PREFACE

The present report titled "Comprehensive Annual Modular Survey in Haryana" brought out by this Department of Economic and Statistical Affairs, Haryana on the basis of State Sample data collected in NSS 79th Round. Fieldwork was undertaken for state sample across selected sample households in the state during July 2022 – June 2023. In CAMS, annual estimates on key social and economic indicators, particularly in the areas of housing condition, education, migration, Out-of-pocket medical expenditure, ICT skills and other modules relevant to national planning and policy. This new modular approach was designed to strengthen the availability of timely and comprehensive data by integrating different subject modules within a common survey framework. The CAMS framework ensures flexibility while maintaining the reliability and quality of estimates across various regions and population groups.

This report has been prepared by Shri Om Parkash Indora, Research Officer with the support of Shri Parveen Kumar, Assistant Research Officer and Mrs. Sunidhi Sharma, Data Entry Operator under the guidance of Shri Rajinder Singh Bhatia, Deputy Director and overall supervision of Shri R.K. Mor, Additional Director of this department. I express my gratitude to the entire team for diligent efforts.

The Department is gratified to the households for extending active co-operation to the field staff. This Directorate is also thankful to NSO for the technical guidance and material assistance provided by them. It is expected that this document may be found useful by the planners, policy makers & researchers.

Suggestions for improvement of future version of the report are welcome.

Date: June 2026

Manoj Kumar Goel
Director, Department of Economic and Statistical Affairs, Haryana.

Highlights

The estimates presented in this report are based on the State sample data of survey on 'Comprehensive Annual Modular Survey (CAMS)' schedule of NSS 79th round conducted during July, 2022 to June, 2023. The survey was conducted in the rural & urban areas which covered 160 villages & 114 urban blocks covering 5474 households (3194 in rural areas and 2280 in urban areas). Some of the important findings are as follows:

1. In the age group '15-24 years ' 97.3 per cent persons in rural areas and 98.6 per cent persons in urban areas were able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations.

2. Mean years of schooling in formal education for the age-group '15 years and above' was 8.1 years in rural areas and 9.9 years in urban areas.

3. Percentage of persons in the age group '6 to 10 years' who were currently enrolled in primary education (Class I to Class V) were reported as 73.4 per cent in rural areas and 72.3 per cent in urban areas.

4. In the age-group '25 years and above' about 47.2 per cent persons in rural areas and 64.3 percent in urban areas reported that they have completed secondary education.

5. About 53.2 per cent children of age-group '6-10 years' in rural areas and about 27.7 percent children in urban areas were currently enrolled in government school.

6. Percentage of male who were in formal and non-formal education and training during the last 12 months preceding the date of survey was higher than that for female in both rural and urban areas.

7. Average annual medical expenditure (₹) per household for hospitalised treatment (during last 365 days preceding date of survey) was reported as ₹ 11,096 in rural areas and ₹ 14,128 in urban areas. Average medical expenditure (₹) per household for non hospitalised treatment (during last 30 days preceding date of survey) was reported as ₹ 1,578 and ₹ 1,610 for rural and urban areas respectively.

8. In the age-group '18 years and above', about 92.0 per cent persons in rural areas and about 93.3 per cent persons in urban areas reported that they have an account individually or jointly in any bank/ other financial institution/mobile money service provider.

9. About 97 per cent households reported that they were possessing telephone (including landline) /mobile phone (including smartphone) at the time of survey. About 7.8 per cent households in rural areas and 17.3 per cent households in urban areas reported that they were possessing computer (desktop PC/ laptop)

10. Percentage of persons of age less than 5 years, who were registered with civil authority for birth certificate ever was 93.4 per cent in rural and 94.4 per cent in urban areas respectively.

11. About 99.9 percent of the households reported of having access to improved principal sources of drinking water.

12. About 66.5 per cent households in rural areas and 95.8 per cent in urban areas were using clean fuel as primary source of energy for cooking.

13. In the age group ‘15 years and above’, about 71.9 per cent persons in rural areas and 79.1 per cent persons in urban areas were able to use internet.

****

Chapter 1

Introduction

Chapter 1

Introduction

1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MOSPI), GoI conducts nationwide large scale sample surveys, since its inception in 1950, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. The Department of Economic & Statistical, Affairs, Haryana participates in these surveys from 22nd round with an independent sample (called State Sample) on matching sample basis.

1.2 NSS 79th round was earmarked for collection of data for compilation of a number of Sustainable Development Goal (SDG) indicators through a 'Comprehensive Annual Modular Survey (CAMS)' along with a survey on Ayurveda, Yoga, Naturopathy, Unani, Siddha, Sowa-Rigpa/Amchi and Homoeopathy (AYUSH).

2. Objective of the survey

2.1 CAMS was introduced to cater the emerging need for supply of information on high-frequency socio-economic indicators that are not available from any other sources like, administrative data etc. Information required for the purpose of generating some SDG indicators and sub-indicators of Global Indices was also collected. The primary objective of CAMS was to collect data to generate indicators encompassing education, health, financial inclusion, use of mobile & internet, ICT skills, possession of assets etc. The information collected in the survey includes:

- Educational particulars of the household members
- Average medical expenditure/Average out-of-pocket expenditure
- Usage of mobile, computer etc.
- Ability of the household members performing different ICT skills, Drinking water facilities, Sanitation facilities, Possession of Assets
- Birth Registration
- Public Transport facilities in Urban Areas
- Distance of Open public space from the place of Households in Urban Areas
- All-weather Road in Rural Areas
- Clean fuel as the primary source of energy for cooking, heating & lighting

3. About the survey

3.1 The results presented in this report are based on information collected from 3194 rural and 2280 urban sample households on the subject 'Comprehensive Annual Modular Survey' (CAMS) and contains information on,

- Percentage of households with a computer.
- Percentage of individuals using internet during last 3 months prior to the date of survey.
- Percentage of adults having an account at a formal financial institution.
- Proportion of children under 5 years of age whose births have been registered with a civil authority.
- Percentage of households having access to improved principal source of drinking water.
- Proportion of population that has convenient access to public transport facility.
- Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months prior to the date of survey.

- Proportion of youth (aged 15–24 years) not in education, employment or training.
- Mean year of schooling.
- Out-of-pocket medical expenditure on hospitalisation during last 365 days.

4. Survey coverage

4.1 The survey covered the whole of the Haryana The total number of first stage units (FSUs) surveyed for the state sample was 274 (160 in rural areas and 114 in urban areas), the total number of households surveyed was 5474 (3194 in rural areas and 2280 in urban areas). Further, 23424 persons (14243 in rural areas and 9181 in urban areas) were enumerated at the state level.

5. Schedule of enquiry

5.1 During this round, for survey on CAMS, the following Schedules of enquiry were canvassed:

Schedule 00 CM : List of Households.
Schedule CAMS 2022-23 : Comprehensive Annual Modular Survey.

6. Survey methodology

6.1 A stratified multi-stage design was adopted for CAMS 2022-23. The first stage units (FSU) were villages/ sub-units (SUs) in the rural sector and UFS blocks/SUs in the urban sector. The ultimate stage units (USU) were households in both rural and urban sectors. To effectively capture information on out-of-pocket medical expenditures, all the households of selected FSUs were classified into two groups based on whether any household member as hospitalized during the last 365 days or not. A total of 20 households were randomly selected following Simple Random Sampling Without Replacement (SRSWOR) from each FSU, for detailed canvassing. Out of the selected 20 households, 5 households belong to the category where hospitalization case(s) were observed, and 15 households were selected from the remaining households. National Sample Survey Office (NSSO) conducted the 'Comprehensive Annual Modular Survey' (CAMS) in its 79th round (July 2022 to June 2023). The primary objective of CAMS was to collect data to generate indicators encompassing education, out-of-pocket medical expenditure, use of mobile and internet, financial inclusion, ICT skills, possession of assets, etc. In addition, information related to drinking water, sanitation, energy use, birth registration, access to transport facilities, etc., was also collected. The survey collected both household and person-level information. In CAMS, an attempt was made to collect person-level information on the formal education of erstwhile household members aged 18 years or above who are currently studying outside India. However, the survey could not capture a sufficient number of households where at least one member aged 18 years or above is currently studying outside India.

7. State level estimates

7.1 The report gives estimates of important indicators based on the state sample data, at the state level. The State level detailed tables are given in Appendix A. It is to be noted that due to the rounding-off effect, some of the row/ column totals may not add up exactly. Further, Appendix B gives a *facsimile* of schedule CAMS 2022-23.

****

Chapter 2

Concepts and Definitions

Chapter 2

Concepts and Definitions

2.0 Concepts and definitions of some important terms used in this report are described below:

2.1 Population Coverage : The following are the rules regarding the population to be covered,

- Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., are to be excluded, but residential staff therein will be listed while listing is done in such institutions. The persons of the first category will be considered as members of their parent households and will be counted there. Convicted prisoners undergoing sentence will be outside the coverage of the survey.
- Floating population, i.e., persons without any normal residence will not be listed. But households residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, will be listed.
- Neither the foreign nationals nor their domestic servants will be listed, if by definition the latter belong to the foreign national's household. If, however, a foreign national becomes an Indian citizen for all practical purposes, he or she will be covered.
- Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) will be kept outside the survey coverage due to difficulty in conduct of survey therein. However, civilian population residing in their neighborhood, including the family quarters of service personnel, are to be covered. Permission for this may have to be obtained from the appropriate authorities.
- Orphanages, rescue homes, ashrams and vagrant houses are outside the survey coverage. However, the residential staff of these institutions may be listed. People staying in old age homes will be covered in the survey.

2.2 House : Every structure, tent, shelter, etc. is a house irrespective of its use. It may be used for residential or non-residential purpose or both or even may be vacant.

2.3 Household : A group of persons normally living together and taking food from a common kitchen will constitute a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months during the survey period) but exclude temporary visitors and guests (expected total period of stay less than 6 months during the survey period). Even though the determination of the actual composition of a household will be left to the judgment of the head of the household, the following procedures will be adopted as guidelines.

(i) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., will constitute a single-member household. If, however, a group of persons among them normally pool their income for spending, they will together be treated as forming a single household. For example, a family living in a hotel will be treated as a single household.

(ii) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on 'ordinarily taking food from a common kitchen'. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household with whom he or she resides.

(iii) A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) will be considered as a member of the household with whom he or she resides even though he or she is not a member of the same family.

(iv) When a person sleeps in one place (say, in a shop or in a room in another house because of space shortage) but usually takes food with his or her family, he or she should be treated not as a single member household but as a member of the household in which other members of his or her family stay.

(v) If a member of a family (say, a son or a daughter of the head of the family) stays elsewhere (say, in hostel for studies or for any other reason), he/ she will not be considered as a member of his/ her parent's household. However, he/ she will be listed as a single member household if the hostel is listed. 1.5.4

2.4 Household size : The number of members of a household is its size.

2.5 Household's usual monthly consumer expenditure (₹) his information is collected to classify the households into different UMPCE (Usual Monthly Per Capita Consumption Expenditure) classes. Household consumer expenditure (HCE) is the sum total of monetary values of all goods and services consumed (out of purchase or procured otherwise) by the household on domestic account during a reference period. Procedure for deciding consumption of goods and services by a household is same as that followed in Consumer Expenditure Survey (Schedule 1.0) of NSS. Unusual expenditures, such as expenditure on social ceremonies, capitation fee, hospitalization, etc., are to be excluded for deriving usual monthly consumer expenditure of the household. However, expenditure on household durable goods is to be included. Household's usual monthly consumer expenditure will be derived through the following items:

(i) usual consumer expenditure in a month for household purposes out of purchase of goods and services excluding items like clothing, footwear (A).

(ii) imputed value of usual consumption in a month from home grown stock like, rice, cereals, pulses, vegetables, milk, firewood, chips, cow dung, etc. (B).

(iii) imputed value of usual consumption in a month from wages in kind, free collection, gifts, etc. (C).

(iv) expenditure on purchase of items like clothing, footwear, etc. during last 365 days (D).

(v) expenditure on purchase of household durables like bedstead, furniture, vehicles, TV, fridge, fans, cooler, AC, mobile, computer, kitchen equipment, etc. during last 365 days (E) In (i) to (v) entry will be made in whole number in rupees. From the entries in (i) to (v), UMPCE will be derived in whole number of rupees rounded to the nearest rupee as: [A + B + C+(D+E)/12].

(i) Usual consumer expenditure in a month for household purposes out of purchase of goods and services excluding items like clothing, footwear (A) Regular monthly expenditure incurred by the household for purchase of goods and services for household purposes will be included here whereas expenses on items like clothing, footwear and purchase of durable goods will be excluded from the coverage of this item. Further, cash remittances should not be reported under this item.

(ii) Imputed value of usual consumption in a month from home grown stock like, rice, cereals, pulses, vegetables, milk, firewood, chips, cow dung, etc. (B): There are some households, especially in rural areas, who use items of household consumer goods like rice, cereals, pulses, vegetables, milk, firewood & chips, cow dung etc., from home grown stock on a regular basis. For households who use items of household consumer goods from home grown stock on regular basis, the imputed value of such usual consumption in a month at ex farm/ex-factory price will be recorded here.

(iii) Imputed value of usual consumption in a month from wages in kind, free collection, gifts, etc. (C): There are some households who regularly consume goods and services that are received in exchange of goods and services provided by them. For wage salaried employees, such services received could be perquisites like free electricity, free telephone services, free medical services, etc. For agricultural labour, such goods and services received could be foodgrains, vegetables, meals etc., as payment for wages in kind. In some cases it may also happen that household regularly consumes goods and services received as gifts or obtained through free collection. For households who regularly consume goods and services received as wages in kind, in exchange of goods provided by them, as gifts or obtained through free collection, etc., the imputed value of such usual consumption in a month at local retail prices will be recorded here. Mid-day meals received by household members also will be considered for making entries against this item.

(iv) Expenditure on purchase of items like clothing, footwear, etc. during last 365 days (D): Expenditure on purchase of items like clothing footwear, etc., which generally are not purchased on a regular basis during the last 365 days will be recorded in here.

(v) Expenditure on purchase of household durables like bedstead, furniture, vehicles, TV, fridge, fans, cooler, AC, mobile, computer, kitchen equipment, etc. during last 365 days (E): Expenditure incurred by the household during the last 365 days for purchase of household durable goods like, bedstead, furniture, vehicles, TV sets, fridge, fans, cooler, AC, mobile phones, computers, kitchen equipment, etc., will be recorded here. Expenditure for construction of household durable goods will not be considered for reporting in this item. Special procedure for expense on tuition fees, hostel room charges and hostel mess charges:

- If these expenses are incurred with a monthly periodicity, they will naturally come under 'A'. But if they are incurred semester-wise, or quarterly or annually, the average expenditure per month is to be calculated and included in 'A'. Note, however, that in case of hostel students, these expenditures should be accounted in the student's household and not in the „parent" household. This is because rent and tuition fees regularly paid by a household (parent household) for a member of another household (usually a hostel student) are covered by the Use Approach.
- For simplicity, the above procedure will be followed for tuition fees paid for non hostel students as well. That is, if tuition fees are not paid monthly and therefore not reported in 'A', the monthly average over a year will be included in 'A'.

2.6 Hospitalization : Hospitalization means admission as in-patient – for treatment of ailment or injury, or for childbirth –to any medical institution (Definition of medical institution is provided below). Further, childbirths sometimes take place in Health Sub- Centres; such cases of delivery will also be considered as hospitalization. Surgeries undergone in temporary camps set up for treatment of aliments, such as eye camps, will also be treated as cases of hospitalization.

2.7 Medical Institution : Medical institution here refers to any institution having provision for admission of sick persons as in-patients for treatment as well as providing treatment to a person as out-patient – all Primary Health Centres, Community Health Centres, all public/government hospitals (district hospitals/state general hospitals/ medical college hospitals etc.) and all private hospitals (run by charitable organisations or NGOs or trusts, private nursing home, day care centre, private medical college and hospital, super-speciality hospital, etc.) comes under this.

2.8 Medical expenditure : This included bed charges, doctor's/surgeon's fees, the total amount paid for medicines, diagnostic tests, attendant charges, physiotherapy, personal medical appliances, blood, oxygen, etc. during the stay at the hospital (within the reference period) – whether made available by the hospital or procured from outside. Expenses on transportation of the patient to or from the hospital were excluded.

2.9 Out-of-pocket medical expenditure: In cases of both hospitalised and non-hospitalised treatment, some amount of medical expenditure may be reimbursed by employers or insurance companies (public or private), or other agencies. In this survey, expenditures were recorded when borne initially by the patients household, whether or not reimbursed later. The amount reimbursed later was also separately recorded. Out-of-pocket medical expenditure is the total medical expenditure initially borne by the households less reimbursement received later on account of hospitalized/non-hospitalized treatment.

3.0 Bank: In this survey, the bank referred to commercial banks including foreign commercial banks operating in India, nationalized banks, regional rural banks, cooperative societies, district or central cooperative banks or other types of cooperative societies.

3.1 Other financial institutions: Other financial institutions included credit unions, microfinance institutions, cooperatives, or post offices (if applicable), or having a debit card in own name. Account at a financial institution may have been used for receiving wages, government transfers, and payments for agricultural products and for paying utility bills or school fees in the past 12 months from the date of survey.

3.2 Mobile-money-service provider: It generally refers to payment services operated under financial regulations and performed from or via mobile device. Instead of paying with cash, cheque or credit card, a consumer can use a mobile to pay for a wide range of services.

3.3 In this survey, information on the execution of some ICT skills (like send messages with attached files, use copy and paste tools to duplicate or move information, documents etc.) was collected from sample persons of age 15 years and above with the reference period of last three months preceding the date of survey. Further, the information on the ability to perform certain skills (like searching of internet for information, sending or receiving emails, performing online banking transactions) was collected for sample persons. It is to be noted that information on the execution/ability to perform the skills was collected based on the reporting of the informant only. While collecting this information, no tests of the skills of the informants were performed.National Sample Survey Office (NSSO) conducted the 'Comprehensive Annual Modular Survey' (CAMS) in its 79th round (July, 2022 to June, 2023). The primary objective of CAMS was to collect data to generate indicators encompassing education, out-of-pocket medical expenditure, use of mobile

and internet, financial inclusion, ICT skills, possession of assets, etc. In addition, information related to drinking water, sanitation, energy use, birth registration, access to transport facilities, etc., was also collected. The survey collected both household and person-level information. In CAMS, an attempt was made to collect person-level information on the formal education of erstwhile household members aged 18 years or above who are currently studying outside India. However, the survey could not capture a sufficient number of households where at least one member aged 18 years or above is currently studying outside India.

****

Chapter 3

Survey findings

CHAPTER 3

SURVEY FINDINGS

3.0 Introduction

3.0.1 NSS 79th round survey on 'Comprehensive Annual Modular Survey' (CAMS) was conducted in the State during July 2022 – June 2023. The primary objective of CAMS was to collect data to generate key socio-economic indicators that are not available from other sources. This includes information on education, out-of-pocket medical expenditure, use of mobile and internet, financial inclusion, ICT skills, possession of assets etc. In addition, CAMS also collected information on drinking water, sanitation, energy use, birth registration and access of transport facilities. The survey collected both household and person-level information.

3.0.2 The data collected through CAMS is instrumental in monitoring the performance of various Sustainable Development Goals (SDG) indicator. This chapter, the 'Survey Findings', provides an overview of the outcomes derived from the survey. List of some SDG and sub indicators of Global indices which are generated from CAMS is given below:

- Proportion of population using safely managed drinking water services.
- Proportion of population covered by a mobile network, by technology.
- Percentage of adult having an account at a formal financial institution.
- Proportion of children under 5 years of age whose births have been registered with a civil authority, by age.
- Participation rate of youth and adults in formal and non-formal education and training in the previous 12 months, by gender.
- Out-of-pocket medical expenditure on hospitalization during last 365 days.

3.0.3 **First stage units and household surveyed**: In 'Comprehensive Annual Modular Survey' (CAMS), the total number of first stage units (FSUs) surveyed for NSS 79th round in the state were 274 for State sample (160 villages in rural areas and 114 UFS blocks in urban areas). The total number of households surveyed were 5474 (3194 in rural areas and 2280 in urban areas).

3.1 Households and population

3.1.1 The percentage distribution of persons, percentage distribution of households and average household size, as estimated from the survey, is given in Statement 1.

Statement 1: Percentage distribution of persons, percentage distribution of households and average household size

Particular	Rural	Urban	Haryana
Percentage distribution of persons	65.06	34.94	100.0
Percentage distribution of households	61.81	38.19	100.0
Average household size (0.0)	4.4	3.8	4.2

3.2 Education

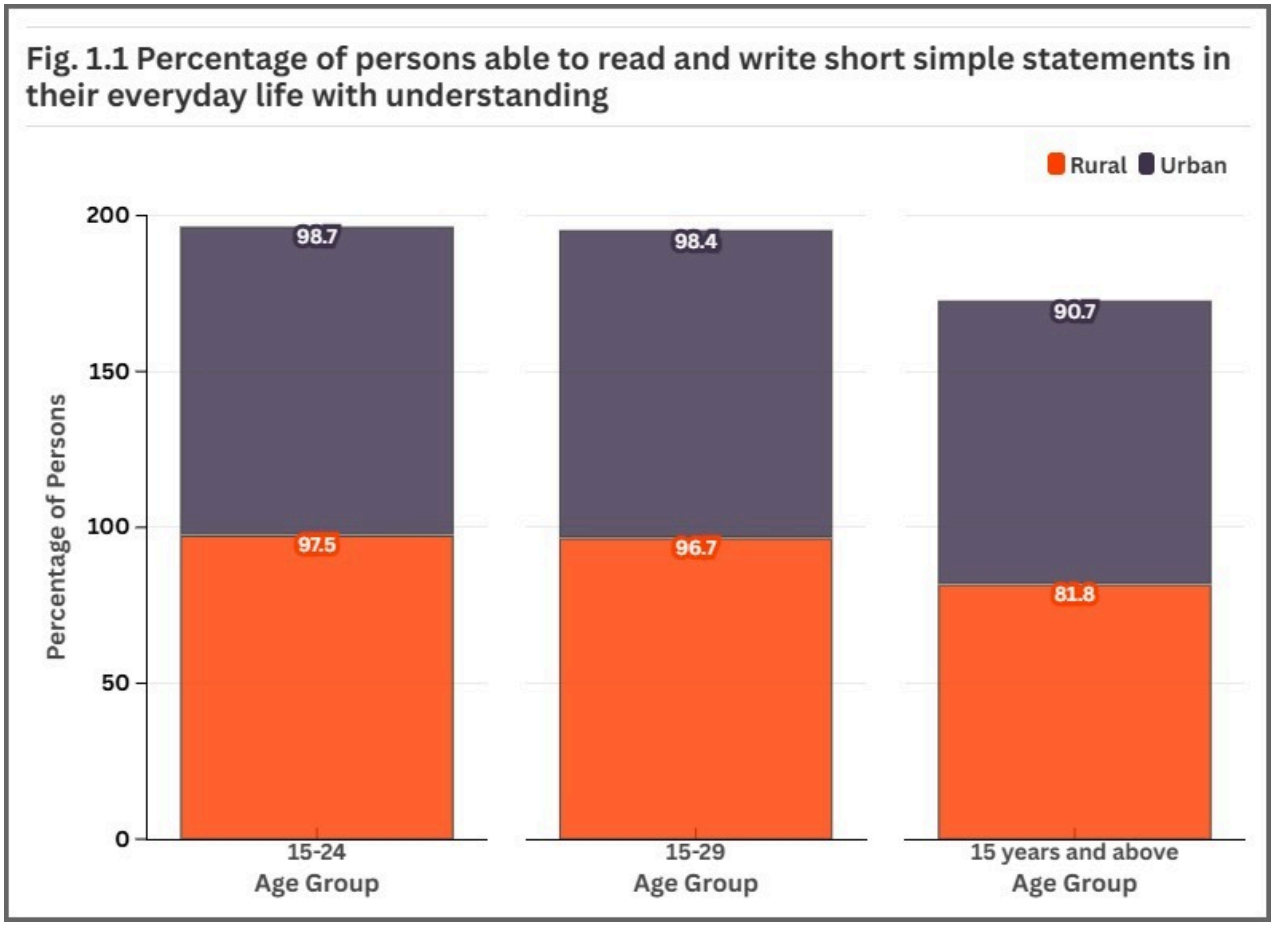

3.2.1 Persons able to read and write short simple statements in their everyday life with understanding.

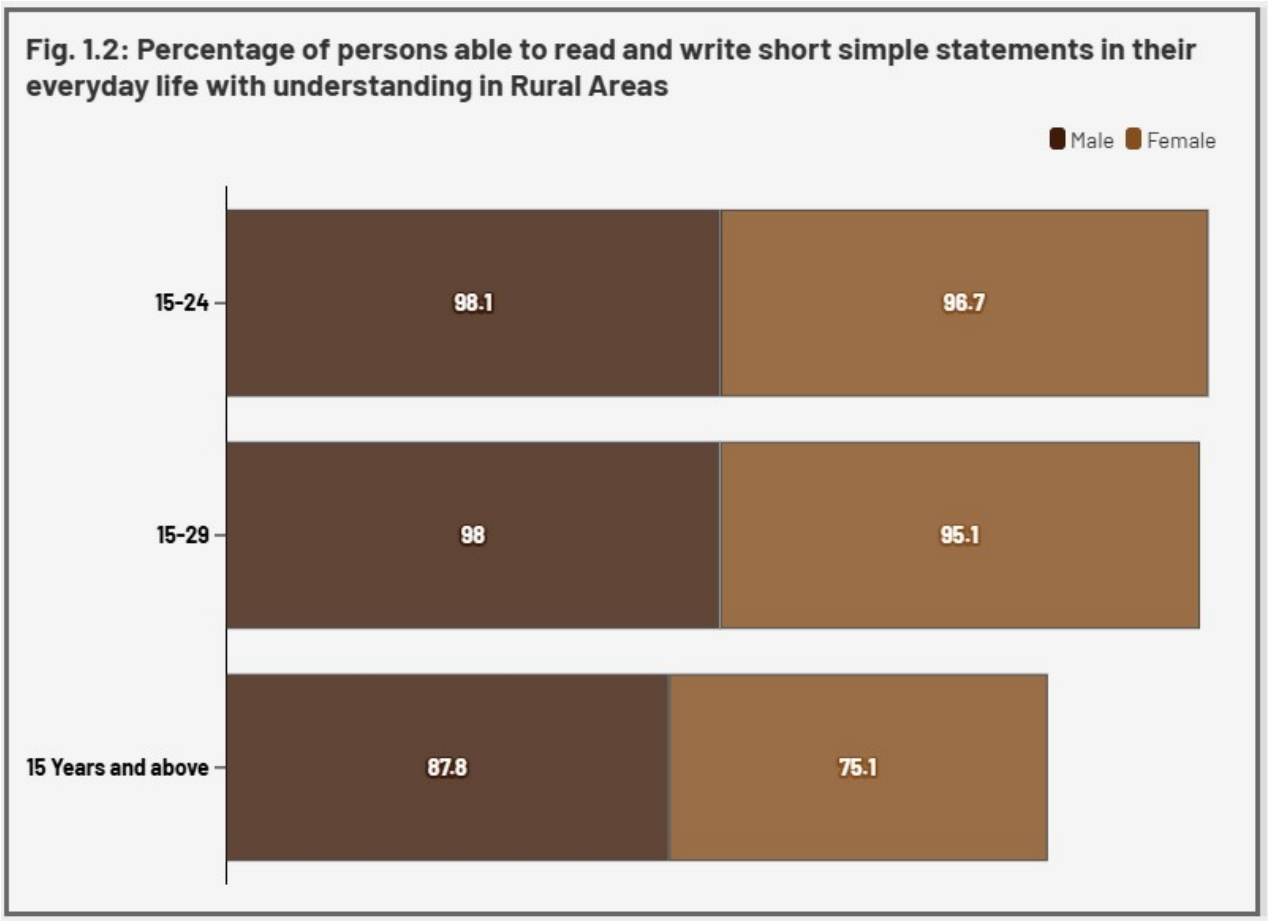

3.2.1.1 Statement 2 gives the percentage of persons able to read and write short simple statements in their everyday life with understanding as on date of survey, for different age groups. About 85 per cent persons in rural areas and 95 per cent persons in urban areas in the age group '15 years

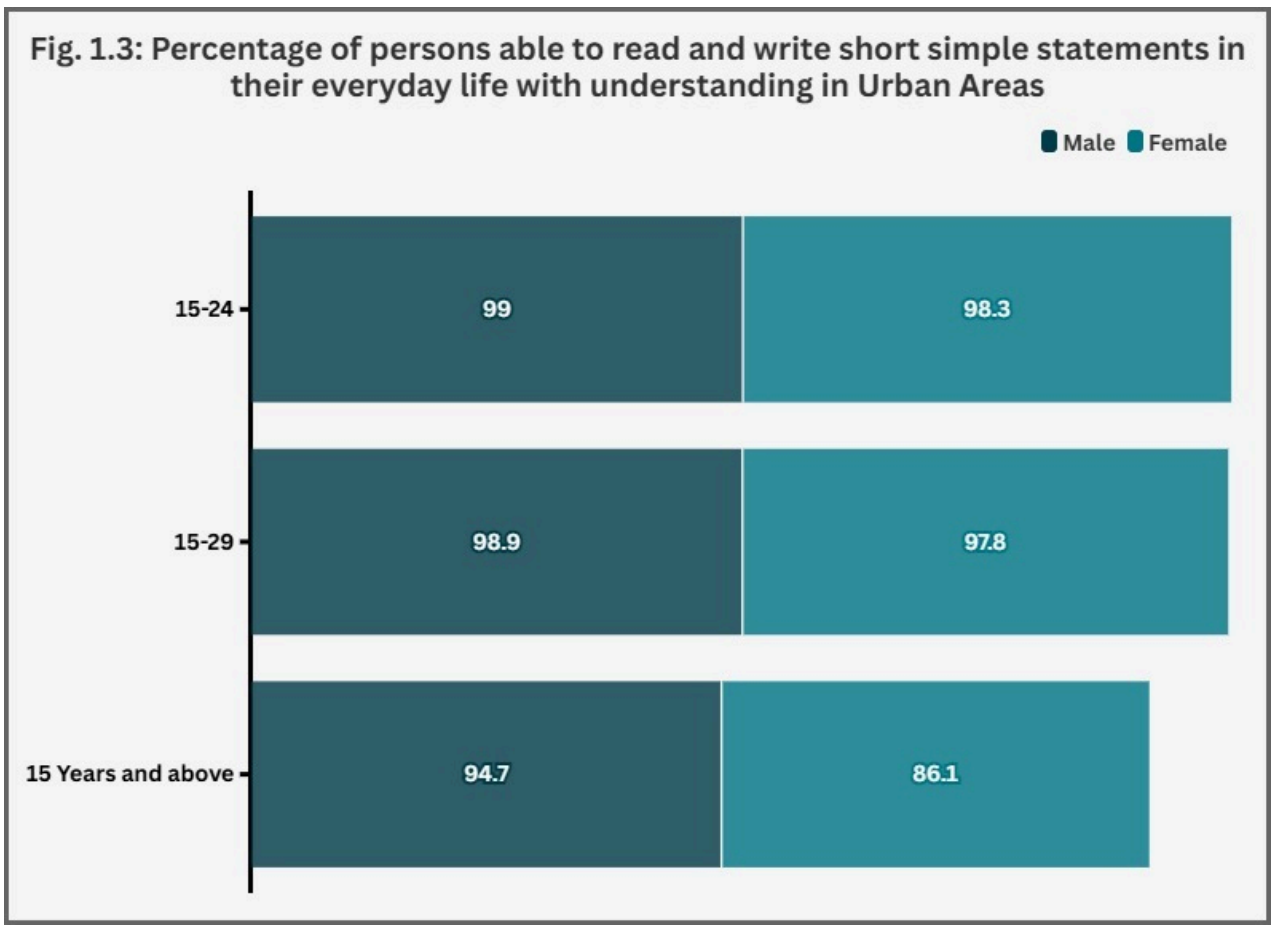

and above' were able to read and write short simple statements in their everyday life with understanding. This percentage was 79.5 per cent for females in rural areas compared to 92.9 per cent females in urban areas. Information on the ability was obtained based on the informant's reporting, and no test was conducted to verify the same. Figure 1 presents sector-wise estimates.

Statement 2: Percentage of persons able to read and write short simple statements in their everyday life with understanding

Age group (years)		Rural	Urban	All
15 – 24	Male	98.1	99.0	98.4
	Female	96.7	98.3	97.2
	Person	97.5	98.7	97.9
15 – 29	Male	98.0	98.9	98.3
	Female	95.1	97.8	96.0
	Person	96.7	98.4	97.3
15 years and above	Male	87.8	94.7	90.3
	Female	75.1	86.1	79.0
	Person	81.8	90.7	85.0

3.2.2 Persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations.

3.2.2.1 Statement 3 gives the percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations as on date of survey, for different age groups. About 85 per cent persons in rural areas and 95 per cent persons in urban areas in the age-group '15 years and above' were able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations. Information on the ability was obtained based on the informant's reporting, and no test was conducted to verify the same. Figure 2 presents sector-wise estimates.

Statement 3: Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations

Age group (years)		Rural	Urban	All
15 – 24	Male	98.1	99.0	98.4
	Female	96.5	98.1	97.0
	Person	97.3	98.6	97.8
15 – 29	Male	98.0	98.9	98.3
	Female	94.7	97.4	95.6
	Person	96.5	98.2	97.1
15 years and above	Male	87.5	94.6	90.1
	Female	74.5	85.3	78.3
	Person	81.4	90.3	84.6

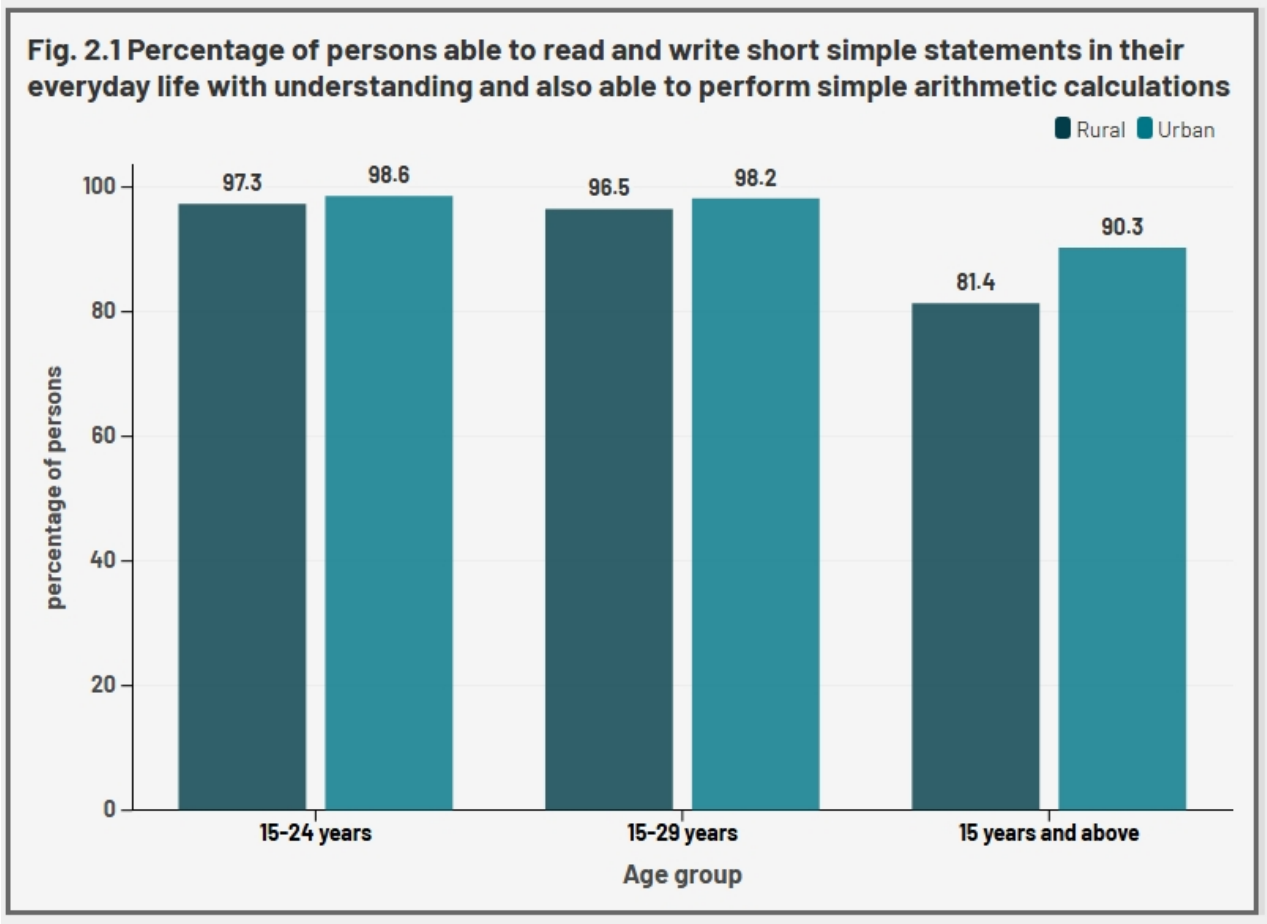

Fig. 2.2 Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations in rural areas

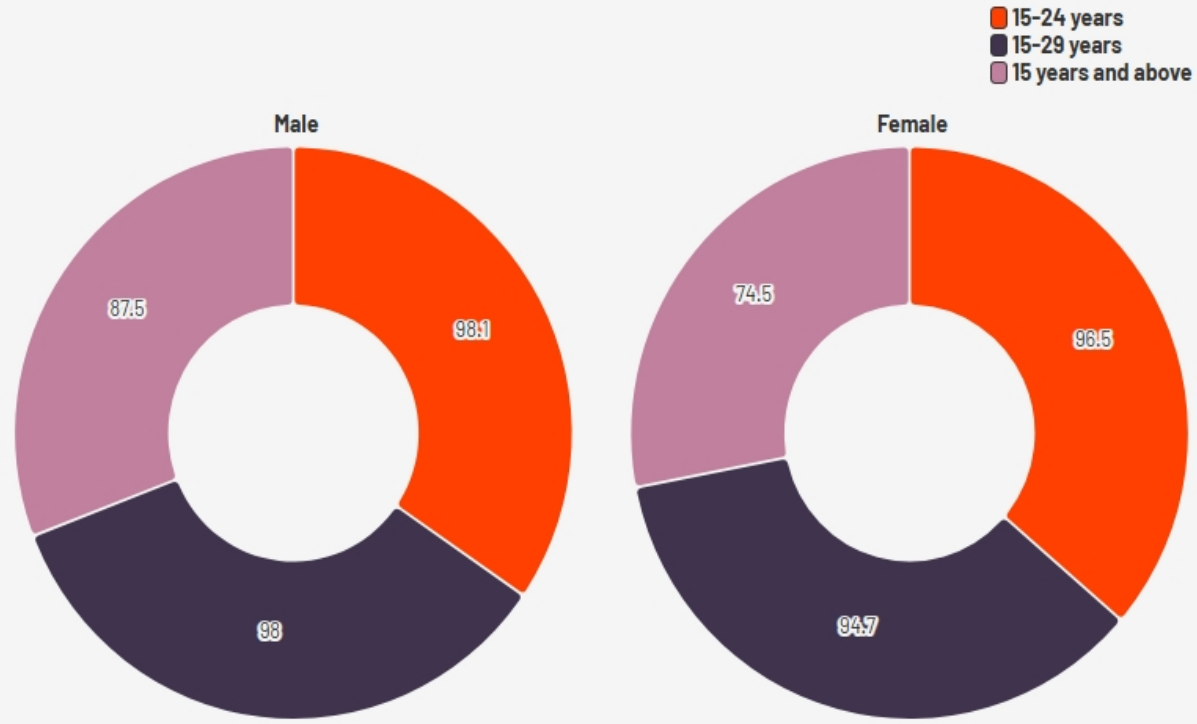

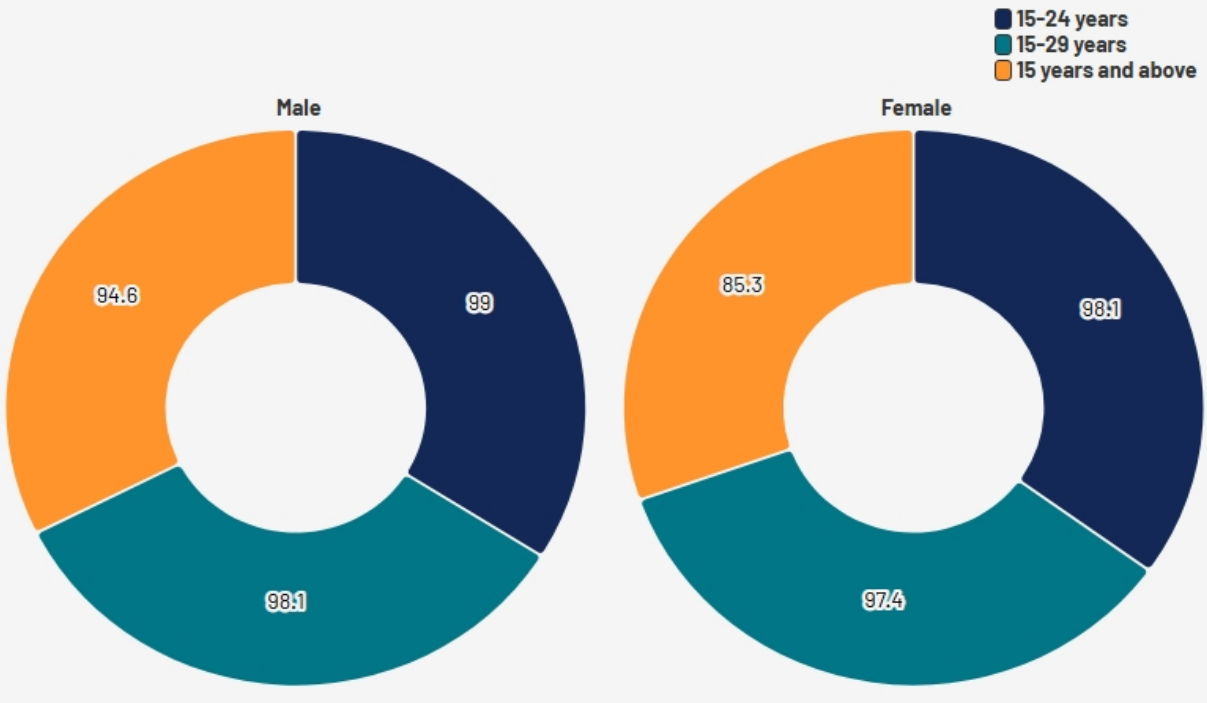

Fig. 2.3 Percentage of persons able to read and write short simple statements in their everyday life with understanding and also able to perform simple arithmetic calculations in urban areas

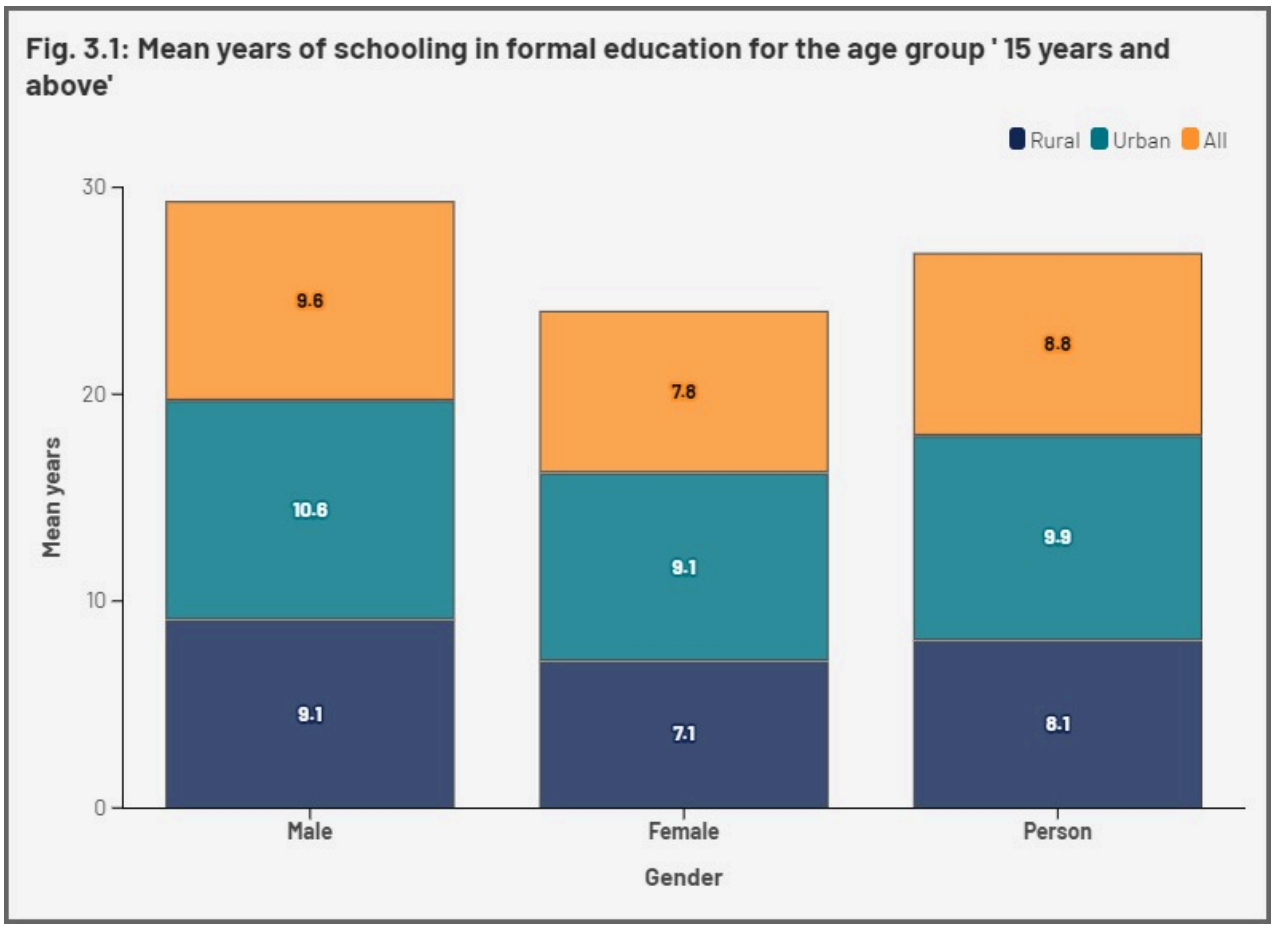

3.2.3 Mean years of schooling in formal education

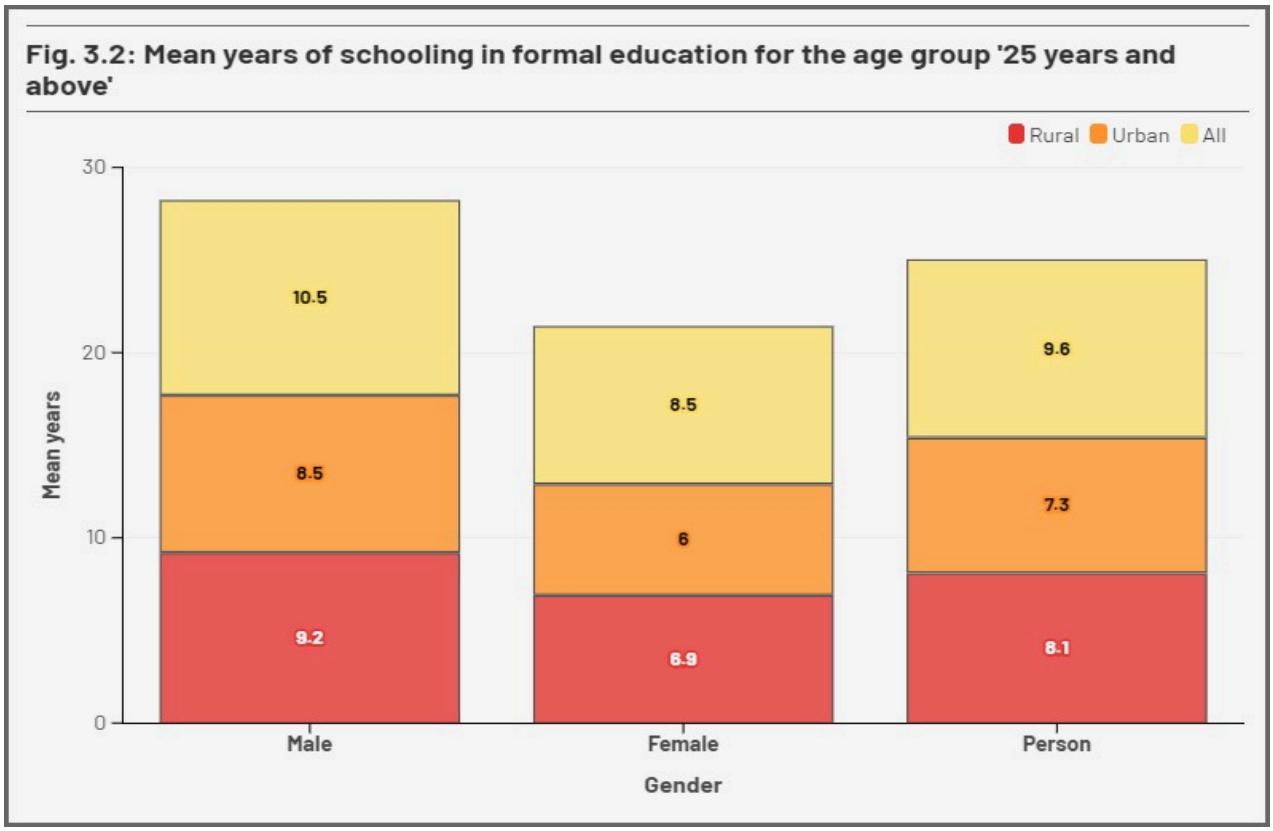

3.2.3.1 The mean years of schooling (MYS) is calculated as the weighted average of the number of years spent in formal education (excluding repeated years) for all persons for any age group like '15 years and above'. The calculation includes all courses and educational levels, including pre-primary education, regardless of whether they were completed or not. For instance, if a course has a duration of 3 years and a person attended 2 years only, then while calculating MYS, 2 years was considered. However, repeated years have not been considered in the calculation of MYS. Further, for person who were reported as 'never enrolled' in formal education, '0' year is considered while calculating MYS.

3.2.3.2 Statement 4 gives the mean years of schooling in formal education of persons of age '15 years and above' and '25 years and above'. Mean years of schooling in formal education for the age-group '15 years and above' was 8.1 years in rural areas and 9.9 years in urban areas. It was 7.1 years for females in rural areas and 9.1 years for females in urban areas.

Statement 4: Mean years of schooling in formal education

Age - group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15 years and above	9.1	7.1	8.1	10.6	9.1	9.9	9.6	7.8	8.8
25 years and above	9.2	6.9	8.1	8.5	6.0	7.3	10.5	8.5	9.6

3.2.4 Persons of age 6 to 10 years currently enrolled in primary education (Class I to Class V)

3.2.4.1 Statement 5 gives the percentage distribution of persons aged '6-10 years' who were currently enrolled in primary education (Class I to Class V) at the time of survey. Percentage of persons in the age group '6 to 10 years' who were currently enrolled in primary education (Class I to Class V) were reported as 73.4 per cent in rural areas and 72.3 per cent in urban areas.

Statement 5: Percentage of persons of age group 6 to 10 years currently enrolled in primary education (Class I to Class V)

Sector	Male	Female	Person
Rural	75.1	76.6	73.4
Urban	68.2	77.5	72.3
All	72.8	73.4	73.1

3.2.4.2 Percentage of children of age group '6 to 10 years' who were currently enrolled in primary education (Class I to Class V) at the time of survey by type of school is given in Statement 6. About 53 per cent children of age-group '6-10 years' in rural areas and about 28 per cent children in urban areas were currently enrolled in government school.

Statement 6: Percentage of children of age '6 to 10 years' who were currently enrolled in primary education (Class I to Class V) at the time of survey by type of school

Type of school	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
Government	49.1	57.9	53.2	28.2	27.1	27.7	42.5	48.1	45.1
Private aided by government	16.0	14.4	15.3	14.7	12.5	13.7	15.6	13.8	14.8
Private unaided (recognized)	34.1	27.3	31.0	57.1	60.4	58.6	41.4	37.8	39.7
Others	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0

3.2.5 Persons with some secondary education

3.2.5.1 Statement 7 gives the percentage of persons (age group 25 years and above) with some secondary education. Here, if a person passed Class X or achieved a higher educational qualification, then that person was considered as a person ‘with some secondary education’. About 47.2 per cent persons in the age-group '25 years and above' in rural areas and 64.3 percent in urban areas reported that they have completed secondary education.

Statement 7:Percentage of persons with some secondary education (25 years and above)

Sector	Male	Female	Person
Rural	56.1	37.4	47.2
Urban	70.2	57.7	64.3
All	61.2	44.7	53.4

3.2.5.2 Statement 8 gives the percentage distribution of persons of age ‘6-18 years’ who were never enrolled in formal education by major reasons. Among the person who were never enrolled in formal education, about 21.7 per cent persons in rural areas and 23.7 per cent persons in urban areas reported 'due to not interested in study' was the major reason for never enrollment.

Statement 8 : Percentage distribution of persons 6 to 18 years who never enrolled in formal education by major reasons

Sector	School far off	Financial problem (like, to supplement to household income)	Not interested in study	Parents not interested to send to school	Social problem (like to help in domestic work, to take care of siblings)	Due to poor health or disability	Others	All
Rural	12.2	2.2	21.7	7.0	3.8	18.1	35.1	100.0
Urban	8.8	12.1	23.7	3.0	0.0	23.3	29.0	100.0
All	11.2	5.2	22.3	5.8	2.6	19.7	33.2	100.0

3.2.6 Youth in formal and non-formal education and training in the previous 12 months

3.2.6.1 Statement 9 gives the percentage of persons in formal and non-formal education and training during the last 12 months preceding the date of survey, for the age groups ‘15-24 years ‘and ‘15-29 years’. Percentage of male who were in formal and non-formal education and training during the last 12 months preceding the date of survey was higher than that for female in both rural and urban areas.

Statement 9: Percentage of persons in formal and non-formal education and training in the previous 12 months

Age-group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15-24 years	61.3	49.6	55.8	63.2	51.4	58.1	62.0	50.2	56.6
15-29 years	41.9	34.2	38.3	44.5	33.3	39.5	42.9	33.9	38.7

3.2.7 Youth not in education, employment, or training

3.2.7.1 In this survey, information was collected on the current status of enrolment and training (formal as well as informal). Information on work/activity status for each of the persons during the last 7 days preceding the date of the survey was also ascertained. Statement 10 gives the percentage of youth reported to be not in education, employment or training, as on date of survey,

for different age groups in the state. About 23.89 per cent persons in rural areas and 21.74 per cent b persons in urban areas of age group '15-24 years' reported 'not in education, employment or training'.

Statement 10 :Percentage of persons not in education, employment and training

Age-group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15-24 years	10.89	38.59	23.89	10.35	36.68	21.74	10.69	37.96	23.15
15-29 years	11.34	48.25	28.63	9.98	47.81	26.80	10.85	48.10	28.00

3.3 Health

3.3.1 Expenditure (in ₹) on hospitalisation (including institutional delivery) during last 365 days and non-hospitalisation in a 30-day period and Out-of-pocket medical expenditure (OOPME) on hospitalisation and non-hospitalisation.

3.3.1.1 In cases of both hospitalised and non-hospitalised treatment, some amount of medical expenditure may be reimbursed by employers or insurance companies (public or private), or other agencies. In this survey, expenditures were recorded when borne initially by the patients household, whether or not reimbursed later. The amount reimbursed later was also separately recorded. Out-of-pocket medical expenditure is the total medical expenditure initially borne by the households less reimbursement received later on account of hospitalized/non-hospitalized treatment.

3.3.1.2 The average medical expenditure per household on hospitalised treatment during last 365 days preceding the date of survey and average medical expenditure per household on non hospitalised treatment during last 30 days preceding the date of survey separately for rural and urban areas is given in Statement 11. Average medical expenditure (₹) per household for hospitalised treatment (during last 365 days preceding date of survey) was reported as ₹ 11,096 in rural areas and ₹ 14,128 in urban areas. Average medical expenditure (₹) per household for non-hospitalised treatment (during last 30 days preceding date of survey) was reported as ₹ 1,578 and ₹ 1,610 for rural and urban areas respectively.

Statement 11: Average medical expenditure (₹) per household on hospitalised treatment (including institutional delivery) during the last 365 days and on non- hospitalised treatment during the last 30 days

Particulars	Rural	Urban	All
Average medical expenditure (₹) per household for hospitalised treatment during last 365 days.	11096	14128	12279
Average medical expenditure (₹) per household for non-hospitalised treatment during last 30 days.	1578	1610	1588
Average out-of-pocket medical expenditure (₹) per household on hospitalised treatment during last 365 days.	10285	10116	10221
Average out-of-pocket medical expenditure (₹) per household on non-hospitalised treatment during last 30 days.	1467	1588	1513
Percentage of average out-of-pocket medical expenditure per household for hospitalised treatment during last 365 days.	92.69	71.60	83.24
Percentage of average out-of-pocket medical expenditure per household on non-hospitalised treatment during last 30 days.	92.97	98.63	95.28

3.4 Financial Inclusion

3.4.1 Accounts at bank/other financial institution/mobile money service provider

3.4.1.1 Statement 14 gives the percentage of persons (18 years and above) who had an account individually or jointly in any bank/other financial institution or with mobile money service provider as on date of survey. About 90.7 per cent persons in rural areas and about 84 per cent persons in urban areas in the age-group '18 years and above' reported that they have an account

individually or jointly in any bank/ other financial institution/mobile money service provider. This percentage was 93.8 per cent and 91 per cent among males and females respectively.

Statement 14: Percentage of persons who have an account individually or jointly in any bank/ other financial institution/mobile money service provider (18 years and above)

Sector	Male	Female	Person
Rural	93.9	89.9	92.0
Urban	93.6	93.0	93.3
All	93.8	91.0	92.5

3.4.2 Percentage of borrowers (18 years and above)

3.4.2.1 In this survey, a person is considered to be indebted if he has taken a cash loan of ₹ 500/- or above and that loan remained outstanding as on the date of survey. Statement 15 gives the percentage of borrowers (18 years and above) who were indebted to any institutional/ non-institutional agency as on date of survey. About 92 per cent persons in rural areas and 93.3 per cent persons in urban areas were reported as borrowers.

Statement 15: Percentage of borrowers (18 years and above)

Sector	Male	Female	Person
Rural	93.9	89.9	92.0
Urban	93.6	93.0	93.3
All	93.8	91.0	92.5

3.5 Mobile and Internet

3.5.1 Persons able to use mobile (including smartphone)

3.5.1.1 Statement 16 gives the percentage of persons who were able to use mobile (including smartphone), as on date of survey, for different age groups. It is observed that 86.6 per cent persons in rural areas and 91.6 per cent persons in urban areas in the age-group '15 years and above' were able to use mobile (including smartphone).

Statement 16: Percentage of persons able to use mobile (including smartphones)

Age-group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15-24 years	94.0	94.4	94.2	95.3	92.9	94.3	94.5	93.9	94.2
15-29 years	95.5	95.0	95.2	96.6	95.3	96.0	95.9	95.1	95.5
15 years and above	90.1	82.7	86.6	94.1	88.7	91.6	91.6	84.8	88.4

3.5.1.2 Statement 17 gives the percentage of persons who used mobile telephones with an active sim card, at least once, during the last three months preceding the date of the survey for different age groups. It is observed that 60.3 per cent of persons in rural areas and 55.8 per cent of persons in urban areas of age '15 years and above' used mobile telephone with an active sim card at least once during last three months preceding the date of the survey.

Statement 17: Percentage of persons who used mobile telephone with an active sim card during the last three months preceding the date of the survey

Age-group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15-24 years	54.0	44.4	49.6	49.5	47.1	48.5	52.3	45.3	49.2
15-29 years	62.6	49.6	56.7	55.4	52.8	54.3	60.0	50.7	55.8
15 years and above	66.5	51.8	60.3	58.7	52.8	55.8	63.4	51.8	58.5

3.5.2 Persons able to use internet

3.5.2.1 Statement 18 gives the percentage of persons who were able to use internet, as on date of survey, for different age groups. About 72 per cent of persons in rural areas and 79 per cent of persons in urban areas of age '15 years and above' reported that they were able to use internet.

Statement 18: Percentage of persons able to use internet

Age-group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15-24 years	91.9	86.6	90.4	94.2	90.5	92.6	92.8	89.2	91.2
15-29 years	92.1	87.7	90.0	94.3	91.9	93.2	92.9	89.1	91.1
15 years and above	76.7	66.6	71.9	83.5	74.1	79.1	79.2	69.2	74.5

3.5.2.2 Statement 19 gives the percentage of persons who used internet during last 3 months preceding the date of survey for different age groups. It is observed that about 60.4 per cent persons of age '15 years and above' in rural areas and 74.4 per cent persons of age '15 years and above' in urban areas used internet during last three months preceding the date of survey.

Statement 19: Percentage of persons who used internet during last three months preceding the date of survey

Age-group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15-24 years	87.3	84.9	86.2	92.2	88.4	90.6	89.1	86.1	87.6
15-29 years	87.8	83.3	85.7	92.5	89.8	91.3	89.5	85.5	65.4
15 years and above	66.4	53.8	60.4	79.5	68.4	74.4	71.1	58.9	64.1

3.6 ICT Skills

3.6.1 Persons sent messages with attached files

3.6.1.1 Statement 20 gives the percentage of persons who reported executing the skill of 'sent messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video)', using mobile or computer-like devices, during the last three months preceding the date of survey in the state for different age groups.

Statement 20: Percentage of persons who send messages (e.g., e-mail, messaging service, SMS) with attached files (e.g., documents, pictures, video) using mobile or computer-like devices during last three months preceding the date of survey

Age-group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15-24 years	73.7	67.3	70.7	80.6	70.8	76.4	76.2	68.5	72.7
15-29 years	72.1	53.6	69.2	78.6	72.1	75.7	74.4	68.1	71.5
15 years and above	52.8	33.6	47.2	66.1	54.4	60.7	57.6	45.7	52.0

3.6.2 Persons used copy and paste tools

3.6.2.1 Statement 21 shows the percentage of persons who reported executing the skill of copy and paste tools to duplicate or move data, information, documents, etc., using mobile or computer like devices, during the last three months preceding the date of survey in the state for different age groups. About 39.4 per cent of persons in rural areas and 49.6 per cent of persons in urban areas of age '15 years and above' reported that they performed 'copy and paste tools to duplicate or move

data, information, documents, etc using mobile or computer-like devices' during last three months preceding the date of survey

Statement 21: Percentage of persons who performed copy and paste tools to duplicate or move data, information, documents, etc using mobile or computer-like devices during last three months preceding the date of survey

Age-group	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
15-24 years	63.2	56.2	59.9	70.7	59.6	65.9	65.9	57.3	62.0
15-29 years	62.9	53.6	58.5	68.1	60.0	64.5	64.8	55.7	60.6
15 years and above	44.6	33.6	39.4	54.6	43.8	49.6	48.2	37.2	43.0

3.6.3 Persons able to search internet for information and able to send or receive emails and able to perform online banking transaction

3.6.3.1 Statement 22 gives gender and sector-wise estimates of the percentage of persons who can search internet for information and percentage of persons who can send or receive emails and percentage of persons who can perform online banking transactions for persons of '15-24 years' age group. About 38.9 per cent of persons in rural areas and 41.2 per cent of persons in urban areas of age '15-24 years' reported that they were able to perform online banking transactions.

Statement 22: Percentage of persons who can search internet for information and percentage of persons who can send or receive emails and percentage of persons who can perform online banking transactions for (15-24 years)

Particulars	Rural			Urban			All		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
Percentage of persons who can search internet for information	84.1	83.5	83.8	91.8	90.9	91.4	87.0	86.0	86.5
Percentage of persons who can send or receive emails	43.2	38.8	41.2	50.9	41.4	46.9	46.0	39.7	43.2
Percentage of persons who can perform online banking transaction	45.7	30.9	38.9	47.1	33.2	41.2	46.2	31.7	39.7

3.7 Others

3.7.1 Assets possessed by household

3.7.1.1 The percentage of households possessing (for household use purposes) different assets and amenities as on date of survey is given in Statement 23. About 96 per cent households reported that they were possessing telephone (including landline) /mobile phone (including smartphone) at the time of survey. About 45.4 per cent households in rural areas and 95.5 per cent households in urban areas reported that they were possessing computer (desktop PC, laptop).

Statement 23: Percentage of households possessing different assets as on date of survey

Type of asset	Rural	Urban	Rural+Urban
Telephone (including landline) / mobile phone (including smartphone)	96.8	97.5	97.0
Computer (desktop PC,laptop)	7.8	17.3	11.4

3.7.2 Access to transport facilities

3.7.2.1 The percentage of the urban population having convenient access to low-capacity public transport (bus, car, taxi, auto etc.) within 500 meters and percentage of the urban population having convenient access to high-capacity public transport (train, metro, ferry etc.) within 1 km from place of living, in the state is given in Statement 24. About 80.4 per cent households in urban areas reported that they were having convenient access to low-capacity public transport (bus, car, taxi, auto etc) within 500 meters of place of living.

Statement 24: Percentage of urban population having convenient access to transport facilities and percentage of rural population with all-weather roads within a distance of 2 km from the place of living

Particulars	Percentage of population
Urban	
Having convenient access to low-capacity public transport (bus, car, taxi, auto etc) within 500 meters of place of living in urban areas.	80.4
Having convenient access to high-capacity public transport (train, metro,ferry etc.) within 1 km of place of living in urban areas.	36.5
Rural	
With all-weather road within a distance of 2 km from the place of living of the household in rural areas.	82.4

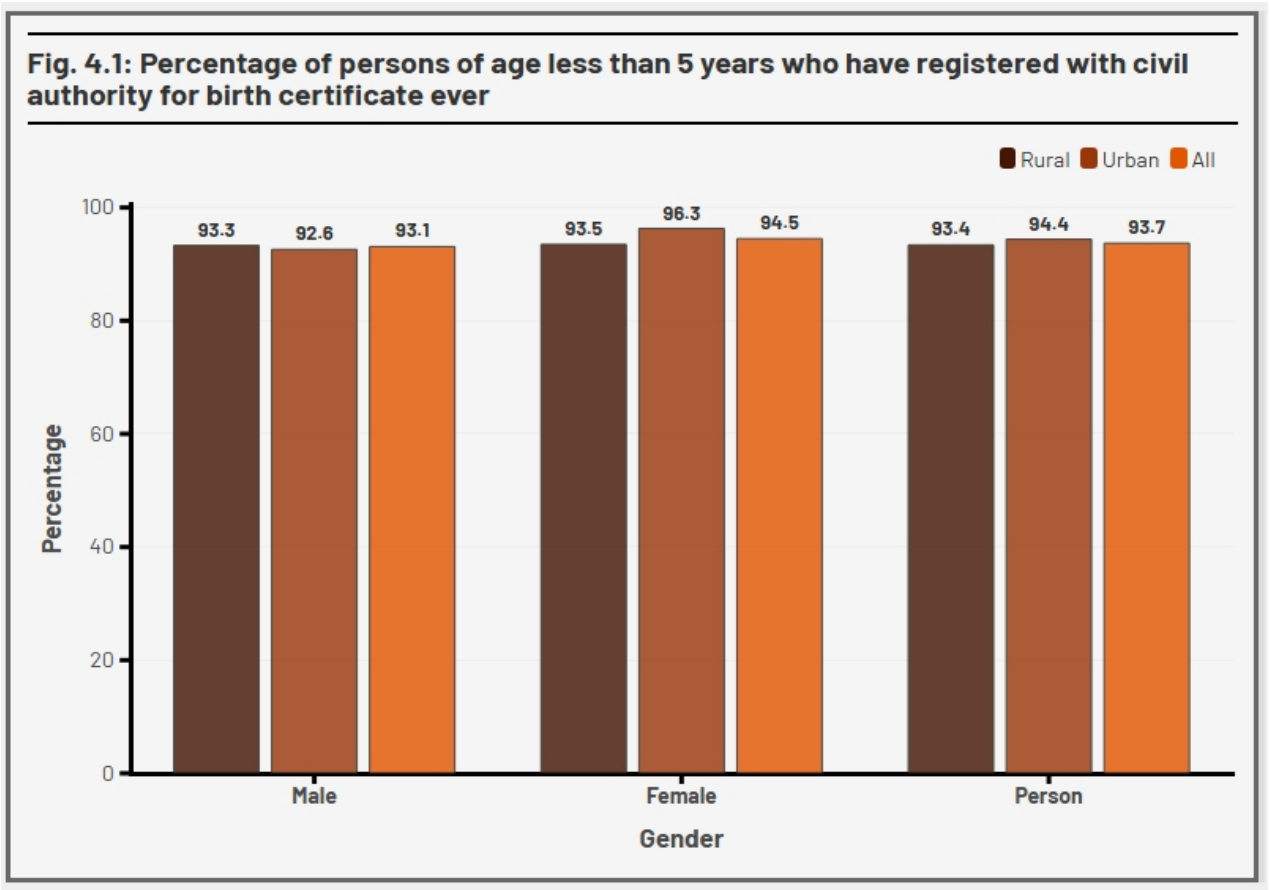

3.7.3 Registration of births/receipt of birth certificates

3.7.3.1 In this survey, information was collected on whether children under the age of 5 years had ever received birth certificates. Additionally, for those children under the age of 5 years who had not received birth certificates or whose birth certificate status was unknown to the respondents, information was collected on whether they were registered with civil authorities (like municipality, panchayat, Government health institution or other local authority appointed by the State Government for registration of birth and issue of birth certificate) for birth certificates.

3.7.3.2 Statement 25 gives the percentage of persons of age less than 5 years who have registered with civil authority for the birth certificate ever (including those who received birth certificates). Percentage of persons of age less than 5 years, who were registered with civil authority for birth certificate ever was 93.4 per cent in rural areas and 94.4 per cent in urban areas.

Statement 25: Percentage of persons of age less than 5 years, who have registered with civil authority for birth certificate ever

Sector	Male	Female	Person
Rural	93.3	93.5	93.4
Urban	92.6	96.3	94.4
All	93.1	94.5	93.7

3.7.4 Use of clean fuel as the primary source of energy for cooking

3.7.4.1 In this survey, primary source of energy for cooking was defined as the source of energy which the household used majority of the time for cooking. A household is categorised as using clean fuel for cooking, if the household reported the use of any one of the primary sources, viz. (i) LPG/ other natural gas, (ii) gobar gas/ other biogas, (iii) electricity (incl. generated by solar /wind power generators), (iv) solar cooker for cooking.

3.7.4.2 Statement 26 gives the percentage of households using clean fuel for cooking (among households reported having cooking arrangements) in the state. About 66.5 per cent households in rural areas and 95.8 per cent households in urban areas were using clean fuel for cooking.

Statement 26: Percentage of households using clean fuel for cooking

Particular	Rural	Urban	Rural+Urban
Percentage of households using clean fuel for cooking	66.5	95.8	77.7

3.7.5 Improved principal source of drinking water, Access to improved latrine

3.7.5.1 In this survey, the principal source of drinking water of a household meant the source of water from which the household obtained most of its drinking water during the last 365 days preceding the date of survey. The sources viz. (i) bottled water, (ii) piped water into dwelling, (iii) piped water to yard/plot, (iv) piped water from neighbour, (v) public tap/standpipe, (vi) tube well, (vii) hand pump, (viii) protected well, (ix) public tanker truck, (x) private tanker truck, (xi) protected spring and (xii) rainwater collection are considered as improved sources of drinking water.

3.7.5.2 Statement 27 gives percentage distribution of households by access to the principal source of drinking water. About 84 per cent of households in rural areas and 85 per cent households in urban areas reported ‘exclusive access’ to the principal source of drinking water.

Statement 27: Percentage distribution of households by access to the principal source of drinking water

Sector	Exclusive use of household	Common use of households in the building / neighbour's source	Community use	Others	All
Rural	84.2	2.9	8.0	3.9	100.0
Urban	84.6	6.2	1.3	7.7	100.0
Rural+Urban	84.4	4.1	5.6	5.2	100.0

3.7.5.3 Percentage distribution of households by distance to the principal source of drinking water is given in Statement 28. About 83 per cent households in rural areas and 91 per cent households in urban areas reported that the principal source of drinking water was available within premises.

Statement 28: Percentage distribution of households by distance to the principal source of drinking water

Sector	Within dwelling	Outside dwelling but within premises	Outside premises	All
Rural	83.2	5.5	11.3	100.0
Urban	91.0	4.2	4.9	100.0
Rural+Urban	85.9	5.0	9.1	100.0

3.7.5.4 In this survey, it was considered that the household had access to latrine if majority of the household members had the facility of using latrine irrespective of whether it was used by them or not. The percentage distribution of households by access of the household to latrine facility (as reported by the household) is given in Statement 29. About 99 per cent households in rural areas and about 100 per cent households in urban areas reported access to latrine facility.

Statement 29: Percentage distribution of households by access of the household to latrine facility

Sector	Exclusive use of household	Common use of Households in the building	Public/ community use of latrine	Others	No access to latrine	All
Rural	93.3	5.4	0.3	0.4	0.6	100.0
Urban	92.6	7.4	0.0	0.0	0.1	100.0
Rural+Urban	93.1	6.1	0.2	0.3	0.4	100.0

3.7.5.5 The sources viz. (i) bottled water, (ii) piped water into dwelling, (iii) piped water to yard/plot, (iv) piped water from neighbour, (v) public tap/standpipe, (vi) tube well, (vii) hand pump, (viii) protected well, (ix) public tanker truck, (x) private tanker truck, (xi) protected spring and (xii) rainwater collection are considered as improved sources of drinking water.

3.7.5.6 Out of different types of latrines, the types viz. (i)Flush/pour-flush to piped sewer system, (ii) Flush/pour-flush to septic tank, (iii) Flush/pour flush to twin leach pits/single pit, (iv) Ventilated improved pit latrine, (v) Pit latrine with slab and (vi) Composting latrine are considered as improved latrine.

3.7.5.7 Statement 30 gives the percentage of households having access to improved principal sources of drinking water and percentage of households having access to improved latrine facility.

Statement 30: Percentage of households having access to improved principal sources of drinking water and percentage of households having access to improved latrine (among households with access to latrine)

Particulars	Rural	Urban	Rural+Urban
Access to improved principal source of drinking water	99.8	100.0	99.9
Access to improved latrine (among households with access to latrine)	99.3	99.7	99.4
