## India crosses 20 Crore Cumulative COVID-19 Vaccination Coverage

India achieved this milestone in 130 days since the start of COVID-19 Vaccination Drive

After the USA, India is the 2nd country to achieve this mark

42 percent population above 60 years have received at least 1st dose of the COVID19 vaccine

Posted On: 26 MAY 2021 3:41PM by PIB Delhi

India achieved a significant milestone in its ongoing COVID-19 vaccination drive today. On 130<sup>th</sup> day of the drive, the cumulative COVID Vaccination Coverage crossed the 20 crore mark (with 20,06,62,456 doses including 15,71,49,593 first dose and 4,35,12,863 second dose of COVID-19 vaccines), as per data available at 07:00 AM today.

India's COVID-19 Vaccination drive, the world's largest vaccination drive so far, was launched by the Hon'ble Prime Minister on 16<sup>th</sup> January 2021.

# Total Vaccinations administered (As on 25<sup>th</sup> May '21)

India is the second country after the USA to achieve this coverage in just 130 days. The USA took 124 days to reach the 20 crore mark.

## COVID-19 Vaccinations: Days taken to reach 20 cr mark

Additionally, as per the data available on Our World In Data and multiple news articles, other leading countries in COVID-19 vaccination drive include the UK which has reached 5.1 crore mark in 168 days, Brazil that reached 5.9 crore mark in 128 days, and Germany which reached 4.5 crore mark in 149 days.

As per the latest available data with the Union Health Ministry, over 34 percent population above 45 years has received at least 1<sup>st</sup> dose of COVID-19 vaccine in India till date. Similarly, over 42 percent of 60+ years of population in India has received at least 1<sup>st</sup> dose of COVID-19 vaccine.

As of date, India is using three vaccines against COVID-19 in its immunization drive; these include two made in India vaccines - Serum Institute of India's Covishield and Bharat Biotech's Covaxin. The Russian Sputnik V is the third vaccine to get approval from the Drug Controller General of India (DCGI) for Emergency Use Authorisation and is being used in few private hospitals which are expected to be increased over the coming days.

In Phase I of the vaccination drive, started 130 days ago on 16<sup>th</sup> January, the National Expert Group on Vaccine Administration for Covid-19 (NEGVAC) prioritized Health Care Workers, and Front Line Workers (both government & private sector). Phase II of the vaccination drive started from 1<sup>st</sup> March 2021, focused on protecting the most vulnerable age groups. These prioritized age-groups included persons above 60 years of age and persons above 45 years with associated specified co-morbidities. This was further relaxed to all people above 45 years of age on 1<sup>st</sup> April 2021. In Phase III, 'Liberalised Pricing and Accelerated National COVID-19 Vaccination Strategy' was adopted on 1<sup>st</sup> May 2021. Under this strategy, everyone above 18 years of age are eligible for COVID-19 vaccination.
