India's Active Caseload further contracts to 4.8 Lakhs

Daily New Recoveries outnumbering Daily New Cases pushes Recovery Rate to more than 93%

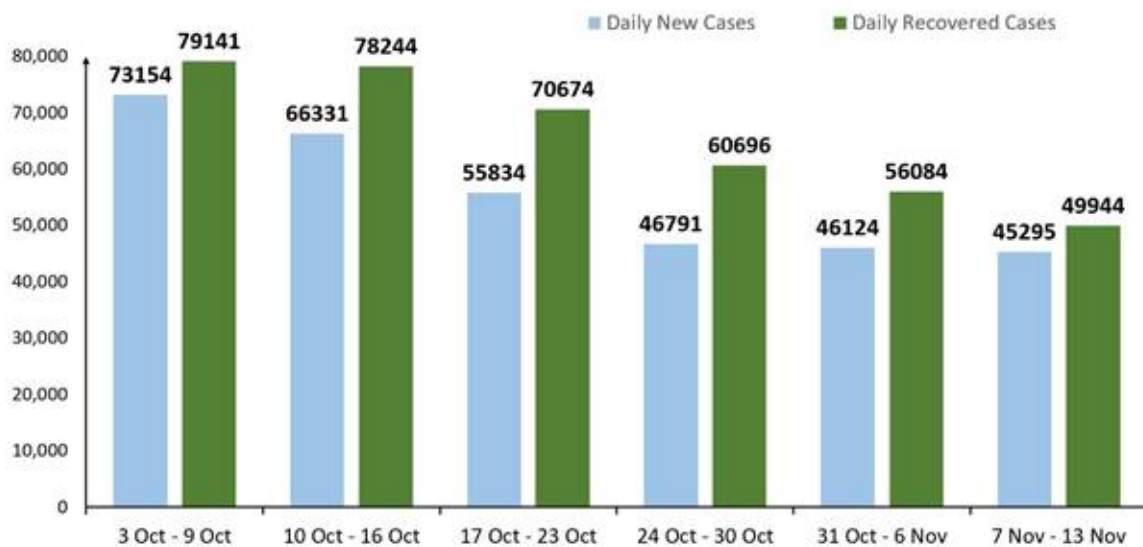

Posted On: 14 NOV 2020 11:32AM by PIB Delhi

Registering a four-day streak of less than 5 lakh active cases, India's active caseload has shrunk to **4,80,719** as on date. The share of Active Cases in the total Positive Cases has further decreased to **5.48%**.

The trend of new recoveries exceeding new cases every day continues continuously as **44,684** new cases were reported in the last 24 hours against **47,992** recoveries.

Continuous decline in average daily new cases for last 5 weeks

New cases continue their downward slope indicating adoption of COVID Appropriate Behaviour among the population, and effective containment measures by the State/UT governments following guidelines of the Union Government. The daily new cases on an average show a declining trend over the last five weeks.

Continuous decline in average daily new cases for last 5 weeks

This trend has also upended the Recovery Rate to cross 93% today. The cumulative national figure is **93.05%**. The total recovered cases stand at **81,63,572**. The gap between the recovered cases and active cases that is steadily increasing, presently standing at **76,82,853**.

Recovered cases cross 80 lakhs & Active cases under 5 lakhs

75.38% of the new recovered cases are contributed by ten States/UTs.

With 6,498 persons recovering from COVID, Delhi saw the most recoveries in the past 24 hours. Kerala saw 6,201 daily recoveries while Maharashtra saw 4,543 new recoveries.

76% of new recovered cases in the 10 States & UTs

Ten States/UTs have contributed **76.38%** of the new cases.

Delhi reported 7,802 cases in the last 24 hours topping the tally of new additions. Kerala recorded 5,804 new cases while Maharashtra stood at the third position with 4,132 new cases yesterday.

76% of new cases in the 10 States & UTs
