- Application for authorization to handle Hazardous Waste (form-1).
- Industry Data Sheet.
- Copy of Consent to Establish under Air Act.

The unit was inspected on 30/09/2015 at 16:00 hrs. At the time of inspection of unit following

observations were noted:

- Display sign board was properly filled with product and waste generation details.
- The unit was in operation at the time of inspection.
- Raw Material used for production is Poly Carbonate, Poly Propylene, Liquid silicon Material and Inc.
- Products manufactured at unit were plastic & rubber blow moulded articles such as baby feeding bottle and nipple etc. Based on requirement.
- The Manufacturing process mainly involves the one stage blow moulding.
- Machinery observed during inspection were as under:

Machine	Quantity
ASB-50 MB Machine	3
Boy Machine	1
Chillers	2
Compressor	4
D. G. Set-15 KVA	1

- During inspection only one D. G. Set worth 15KVA was found installed in the unit premises.
- D. G. Set was provided with acoustic for control of noise pollution.
- As per the information furnished by the Manager of the unit maximum consumption of diesel in D. G. Set had never been more than 10 litre.
- Proper storage facilities were available for raw material and products.
- The unit is not significant to pollution potential. As there is no water used during any stage of process.

N/11

GF-3733

➤ The unit was availed with septic tank and soak pit for domestic waste water generation.

In view of the above, Operate to consent Diesel Generator Sets "15 KVA D. G. Set" which falls in **Green category** under Air act along with terms and conditions as mentioned in annexure-I for the period up to 30/09/2016.

Submitted for your kind approval please.
