In a landmark stride, India's Recovery Rate crosses 96%, one of the highest in the World

Active Cases further slide to 2.57 lakhs

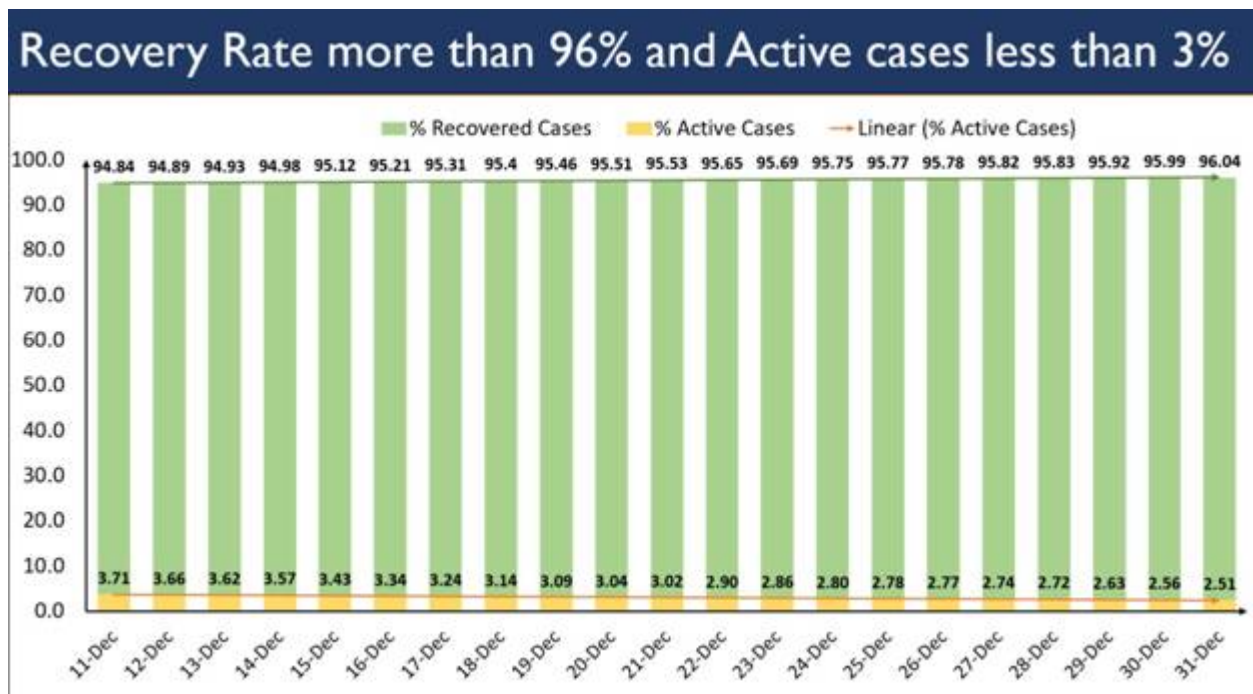

in Total Recoveries exceed the Active cases by more than 96 lakh

Total 25 cases of UK mutant virus sequenced

Posted On: 31 DEC 2020 10:54AM by PIB Delhi

India has crossed a significant milestone in its fight against COVID.

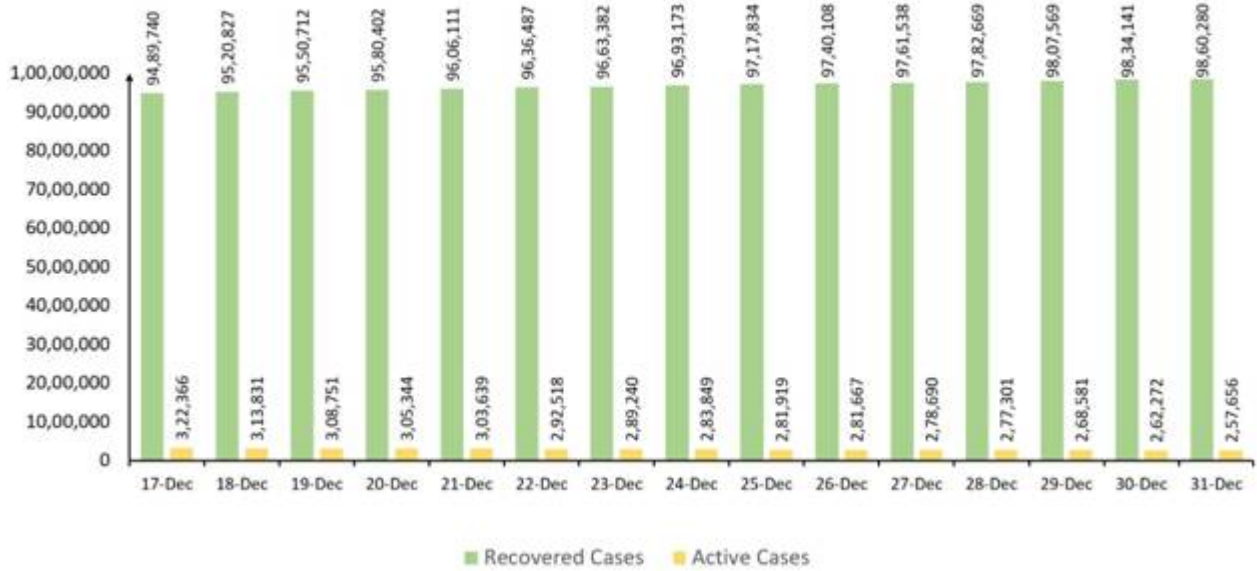

National Recovery rate **has crossed 96% (96.04%) today, one of the highest globally.** The exponential rise in the recoveries has led to the improvement in the Recovery Rate.

The total recovered cases have **crossed 98.6 lakhs (98,60,280), the highest globally.** The gap between active cases and recovered cases is continuously increasing and stands at **96,02,624.**

Recovered cases cross 98 lakhs & Active cases under 3 lakhs

In another achievement, the active cases have drastically declined to **2.57 lakh**. The total positive cases of the country are **2,57,656** and now comprise merely **2.51%** of the total cases.

With a high number of COVID patients recovering every day and the sustained fall in the mortality rate, India's steady trend of registering dipping active cases continues. **21,822** new confirmed cases recorded in the last 24 hours in the country whereas **26,139** new recoveries were registered in the same period. It has led to a **net decline of 4,616 cases** from the total active caseload.

Active cases continue to decline, now below 3 lakhs

77.99% of the new recovered cases are observed to be concentrated in 10 States/UTs.

Kerala has reported the maximum number of single day recoveries with 5,707 newly recovered cases. 4,913 people recovered in Maharashtra followed by 1,588 in Chhattisgarh.
