India records 30K Daily New Cases for the second successive day

Daily Recoveries continuously exceed Daily COVID19 Cases since the last 1.5 months

Posted On: 17 NOV 2020 11:27AM by PIB Delhi

India has been recording around 30,000 daily new cases for the last two consecutive days. **29,163 new cases** were reported in the last 24 hours. The country has also seen less than 50,000 daily new cases being registered continuously for the past ten days.

Two successive days of 30,000 cases leading to decline in average daily cases

While this signifies the wide adoption of COVID appropriate behaviour among the population, it also assumes significance in view of the high number of daily cases being continuously reported in many countries in Europe and the Americas.

The trend of new daily recoveries exceeding the daily new cases continues with **40,791** cases recovering in the last 24 hours against just **29,163** newly detected cases.

New recoveries have exceeded new cases continuously in the last 45 days

The Government continues to maintain a high level of countrywide testing. Total tests stand at **12,65,42,907** today. This has led to bringing down the cumulative positivity to **7.01%**.

Cumulative positivity rate continues to decline as tests conducted cross 12.6 crore

The Active Caseload which has now stands at **4,53,401** comprises just **5.11%** of all cumulative cases.

The total recovered cases stand at **82,90,370**. With this, the Recovery Rate has improved to **93.42%** today.

72.87% of the recovered cases reported in the last 24 hours are from ten States/UTs.

Kerala saw the greatest number of recoveries as 6,567 confirmed cases tested negative. West Bengal registered 4,376 daily recoveries while Delhi reported another 3,560 of them.

75.14% of the new cases have been reported from ten states/UTs

Delhi which saw a surge in new cases over the last few days reported only 3,797 new cases yesterday, followed by West Bengal which reported 3,012 new cases. Kerala recorded 2,710 new cases.

78.40% of the **449** new deaths are concentrated in ten States/UTs.

More than a fifth, **22.76%** of new fatalities reported are from Delhi which reported 99 deaths. Maharashtra reported 60 fatalities, followed by West Bengal (53).

78% of new deaths in the 10 States & UTs
