## Preface

The Sixth Economic Census (EC) has been a joint effort of CSO and DESs in U.T. of Daman & Diu and was conducted on All India basis covering all the States and UTs in the country during January to March, 2013. It was one of the most complex and massive administrative exercises which inter-alia required training an army of enumerators, conducting a considerable publicity campaign and collecting information from all establishments (excluding crop production, plantation, public administration, defense and compulsory social security) - big or small, in the Private or Public sector.

2. The Sixth EC had several salient features including use of Enumeration Blocks (EBs) of Population Census 2011, both in rural and urban areas, so that results of Sixth EC can be synchronized with those of Population Census 2011. Further, for the first time, Handicraft/handloom establishments, proprietary establishments owned by women and their source of finance etc. were identified separately and the information on number of persons working therein was also collected. To seek the co-operation from respondents, the Collection of Statistics Act 2008, was invoked for the conduct of Sixth Economic Census.

3. The present report is based on the information tabulated from the data contained in the House and Establishment Listing Schedule 6A', which would be useful for all concerned stakeholders.

4. The Sixth Economic Census was planned and conducted by the Department of Planning & Statistics, U. T. of Daman & Diu who worked under the guidance and directions of the Ministry of Statistics & Programme Implementation, Government of India, New Delhi and completed the fieldwork, its supervision, scrutiny and coding of data. The services of the senior officers and other officials of Department of Planning & Statistics, Daman involved during Planning, Survey and Compilation etc. at the U. T. level are highly appreciated.

5. I further place on record the tireless efforts of the Economic Census Unit, Department of Planning & Statistics, Daman under the adept guidance of Dr S. D. Bhardwaj, Joint Director/ Joint Secretary ( Planning & Statistics ) in successful conduct of Sixth EC and also in bringing out this report.

## FOREWORD

The Economic Census provides the count of establishments including those in the unorganized sector, which have a huge contribution in Indian economy in terms of employment generation.

The Sixth Economic Census conducted recently is a data source which provides data on the number of establishments in the U. T. of Daman & Diu and the number of persons employed therein along with their distribution by geographical location, type of ownership, etc. The database would undoubtedly be a valuable input for planning and policy formulation. I hope the data would provide insight in the developments taken place since 2005, when the Fifth Economic Census was conducted.

I congratulate the staff/ official/ officers of Department of Planning & Statistics, U. T. Administration of Daman & Diu specially Shri J. A. Mendonce, Research Assistant, Shri B.H. Patel, Statistical Assistant and Shri Atul Shinde, Statistical Investigator in completing the herculean task of conducting the Sixth Economic Census and bringing the results in the shortest possible time.

### **CHAPTER - I**

#### **INTRODUCTION**

The Economic Census is the official count of all entrepreneurial units located within the geographical boundaries of a nation, involved in economic activities of either agricultural (excluding crop production and plantation) or non-agricultural sectors of the economy, engaged in the production or distribution of goods or services not for the sole purpose of own consumption. The information collected through these censuses provide basic entrepreneurial data for the purpose of planning, development administration and for improving the estimation of National income and related aggregates and also after independence, strong data base was required at village level to frame appropriate policies to meet out the demand of local areas.

In the agricultural sector of the economy we do have data on wide range of items but in the non-agricultural sectors, the current information on regular basis is mainly confined to a few organized segments like mining and quarrying, transport, manufacturing registered, Govt. services and banking sector etc. For the sectors like trade, construction, manufacturing unregistered and unorganized segments of other sectors we do not have sufficient data. To bridge this data gap, the Central Statistics Office, Department of Statistics, Govt. of India made first coordinated approach by launching a Plan Scheme “Economic Census and Surveys” in 1976. The scheme envisaged organizing country wide census of all economic activities (excluding crop production and plantation). This work was assigned to Central Statistics Office in co-ordination with State Statistical Directorates. All these statistical organizations made concerted efforts in developing sound and reliable data base, particularly for the unorganized sectors of non-agricultural economy and launched country wide economic census in 1977, 1980, 1990, 1998 and 2005. Basic idea behind all these censuses was the same but with the period of time different methodology were adopted due to change in demographic contents. U. T. of Daman & Diu participated in all these five Censuses, which, in the state were conducted by the Department of Planning & Statistics.

#### **HISTORICAL BACKGROUND**

##### **FIRST ECONOMIC CENSUS -1977**

Scope of the first Economic Census was limited on some points of coverage only for non-agricultural economic activities employing at least one hired worker on fairly regular basis. Agricultural enterprises and own account enterprises were excluded.

##### **SECOND ECONOMIC CENSUS-1980**

## *Sixth Economic Census*

The second Economic Census was carried out in 1980 on a more comprehensive basis. It covered all the agricultural and non-agricultural enterprises except those engaged in crop production and plantation. Since the Economic Census operations involve listing of all the enterprises through house listing and as the nationwide house listing operations were to be conducted in 1980 as prelude to 1981 population census, it was considered economical and expedient to conduct the second Economic Census in 1980 as an adjunct to the house listing operations of Population Census of 1981.

### **THIRD ECONOMIC CENSUS -1990**

Over a period of time, the frame based on second Economic Census to conduct follow up surveys, found to be outdated and it was felt to update the information collected in the Economic Census 1980 and to assess the changes in the structure of establishments, the growth of employment etc., a new frame was considered necessary. As such, third Economic Census sponsored by the Central Statistical Organization was carried out during the year 1990 synchronizing with the house listing operation of the Population Census of 1991 for operational convenience and cost effectiveness.

In the Third Economic Census, a complete enumeration of all enterprises in the un-organized non-agricultural sector and agricultural sector excluding those engaged in crop production and plantation was carried out. Information collected in the third Economic Census included location of enterprise, nature of operation, type of ownership, social group of ownership, power/fuel used for economic activities, number of persons usually working and hired etc.

### **FOURTH ECONOMIC CENSUS-1998**

The fourth Economic Census was conducted during the year 1998 with a particular interest to have detailed inquiry to assess the impact of liberalization policy introduced in the National Economy. Through this economic census account of all economic activities together with sum of their silent characteristics like location of activities, type of activities, employment etc. was made. It threw up macro information on industrial and non-industrial activities in the U. T.

### **FIFTH ECONOMIC CENSUS-2005**

The Fifth Economic Census was conducted during the year 2005-06 to prepare a fresh frame for conducting follow up surveys. The coverage of the action was same as that of IV Economic Census. Like all other previous economic census this census also was sponsored by Central Statistical Organization, Govt. of India and implemented in the state through Department of Planning & Statistics, Daman under 100% centrally sponsored scheme.

### **SIXTH ECONOMIC CENSUS IN U. T. OF DAMAN & DIU**

## *Sixth Economic Census*

Since the small units, especially under unorganised sector covered under Economic Census, usually change their location and existence etc., the census is required to be conducted at frequent intervals, generally not exceeding five years. In order to continue the process of bridging the data gap and update the entrepreneurial structure the Sixth Economic Census was conducted from January, 2013 and was over by March, 2013. The census has been sponsored by the Central Statistics Office, Govt. of India as a central sector scheme and implemented through the Department of Planning & Statistics. The census provide information on number and distribution of enterprises by industry, type of ownership, agricultural or non-agricultural, perennial, seasonal, number of workers and hired employment etc.

### **STATE LEVEL STEERING COMMITTEES**

To implement this 100% CSS and as per the guidelines of Central Statistical Office, Ministry of Statistics & Programme Implementation, Govt. of India, a Steering Committee was constituted by the Administrator of Daman & Diu Vide Notification No. DPS/330/2011-12/238 dated 05/07/2011 at the U. T. level & District level for the smooth & efficient conduct of Sixth Economic Census 2012-13 in the U. T. of Daman & Diu.

### **ECONOMIC CENSUS CELL**

To complete this nationwide assignment in time bound manner an Economic Census cell was created in the office of the Deputy Director, Department of Planning & Statistics, U. T. Administration of Daman & Diu sanctioned three posts viz. one Research Assistant, one Statistical Investigator & one Data Entry Operator on temporary basis for a period of 30 months for conduct of Sixth Economic Census 2012-13 by the Ministry vide letter no. DPS/330(1)/2011-12/594 dated 17th February, 2012.

### **ECONOMIC CENSUS PROGRAMME AND DESIGN**

#### **Scope and Coverage**

The present Economic Census is sixth in series and it covered all the activities under agricultural and non-agricultural sectors except the enterprises engaged in crop production and plantation. Like all other previous Census this Census also was sponsored by Central Statistical Office, Government of India and implemented in the U. T. through Department of Planning & Statistics. It gathered the information on location of enterprises, nature of operation, description of activity, type of ownership (social group, sex and religion in case of proprietary establishment) and the number of persons hired/not hired on the last working day in the establishment. Complete house listing approach was adopted both in rural and urban areas.

## **CHAPTER - VII**

### **WOMEN ENTREPRENEUR**

#### **Introduction**

The UN observed 1975 as International Women's Year where it was recognized the importance of producing statistics on women. Over the years, the compilation on existing statistics and indicators necessary to address the demand of those concerned with women's issues revealed many data gaps and problems in data collection methods.

In the past, statistics offices and researches have presented only aggregate labour forces data, for example, for the entire population. However, labour force participation for women (defined as the proportion of the total population of women aged 15-60 who are actually in the work force) is usually much lower than for men. Similarly, the distribution of the male and female labour force by sector is usually quite different. There are also clear differences by occupation, with some "feminized" occupations such as teaching or nursing being dominated by women while others, such as engineering, tend to be dominated by men. A consequence of the failure to recognize and routinely distinguish the different patterns for women and men is that the situation of men tends to be regarded as the norm or standard, and the different situation of women is overlooked. Furthermore, policies and programmes may be based on stereotypes that are significantly different from the empirical reality. Issues that are important to women rather men were overlooked. As a result, there was an attempt to collect the data in this Economic Census and separate chapter was introduced on women.

This is first time in the history of Economic Census, when an attempt was made to document a separate chapter based on women entrepreneurship to see the gender equity. Out of the total 10506 establishments, 805 are run by women entrepreneur in the U. T. which comes to 7.66%. Total worker engaged in women owned & run establishments were 1,923 which is 2.36% of the total workers engaged in U. T. of Daman & Diu under different economic activities. Different aspects relating to the women entrepreneurs were narrated in the Table 8.1.

## **Concepts & Definitions of Important Terms**

Concepts and definitions of some of the important terms used in the Sixth Economic Census are given below:

### **Establishment**

The establishment is a unit situated in a single location in which predominantly one kind of economic activity is carried out such that at least a part of the goods and/or services produced by the unit goes for sale (i.e. entire produce is not for sole consumption).

### **Agricultural Establishment**

An agricultural establishment for the purpose of Economic Census is one, which is engaged in production of agricultural goods (other than crop production & plantation by the farmers or a group of farmers or any agency), agricultural services, hunting, trapping & game propagation, where at least some part of the production or services is sold out. Establishments engaged in activities pertaining to crop production and plantations though in the agriculture sector are excluded from the coverage. Thus primarily cultivators themselves are excluded from the coverage of Sixth Economic Census.

### **Non-Agricultural Establishment**

Establishments engaged in activities other than agricultural activities (like crop production & plantation, growing of tea, coffee, rubber, tobacco etc.) are termed as non-agricultural establishments.

### **Household**

A household is a group of persons usually living together and taking their meals from a common kitchen. It includes temporary stay-aways (those whose total period of absence from household is expected to be less than six months) but excludes temporary visitors and guests (with expected total stay of less than 6 months). A group of persons, who are unrelated to each other, live in a census house but do not take their meals from a common kitchen would not constitute an institutional household.

### **Census Towns**

Census towns are those villages having a population of 5000 and above, at least 75% of male working population are employed in non-agricultural activities and density of population is at least 400 per sq. km., covered as urban areas during Population Census 2011 by RGI.

## **Census House**

A census house is a building or a part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used, or recognized as a separate unit. It may be occupied or vacant. It may be used for residential, commercial or for both purposes.

## **Enumeration Block**

The ultimate area unit of enumeration in the Sixth EC is Population Census (2011) Enumeration Block (EB). An EB broadly covers about 120 households or a population of nearly 600 or so.

## **Handicraft/Handloom Activity**

Handicraft describes a craft or occupation requiring skilled use of hands. Handicrafts are items made by hand, often using simple tools. These items can be functional, artistic and/ or traditional in nature.

## **Nature of Operation**

If the entrepreneurial activity is carried on or likely to be carried on throughout the year more or less regularly, it is treated as perennial activity. If the activity of the establishment is confined to a particular season i.e. fixed months of a year, the same is called the seasonal activity. The economic activity of the establishment which is neither perennial nor seasonal is termed as casual.

## **Worker (Person Employed)**

All persons (including children under 15 years of age) working on the last working day prior to the date of fieldwork in the establishment, either as owners, members of the household, co-owner or partner or family members helping the owner in running the establishment including other persons engaged by the establishment, whether hired or not, besides regular and salaried employees, casual/daily wage labourers are considered as workers for the establishment.
