# India reaches another peak of highest single day recoveries

## 68,584 recover in the last 24 hours

# in 26 States & UTs report higher than 70% Recovery Rate

Posted On: 03 SEP 2020 3:00PM by PIB Delhi

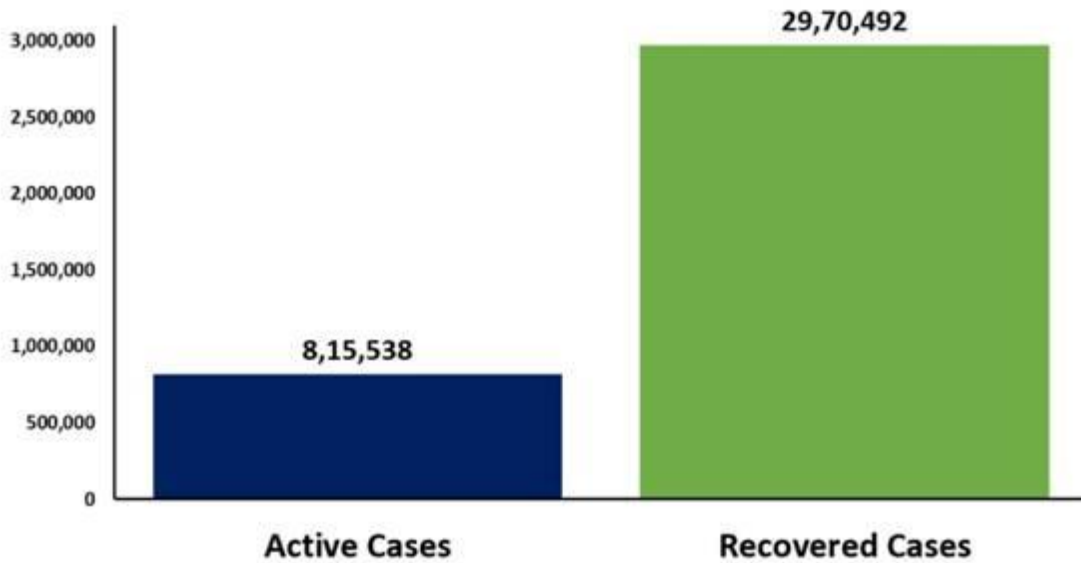

Matching the achievement of highest single tests of more than **11.7 lakhs** in the last 24 hours, India has scaled another peak of success.

India has registered the highest recoveries in a single day. **68,584** COVID-19 patients have recovered and been discharged in the last 24 hours. This has led to a surge in the total number of recovered patients which is nearly 30 lakh (**2,970,492**).

With this, India's Recovery Rate amongst the COVID-19 patients has crossed 77% (**77.09%**). The number of recovered patients has outpaced the active cases (**8,15,538**) by more than **21.5 lakh**.

The recovered patients have increased to more than **3.6 times** the active cases, as on date. The record high recoveries have ensured that the actual caseload of the country viz. the active cases, has reduced and currently comprises only **21.16%** of the total positive cases.

## Recovered Cases are 3.6 times the number of Active Cases

Focus on improved and effective clinical treatment in hospitals, supervised home isolation, use of non-invasive oxygen support, improved services of the ambulances for ferrying patients for prompt and timely treatment, upgradation of clinical management skills of doctors treating COVID-19 patients by active technical guidance through tele-consultation sessions of AIIMS, New Delhi, use of steroids and anti-coagulants, etc., have together resulted in seamless efficient patient management.

These measures have ensured that India's Case Fatality Rate (CFR) is maintained below the global average (3.3%). Witnessing a decline every day, it stands at **1.75%** today.
