India tests a new record of 6,64,949 tests in last 24 hours

More than 6 lakh tests done for 3rd successive day

Tests Per Million (TPM) cross 16,000

Posted On: 06 AUG 2020 7:40PM by PIB Delhi

Keeping the focus on “**Test, Track and Treat**” strategy, India has continued testing more than 6 lakh COVID-19 samples for the third consecutive day in a row. India’s resolve to rapidly increase the number of tests done per day has resulted in a successful march towards 10 lakh/day testing capacity with 6,64,949 tests conducted in the last 24 hours.

The cumulative testing as on date has reached 2,21,49,351. The Tests Per Million too have seen a sharp rise to 16050. It is only by aggressive testing that positive cases can be identified, their contacts tracked and isolated as well as prompt treatment can be ensured.

A key component for the successful implementation of the “Test, Track and Treat” strategy has been the continuously expanding network of diagnostic labs across the country. The lab network as on today consists of 1370 labs; 921 labs in the government sector and 449 private labs. These include:

- **Real-Time RT PCR** based testing labs: 698 (Govt: 422 + Private: 276)
- **TrueNat** based testing labs: 563 (Govt: 467 + Private: 96)
- **CBNAAT** based testing labs: 109 (Govt: 32 + Private: 77)
