Research on Ayush Medicines to Curb Covid-19 Outbreak

f During the second wave of this pandemic, AYUSH-64 and KabasuraKudineer were repurposed for COVID 19 after the robust scientific studies found them useful in asymptomatic, mild and moderate COVID-19 infection as standalone and/or as an adjunct to Standard care as per the studies conducted by Ministry of Ayush in collaboration with Ministry of Health and family Welfare, Ministry of Science and **Technology** (CSIR & DBT), Department of Science and Technology and reputed scientific organisations and hospitals. However, Govt. of India has released “National Clinical Management Protocol based on **Ayurveda and Yoga for management of COVID-19**”.

IIT Ropar develops first-of-its-kind Oxygen rationing device – AMLEX

To increase the life of medical oxygen cylinders three fold, the Indian Institute of Technology, Ropar has developed a first-of-its-kind Oxygen Rationing Device – AMLEX that supplies a required volume of oxygen to the patient during inhalation and trips when the patient exhales CO₂. This process saves oxygen which otherwise unnecessarily get wasted.

So far, during exhalation, the oxygen in the oxygen cylinder/pipe is pushed out along with the exhaled CO₂ by the user. This leads to wastage of a large volume of oxygen in long run. In addition to this, a large volume of oxygen escapes from the openings of the mask to the environment in the resting period (between inhalation and exhalation) due to continuous flow of life saving gas in the mask. As we have seen the demand of medical oxygen has jumped manifold amid the second wave of Covid-19, the device would help in stopping the unwanted wastage of the same.

Indian start-up makes affordable and dual powered defibrillator - SanMitra 1000hct

f Jeevtronics, an ISO13485 certified company, has already received four patents in US and India, and had been facilitated financially by BIRAC under the schemes of BIG and IIPME (Early Transition stage) in the past. SanMitra 1000 HCT is designed to international IEC standards for medical devices and the patented technology costs INR 99,999+ taxes, which is 1/4th of the big brands, as reported by the start-up. These defibrillators can be usually preferred over chest compressions (CPR), and can even prove fruitful in treating COVID-19 patients suffering from issues related to rate or rhythm of the heartbeat (Arrhythmias).
