

# International Conference on Green Hydrogen (ICGH-2024)

The International Conference on Green Hydrogen (ICGH-2024) is a significant event that brings together stakeholders from around the world to discuss advancements and innovations in green hydrogen production and technologies. These conferences are critical for accelerating the development and adoption of green hydrogen as a clean energy source.

This prestigious conference is scheduled to be held at Bharat Mandapam, Pragati Maidan, New Delhi, from September 11–13, 2024. This three-day event promises a deep dive into the world of green hydrogen, featuring:

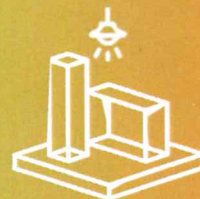

**20 in-depth technical parallel sessions** led by experts, tackling specific topics within the green hydrogen field.

**6 insightful plenary sessions** featuring prominent figures who will share their valuable perspectives on the industry.

**A global stage:** The conference fosters collaboration with the participation of 6 international partners from the US, EU, Australia, Japan, and Korea.

**Interactive exhibition:** Get hands-on experience and explore the latest advancements in green hydrogen technology at a dedicated exhibition.

**Spark your innovation:** Showcase your knowledge and creativity through a quiz and poster competition focused on green hydrogen.

We anticipate over **3,000+** participants to attend the conference.

Over **78,000 square metres** of dedicated exhibition space is available for exhibition.

ICGH-2024 presents a unique opportunity for researchers, policymakers, industry leaders, and stakeholders to connect, share knowledge, and accelerate progress towards a sustainable future powered by green hydrogen.
