Sustained shedding of Active Caseload continues; drops to 3.03 Lakh after 161 days

Daily Recoveries outnumber daily New Cases successively since last 24 days

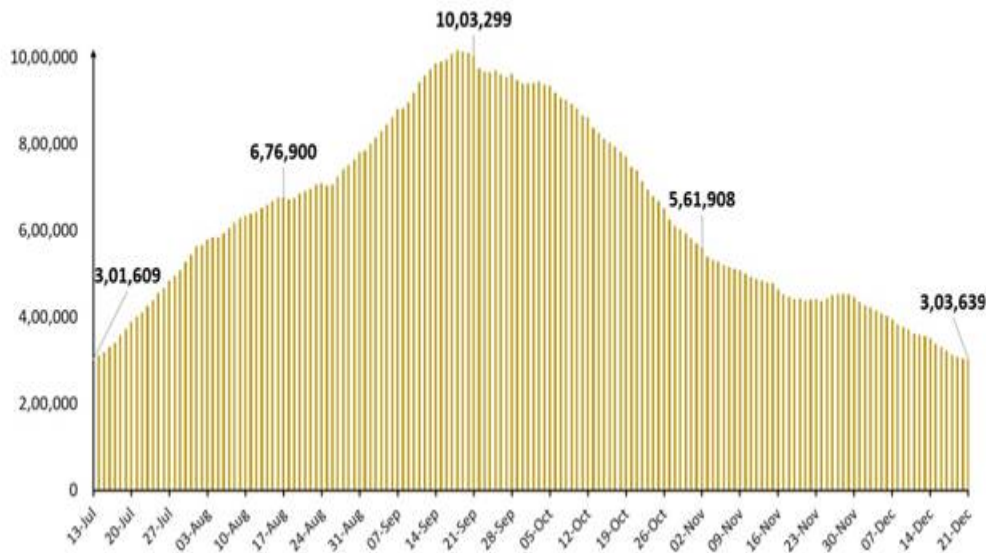

in

Posted On: 21 DEC 2020 12:03PM by PIB Delhi

India's total Active Caseload has **dropped to 3.03 lakh (3,03,639) today**. This is the **lowest in 161 days**. The total active cases were 3,01,609 on 13th July, 2020.

India's present active caseload consists of just **3.02%** of India's Total Positive Cases. The new recoveries have led to a net decline of **1,705** in the Total Active cases.

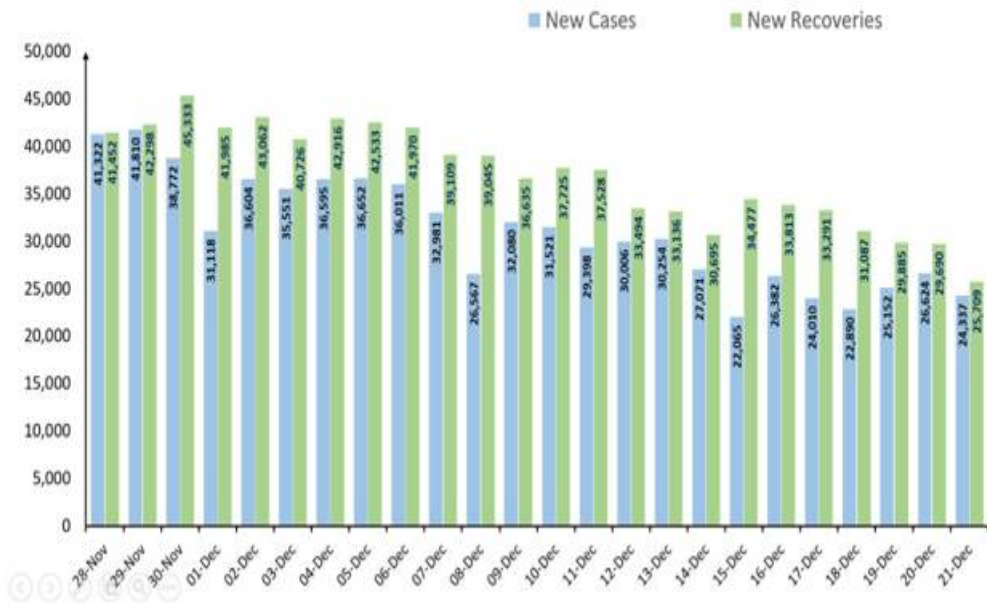

Active cases continue to decline, now below 3.1 lakhs

The daily new recoveries recorded in the country have been more than the daily cases registered since the last 24 days. The number of daily new cases in the last 24 hours is **24,337**. **25,709** cases recovered and were discharged in the last 24 hours.

New recoveries have exceeded new cases continuously in the last 24 days

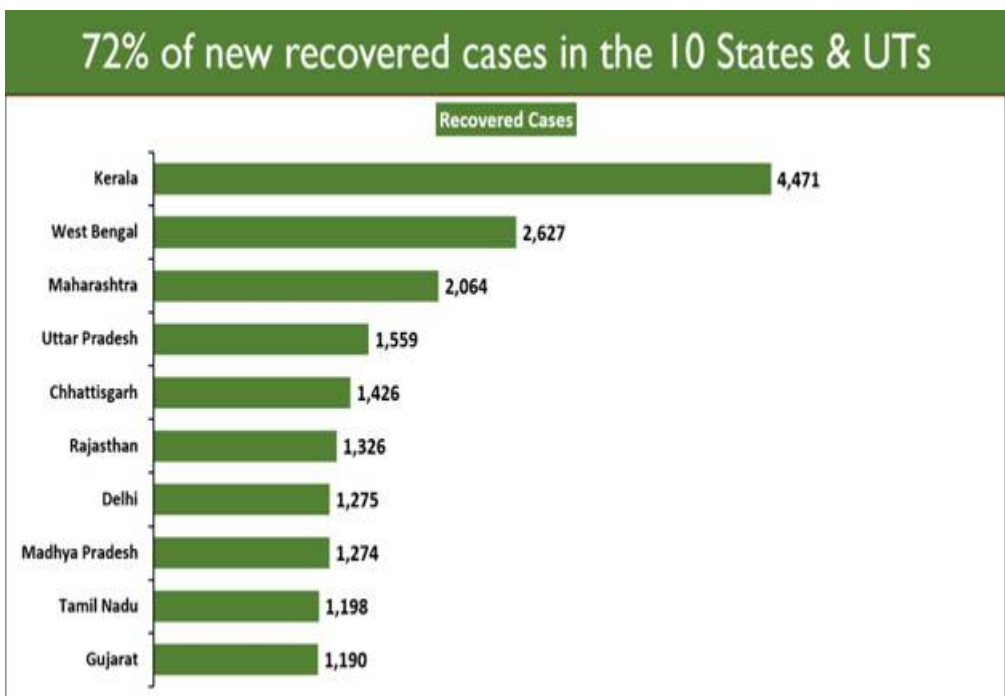

The rising recoveries have also improved the Recovery Rate to **95.53%** today.

The total recovered cases stand at **9,606,111**. These are amongst the highest globally. The gap between Recovered Cases and Active Cases is bridging fast and presently stands at **93,02,472**.

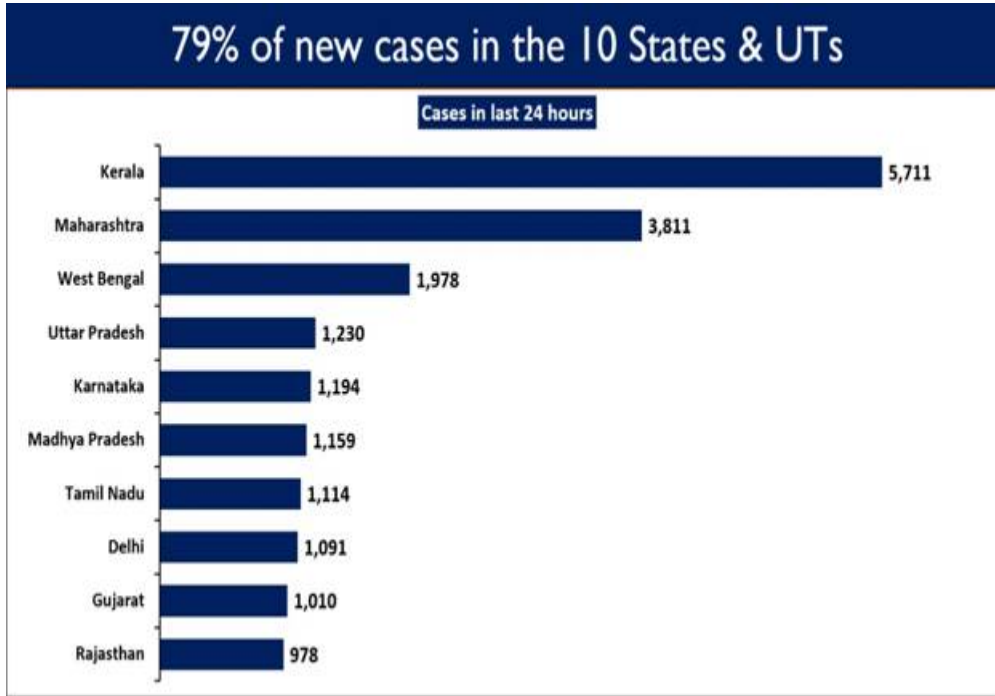

71.61% of the new recovered cases are observed to be concentrated in 10 States/UTs.

Kerala has reported the maximum number of single day recoveries with 4,471 newly recovered cases. 2,627 people recovered in West Bengal followed by 2,064 in Maharashtra.

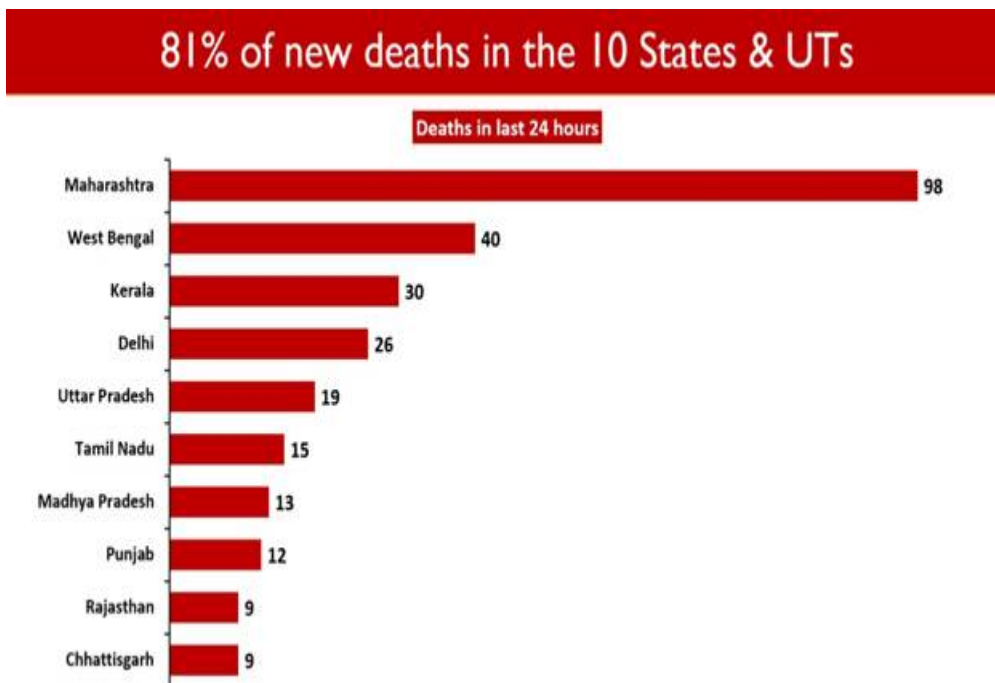

79.20% of the new cases are from 10 States and UTs.

Kerala reported the highest daily new cases at 5,711. It is followed by Maharashtra with 3,811 new cases. West Bengal recorded 1,978 new cases.

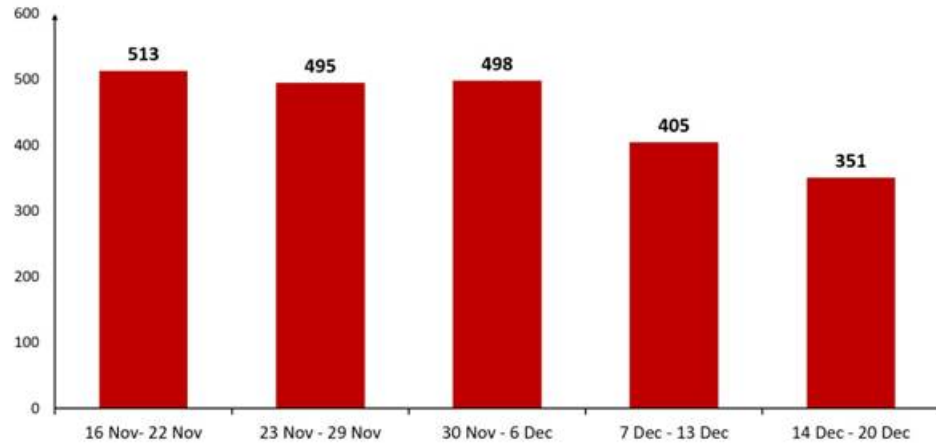

333 case fatalities have been reported in the past 24 hours.

Ten States/UTs account for **81.38%** of the new deaths. Maharashtra saw the maximum casualties (98). West Bengal and Kerala follow with 40 and 30 daily deaths, respectively.

Decline in average daily new deaths for last 5 weeks

India has one of the lowest deaths/mn population globally (105.7).

Focussed measures including targeted testing, early identification, timely isolation & prompt hospitalization & Standard Treatment Protocol have ensured that daily fatalities are under 400.
