The unit had submitted a letter stating that the unit had received the power supply therefore unit was inspected on 21/04/2016 at 16:00 hrs. At the time of inspection of the unit following observations were noted:

- Display sign board was properly filled with product and waste generation details.
- The unit was in operation at the time of inspection.
- Raw materials used in manufacturing process were PVC resin or powder, calcium carbonate ( $\text{CaCO}_3$ ) and Stabilizer.
- Products being manufactured were PVC boards or sheets.
- Manufacturing process involved in the unit was extrusion.
- Machineries installed in the unit were a sheet line extrusion machine, a chiller, an air drier and a grinder.
- Housekeeping observed was in good condition.
- Proper storage facilities were available for raw material and products.
- The unit is not significant to pollution potential. As there is no water used during any stage of process.
- The unit was availed with septic tank and soak pit for domestic waste water generation.

In view of the above, Operate to Consent for manufacturing of "PVC board and all PVC related items-52000 sheets/Annum (no other items)" Which falls in **Category-III** under water act and air act along with terms and conditions as mentioned in annexure-I for the period up to 31/03/2017.

Submitted for your kind perusal and approval, Sir please.
