

District Skill Development Plan Uttar Kashi Uttarakhand

Financial Year: 2022-2023

The report focuses on effectively using the available tourism infrastructure and skilling the tertiary sector for the expanding demand in the district.

Uttar Kashi

Submitted by: Kartikeya Kotnala (MGN Fellow, Uttarkashi)

Date: 31 August 2022

Process and methodology

The preparation of DSDP started with the first DSC meeting conducted on 12th November 2021. The plan focuses on identification of skilling infrastructure available in the sector and utilise the growing tourism market in the district. The plan is based on analysis of data collected from primary and secondary sources. All the sources have been referenced in the report, and are in the best knowledge of the writer and the participants.

Executive Summary

This DSDP will give overview of skilling ecosystem in Uttarkashi. The demand in various sectors of the district and supply side of it. **The DSDP tries to utilise the expanding hospitality sector and create a ripple effect from it to generate employment by creation of homestay ecosystem, skilling in hospitality and recognition of prior learning.** The data has been collected from primary and secondary sources, and derivations have been made from them to predict the demand supply gap. By going through the report, one may come across the following:

- Uttarkashi is a geographically large area with a small population and very low population density.
- 80% of population lives in rural and depends on primary and secondary sector for livelihood.
- The tertiary sector contributes most to district economy.
- The challenge of migration is rising in the lower blocks of the district.
- Demand surplus in hospitality sector can be used to generate employment and increase livelihood and reduce migration.
- 2x farmer's income by utilising tourism.
- The plan will focus on local employment generation to address migration along with skilling

1. About the District

Uttarkashi district was created on February 24, 1960 out of what then constituted the parganas of Rawain and Uttarkashi of Rawain tehsil of erstwhile Tehri Garhwal district. Uttarkashi is one of the thirteen districts of Uttarakhand and is the northernmost among them. It's a part of Garwal Mandal in the Himachal ranges at a height of 1,158 meters above sea level and the rivers Bhagirathi and Yamuna flow through it. It is bordered by China in the north, the state of Himachal in the west, Tehri and Dehradun districts in the south, and the district of Chamoli in the east. The district is well endowed with scenic beauty which makes it an ideal tourist destination.

4. Economic Profile

Table 4.1: Sectorwise Economic Profile

Primary Sector	<ul style="list-style-type: none"> Contributes 644 crores to the district economy and employs 80% of the population. Per capita income is 1,17,000 Rs per annum. Major crops are Mandua, Potato, Wheat, Apple, and Rice
Secondary Sector	<ul style="list-style-type: none"> There are no industries with capital investment greater than 5 crores. The sector is highly fragmented and mostly rural cottage industry are supporting the sector. People involved in primary and tertiary sector occasionally involve in secondary sector during off cycles in Agriculture and Tourism. There are no operational industrial center in the district. Some processed products include Ringal (Bamboo) products, Rugs, and Kedarpati (incense).

Tertiary Sector	<ul style="list-style-type: none"> ● Contributes 1,738 crores to the district economy and employs 20% of the population. ● Per capita income is 4,11,000 Rs per annum. ● Major activities include transportation, hotels, homestays, trekking trails, and dhabas. ● The sector has potential to promote indirect growth in primary and secondary sectors by utilising surplus tourism.
------------------------	--

5. Target Population

Table 5.1: Demographic Profile

Census 2011	Total Population			SC			ST		
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

5.	UTTAR KASHI	Livelihood Initiatives for Empowerment	LIFE UTTARKASHI	Tourism & Hospitality	Food & Beverage Service - Steward

7. SWOT (Strength Weakness Opportunities and Threat) of the District

Table 7.1: SWOT District

Strength	Explanation
Unique Culture	The unique culture of Uttarkashi attracts tourists.
Improved Infrastructure	The road connectivity to the district has improved over the years with nearby districts.
Aspiring Youth.	Entrepreneurial youth is interested to open their own micro enterprises, setting up their own hotels, dhabas, restaurants and, travel agency to cater tourists.'
Char Dham Yatra	Two of the four char dhams are in Uttarkashi namely the Gangotri and Yamunotri attracting annually five lakh religious tourists.
Weakness	Explanation
Seasonality of tourism sector.	Tourism sector in Uttarkashi is prone to seasonal contraction of demand.
Remote and not easily accessible city headquarter.	Uttarkashi doesn't offer any commercial flight connectivity and doesn't have a railway station. It is at a distance of 400km from Delhi.
Eco- Sensitive Zone	Uttarkashi is eco-sensitive zone with 90% forest land which makes infrastructure development difficult.
Opportunities	Explanation
Proposed rail connectivity.	The proposed rail connectivity from Dehradun to Maneri, offers to increase tourist influx.
Growing trend among youth for tourism.	Increase in tourism related activity post lockdown lift.
Threat	Explanation
Natural disasters.	Uttarkashi is an earthquake sensitive zone-4 and prone to landslides which can disrupt connectivity to the district affecting its tourism.
Pollution.	Uttarkashi is an eco-sensitive zone-5. Increasing tourism can lead to pollution of natural environment, and degradation of its resources.
Migration	More than 80 villages have been lost in last 10 years to migration.

8. SWOT (Strength Weakness Opportunities and Threat) of the Skilling Ecosystem

Table 8.1: SWOT Skilling

Strength	Explanation
Skilling Infrastructure	A good Skilling infrastructure of ITI, Polytechnics, Skill hubs, and KVK is present in the district.
Hospitality	Hospitality skill is major skill that empowers the youth.
Departmental Trainings	Apart from Skilling in institutions district departments also engage in skilling programs.
Weakness	Explanation
Outdated Courses	Some skilling modules are outdated and need modernization.
Demand Supply Gap	Courses at times are not selected based on market supply gap analysis.
Opportunities	Explanation
Growing Demand	The demand for skilled labour is increasing.
Aspiring Youth	The youth is hardworking and has entrepreneurial mindset.
Government Support	Various short and long term skilling courses running in the district already under UKWDP and PMKVY.
Threats	Explanation
Changing Market Dynamics	The market is changing at a fast pace and can lead to outdatedness of skills quickly.
Migration	The skills given lead to migration for job opportunities.

9. Demand

Table 9.1: Workforce

Total Population	3,48,624
Working Age Population	2,53,743
Labour Force	2,09,843
Workforce	2,04,912

Table 9.2: Demand

S No.	Sector	Existing Job Roles	Emerging Job Roles	New Courses/Trades to be Introduced (Suggested)
1	Primary	Farm Labour	Agro Processing	Multi Skill Technician Food Processing
		Cultivator	Horticulture and Vermicomposting	Dairy farming, Vermicomposting and Horticulture Courses
2	Secondary	Welder	Solar PV installer	Solar-related courses such as SURYAMITRA (SGJ/Q0101)
		Fitter	Handicrafts and Carpets	Bamboo Works (HCS/Q8704)
		Electrician	Electronics	Automotive related Courses
3	Tertiary	Multi Cuisine Chef	Multi Cuisine Chef	Photography and Video Editing
		Yoga Wellness Trainer	Homestay Property Manager	Modern Hospitality using digital tools (THC/Q0501)
		Stenographer & Secretarial Assistant	IT-related Job Roles	IT-related Courses

Training	Trained
Dairy Farming	310
Mushroom cultivation	250
Commercial Horticulture	380
Pissiculture	215
Electronics Mechanic	240
Bamboo & Cane Craft Making	20
Carpets weaving	40
Hospitality	30

Figure 9.1: Skilling in Youth

10. Migration Pattern

Migration is one of the major challenges in the district.

Table 10.1: Migration

Frequency to visit Native Place in last 365 days (%)							
0	1	2	3	4	5	Above 5	Total
5.8%	13.3%	23.7%	24.4%	13.3%	3.5%	16%	100%

Work Status of Migrants (%)								
Enterprise Workers	Employer	Household Workers	Regular salaried Government Employee	Regular salaried Private Employee	Casual Worker (Agriculture)	Casual Worker (Non-Agriculture)	Student	Total
17.4%	4.9%	1.3%	29.3%	27.7%	0.5%	1.7%	17.2%	100%

Process of First Migration						
Alone	With Family	With Community/Village	With Acquaintance/Friends	Middleman	Other	Total
65.9%	18.8%	8.8%	5.3%	0.4%	0.8%	100%

(Source: Uttarakhand Human Development Report 2017)

1. There is a net 5% outward migration, however the covid years have witnessed reverse migration.
2. The increase in number of ghost villages is a serious indication of migration.
3. Lack of employment, livelihood (78%) and educational (17%) opportunities are the prime reasons for migration.

Skilling for outward migration

The prime goal should be to skill people to prevent migration. The outward migration is mostly in search of labour. The people can be skilled in various courses like multi-cuisine chef, property manager (homestay), trekking guide, bird watching, etc to reduce migration.

11. RPL and Skilling in Tourism

Extensive focus on tourism for core skilling as it will have ripple effect on economy.

Rationale for selecting tertiary sector for skill development

(The contribution to D.D.P. /Population engaged) is higher for tertiary sector than for primary sector, which tells us about higher per capita income in tertiary sector with lower population engagement. This indicates opportunity in tertiary sector in comparison to primary sector where there is already labour saturation. (from page 9, figure 3.1 and figure 3.2)

Skill Gap

Table 11.1 Skill Gap in Hospitality (source: Tourism Department)

Skill Gap in Hospitality Sector	
Trained annually in Hospitality (No. Of People)	30
No. Of Homestays	557
No. Of Hotels	221

The training imparted in hospitality is proportionally lower than the available infrastructure and indicated demand, therefore skilling in this sector will have positive effects on income in this sector and allied sectors like transportation & logistics as well. (General theory of employment)

- 1) Tourism sector is one of the largest component of tertiary sector which contributes more than 50% to D.D.P. with less than 10% of the population engaged indicating unsaturated labour market in the sector in comparison to other sectors. (Source: page 9)
- 2) The district faces a challenge of *ghost villages* (villages with zero population). People migrate to lower districts in search of livelihood. There are more than 32 villages where population has reduced by 50% over a period of 10 years (Source: DRDA, Uttarkashi). They can be saved from becoming completely ghost by generating employment in these villages by connecting them to nearby homestay and tourist spots, and developing the system as a cluster by using improved marketing to promote tourism to the cluster.

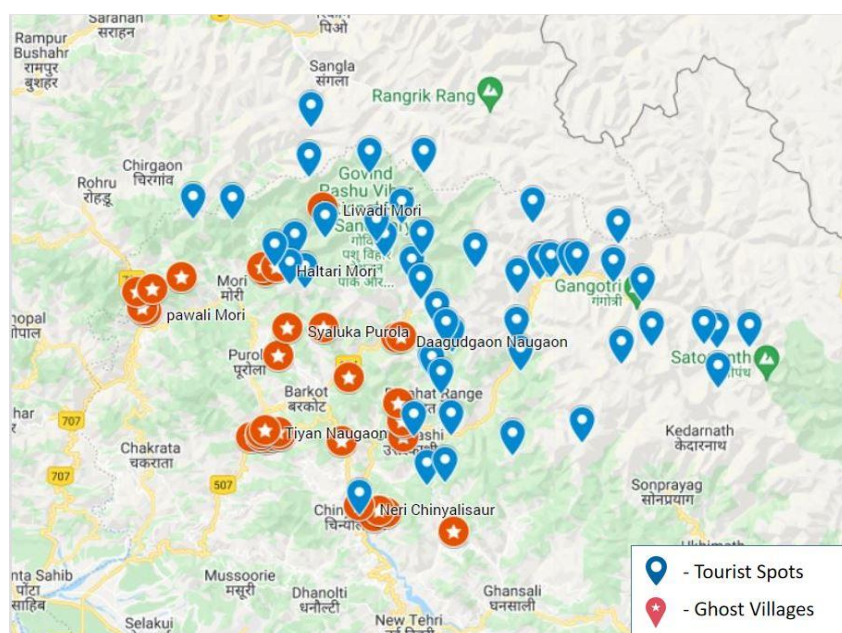

Figure 11.1: Map of Tourist Spot and Ghost Villages (Source: developed using data from DTDO and DRDA, Uttarkashi)

- 3) The Figure 11.1 developed shows a link between ghost villages and tourist spots. The places in north despite of being remote are not ghosted due to presence of tourist spots which provides employment opportunity there. The same can be replicated near ghost villages mostly clustered in southern blocks by skilling people in hospitality.
- 4) Uttarkashi has more than 62 tourist spots spread across the district and yet it receives less than 1% of total tourist footfall in the state. (Source: Uttarakhand Human Development Report 2017) ; Indicating possibility of growth.
- 5) Already available infrastructure network of 500+ homestays which can be utilised.(Source: DTDO, Uttarkashi)
- 6) The improved connectivity by Char Dham corridor and proposed rail line provides impetus to tourism.
- 7) Religious and adventure tourism forms the main activity of the District economy. Improvement in adventure tourism infrastructure would give rise to demand for a number of services like sports instructors, hotels, restaurants, and transportation related services.
- 8) District Tourism Board representatives highlighted the need for following:
- 8.1) Need for skilled manpower as instructors for various types of adventure sports.
 - 8.2) The District does not provide adequate infrastructure support for adventure sports like rock, river rafting, parasailing, and snow skiing.
 - 8.3) Also with the presence of Nehru Institute of Mountaineering in the District, there is a huge potential for growth in adventure tourism.
- 9) The Growing Yatra trend to Gangotri and Yamunotri indicates future demand to increase. (Expanding Market)

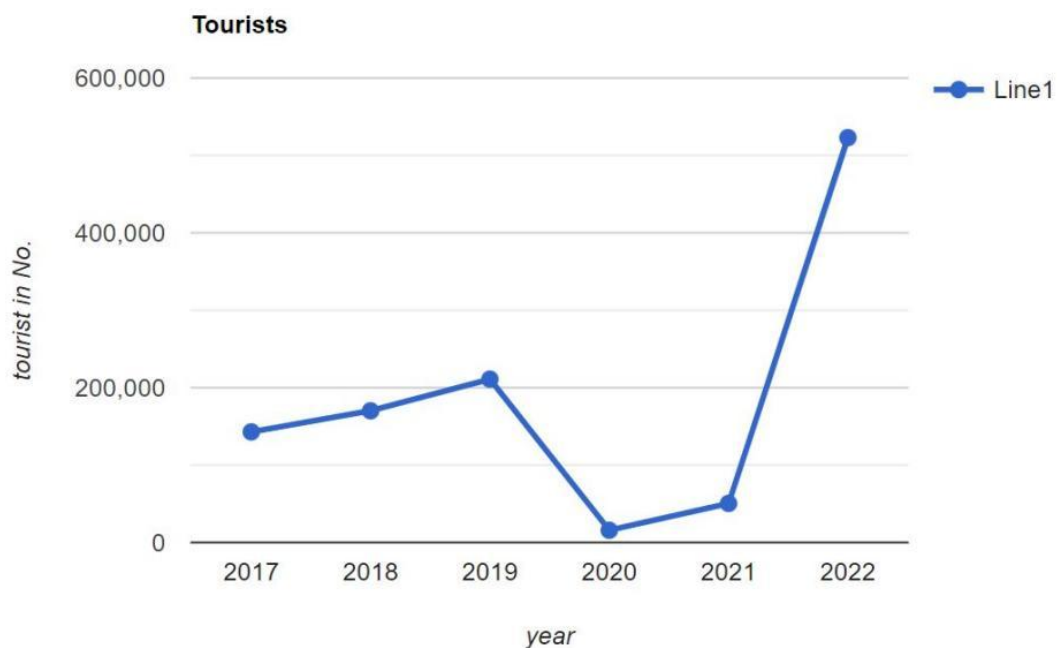

Figure 11.2: Tourism over Years (Source: Tourism Department, Uttarkashi)

12. Homestay Ecosystem

The plan suggest on developing a homestay ecosystem by incorporation of certain components in homestay skilling module. The ecosystem will consist of a homestay at the centre and provide livelihood to people of ghost villages, and attracting tourists to nearby tourist spots (Figure 12.1). The ecosystem works on developing linkages and efficient marketing to bring tourists to the cluster by *skilling people in hospitality through a curated skilling module consisting of modern techniques like:*

- 1) *online listing, mapping*
- 2) *digital marketing*
- 3) Identification of trekking trails and nearby lakes and tourist spots by homestay owners and listing them online and with tourism department.

Figure 12.1: Homestay Ecosystem

This will generate livelihood and prevent migration from villages. (NSQF THC/Q0501 of Tourism and Hospitality sector skill council in combination with courses from modules of media and entertainment skill council can be used). Clusters like this can be spread across the whole district by utilising the already available network of 500+ homestays.(Figure 12.2)

Figure 12.2: Homestay Ecosystem Map

13. Economic Analysis of Homestay Ecosystem

Per capita income in primary sector = 1,70,000 Rs

Footfall (religious) in Yatra season = 5,50,000 (Year 2022)

No. Of hotels = 221

Average No. Of rooms in hotels = 10

No. Of homestays = 557

Average No. Of rooms in homestays = 3

No. Of people that can be accommodated in each room = 2

Carrying capacity of hotels per day = $221 \times 10 \times 2 = 4,420$

Carrying capacity of homestays per day = $557 \times 2 \times 3 = 3,342$

Duration of yatra season = 90

Average number of tourists in yatra season per day = 6,100

Surplus market in yatra season per day over the carrying capacity of hotels = 1,680

The surplus 1,680 people can be accommodated in homestays of Uttarkashi and provide livelihood to 557 homestays with 50% occupancy during yatra season. This can lead to additional annual income of 67,500 Rs for homestay owners especially in primary/rural area and lead to a **40% increase in annual income**. The tourism market has expanded by 22% over the last 10 years which will ensure growth in this sector. The homestay ecosystem promotion will lead to ripple effect and additional growth in allied sectors like fooding, logistics, adventure tourism, etc

14. SWOT (Strength Weakness Opportunities and Threat) of Homestay Ecosystem

Table 14.1: SWOT Homestay Ecosystem

Strength	Explanation
Already existing infrastructure.	There are 500+ homestays in the district (DTDO, Uttarkashi).
Already running government schemes.	Deendayal Upadhyay Griha Awas Yojna and Veer Chandra Singh Gharwali Scheme which offers 33% of total construction cost or upto 10 lakhs, whichever is less.
Aspiring Youth.	Entrepreneurial youth is interested to open their own micro enterprises, setting up their own hotels, dhabas, restaurants and, travel agency to cater tourists.
Weakness	Explanation
Seasonality of tourism sector.	Tourism sector in Uttarkashi is prone to seasonal contraction of demand (DTDO, Uttarkashi).
Remote and not easily accessible city headquarter.	Uttarkashi doesn't offer any commercial flight connectivity and doesn't have a railway station. It is at a distance of 400km from Delhi.
Opportunities	Explanation
Improved connectivity.	The Char Dham corridor offers a two lane road connectivity to the district from Rishikesh and Mussoorie.
Proposed rail connectivity.	The proposed rail connectivity from Dehradun to Maneri, Uttarkashi offers to increase tourist influx.
Growing trend among youth for tourism.	Increase in tourism related activity post lockdown lift (DTDO, Uttarkashi).
Threat	Explanation
Natural disasters.	Uttarkashi is an earthquake sensitive zone-4 and prone to landslides which can disrupt connectivity to the district affecting its tourism.
Pollution.	Uttarkashi is an eco-sensitive zone-5. Increasing tourism can lead to pollution of natural environment and degradation of its resources.

15. Homestay Ecosystem and SDG

Figure 15.1: Sustainable Development Goals

The homestay ecosystem provides livelihood to homestay owners and increases annual income of families. It promises to have a ripple effect on economy of district and directly impact SDG1 no poverty, SDG2 zero hunger, SDG8 decent work and economic growth, SDG9 industry and innovation, SDG10 reduce inequality. By incorporation of modern tourism practices like eco-tourism, agri-tourism, sustainable and responsible tourism will lead to satisfaction of SDG3 good health and well being, SDG11 sustainable communities, SDG12 responsible consumption and production, SDG13 climate action, SDG15 life on land and SDG17 partnership.

16. Action Plan

Figure 16.1: Action Plan

- 1) Identifying clusters of homestay, ghost villages, and tourist spots using GIS (Geographical Information System) (Status , as shown on page 19 in figure 11.1).
- 2) Selecting various job roles under tourism& hospitality, and training partners (Status , Working with Institute of hotel management (IHM), Dehradun and UKSDM).
- 3) **Developing a model homestay.**
- 4) Incorporating modern techniques like online listing, digital marketing, awareness about agri-tourism, eco-tourism, available government scheme, etc (Status , Working with Institute of hotel managemen(IHM), Dehradun and UKSDM).
- 5) **Finalization of hospitality module** (Status , Working with UKSDM)
- 6) Mobilization of interested youth and owners of 500+ homestays with special focus on homestays near ghost villages (Status , Working with DSC).
- 7) **Conduction of training** (Status , on pause will begin post Action Plan 4).
- 8) Hand holding for self employment through government schemes (Status , on pause will begin post Action Plan 6)
- 9) **Monitoring** (Status , on pause will begin post Action Plan)

 : Achieved

 : Working

 : On pause

17. Recommendations

- 1) **Setting up a homestay ecosystem** in the district as shown on page 21
- 2) **Developing a model homestay**, to understand various changes required in hospitality module.
- 3) Infrastructure development and big push to skilling in the district as per **Rodan's big push** to kick start the slow economy of the district.
- 4) To collaborate with the National Council on Skill Development (NCSD), National Skill Development Co-ordination Board (NSDCB), and National Skill Development Corporation (NSDC) with the objective of optimizing resources for rapid and sustained skill development among the people of Uttarkashi.
- 5) To co-operate with other departments and educational institutions in the district having objects wholly or partly similar to those of the DSDP in such manner as may be conducive to their common objective.
- 6) Create and support infrastructure both physical and human for facilitating a pool of resource persons for skill development in the district.
- 7) Priority shall be accorded to imparting skill development training and upgrading skills of Self Help Groups active in State, and homestays at the centre of cluster as proposed in homestay ecosystem.
- 8) To check on the quality of trainings over different batches, frequent surprise visits shall be initiated by the DSC members.
- 9) Effective **monitoring** for understanding the output of **homestay ecosystem** and efficiency of training delivered. The attached questionnaire format can be used for the purpose.
 - 9.1) Name of the homestay:
 - 9.2) Distance from the city:
 - 9.3) Distance from nearest ghost village:
 - 9.4) Bookings per month before training:
 - 9.5) Bookings per month post training:
 - 9.6) Running cost pre training:
 - 9.7) Running cost post training:
 - 9.8) No. Of new tourist spots identified:
 - 9.9) Using modern training practices: Yes, No
 - 9.10) Difficulty in using web tools: easy, moderate, difficult
- 10) Components that hospitality training module may include.
 - 10.1) Basic internet and booking related.
 - 10.2) Hospitality related and hygiene manners. (recommendation of DSC)
 - 10.3) Basic awareness about digital marketing.
 - 10.4) Awareness about eco-tourism and agri-tourism. (recommendation of DSC)
 - 10.5) Awareness about sustainable and eco-friendly habits.
 - 10.6) Stressing on recycle, reuse, refuse, and reduce.
 - 10.7) Awareness about linking homestays to tourist spots and identification of new tourist spots by locals.
 - 10.8) Including local customs and practices in hospitality service to preserve culture. Example: traditional welcome of guests. (recommendation of DSC)

18. Conclusion

The DSC came to conclusion with the above mentioned that, homestay ecosystem will take the current hospitality experience and service quality to new heights. It will lead to multiplier affects of tourism industries. It will support economic activities associated with tourism and other allied services. The youth of the district is inclined towards adventure tourism, guide, nature guide, homestay property manager, etc. The youth also wants to start its own hotels, restaurants, dhabas, tour& travel agencies etc, which indicates a strong entrepreneurial mindset in youth.

19. Glossary

1. ITI – Industrial Training Institute
