# Daily Recoveries outnumbering daily New Cases ensure steep upward trajectory of the Recovery Rate

Posted On: 17 DEC 2020 11:11AM by PIB Delhi

**in**With focussed strategy and proactive as well as calibrated measures of the Union Government along with the States and UTs, India has sustained a very high Recovery Rate along with rapidly declining Active Cases and low mortality rate.

Recoveries outnumbering new cases on a daily basis have ensured a high recovery rate among patients. The total recovered cases are nearing **95 lakh (94,89,740)**. The Recovery Rate has improved to **95.31% today**. The gap between Recovered cases and Active cases is also increasing consistently and presently stands at **91,67,374**.

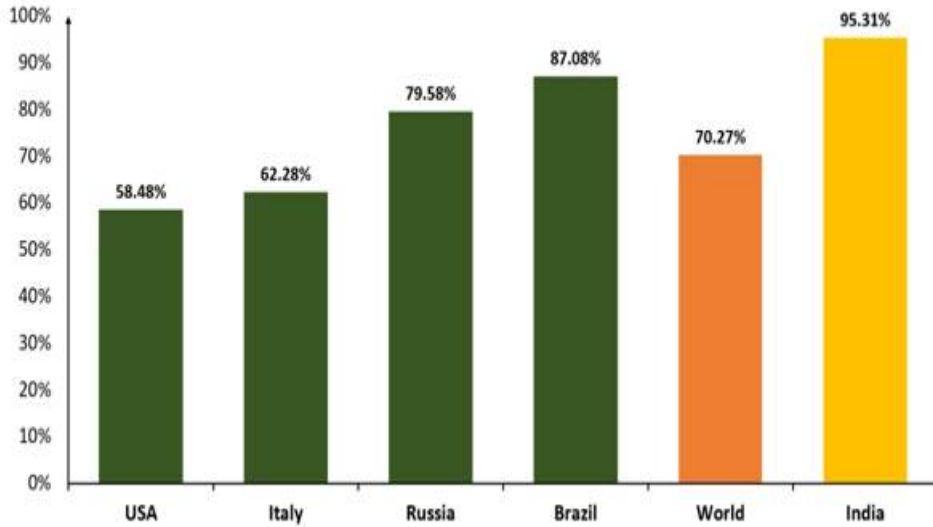

The rising recoveries have also led to a continuous contraction of India's Active Caseload. It has ensured that India's present active caseload of **3,22,366** consists of just **3.24%** of India's Total Positive Cases.

**India's recovery rate is amongst the highest in the world.** While the global figure for Recovery Rate is 70.27%, India is recording 95.31%. USA, Brazil, Russia, and Italy are reporting lesser recovery rates.

## Recovery rate – Amongst the highest in the world
