Name of the Project: 7. Land Acquisition Monitoring System

Description of the Project:

The Land Acquisition System is for accurate and timely disposal of Land Acquisition cases by Acquisition Cell of District Collectors' Office. The application evaluates the land based on different parameters like the type of land, standing properties etc, maintains the database of land owners and generates reports based on the category of Acquisition namely Government Rate, Market Rate or Negotiated Rate. The reports generated are used in fields for payment of Land Acquisition Compensation

Status of the Project:

The solution is presently implemented in East District Administration

ACQUISITION SOFTWARE

The screenshot shows a web application interface for land acquisition in Sikkim. The header includes the logo 'Land Acquisition Government of Sikkim' and the date '15-05-2019'. The main form area contains several sections: 'ACQUISITION CODE' with a value of '272', 'ACQUISITION NAME', 'DEPARTMENT' (with a dropdown menu), 'CIRCLE' (with a dropdown menu), and 'BLOCK' (with a dropdown menu). There are also buttons for 'Data Entry', 'View Details', 'Modify Details', 'Reports', and 'Miscellaneous'. A section titled 'OWNER DETAILS' includes fields for 'OWNER CODE', 'OWNER' (with a dropdown), 'Name of Land Owner', and 'Father's Husband's Name'. A 'Save Details' button is located at the bottom right of the form. At the bottom of the page, there is a copyright notice: '© 2009 National Informatics Centre (EAST DISTRICT UNIT) All rights reserved. Application developed for DISTRICT ADMINISTRATION CENTRE, EAST SIKKIM.'
