## INTEGRATED SAMPLE SURVEY SCHEME

Report On Estimation of Milk, Egg, Wool, Meat Production and Livestock &  
Poultry Keeping Practices in Maharashtra State for the Year  
2017-18

Department of Animal Husbandry  
Maharashtra State, Pune-411067

Integrated Survey Scheme,  
Report On

**Milk, Egg, Wool, Meat Production and  
Livestock & Poultry Keeping  
Practices in Maharashtra State for  
the Year**

**2017-18**

**(48<sup>th</sup> REPORT IN SERIES)**

**Department of Animal Husbandry, Maharashtra State, Pune-411067**

## PREFACE

Livestock plays an important and supplemental role to the development of agrarian rural economy of the State. It has been an established fact that, flow of income to the owners through livestock production is continuous throughout the year irrespective of season. Animal Husbandry and the livestock production is thus, playing a vital role in the sustainable economic up-liftment of the rural masses. With this in mind, Animal Husbandry Department is framing and implementing policies for genetic up gradation of the livestock for insuring the desired growth in livestock production in Maharashtra State. In order to assess the impact of these programs and policies ; there is obviously, a need to have estimates of production of Major Livestock Products such as Milk, Eggs, Meat and Wool with an objective interpretation and well within the scheduled time frame. To meet this need, the Integrated Sample Survey scheme for estimation of these major livestock products is being implemented in Maharashtra State from the year 1970 -71.

The present forty-eighth (48<sup>th</sup>) annual report exhibits the data collected during the year 2017-18. Analysis of this data furnishes elaborative and fundamental information about the livestock, livestock products, feeding and management practices, utilization pattern of the livestock products etc. in the state. **It is noteworthy to mention that Maharashtra state has secured 1<sup>st</sup> position in poultry meat, II<sup>nd</sup> position in Buffalo meat at National level and II<sup>nd</sup> position in overall Meat production. It also ranks 7<sup>th</sup> in Milk and Wool production and 5<sup>th</sup> in Egg production at National level.**

This study aims to assure an objective appraisal of physical, financial and managerial resources available in Animal Husbandry sector which would enable us in making a systematic planning for enhancing livestock production (*i. e.* Production of Milk, Eggs, Meat, and Wool) both in quantitative and qualitative terms.

I sincerely thank the farmers of the State for their cooperation in providing necessary information to the field staff.

I congratulate the office staff and field staff of Integrated Sample Survey Scheme for their sincere endeavor in preparing the present report under the able guidance of **Shri Sanjay S. Markale Deputy Director (Statistics)** in the Commissionerate of Animal Husbandry. Suggestions & comments for improvement in this report for future surveys are welcomed.

Pune  
Date :-

**Laxminarayan Mishra (IAS)**  
**Commissioner,**  
**Animal Husbandry, Maharashtra State, Pune**

## LIST OF PERSONS ASSOCIATED WITH INTEGRATED SAMPLE SURVEY 2017-18

SHRI. Laxminarayan Mishra (IAS) : COMMISSIONER  
DR. D. D. Parkale : ADDITIONAL COMMISSIONER  
SHRI S. S. Markale : DEPUTY DIRECTOR (STATISTICS)  
DR. S. G. Nevkar : ASSISTANT COMMISSIONER (ISS)  
SHRI. S. T. DENDAGE : INVESTIGATOR  
SHRI. S. M. RAJWAL : STATISTICAL ASSISTANT  
SHRI. P. V. DHEMBARE : STATISTICAL ASSISTANT  
SHRI. R. M. CHAVAN : LIVESTOCK SUPERVISOR  
SMT. C. U. DOSE : SENIOR CLERK

## LIST OF PERSONS ASSOCIATED WITH INTEGRATED SAMPLE SURVEY AT FIELD LEVEL 2017-18

Sr. No.	Region	Name of field officer	Designation
1	Mumbai	Smt. Dr. S. M. Palkar	Livestock Development Officer
2	Kolhapur	Dr. S. A. Bandekar	Livestock Development Officer
3	Latur	Smt. Dr. V. R. Garje	Livestock Development Officer
4	Akola	Dr. M. I. Ahmed	Livestock Development Officer
5	Nashik	Dr. U. G. Pawar	Livestock Development Officer
6	Nagpur	Smt. Dr. B. B. Meshram	Livestock Development Officer

### 3. INTRODUCTION

Maharashtra State occupies a prominent place in the Indian union and is the second largest State of the country which has 9% of the natural land mass. It lies between the North latitudes '15' and '22' and East latitudes '72' and '81'. The State consists of 36 districts with 355 tahsils and 40959 inhabited villages, 534 cities and town units as per the 2011 Human Census. The State can be roughly divided into two major physiographic divisions namely (i) Deccan plateau and (ii) Costal Kokan Region. The State has tropical climate with three distinct seasons (a) Summer (b) Rainy (c) Winter, the annual rainfall ranges from 500 m.m. to 5000 m.m. The district wise annual rainfall figures are given below.

**Table No. 1 : RAINFALL OF MAHARASHTRA STATE FOR THE YEAR 2018**

Sr. No.	District	Normal Rainfall (in mm)	Actual Rainfall (in mm)	% To Normal
1	Thane	2558.6	2425.5	94.80
2	Raigad	3201.2	2796	87.34

The State has a total geographical area of about 30.76 million hectares. Of this 16.94 % area is under forest cover and 5.62 % area is considered barren and unfit for cultivation. The gross cropped area during the year 2015-16 was 74.23 %. Average size of holding per holder in the State is 1.44 hectares. (Agricultural Census 2010-11) Distribution of land holders according to size of agricultural land is as follows.

#### OPERATION HOLDING(According to Agricultural Census (2010-11))

Sr. No.	Type of holding	No. of holders (in 000)	Area of operational holdings(000 ha.)	Average size of holdings (ha.)
1	Marginal holding (Up to 1 ha.)	6,709	3186	0.99
2	Small holding (1-2 ha.)	4052	5739	1.42
3	Semi- medium holding (2-5 ha.)	2473	7156	10.21
4	Medium holding (5-10ha.)	396	2,603	6.57
5	Large holding (10-20 ha.)	59	752	12.75
6	Large holding (20 ha. & above)	9	331	37.24
<b>Total</b>		<b>13,698</b>	<b>19,767</b>	<b>1.44</b>

Source: Economic Survey of Maharashtra 2017-18

The State has following main and important rivers (i) Krishna (ii) Koyana (iii) Godavari (iv) Bhima (v) Wainganga (vi) Wardha. Based upon the Agro climatic conditions, the State can be divided in to nine zones. The salient features of these zones particularly relating to rainfall, topography etc. presented in table No. 2.

The annual rainfall in the scarcity zone is about 700 mm and in the Ghat zone it is up to 4000 mm. The scarcity zone includes parts of some districts like Dhule, Ahmednagar, Aurangabad, Beed, Osmanabad, and Solapur. While the Ghat zone includes Sahyadri Ranges and some parts of districts like Satara, Sangli, Kolhapur, Pune and Nashik.

**Table No. 2 : AGROCLIMATIC ZONES OF MAHARASHTRA STATE**

Sr. No.	Zone	District	Annual rain fall in mm.
1	South Kokan Costal Zone	Ratnagiri, Sindhudurg	3100
2	North Kokan Costal Zone	Thane , Palghar, Raigad	2600
3	Western Ghat Zone	East part of Thane, Raigad, Ratnagiri, Sindhudurg, East Nashik, Pune, Satara & Kolhapur	3000 to 6000
4	Sub. Mountain Zone	Western Nashik, Pune, Satara, Kolhapur and Sangli.	700 to 1250
5	Western Maharashtra Plane Zone	West part of Dhule, Nashik, Pune, Satara, Sangli and Ahmednagar	700 to 1250
6	Western Maharashtra Scarcity Zone	Satara, Solapur, Sangli, Pune, Ahmadnagar, Nashik, Dhule, Western Beed, Aurangabad	Below 750
7	Central Maharashtra Plateau Zone	Jalgaon, Buldhana, Akola, Jalna, Latur, East Beed, Amravati, Osmanabad, Aurangabad, West Parbhani	700 to 900
8	Central Vidarbha	Nagpur, Wardha, Yavatmal, Nanded, East Parbhani., South Akola, West Chandrapur	950 to 1250
9	Eastern Vidarbha	Gadchiroli, Bhandara, Eastern Chandrapur, Nagpur	1250 to 1700

## LIVESTOCK CENSUS

As per 2012 Livestock Census, the State has 154.84 lakhs Cattle, 55.94 lakhs Buffaloes, 25.80 lakhs Sheep and 84.35 lakhs Goats. The district wise population of productive livestock as per 2012 Census is given in Table No. 4.

**Table No. 4. : DISTRICTWISE PRODUCTIVE LIVESTOCK POPULATION(Number)**

Sr. No.	District	Cows in-milk			Buffaloes in- milk	Goats in- milk	Total sheep	Poultry layers	
		Crossbred	Indigenous	Total				Deshi	Improved
1	Mumbai	1507	713	2220	26416	1816	312	19799	17423

## VETERINARY INSTITUTES

The number of veterinary institutes catering health cover and artificial insemination services in the State are as follows:

Sr. No.	Veterinary institute	Number
1	Veterinary Polyclinics	32
2	Veterinary MiniPolyclinics	168
3	Veterinary Dispensaries Grade I (State + Z.P.)	1741
4	Veterinary Dispensaries Grade II (State + Z.P.)	2841
5	Artificial insemination Sub- Centers	4847
6	Cattle breeding Farms (State level)	01
7	Bull rearing centers(under MLDB, Akola)	02
8	Bull Mother Farms(under MLDB, Akola)	07
9	Sheep and Goat Farms(under MSGDC)	15
10	Hatcheries	04
11	Intensive Poultry Development Blocks	16
12	Check Post	13
13	Mobile Veterinary clinics	65
14	Frozen Semen Laboratories(under MLDB, Akola)	03
15	No. of Duck Breeding Farms	01

## 4. OBJECT AND COVERAGE

4.1 The main objectives of the survey are as follows:-

- I) To estimate the production of major livestock products viz. Milk, Eggs, Wool and Meat.
- II) To estimate the in milk and milch animals, sheep, goats and layers.
- III) To work out the per day average milk yield of in milk animal and goat and to work out per day average egg production of layers, average annual wool yield of sheep.
- IV) To study the various management practices of livestock and poultry, adopted by the farmers and the livestock owners.

### 4.2 SAMPLE PLAN

The production estimates of Major Livestock Products (MLP) namely, milk, egg, meat and wool are derived on the basis of annual sample survey being conducted under the central sector scheme Integrated Sample Survey. The scheme is implemented by the Commissionerate of Animal Husbandry throughout the State. The sample plan involves a 3 stage Stratified Random Sampling design with district as a stratum.

Rural/Urban wards form the primary sampling unit, the households having in milk animal, sheep/goat and poultry layers form the second stage units and the selected animals from the selected households form the third stage units. As per the suggestions of Government of India, the sampling size selected for listing was enlarged from the year 1984-85 onwards and about 15 % of the total villages in the state excluding Brihan Mumbai were selected during the year 2017-18. The selected villages/wards were distributed among the districts of the State in proportion to the total livestock and poultry population as per the 2012 livestock Census, so that 1/3<sup>rd</sup> of the selected villages were covered during each season.

The data obtained for these villages/wards was utilized for estimating the number of in milk/milch animals, poultry layers, sheep, etc. for every season. Additional 1980 Villages/wards were observed apart from the sampling villages in the survey. The survey work was conducted during the 3 seasons of the year. Thus, in all 697 villages/wards were covered during the year 2017-18. In addition to this, 240 cattle sheds from the group of Brihan Mumbai also were covered during the year under report. For the sake of convenience, during each season a cluster of 5 nearby villages/wards was allotted to each Livestock Supervisor, thereby 23 Livestock Supervisors have covered 697 villages/wards. Mumbai being the 100% urban area, the work of survey of 240 cattle sheds of Brihan Mumbai was separately conducted by another Livestock Supervisor.

### 4.3 PERIOD OF FIELD SURVEY

The data for present survey was collected during all the three seasons of the year 2017-18 as shown below:-

1. Summer season .....1<sup>st</sup> March 2017 to 30<sup>th</sup> June 2017.
2. Rainy season .....1<sup>st</sup> July 2017 to 31<sup>st</sup> October 2017.
3. Winter season.....1<sup>st</sup> November 2017 to 28<sup>th</sup> February 2018.

### 4.4 SCHEDULE OF THE FIELD WORK

For collection of data regarding production and rearing practices of livestock and poultry, one survey supervisor was allotted 5 villages/wards selected randomly. For Brihan Mumbai district, one Livestock Supervisor has allotted the work of collection of data about milk production and allied information by visiting about 20 stalls during a month, selected randomly. For remaining groups of districts each Livestock Supervisor visited selected villages/wards in 4 rounds and from second round he made 2 days halt, for collection of data in each selected village/ward. During the first round of three days he carries out house to house complete enumeration and collection of data of livestock and poultry. He collects data as per given below schedules. After complete enumeration he collects data as per the norms given in the Table No. 5

### **Schedule I - General Information**

Block 1 - General information about village selected for complete enumeration:

Block 2 - Particulars of the selected village

Block 3 - Livestock and Poultry population according to the Breed Survey 2012 and Livestock Census-2012 or estimated population of Breed Survey 2012 for selected village/ward

Block 4 - Reasons for declining Cattle & Buffaloes population

### **Schedule II - Complete Enumeration**

Block 1 - General information about selected village /urban ward:

Block 2 - Household Summary Detail

Block 3 - Summary Detail of Milch Animals and Poultry in the sample

Block 4 - Number of Animals Slaughtered during last 4 months

Block 5 - List of households/household enterprises

Block 6 -of Animals Slaughtered during last 4 months by Butchers and other agencies in the Village or within a radius of 2 Km.

### **Schedule III --Details of milk yield in selected households/enterprise**

Block 1 - General information about selected village/urban ward:

Block 2 – Selection of Household/Household Enterprises for detailed enquiry.

Block 3 - Identification of selected H.H./Enterprise in the sub-sample of villages/ Urban Ward.

Block 4 - Milk yield of individual animal on the day of visit

Block 5 - Details of average daily feed consumption during last 30 days

Block 5 (A) - Details of utilization of Cow milk produced on the previous day (kg.)

Block 5 (B) - Details of utilization of Buffaloes milk produced on the previous day (kg.)

Block 5 (C) - Details of utilization of Goats milk produced on the previous day (kg.)

Block 5 (D) -Summary of total utilization milk from Cow, Buffaloes and Goats

Block 6 (a)- Utilization of dung (Cattle & Buffaloes) collected on the previous day

Block 6 (b) - Utilization of dung of Goat collected on the previous day

### **Schedule IV -Details of egg production in selected households/enterprises**

Block 1 - General information about selected village/urban ward:

Block 2 - Details of selection of Household/H.H Enterprises for detailed survey

Block 3 -Identification of selected H.H./Enterprise in the villages/town

Block 4 - Production, Purchase and Disposal of eggs during the last 7 days

### **Schedule V - Details of Egg production in the commercial poultry farms**

Block 1 - General information about commercial poultry farm:

Block 2 - Details of poultry birds and its yield rate

### **Schedule VI - Details of wool production in sample households/enterprise**

Block 1 - General information about selected village/urban ward

Block 2 - Details of selection of Household/H.H Enterprises for detailed survey

Block 3 - Particulars of selected household/enterprise in the village urban ward

Block 4 - Disposal of sheep during the last season

Block 5 - Utilization of dung of sheep collected on the previous day

Block 6 - Wool yield of selected sheep (Grams)

### **Schedule VII - Information on yield of meat from recognized slaughterhouses**

Block 1 - General information about recognized slaughterhouses

Block 2 - Basic Information as on 1st day of month of the season

Block 3 - Details of animal slaughtered and its yield rate

### **Schedule VIII - Details of Broilers and Layers' Meat production in the commercial poultry farms**

Block 1 - General information about commercial poultry farms

Block 2 - Information on Commercial Poultry Farms

**TABLE No. 5 : DETAILS OF DATA COLLECTION**

Sr. No.	Type of Information collected	Number of households observed per day
1	Milk production and bovine keeping practices.	06
2	Egg Production and poultry keeping practices.	05
3	Sheep rearing practices and Wool production.	04
4	Goat milk production and goat rearing practices.	06
5	Meat production & house holding having livestock or poultry	All Households and Butcher Shops in selected village/ward
6	Meat production and other by products obtained slaughter at district place slaughter house.	.....

**4.5 DETAILS OF DATA COLLECTED**

In this report tabular information on milk, egg, wool and meat production estimates along with keeping practices of livestock and poultry is presented. This information is mainly regarding Production and utilization of milk of milch animals/goats both for morning and evening.

- (I) Feed consumption of cattle per day.
- (II) Production and utilization of dung.
- (III) Production and disposal of eggs.
- (IV) Average feed consumption of poultry birds.
- (V) Category wise number of animal slaughtered and average quantity of meat production per animal.

**TABLE No. 6 : STAFF**

The following staff completed the work assigned under the scheme during year 2017-18 under report.

Sr. No.	Name of the post	Scale	Number of Posts		
			Sanctioned	Filled	Vacant
1	Assistant Commissioner of Animal Husbandry (MAHS Class – I)	Rs.15600-39100 G.P.Rs.5700	01	01	00
2	Livestock Development Officer (MAHS Class – I)	Rs.15600-39100 G.P.Rs.5400	06	06	00
3	Investigator	Rs.9300-34800 G.P.Rs.4300	03	01	03
4	Statistical Assistant	Rs.5200-20200 G.P.Rs.2400	06	02	04
5	Livestock Supervisor	Rs.5200-20200 G.P.Rs.2400	36	23	13
6	Senior Clerk	Rs.5200-20200 G.P.Rs.2400	01	01	00
7	Junior Clerk	Rs.5200-20200 G.P.Rs.1900	01	00	01
8	Peon	Rs.4440-7440 G.P.Rs.1300	02	02	00
<b>Total</b>			<b>56</b>	<b>42</b>	<b>14</b>

The field data were collected by 23 Livestock supervisors only. As such additional survey work was carried out by the Livestock Supervisors for the vacant posts in some of the districts. The Livestock Development Officer supervised the work of Livestock Supervisors by visiting the selected villages. The data so collected were scrutinized, compiled by Statistical Assistants while tabulated and analyzed by Statistical Investigators. The Assistant Commissioner was the overall in-charge of the scheme for field work as well as administrative work. The Deputy Director (Statistics) Animal Husbandry gave valuable guidance in the conduct of survey and finalization of production estimates as well as the present report.

## SUPERVISION

The Assistant Commissioner and Six Livestock Development Officer, Investigator and Statistical Assistant under the scheme inspected the field work of Livestock Supervisors. The Deputy Director (Statistics) Animal Husbandry, District Deputy Commissioner of Animal Husbandry also conducts surprise check of the field work of livestock Supervisors.

### 5. CHARACTERICS OF SAMPLE VILLAGES

During the year under report, data of 558 villages and 139 wards were received on items such as land possessed, livestock breeding, feeding and management practices followed, details regarding production and utilization of milk, egg, wool and meat. The distribution of villages having various categories of livestock and poultry is presented in Table No. 7

**TABLE No. 7 : DISTRIBUTION OF VILLAGES HAVING LIVESTOCK POULTRY**

Sr. No.	Season	Percentage of villages having			
		Bovine	Poultry	Goats	Sheeps
1	Summer	100	90.50	87.42	9.46
2	Rainy	100	87.60	90.36	11.30
3	Winter	100	95.74	94.89	13.50
<b>Overall</b>		<b>100</b>	<b>91.28</b>	<b>90.89</b>	<b>11.42</b>

It is seen from Table No. 7 that bovine was found in all the villages, while poultry and goats were found in 91.28 and 90.89 percent villages respectively. Sheep were found in only 11.42 percent villages because sheep rearing is not a common practice in most of the villages throughout the State and the shepherds are nomadic. The sheep population is concentrated mainly in Pune, Ahmednagar, Solapur, Satara, and Sangli districts of the State.

### NUMBER OF HOUSEHOLDS PER VILLAGE

During the year, livestock and poultry were enumerated by livestock supervisors from a total of 244647 households from selected villages and wards. Theseason wise distribution of these villages according to number of households per village is given in Table No. 8.

**TABLE No. 8 : DISTRIBUTION OF VILLAGES ACCORDING TO NUMBER OF HOUSEHOLDS**

Sr. No.	No. of Households	Percentages of villages			
		Summer	Rainy	Winter	Overall
1	Up to 150	5.91	10.21	5.32	7.15
2	151 to 200	7.26	11.09	4.4	7.58
3	201 to 250	16.50	14.25	17.02	15.92
4	251 to 300	12.10	17.3	20.12	16.51
5	301 to 350	18.40	12	13.42	14.61
6	351 to 400	12.60	10.14	9.01	10.58
7	401 & above	27.23	25.01	30.71	27.65
<b>Total</b>		<b>100(234)</b>	<b>100(231)</b>	<b>100(232)</b>	<b>100(697)</b>
<b>Average number of households per village</b>		<b>370</b>	<b>328</b>	<b>355</b>	<b>351</b>

**Note: figures in bracket indicate number of villages observed.**

It is seen from the above table that about 7.15 percent villages had up to 150 households, 7.58 percent villages had in the range of 151 to 200 households. While 15.92 percent villages had in the range of 201 to 250 households and 16.51 percent villages had in the range of 251 to 300 households. Further 14.61 percent villages had households in the range of 301 to 350, 10.58 percent villages had in the range of 351 to 400 households and 27.65 percent villages had in the range of 401 & above households. The overall average number of households per village was 351.

## HOUSEHOLDS REARING LIVESTOCK AND POULTRY

The total enumerated households were classified according to particular kind of livestock and poultry reared and the same is given in Table No. 9. Generally, there is the tendency to keep milch animals only or in combination with poultry or/ and goats. The households keeping flocks of sheep do not seem to keep any other type of livestock or poultry. However; a few goats are kept in the sheep flocks to lead these flocks at the time of grazing or migration.

**TABLE No. 9 : DISTRIBUTION OF HOUSEHOLDS ACCORDING TO LIVESTOCK & POULTRY REARED**

Sr. No.	Particulars	Percentage of households rearing			
		Bovine	Poultry	Goats	Sheep
1	Households rearing only one type	36.4	6.95	8.47	0.26
2	Households rearing livestock & others in combination	56.8	22.25	18.9	0.7
<b>Total</b>		<b>93.2</b>	<b>29.2</b>	<b>27.37</b>	<b>0.96</b>

From the total households observed, it was found that about 93.20 percent households reared bovine, 29.2 percent reared poultry, and 27.37 percent households reared goats and 0.96 percent households reared sheep either alone or combination with other type of livestock or poultry.

## GENERAL FACILITIES FOR THE VILLAGES

Information regarding facilities for veterinary aid, distance from market for milk, egg, and etc. was collected for the selected villages and is given in Table No. 10. Marketing facilities for the livestock products play an important role in the rural economy. The households having one or two in milk cattle are benefited if there is a dairy for collection of the milk in that village. However, the households which keep 20-25 poultry birds and received about 12 to 15 eggs/day have to collect these eggs and then sell them at the time of the bazaar day. The local purchase of eggs in a village is not so common.

**TABLE No.10 : PERCENTAGES OF VILLAGES ACCORDING TO THEIR DISTANCE FROM THE VETERINARY FACILITY**

Sr. No.	Facility	Percentages of villages for which it is available at a distance of					Average distance Km. (weighted average)
		0 Km.	0 to 3 Km.	3 to 5 Km.	5 to 10 Km.	Above 10 km.	
1	Veterinary Aid	29.80	18.20	20.36	22.45	9.19	3.69
2	Artificial Insemination	25.60	20.90	21.58	22.30	9.62	3.81
3	Market for cattle	0.70	6.34	7.90	30.40	54.66	8.16
4	Market for Milk & milk products	30.10	24.10	20.58	18.60	6.62	3.24
5	Market for egg	31.37	23.15	20.10	16.48	8.90	3.28
6	Market for wool	10.20	11.30	12.20	21.90	44.40	6.74
7	Market for meat	15.2	14.85	16.75	22.1	31.1	5.66

It is observed that veterinary aid services were available in 29.80 percent village in the village itself and the average distance at which this facility was available 3.69 Kms. The artificial insemination facility was available in 25.60 percent villages in the village itself and average distance at which this facility was available 3.81 km. from the village. The market for milk and milk products was available in the village itself in case of only 30.10 percent villages & average distance of this facility was 3.24 Kms.

Veterinary aid was available to 68.36percent villages within 5 Kms. While the remaining 31.64percent villages had it at a distance beyond 5 kms. As for artificial insemination facility it was available to 68.08 percent villages within 5 kms. while for remaining 31.92percent villages it was available at a distance of more than 5 Kms. from the village.

## **6. MILKPRODUCTION AND BOVINE KEEPING PRACTICES**

The estimate of milk production for each district including Brihan Mumbai, during each season was obtained for Nondescript and indigenous cows, Crossbred and exotic cows and Nondescript and indigenous buffaloes separately. It was based on (1) estimates of average daily milk yield per animal in-milk, (2) estimated number of animals in-milk and (3) number of days in the season. The results are based on 42240 cows and 21120 buffaloes for milk recording during the year.

### **ESTIMATED NUMBER OF IN-MILK ANIMALS**

The 'Ratio' method of estimation was adopted to work out the estimated number of in-milk cows as well as in-milk buffaloes. The ratio was worked out between the total number of in-milk animals enumerated and the corresponding numbers as per the 2012 Census in all the selected villages in respective group of districts. The estimates so obtained for different districts were pooled together to obtain the estimated number for season.

The estimated number, per day average milk yield and milk production of in-milk breed wise animals worked-out for different seasons and for all districts are presented in Table Nos.11 to 38 respectively.

The estimated milk production of winter season as compared to that of summer and rainy season is generally, more in all the districts. This may be due to availability of lush greens to the livestock is more in winter season as compared to very limited supply of greens to the livestock in summer season.

**Note:- Minor differences may occurs due to pulling & rounding.**

**TABLE No. 11 : SEASONWISE ESTIMATED NUMBER OF IN-MILK ANIMALS, PER DAY AVERAGE MILK YIELD AND MILK PRODUCTION OF EXOTIC COW FOR THE YEAR 2017-18.**

Sr. No.	Name of Districts	EXOITC COW								
		SUMMER								
		Estimated No. of animals (Lakhs)			Per day average milk yield (Kg)			Milk Production ('000' M.T.)		
		Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	Total

Note :- Minor differences may occurs due to pulling & rounding.

It is seen from the Table No. 41, that the total milk production from bovines for the state, during the year was estimated as **11102.289 ('000' M.T.)** Of this, the contribution from cows was about **60.34** percent and remaining **37.51** percent was from buffalo class and remaining **2.15** percent was from Goat class. Of the total cow milk production, **78.35** percent was contributed by exotic and crossbred cows and remaining **21.65** percent was from the indigenous & ND cows.

Per capita per day availability of milk during the year was found to be **256 gms** based on projected human population.

#### UTILIZATION OF MILK

The information about utilization of milk on the previous day of the visit in the bovine keeper (Milk producer) households is presented in Table No.43A, 43B,44A,44B,45A,45B,46A,46B for Rural & Urban separately.

**TABLE No. 43A (RURAL)**

#### AVERAGE UTILISATION OF MILK PER HOUSEHOLD PER DAY (in Kg.) FOR 2017-18 (SUMMER)

Sr. No.	Category	Milk Purchased		Milk Sold		Consumed as fluid milk	Milk converted into milk products	Total Milk productions/ household producing milk
		Qty	Rate /kg	Qty	Rate /kg

3	Goat Milk (in Kg)	0	0	0	0	0.360 (100)	0	0.360

**TABLE No. 46A (RURAL)**

**AVERAGE UTILISATION OF MILK PER HOUSEHOLD PER DAY (in Kg.) FOR 2017-18 (ANNUAL)**

Sr. No.	Category	Milk Purchased		Milk Sold		Consumed as fluid milk	Milk converted into milk products	Total Milk productions/ household producing milk
		Qty	Rate /kg	Qty	Rate /kg			
1	Cow Milk (in Kg)	0.189	27.00	4.507 (71.96)	32.67	1.365 (21.8)	0.391 (6.24)	6.263
2	Buffalo Milk (in Kg)	0.437	35.00	7.853 (81.82)	40.00	1.285 (13.39)	0.460 (4.79)	9.598
3	Goat Milk (in Kg)	0	0	0.00	0.00	0.306 (100)	0	0.306

On an average 18.77 percent cow, 7.41 percent buffalo milk & 100.00 percent goat milk was utilized at home and 73.68 percent cow, 87.90 percent buffalo & 0 percent goat milk was sold out, 7.54 percent cow & 4.68 percent buffalo milk converted to milk products.

**TABLE No. 46B (URBAN)**

**AVERAGE UTILISATION OF MILK PER HOUSEHOLD PER DAY (in Kg.) FOR 2017-18 (ANNUAL)**

Sr. No.	Category	Milk Purchased		Milk Sold		Consumed as fluid milk	Milk converted into milk products	Total Milk productions/ household producing milk
		Qty	Rate /kg	Qty	Rate /kg			
1	Cow Milk (in Kg)	0.267	35.67	4.016 (72.93)	40.00	1.264 (22.95)	0.227 (4.12)	5.507
2	Buffalo Milk (in Kg)	0.142	41.00	6.624 (80.90)	51.50	1.309 (15.99)	0.255 (3.11)	8.188
3	Goat Milk (in Kg)	0	0	0	0	0.396 (100)	0	0.396

On an average 22.95 percent cow, 15.99 percent buffalo milk & 100 percent goat milk was utilized at home and 74.93 percent cow & 80.90 percent buffalo milk was sold out. 4.12 percent cow & 3.11 percent buffalo milk converted to milk products.

**NOTE- (for all Tables) Figures in bracket indicate percentage of milk utilization for milk in bovine & goat keeper households.**

**MILK PRODUCTION AND MILK PROCURMENT**

The estimated milk production in the state during 2017-18 was **11102.289** ('000 M.T.) while Procurement of milk by government & Co-operative dairy Societies was **4540.240** ('000 M.T.) (40.89 %). During 2017-18 sixty milk processing plants were functioning in the state. In addition to these processing plants, 78 Government & 41 Co-operative milk chilling centers were in operation. The average daily collection of milk of Government & Co-operative Dairies together in the state during 2017-18 was about 124.390 lakh liters

The following table shows region wise milk production & milk procured in State during 2017-18

**TABLE No. 47 : REGIONWISE MILK PRODUCTION AND MILK PROCUREMENT**

Sr. No.	Region	Milk Production ('000'M.T.)	Milk Procurement ('000'M.T.)	Milk Procurement in %

## 8. FEEDING PRACTICES IN BOVINE

Data of feed and fodder fed to the animals were collected from the selected households having bovines. The data were collected for the following types of animals (bovines) (i) in-milk (ii) dry and not calved even ones, (iii) adult males, (iv) young stock up to 3 years. During the year under report, data were collected from 48093 households having 178523 cattle and 122547 buffaloes. The season wise details about the number of animals observed for feeding practices are given in Table No. 48, 49

**TABLE No. 48 : NUMBER OF ANIMALS OBSERVED FOR FEEDING PRACTICES**

### AVERAGE QUANTITY OF FEED / FODDER FED PER DAY

The data was collected from rural and urban area about the feed /fodder supplied to the various categories of bovine in the selected bovine keeper households. The season wise details of average quantity of feed/ fodder fed per animal per day are presented in Table No.50A, 50B, 51A, 51B, 52A, 52B, 53A, 53B. These averages are based on all the animals observed, including those kept on grazing alone. Generally, it is observed that, the animals do not get sufficient greens during summer season as a result of which the estimated milk yield is the lowest in comparison to the other two seasons. In some of the groups of districts, the livestock owners are not much inclined to grow greens on their fields probably due to limited supply of water.

It is seen from the table that cows & buffaloes in-milk are fed better than other categories of animals. Further, during rainy season the livestock owners appear to feed comparatively less of dry fodder to their livestock irrespective of age, while during the other two seasons the feeding of dry fodder to the cattle is quit sufficient. So also, there is no significant difference in the feeding schedule of cattle & buffalo. The quantity of any type of feed fed to cattle & buffaloes during all the seasons do not vary

## 9. PRODUCTION AND UTILIZATION OF DUNG

The data about production and utilization of dung on the previous day of the visit was collected. Season wise results are presented in Table No. 57A, 57B, 58A, 58B, 59A, 59B, 60. Here, the dung collected in the stalls is only considered.

**TABLE No. 54A (RURAL)**

### AVERAGE UTILIZATION OF DUNG PER HOUSEHOLD PER DAY (in Kg.)FOR 2017-18 (SUMMER)

Sr. No.	Category	Total dung production per household engaged in Dairy activity	Used as Dung cake	Percentage Average utilization Used as Dung cake	Used as Manure	Percentage Average utilization Used as Manure	Other Use such as biogas	Percentage Average utilization Other Use
1	Cattle/Buffalo Dung (In Kgs)	25.000	3.701	14.80	20.629	82.52	0.670	2.68

3	Sheep Dung (In Kgs)	0.00	-	-	0.00	00	0	0

**TABLE No. 58 : UTILIZATION OF DUNG COLLECTED FROM BOVINES AT STALLS**

Sr. No.	Season	Average quantity of dung collected per day/ bovine(Kg.)	Estimated annual quantity of dung collected ('000'M.T.)	Percentage utilization			
				For manure	For dung cakes	Other purposes	Total
	<b>Overall</b>	<b>4.638 (89100)</b>	<b>41324.580</b>	<b>86.41</b>	<b>10.73</b>	<b>2.86</b>	<b>100</b>

**Note** :- Figure in bracket indicates number of animals observed.

The average quantity of dung collected in stalls and household cattle shed was about 4.638Kg. per animal per day. It is observed that the dung produced is mainly used as manure, in rural areas. The quantity of collected dung in stalls during the year for the State was estimated at about 41324 ('000 MT)

#### **10. EGG PRODUCTION AND POULTRY REARING PRACTICES SAMPLE SIZE OBSERVED**

For collection of data about egg production and poultry rearing practices, a sample of 10 households was observed during one round from each of the villages having poultry out of the total 697 selected villages/wards. The details are as given below. During the year, data on egg production were collected for 65690 layers from 8870 poultry keeper households.

#### **11. ESTIMATED NUMBER OF LAYERS, LAYING PERCENTAGE AND EGG PRODUCTION**

The total egg production from deshi and improved birds, for each district, for the three seasons of the year was estimated on the basis of the data collected. The egg production from improved layers was estimated from the data collected from commercial poultry farms. The details are given in the Table numbers 59,60,61,62.

**TABLE No. 59 : ESTIMATED EGG PRODUCTION FROM DESHI LAYERS AND IMPROVED LAYERS DURING SUMMER SEASON FOR THE YEAR 2017-18**

<b>Improved Duck</b>		-	-	-	-	-	-	0.00	-	-	0.53	-	-
<b>Overall for Deshi, Improved Layers and duck</b>		<b>238.73</b>					<b>56991.21</b>		-			-	

The total egg production for the state, during the year, was estimated as **56991.210 lakhs**. Out of this the contribution from deshi layers was about **18.24** percent and from improved layers **81.76** percent. The overall eggs obtained per deshi layer per year were about **133** and from improved layer were about **290** Per capita per annum availability of eggs was **48** during the year underreport, on the basis of projected human population.

#### UTILIZATION OF EGGS IN POULTRY KEEPER HOUSEHOLDS

From the poultry keeper households, data regarding production & disposal of eggs on the previous 7 days of the visit were also collected. Season wise results are presented in Table No.63A,63B

**TABLE NO.63A ( RURAL ) : AVERAGE UTILISATION OF EGG PER HOUSE HOLD (in Nos. / Week)**

SEASON	Category	Total egg production per household producing egg	Egg Purchased		Egg Sold		Egg consumed	Eggs kept for hatching	Eggs damaged
			No.	Rate/ dozen	No.	Rate/ dozen			
SUMMER	Fowl Egg (In Nos.)	5.759	0.483	60.00	1.441 (25.02)	68.00	3.311 (57.49)	0.98 (17.02)	0.027 (0.47)
RAINY		5.527	0.659	50.00	1.517 (27.45)	60.00	3.115 (56.36)	0.874 (15.81)	0.021 (0.38)
WINTER		5.817	0.726	55.00	1.467 (25.22)	65.00	3.216 (55.29)	1.112 (19.12)	0.022 (0.37)
<b>ANNUAL</b>		<b>5.701</b>	<b>0.623</b>	<b>55.00</b>	<b>1.475 (25.87)</b>	<b>64.33</b>	<b>3.214 (56.38)</b>	<b>0.989 (17.35)</b>	<b>0.023 (0.40)</b>

**NOTE-** Figures in bracket indicate percentage of egg utilization for per household producing egg

It is found from the Rural data that out of the total eggs produced 56.38 percent were consumed at home for table purpose, while 17.35 percent were kept for hatching. About 25.87 percent eggs were sold out for table purpose. It is noticed that there was 0.40 percent breakage and spoilage in the total number of eggs produced.

**TABLE NO.63B ( URBAN ) AVERAGE UTILISATION OF EGG PER HOUSE HOLD (in Nos. / Week)**

SEASON	Category	Total egg production per household producing egg	Egg Purchased		Egg Sold		Egg consumed	Eggs kept for hatching	Eggs damaged
			No.	Rate/ dozen	No.	Rate/ dozen			
SUMMER	Fowl Egg (In Nos.)	5.465	0.560	60.00	1.161 (21.24)	70.00	2.920 (53.43)	1.331 (24.35)	0.053 (0.97)

WINTER		6.062	0.845	60	1.786 (29.47)	72.00	3.124 (51.53)	1.024 (16.89)	0.128 (2.11)
<b>ANNUAL</b>		<b>5.807</b>	<b>0.737</b>	<b>60.000</b>	<b>1.601 (25.57)</b>	<b>71.33</b>	<b>3.049 (52.51)</b>	<b>1.045 (18.00)</b>	<b>0.112 (1.93)</b>

**NOTE-** Figures in bracket indicate percentage of egg utilization for per household producing egg

It is found from the Urban data that out of the total eggs produced 52.51 percent were consumed at home for table purpose, while 18.00 percent were kept for hatching. About 25.57 percent eggs were sold out for table purpose. It is noticed that there was 1.93 percent breakage and spoilage in the total number of eggs produced.

#### 12. WOOL PRODUCTIONS - NUMBER OF SHEEP OBSERVED FOR WOOL PRODUCTION

A total of 76602sheep from 335 flocks were observed for wool production and sheep rearing practices. The details are given in Table No. 64. The shepherd community rears sheep flocks with goats. Shepherds usually do not keep any other livestock with their sheep flocks.

**TABLE No. 64 : NUMBER OF SHEEP OBSERVED**

Sr. No.	Type of Flock	No. of Flocks	No. of Sheep				
			Rams	Ewes	Lambs - Male	Lambs - Female	Total
1	Stationary	284	8951	50735	7612	8141	75439
2	Migratory	51	251	520	128	264	1163
<b>Total</b>		<b>335</b>	<b>9202</b>	<b>51255</b>	<b>7740</b>	<b>8405</b>	<b>76602</b>

It is observed from the table No.64 that about 85 percent sheep were from stationary flocks and remaining 15 percent sheep were from migratory flocks.

### MIGRATORY ASPECTS

It is a general practice that the flocks from water and grazing scarcity areas leave their villages from October onwards *i.e.* during winter season after Diwali festival. These flocks remain in the areas having water and grazing facilities and moderate climate. These migratory flocks return to their native places at the beginning of Rainy season .The maximum migration period is about five months. The shepherds usually follow fixed routes, their places for night halt also are fixed .They move along with their families. They fold their sheep flocks during nights in the fields and owner of these fields gives them grain and some amount depending upon the number of sheep in the flocks.

### 12. WOOL PRODUCTION

The sheep of the state grow a coarse type of wool on their bodies. The sheep are shorn twice during a year. The first shearing is done during June & July. The second shearing is done after six month, of the first shearing. The estimated wool production during each shearing season is presented in Table No. 65.

**TABLE No. 65 : ESTIMATED WOOL PRODUCTION**

	Estimated No. of sheep (lakh)	Estimated No, of sheep shorn (lakh)	Average wool yield per sheep shorn (Kg.)	Total wool production (M.T.)
<b>1<sup>st</sup> Shearing:-</b>				
(i) Ram+ weather	2.251	2.161	0.384	82.891
(ii) Ewes	15.435	15.203	0.355	539.298
(iii) Lambs	7.951	4.254	0.215	91.265
<b>Total</b>	<b>25.637</b>	<b>21.618</b>	<b>0.330</b>	<b>713.454</b>
<b>2<sup>nd</sup> Shearing</b>				
(i) Ram+ weather	2.284	2.170	0.385	83.466
(ii) Ewes	15.581	15.269	0.358	545.608
(iii) Lambs	8.228	4.361	0.217	94.238
<b>Total</b>	<b>26.093</b>	<b>21.800</b>	<b>0.332</b>	<b>723.312</b>
<b>Overall</b>				
(i) Ram+ weather	2.268	2.166	0.769	166.355
(ii) Ewes	15.508	15.220	0.712	1084.905
(iii) Lambs	8.089	4.307	0.431	185.502
<b>Total</b>		<b>21.693</b>	<b>0.662</b>	<b>1436.770</b>

The estimated number sheep shorn of Rams/ Weathers, Ewes and Lambs for first shearing season was 2.161 lakhs, 15.203 lakhs & 4.254 lakhs resp. The same for the second shearing season were 2.170 lakhs, 15.269 lakhs & 4.361 lakhs resp. Shearing is not done during summer season.

The overall average estimated wool yield per sheep shorn worked out to be 662 grams. The estimated wool production for the state during the year was about 1437 M.T.

### 13. MEAT PRODUCTION

Information of the animal slaughtered at the recognized slaughter houses is collected. The no. of such illicit slaughter is estimated. The meat production from different species of livestock was estimated for the State and on the yearly basis. The details are given in the Table No. 66A, 66B, 66C, 67A, 67B,67C,68A,68B,68C,69A,69B, 69C,& 70. The data of animals slaughtered under each category is based on the report received from the concerned Panchayat Samitis, Municipal Corporations and Municipalities.

**TABLE No. 70 (RURAL+ URBAN) : TOTAL ESTIMATED MEAT PRODUCTION FROM REGISTERED SLAUGHTER HOUSES, HOUSEHOLDS AND BUTCHER SHOP FOR ANNUAL 2017-18**

Sr. No.	Species	Estimated no. of animals slaughtered (Lakh)	Average meat production/animal (kg.)	Total meat production ('000') M. T.
1	Cattle	0	0	0
2	Buffalo Adult	9.101	181.311	165.011
3	Buffalo Young	0.424	88.870	3.769
4	Sheep	12.743	12.697	16.180
5	Goat	97.818	12.066	118.03
6	Pig	12.004	42.278	50.750
7	Poultry (Deshi)	72.722	0.761	5.532
8	Poultry(Commercial)	3199.069	1.666	565.668
<b>Total</b>		<b>---</b>	<b>----</b>	<b>924.930</b>

It is seen from Table No.70 that the average meat yield per animal is little more in sheep than that of goat.

**CATEGORYWISE MEAT PRODUCTION IN MAHARASHTRA STATE DURING 2017-18**

of the total estimated meat production, the contribution from the from buffaloes is about 18.25%.Where as from goats 12.77 %, from sheep 1.75 % and from pigs is 5.49 %. The contribution of poultry in meat production is very high about 61.76 %.

**TABLE No. 71 : PER CAPITA AVAILABILITY FOR MAHARASHTRA STATE AND INDIA**

Sr. No.	Year	Per Capita Availability For Maharashtra		Per Capita Availability For India	
		Milk (Gram) / day	Eggs (No.) / annum	Milk (Gram) / day	Eggs (No.) / annum
