the National Statistical Office, New Delhi with suitable modifications, where necessary. It is hoped that planners, economists, administrators and research scholars will find the information in this report useful for gaining an overview of the State's economy and for planning and formulating developmental programmes and policy decisions.

I extend my sincere appreciation to Miss Lucky Arora, Deputy Director and Sh. Parveen Singh, Research Officer for their coordinated efforts, along with the valuable inputs of Sh. Karambir Singh, Assistant Research Officer; Sh. Ankit Mittal, Assistant Research Officer; Sh. Anil Kumar, Statistical Assistant; Smt. Veena Rawat, Senior Scale Stenographer, all of whom worked diligently under the supervision of Sh. Rajender Kumar Mor, Additional Director, in preparing this book.

I express my sincere gratitude to the officers of the National Statistical Office (NSO), New Delhi for their valuable cooperation and guidance in estimating Capital Formation in the State. I also acknowledge the assistance extended by various Departments/Organizations/Boards/Corporations and District Statistical Offices in providing the requisite data for preparing these estimates.

Panchkula
Dated: 15th July, 2025

Manoj Kumar Goel
Director,
Department of Economic &
Statistical Affairs, Haryana

EXECUTIVE SUMMARY

The estimates of Capital Formation are of considerable importance in the context of planning and economic development. These estimates throw light on the addition to the capital base of the economy and subsequent changes in the modes and capacity of production. The higher the rate of Capital Formation, the higher the rate of growth in National/State Products. Capital Formation is defined as that part of a country's current output and imports which is not consumed or exported during the accounting period but is set aside as an addition to its stock of capital goods. Total Capital Formation can be broadly classified into Gross Fixed Capital Formation (GFCF) and change in stock of raw materials, semi-finished and finished goods.

The estimates of Capital Formation can be prepared by following any of the three approaches namely:- i) Production or commodity flow approach ii) Savings and flow of funds approach iii) Expenditure approach. At the State level, the estimates of Capital Formation are prepared by following the expenditure approach as the other two approaches are not feasible at present. Similarly, the estimates of change in stock cannot be prepared at the State level due to non-availability of data. Therefore, the Department of Economic & Statistical Affairs, Haryana prepares the estimates of Gross Fixed Capital Formation (GFCF) only of the State.

The estimates of GFCF at the State level are being worked out i) by industry of use i.e. separately for all the thirteen sectors of the economy ii) by type of institutions i.e. for public and private sectors iii) by type of assets i.e. separately for buildings, roads and bridges, other constructions, plant and machinery, transport equipment and other equipments (including furniture and fixtures). These estimates are prepared by adopting the standard methodology as suggested by the National Statistical Office (NSO), New Delhi. At present, the estimates of GFCF in the State are being prepared at both current and constant prices in the series with base year 2004-05.

At current prices, the total GFCF of the State has been estimated at ₹ 136668.44 crores during the year 2022-23 as against ₹ 119554.59 crores during the year 2021-22 increasing by 14.3 percent. Similarly, at constant prices, the total GFCF has been estimated at ₹ 62505.80 crores during the year 2022-23 as against ₹ 55147.50 crores during the year 2021-22 increase by 13.3 percent.

The composition of GFCF reveals that the primary sector comprising agriculture, forestry, fishing, mining and quarrying sectors has contributed 22.2 / 16.7 percent, secondary sector consisting of manufacturing, construction and electricity, gas & water supply sectors has contributed 40.8 / 49.9 percent and tertiary sector which consists of trade, hotels & restaurants, transport, storage, communication, banking, real estate, ownership of dwelling & business services, public administration and other services has contributed 37.0 / 33.4 percent in total GFCF at current/constant prices, respectively in 2022-23. It shows that the secondary sector has contributed maximum to the State GFCF followed by tertiary and primary sectors.

Similarly, the composition of GFCF reveals that the primary sector comprising agriculture, forestry, fishing, mining and quarrying sectors has contributed 22.9 / 15.5 percent, secondary sector consisting of manufacturing, construction and electricity, gas & water supply sectors has contributed 41.8 / 50.7 percent and tertiary sector which consists of trade, hotels & restaurant, transport, storage, communication, banking, real estate, ownership of dwelling & business services, public administration and other services has contributed 35.3 / 33.8 percent in total GFCF at current/constant prices, respectively in 2021-22. It shows that the secondary sector has contributed maximum to the State GFCF followed by tertiary and primary sectors.

The estimates of GFCF by type of institutions at current/constant prices show that the public sector has contributed 33.6 / 33.0 percent and private sector has contributed 66.4 / 67.0 percent, respectively during the year 2022-23 in total GFCF of the State. Similarly, the estimates of GFCF by type of institutions at current/constant prices during the year 2021-22 show that public sector has contributed 30.5 / 31.2 percent and private sector has contributed 69.5 / 68.8 percent in the total GFCF of the State.

A look at GFCF by type of assets at current/constant prices during the year 2022-23 reveals that the plant and machinery have contributed 40.1 / 57.0 percent in total GFCF of the State. The construction of buildings, roads/ bridges, other construction and transport equipment contributed 46.7 / 32.1, 5.7 / 4.1, 5.6 / 4.0, 1.9 / 2.8 percent respectively. It shows that the contribution from construction of building at current prices and plant and machinery at constant prices is the highest in total GFCF.

Similarly, the estimates of GFCF by type of assets at current/constant prices during 2021-22 show that the plant & machinery has contributed 39.3 / 54.6 percent in total GFCF of the State. The construction of buildings, roads/bridges, other construction and transport equipment contributed 48.0 / 34.1, 5.9 / 4.6, 5.0 / 4.1 and 1.8 / 2.6, percent respectively. It shows that the contribution from plant & machinery at constant prices and construction of Building at current prices is the highest.

PART- I

INTRODUCTION, METHODOLOGY

AND

OVERVIEW OF GFCF ESTIMATES

INTRODUCTION

Capital is the most important factor of production particularly in a developing economy. The higher the rate of Capital Formation, the higher would be the rate of growth in National Product therefore, Capital Formation becomes the major determinant of economic growth.

The estimates of Capital Formation are of considerable importance in the context of planning and economic development. These estimates throw light on the addition to the capital base of the economy and consequent change in the modes and capacity of production. The estimates of Capital Formation are among the important statistics required for determining and judging the policy decisions in resource mobilization and allocation of resources and for assessing the growth potential of the economy. Capital Formation is defined as that part of country's current output and imports which is not consumed or exported during the accounting period but is set aside as an addition to its stock of capital goods. Net Capital Formation is distinguished from Gross Capital Formation in the sense that it is measured after allowances are made for consumption of fixed capital which includes unforeseen obsolescence and accidental damages to the extent provided by the enterprises. Total Capital Formation can broadly be classified into Gross Fixed Capital Formation and change in stock of raw materials, semi-finished and finished goods.

Gross Fixed Capital Formation (GFCF) consists of additions to the assets of producers of tangible reproducible goods which have an expected life time of use of one year or more. The producers in question may be industries, producers of government services and producers of private non-profit services to households. The capital goods may include (i) durable goods acquired by producers during the accounting period (ii) improvements and alterations made in durable goods for extending their expected life span or their productivity (iii) all types of constructions, alterations and repair of buildings, highways, streets, bridges, culverts, railroad beds, railroads, subways, airports, parking areas, dams, drainages, wells and other irrigation sources, water and power projects, communication systems such as telephone and telegraph lines, land reclamations, buildings and other land improvements and planting and cultivating new orchards. The value of increment in livestock during the accounting period is also taken into account. The natural endowments representing durable goods like land, mineral deposits, etc. and classified as non-producible tangible assets are not included.

However, dealer's margin, service charges and other transfer costs in the transactions of such assets form part of Capital Formation. The construction works and durable goods which are meant primarily for military purposes are excluded. Outlays on new constructed dwellings (either by households or industries) and expenditure on major improvements and alterations of residential buildings form a part of Fixed Capital Formation, while the purchase of durable goods by households is not treated as Capital Formation. The expenditure incurred on invisible assets such as patents, good-will, health, research, education, improvements in technology and productivity of human capital are excluded from the scope of Capital Formation.

Similarly, expenditure incurred on current repairs and maintenance to keep the fixed assets in proper working order is also not classified as Capital Formation. However, capital repairs consisting of significant alterations and additions or replacement of parts of fixed assets having an expected lifetime of use of one year or more and involving substantial outlays are to be taken into account. Such capital outlays on repairs are incurred to enhance the life and productivity of capital assets.

There is no problem of measurement of Capital Formation in case of resident industries located within the State boundaries. However, in case of organized enterprises both in public and private sectors having activities spread over more than one State and also in case of transportable fixed assets operating in several States, there are problems of identification and measurement in the context of State Domestic Capital Formation. Transportable fixed assets owned by State Enterprises pose no problem as these forms a part of the Capital Formation of the State to which these assets belong. However, in case of Central Enterprises like Railways, Indian Airlines etc. transportable fixed assets are not taken into account.

The estimates of GFCF of the State are being worked out by (i) industry of use (ii) type of institutions and (iii) type of assets at both current and constant prices as per the methodology suggested by the National Statistical Office, New Delhi.

GFCF by industry of use

The economy has been divided into thirteen sectors for the estimation of GFCF by industry of use. These thirteen sectors are as under:-

1. Agriculture

2. Forestry
3. Fishing
4. Mining & Quarrying
5. Manufacturing
 - 5.1 Registered
 - 5.2 Unregistered
6. Electricity, Gas and Water Supply
7. Construction
8. Trade, Hotels and Restaurants
9. Transport, Storage and Communication
 - 9.1 Railways
 - 9.2 Transports by Other Means
 - 9.3 Storage
 - 9.4 Communication
10. Banking and Insurance
11. Real Estate, Ownership of Dwellings and Business Services (only residential Building part)
12. Public Administration
13. Other Services

These thirteen sectors have been arranged into 3 broad groups, i.e. primary, secondary and tertiary sectors. The primary sector comprises Agriculture & Allied Activities, Forestry, Fishing and Mining industries. The secondary sector includes Manufacturing, Electricity, Gas and Water Supply, Construction sectors. The tertiary sector consists of Trade, Hotels & Restaurants, Transport, Storage & Communication, Banking & Insurance, Real Estate, Ownership of Dwellings and Business Services (only residential building part), Public Administration and Other Services sectors.

GFCF by type of Institutions

The institution-wise break up has got two main segments i.e. Public sector and Private sector. The public sector has been further segregated into Public Administration, Departmental Enterprises and Non-departmental Enterprises. Public Administration has

further three parts i.e. Central Government, State Government and Local Bodies. Departmental Enterprises has been classified into Central and State Government enterprises. Non-departmental Enterprises has also been classified into central and State Government enterprises. Both Central and State Government enterprises of non-departmental enterprises have been further categorized into Non-financial and financial enterprises.

GFCF by type of Assets

For compiling the GFCF estimates by type of assets, fixed assets have been categorized into six items viz. (i) buildings (ii) roads and bridge (iii) other construction (iv) plant and machinery (v) transport equipments and (vi) other equipments (including furniture and fixtures). The details are as under:-

- 1. Buildings:-** The Value of work put in place on the construction of buildings meant entirely or primarily for dwellings and expenditure on construction of buildings meant entirely or primarily for industrial or commercial use such as buildings for factories, warehouses, offices, stores, hotels and restaurants, garages, farm houses, education, recreation, construction activity and similar other purposes including outlays on major alterations and additions to these buildings are to be taken as Capital Formation. It also includes outlays on internal paintings of new buildings and installation of new permanent fixtures which are integral and immovable parts of structures such as fixed central heating, air conditioning, lighting, plumbing and water supply facilities and all other fixed equipments customarily installed before the dwellings are occupied. However, repairs and replacements of worn out or damaged fixed equipments and fixtures are excluded. In the cases where the price of land is not available separately from the cost of building, 80 percent of the total expenditure is taken as expenditure on buildings. It also includes the expenditure given under the head "work in progress" but only in those cases where it is specifically mentioned that work in progress relates to building construction.
- 2. Roads and Bridges:-** The expenditure incurred on construction works of roads and bridges has been taken as capital expenditure under this category.
- 3. Other Construction:-** The expenditure on other construction works such as drainage works, sewerage, car parking facilities, water and power projects, dams, railroads, streets, sewers, sub-ways and tunnels, harbours, piers and other harbour

facilities, airports, pipe lines, oil wells, canals, water ways, athletic fields, electricity transmission lines, gas main pipes, telephone and telegraph lines etc. is covered under other construction. It also includes outlays on land reclamation and land clearance, irrigation and flood control projects including dams and dikes and clearance and afforestation of timber tracts and forests. The expenditure incurred on planting and cultivating of those crops on orchards, rubber plantations and other new holdings of fruit bearing and sap bearing plants which take more than one year to become productive is also included under it.

4. Plant and Machinery:- It covers the expenditure incurred on acquisition of new power generating machinery, agricultural machinery, implements, industrial machinery, metal working machinery, cranes, tractors, forklifts equipments, etc. The value of additions less disposal of breeding stock, draught animals, dairy cattle, sheep, lambs etc. have also been covered under plant and machinery.

5. Transport Equipments:- It covers the expenditure incurred on transport equipments both mechanized as well as non-mechanised viz. cycles, cycle rickshaws, auto cars, buses, trucks, taxis, etc.

6. Other Equipments:- The assets which could not be classified under any of the previous categories have been placed under this head. It covers expenditure made on furnitures and fixtures viz. tables, chairs, almirahs, racks, wooden partitions etc. The expenditure on office equipments and small tools used by professionals have also been included under this head.

The estimates of GFCF at constant prices have been worked out by applying various price deflators for different items. The estimates of expenditure made on buildings have been deflated with the help of index of cost of construction of building materials viz. bricks, cement, steel, timber and wages paid to construction workers/labourers. The weights assigned to building material and wage rates have been supplied by the NSO. In case of roads and bridges, weighted average index based on the price of bricks, bitumen and unskilled labourers has been used to arrive at estimates at constant prices. The estimates of expenditure made on other construction have been deflated with the weighted average index of bricks, steel, cement and wage rates of skilled and unskilled workers. In the absence of availability of price indices of plant and machinery at State level, the wholesale price index of machinery and machine tools

available from the RBI Bulletin has been used to compile the estimate at constant prices. In case of transport equipments, the wholesale price index of transport equipments available from the RBI Bulletin has been used for arriving at estimates at constant prices. In case of other equipments, the wholesale price index of steel furniture has been used for compiling the estimates at constant prices.

METHODOLOGY

Total capital formation can broadly be classified into (i) fixed capital formation and (ii) changes in stocks of raw material, semi-finished and finished goods. Gross Fixed Capital Formation is measured by the total value of the (i) gross fixed capital formation (ii) changes in inventories and (iii) acquisitions less disposals of valuables. The estimates of Capital Formation can be prepared by adopting either of the three approaches (i) production or commodity flow approach (ii) saving and flow of funds approach (iii) expenditure approach.

(i) Production or Commodity Flow Approach: In this approach, the estimates for the entire country/state/regional economy is prepared on the basis of availability of commodities used in capital formation by type of assets i.e. construction, machinery and equipments.

(ii) Savings and Flow of Funds Approach: In this approach, the estimates can be prepared on the basis of finances available for capital formation i.e. savings and flow of funds from other States and rest of the world.

(iii) Expenditure Approach: In this approach, the expenditure incurred on type of assets namely construction and machinery is estimated by industry of use to arrive at GFCF estimates.

The estimates of capital formation by adopting the flow of funds approach are comparatively easier for the country as a whole than for the individual States. It is difficult to adopt the commodity flow approach or flow of funds approach at the State level because the data on production and imports and exports of capital goods relating to the domestic boundaries of the State and the data on inflow of capital from outside the State and vice versa is not available. The estimates at the State level are, therefore, being prepared by following the expenditure approach. Similarly, the estimates of change in stock cannot be prepared at the State level due to non-availability of data and open boundaries of the States. Thus, State's Regional Account Committee (RAC) has also recommended that the States should concentrate their efforts to prepare the estimates of GFCF only, therefore, the Department of Economic & Statistical Affairs, Haryana also prepares the State estimates of GFCF only. The estimates of GFCF for each sector are prepared separately for public and private sectors and then for

buildings, roads and bridges, other construction, plant and machinery, transport equipments and other equipments separately under public and private parts.

The detailed methodology followed for preparing the GFCF estimates for all thirteen sectors of the State economy is given below:-

1. Agriculture

This sector covers the capital formation from the activities of both crop husbandry and animal husbandry.

(a) Public Sector: Public sector has been divided into three parts viz. Public Administration, Departmental Enterprises and Non-departmental Enterprises for estimation of GFCF.

(i) Public Administration:- It covers Central Govt. Administration, State Govt. Administration and Local Bodies.

Central Government Administration:- The estimates of Capital Formation relating to Central Govt. Administration has been prepared by taking into account the expenditure made by the Central Government offices on fixed assets in the State. These offices include Central Soil Salinity Research Institute, Karnal, Regional Station of Forage Production, Hisar, Sugarcane Breeding Regional Centre, Karnal, Agriculture Implements Training Institute, Hisar, etc.

State Government Administration:- The data relating to Capital Formation in respect of State Govt. Administration has been culled out from the analysis of State Govt. Budget. The revenue heads taken into account are Agriculture, Soil & Water Conservation, Command Area Development Authority, Crop Husbandry, Animal Husbandry and Dairy Development. The capital heads included are Soil Conservation, Command Area Development Authority, Animal Husbandry and Dairy Development.

Local Bodies:- The expenditure made by the Market Committees and Haryana State Agricultural Marketing Board has been taken into account under this part. The data is directly collected from the concerned offices.

(ii) Departmental Enterprises:- The expenditure made by the State Government departmental enterprises has also been culled out from the State Government Budget Documents. The departmental enterprises are owned and controlled by the public authorities. The revenue heads included are minor irrigation and major and medium irrigation. The capital heads covered are major and medium irrigation.

(iii) Non-departmental Enterprises:- The expenditure made by Haryana Land Reclamation and Development Corporation on fixed assets has been placed under the head 'State Govt. Non- departmental Enterprises'. The data has been culled out from the balance sheets of the enterprises.

(b) Private Sector:- The estimates of GFCF for private part of agriculture sector have been prepared on the basis of data given in All India Debt and Investment Survey, 2002-03 report. The report provides the necessary data on GFCF separately for rural and urban households. In order to achieve the more authentic results, an attempt has been made to segregate the items of Capital Formation into as many parts as possible, depending upon the availability of data. For each item, the separate indicator as given below has been used to project the benchmark year estimates to the subsequent years:-

(i) Reclamation of land, bunding and other land improvement:- The index of expenditure incurred by State Government on soil conservation is used to project the benchmark year GFCF estimates of reclamation of land at current prices to the subsequent years.

(ii) Wells:- The data relating to number of wells is collected from the Director, Land Records, Haryana. The index of wells is used to project the benchmark year expenditure to the subsequent years for the compilation of GFCF estimates at constant prices. The GFCF estimates at constant prices are inflated with weighted index of construction of wells to arrive at estimates at current prices.

(iii) Other irrigation resources:- The data relating to construction of new irrigation resources in the base year has been extrapolated on the basis of index of agricultural production of all commodities to compile the GFCF estimates at constant prices. The estimates at constant prices are then inflated with the index of wages

paid to workers engaged in other agricultural operations to work out the estimates at current prices.

(iv) Agricultural machinery and transport equipments:- The benchmark year expenditure of agricultural machinery and transport equipments is projected to subsequent years on the basis of Index of Industrial Production. These estimates at constant prices are then inflated with Index of Plant and Machinery to arrive at estimates at current prices.

(v) Farm houses:- In case of farm houses, the bench mark year estimates of GFCF have been extrapolated on the basis of the indicator prepared by taking into account the value of agricultural production and increment in livestock.

(vi) Increment in livestock:- The increment in livestock measured in terms of breeding stock, draught animals, dairy cattle and other animals raised for wool clipping has been estimated on the basis of data available from livestock censuses. All livestock animals excepting (i) bulls and bullocks over three years and not in use for breeding or work (ii) cows over three years and not in use for work or breeding purpose (iii) young male and female stock (iv) goats under one year (v) female goats of one year and above and not in milk and (vi) pigs and poultry are taken to form the part of fixed capital formation. The estimates of increment in livestock are evaluated at the average wholesale prices collected by the DSO offices in the State.

2. Forestry

The estimates of capital expenditure on forest preservation, extension, etc. in the public sector have been worked out from the State Government Budget Document. The expenditure made on forest preservation and extension by panchayat and panchayat samities has also been included under public sector. In case of private sector, the estimates are being prepared on the basis of data regarding revenue received by the farmers from sale of plants available from the Forest Department, Haryana.

3. Fishing

The estimates of public sector are based upon the data provided in State Government Budget Document. In case of private sector, the estimates are based upon the information regarding expenditure incurred by private fish farmers on different items

of Capital Formation i.e. construction/renovation of ponds, fishing boats, fishing nets, etc. available from the Fisheries Department, Haryana.

4. Mining and Quarrying

For estimation of public sector GFCF estimates, the expenditure made under the head 'Mines and Minerals' in the State Government Budget has been taken into account. In case of private sector, the GFCF estimates are compiled on the basis of expenditure incurred by private miners on different items of Capital Formation collected through the District Statistical Offices.

5. Manufacturing

5.1 Registered Manufacturing:- Registered Manufacturing sector covers all manufacturing and processing establishments which are registered under Indian Factories Act, 1948. Annual Survey of Industries covers the entire factory sector comprising factories registered under section 2m(i) and 2m(ii) of Indian Factories Act, 1948 and functioning within jurisdiction of Haryana State. These sections refer to the units employing 10 or more workers with power and 20 or more workers without power on any day of the preceding twelve months.

(a) Public Sector:-

(i) Public Administration:- No factory is reported to have been covered under Central Govt. Administration, State Govt. Administration and Local Bodies.

(ii) Departmental Enterprises:- It covers the workshops of Northern Railways, Kalka and Jagadhri and Haryana Coach Builders, Rohtak. Similarly, Government Press, Kurukshetra and Faridabad have also been covered under manufacturing sector.

(iii) Non- departmental Enterprises:-

Central Govt. Non-departmental Enterprises:- It covers National Fertilizers Ltd., Panipat, Maruti Udyog Ltd., Gurugram and Bharat Petroleum, Panipat. The information on capital expenditure is collected directly from their offices.

State Govt. Non-departmental Enterprises:- It covers Haryana Agro Industries Corporation Limited, Panchkula, Haryana State Co-operative Supply and Marketing

Federation Limited, Panchkula and two units of Haryana Dairy Development Co-operative Federation Limited. The requisite data is collected directly from these units.

(b) Private Sector :-

Annual Survey of Industries (ASI) provides the information on GFCF at State level. Under ASI, all units have been divided into two parts i.e. census part and sample part.

Census part:- All units in census part are covered on complete enumeration basis. Adjustment for non-responsive units is also made.

Sample part:- In case of sample part, a part of units is covered and the remaining units are accounted for, by using the multiplier.

5.2 Unregistered Manufacturing:- Unregistered Manufacturing sector covers all manufacturing and processing activities which are not registered under 2m(i) and 2m(ii) of the Indian Factories Act, 1948. It includes Directory Manufacturing Establishments, Own Account Enterprises and Non-directory Manufacturing Establishments. It is covered under private sector.

The benchmark year estimates of GFCF for this sector are based on the results of Enterprise Survey 2005-06. These estimates are moved forward with the help of index of Gross State Domestic Product of unregistered manufacturing sector at current prices.

6. Electricity, Gas and Water Supply

There are different undertakings which are engaged in generation, transmission and distribution of electricity in the State. The expenditure made by the companies namely; Haryana Vidyut Parsaran Nigam Ltd., Haryana Power Generation Corporation Ltd., Uttar Haryana Bijli Vitran Nigam Ltd. and Dakshin Haryana Bijli Vitran Nigam Ltd. on different items of capital formation is available from their annual accounts. The GFCF estimates from other two bodies i.e. Power Generation Corporation and National Thermal Power Corporation are prepared and supplied by the NSO.

In case of Gas sub-sector, the expenditure made by Gas Authority of India Limited (GAIL) on different items of capital formation is supplied by the NSO. In case of Bio-Gas, the expenditure incurred by the Department of Renewable Energy on Institutional Community Bio-Gas Programme has been taken into account. This expenditure has been placed under the head "Other Construction".

In case of Water Supply, the expenditure incurred by the Municipal Committees/ Notified Area Committees on water supply schemes in urban areas is taken into account. The relevant figures are available from the budgets of Municipal Committees/ Notified Area Committees. This expenditure is placed under the head “Other Construction” because in case of water supply schemes, most of the expenditure is made on reservoirs and laying of pipelines, etc.

7. Construction

The Gross Fixed Capital Formation in the Construction sector comprises the net addition to the machinery, equipments, tools and implements of construction enterprises. Any new construction expenditure in the form of office buildings etc. of these enterprises have also been included under construction sector.

(a) Public Sector:- The expenditure made by the State Public Works Department (B&R) on machinery and equipments has been taken under the State Government Administration. The expenditure made by the Public Works Department (B&R) on machinery and equipments has been culled out from the State Government Budget Document. Housing Board Haryana, Haryana Urban Development Authority/HSVP, Haryana Forest Corporation and Haryana Police Housing Corporation are covered under the head “Local Bodies”. The relevant data for the local authorities have been taken from their annual statements or accounts/balance sheets.

(b) Private Sector:- The bench-mark year estimates of GFCF in respect of unorganized part are based on the 29th Round of National Sample Survey (NSS) data. The 29th Round NSS data mainly pertain to the own account workers along with small employers, the nature of whose activities was more or less similar to those of own account workers engaged in construction activity. The survey covers the unorganized sector of different non-agricultural industries. The unorganized sector for the purpose of the 29th round enquiry was defined as the enterprises under own account workers and those employers who did not usually employ more than five hired workers. The bench mark year estimates for rural areas have been moved forward with the combined index of rural population and rural income with equal weights for rural income and rural population. The bench mark year estimates for urban areas have been projected to subsequent years with the combined index of urban income and urban population with equal weights for urban income and urban population. The index has been worked out

on the assumption that with change in income and population, construction activity also undergoes the similar rate of change.

8. Trade, Hotels and Restaurants

The GFCF estimates have been prepared separately for Trade sector and Hotels and Restaurants sector.

Trade

(a) Public Sector:- The public sector covers Central and State Government Non-departmental Enterprises.

Central Government Non-Departmental Enterprises:- The estimates of these enterprises are based on the data provided in the annual accounts reports of Central Government Non-Departmental Enterprises viz. Cotton Corporation of India, Indian Oil Corporation, Steel Authority of India, Hindustan Petroleum, National Handloom Corporation and Food Corporation of India. The information from these Central Government Non-Departmental Enterprises is collected from their regional/head offices.

State Government Non-Departmental Enterprises:- This covers Haryana Seeds Development Corporation and Confed. The information for these offices is culled out from their annual accounts.

(b) Private Sector:- The bench mark year estimates of private part of trade sector have been prepared on the basis of the results culled out from the report “State Level Results on Small Trading Units in India, July 1990 to June 1991.” The bench mark year estimates are projected to the subsequent years with the help of the index of total number of shops and commercial establishments in the State to reach at the GFCF estimates at constant prices. These GFCF estimates at constant prices are then inflated with the suitable price indices.

Hotels and Restaurants

(a) Public Sector:- The estimates of public administration sector are being prepared by culling out the data from the State Government, Budget Document. The information on capital expenditure of Central Government Non-departmental Enterprises i.e. Indian

Tourism Development Corporation Ltd. and State Government Non-departmental Enterprises i.e. Haryana Tourism Corporation is collected from their annual reports.

(b) Private Sector:- The bench mark year estimates for private sector are being prepared on the basis of the results of Enterprise Survey, 2006-07. The bench mark year estimates are projected to the subsequent years with the help of the index of total number of hotels and restaurants in the State to reach at GFCF estimates at constant prices. These GFCF estimates at constant prices are then inflated with the suitable price deflators to reach at GFCF estimates at current prices.

9. Transport, Storage and Communication

(a) Railways:- The Railway sector is a supra- regional Sector. The GFCF estimates of this sector are prepared and supplied by the NSO.

(b) Transport by Other Means:- In case of public sector, the estimates are being prepared by culling out the requisite data from the State Government Budget Document. For private sector, the bench mark year estimates of GFCF are based on the data provided in the NSSO Report, "Mechanised and Non-Mechanised Passengers and Goods Transport Survey, 1993-94. The bench mark year estimates of private sector are categorised into mechanised and non-mechanised segments. The bench mark year estimates of mechanised part are projected to the subsequent years with the index of number of mechanised vehicles to reach at the estimates at constant prices. These estimates at constant prices are then inflated with the suitable price deflators to work out the estimates at current prices. "The bench mark year estimates of non-mechanised segment are projected to the subsequent years with the index of number of non-mechanised vehicles to compile the estimates at constant prices. These estimates at constant prices are then inflated with the suitable prices deflators to compile the estimates at current prices.

(c) Storage:- This sub-sector covers Central Warehousing Corporation and Haryana Warehousing Corporation in the public sector. The data for these corporations is culled out from their annual accounts reports. The data regarding the expenditure incurred on different items of Capital assets for private sector is being collected from all the cold storages in the State through district agencies.

(d) Communication:- The Communication sub-sector is a supra-regional sector. The estimates of GFCF for this sector are prepared and supplied by the NSO.

10. Banking and Insurance

The Banking and Insurance sector is a supra - regional sector. Hence, the GFCF estimates of this sector are prepared and supplied by the NSO.

11. Real Estate, Ownership of Dwellings and Business Services

The economic activities covered in this sector are Real Estate, Ownership of Dwellings and Business Services.

(a) Public Sector:- The estimates of GFCF in respect of Real Estate and Ownership of Dwellings are prepared by culling out the requisite data from the State Government Budget Document.

(b) Private Sector:- The benchmark year estimates of residential buildings in rural and urban areas have been prepared on the basis of data provided in AIDIS 2002-03 report. The benchmark year estimates for rural and urban areas have been carried forward separately to the subsequent years with the help of rural and urban indices of the annual additions in the number of residential dwellings to obtain the estimates at constant prices. These GFCF estimates in rural and urban areas at constant prices are then super imposed by the indices of housing and building material and wages of construction labour separately for rural and urban areas to get the estimates at current prices.

12. Public Administration

The administrative departments include all offices of the Central Government, State Government and Local Bodies viz. Municipal Committees, Notified Area Committees, Improvement Trusts, Cantonment Boards, Gram Panchayats and Panchayat Samities engaged in administration and regulation of the public order. The administrative departments include the activities relating to the collection of taxes, defence services and administrative services such as police, jails, administration of justice, audit, cooperation, broadcasting, labour and employment, education, industries, etc.

(a) Central Government:- The estimates of GFCF in respect of Central Government Public Administration are prepared and supplied by the NSO.

(b) State Government:- The main source of information is the publication, “Economic-Cum-Purpose Classification of the Haryana Government Budget” brought out by this department. After allocating the figures of expenditure to different sectors depending upon their industry of use, the residual part has been placed under Public Administration. The publication does not provide the separate figures of expenditure on furniture and fixture, office equipments, other equipments, etc. All such type of expenditure is being shown under ‘commodity and services’. In order to estimate the expenditure on the aforesaid equipments, a type study was got conducted and on the basis of the study results, the figures of expenditure made by the State Government on furniture and fixture, office equipment etc. have been estimated and placed under the head ‘Other Equipments’.

(c) Local Bodies:- The capital expenditure made by Municipal Committees/ Notified Area Committees, Improvement Trusts, Cantonment Boards, Panchayat Samities and Gram Panchayats have been covered under this head. The part of expenditure made by the Local Bodies which have already been included under any other sector according to their industry of use, have been deducted from their total expenditure and the remaining expenditure has been placed under this head. The expenditure incurred by Municipal Committees/Notified Area Committees on construction of buildings and reservoirs, machinery and equipments relating to water supply schemes has been placed under the sector ‘Electricity, Gas and Water Supply’ and the remaining expenditure on fixed assets is included under Public Administration sector. Similarly, the expenditure made by Panchayat Samities and Gram Panchayats on tree plantation has been allocated to Forestry Sector and the remaining expenditure on fixed assets has been taken under Public Administration sector.

13. Other Services

This sector covers educational, medical and health, sanitary, cultural and personal services. The estimates of GFCF for this sector are prepared separately for public and private sectors.

(a) Public Sector:- In case of public sector, the estimates are compiled by analyzing the budget documents and annual reports. The GFCF figures of State Government

Administration have been taken from State Govt. Budget Documents. Kurukshetra Development Board - Kurukshetra, Mewat Development Board - Mewat, Shivalik Development Board - Ambala, Zila Sanik Boards and Haryana Khadi & Village Industries Board are covered under Local Bodies and the information on capital expenditure is collected directly from these offices. Central Government Non-departmental Enterprises cover Engineers India Ltd., New Delhi and State Government Non-departmental Enterprises cover Haryana Backward Classes Nigam and Haryana Scheduled Castes Finance and Development Corp. Ltd. The requisite information is collected directly from these offices.

(b) Private Sector:- In case of organized sector, the information on capital expenditure is directly collected from the institutions namely; Schools, Colleges, ITI's, Polytechnics, Universities, DRDA, Cinemas, Christians Hospitals, etc. The GFCF estimates from unorganized private sector has been compiled under three categories i.e. (i) Education, (ii) Health and medical and (iii) Other Community, Social and personal services. In case of education, the expenditure incurred on different assets is collected from the aided private schools selected in the State through the District Statistical Offices. Then, the bench mark year estimates of GFCF of education in unorganized sector available from the report of Enterprise survey, 2006-07 are projected to the subsequent years with the index of expenditure as collected above from the aided schools. The benchmark year of GFCF estimates of health and medical services in unorganized sector available from the report of Enterprise survey, 2006-07 are moved to the subsequent years with the index of workforce of medical and health services. The bench mark year estimates of GFCF of other community, social and personal services in unorganized sector available from the Enterprise survey, 2007 is moved forward to the subsequent years with the index of the number of different types of social welfare societies.

OVERVIEW OF STATE GFCF ESTIMATES

The Gross Fixed Capital Formation estimates compiled for the year 2022-23 are provisional. As already presented in the previous chapters, GFCF estimates at both current and constant prices have been compiled by industry of use, type of assets and type of institutions. The estimates of GFCF for the year 2022-23 have been depicted in Tables from 4.1 to 4.60.

The analysis of Gross Fixed Capital Formation estimates shows that the GFCF of the State at current prices has increased from ₹ 119554.59 crore in 2021-22 to ₹ 136668.44 crore in 2022-23 registering a growth of 14.3 percent. Similarly, the GFCF at constant prices has increased from ₹ 55147.50 crore in 2021-22 to ₹ 62505.80 crore in 2022-23 recording an increase of 13.3 percent. The composition of GFCF by three broad sectors of the economy i.e., primary, secondary and tertiary sectors reveals that the secondary sector at current prices has the maximum contribution to the State GFCF followed by tertiary and primary sectors. The composition of GFCF during the period 2021-22 to 2022-23 at constant prices shows that the contribution of secondary sector has decreased from 50.7 percent in 2021-22 to 49.9 percent in 2022-23 at constant prices. The contribution of primary sector increased from 15.5 percent in 2021-22 to 16.7 percent in 2022-23. The contribution of tertiary sector has decreased from 33.8 percent in 2021-22 to 33.4 percent in 2022-23.

The estimates of GFCF by type of institutions at constant prices shows that the contribution of private sector in total GFCF of the State has decreased from 68.8 percent in 2021-22 to 67.0 percent in 2022-23. Consequently, the contribution of public sector has increased from 31.2 percent in 2021-22 to 33.0 percent in 2022-23.

The analysis of GFCF by type of assets at constant prices reveals that the contribution of plant and machinery (54.6%) was the highest followed by construction of building (34.1%), road & bridges (4.6%), other construction (4.1%) and transport equipments (2.6%) in the year 2021-22. It indicates that the contribution of plant and machinery (57.0%) was the highest followed by contribution of construction of building (32.1%), road & bridges (4.1%), other construction (4.0%) and transport equipments (2.8%) in the year 2022-23.

building (32.1%), road & bridges (4.1%), other construction (4.0%) and transport equipments (2.8%) in the year 2022-23.

Similarly, the comparison of GFCF to the GSDP during the period 2021-22 indicates that the GFCF as percentage of GSDP at State level was 13.8 percent at current prices and at All India level was 29.6 percent. During the year 2022-23, this ratio was 30.7 percent at All India level and 14.0 percent at State level.

PART-II

ESTIMATES OF GFCF AT STATE LEVEL	
A. Estimates by Industry of use	
B. Estimates by type of Institutions	
C. Estimates by type of Assets	
D. Composition by Industry of use	
E. Percentage changes over the previous year by Industry of use	
F. Estimates details by Industry of use with type of Assets from 2004-05 to 2022-23	
G. Estimates of all Institutions	
H. Percentage of GFCF to GSDP
