COVID-19 Update**f**

- **India's Cumulative COVID-19 Vaccination Coverage exceeds 45.60 Cr**

- **More than 51 Lakh vaccine doses administered in the last 24 hours**

- **Recovery Rate stands at 97.38%**

- **44,230 Daily New Cases reported in last 24 hours**

- **India's Active Caseload (4,05,155) presently constitutes 1.28% of total cases**

- **Daily Positivity Rate (2.44%) less than 5% for 53 consecutive days**

India's COVID-19 vaccination coverage exceeded 45.60 Cr yesterday. Cumulatively, **45,60,33,754** vaccine doses have been administered through 54,50,378 sessions, as per the provisional report till 8 am today.

in 51,83,180 vaccine doses were administered in the last 24 hours. These include:

HCWs	1 st Dose	1,02,98,871
	2 nd Dose	77,94,788
FLWs	1 st Dose	1,79,23,328
	2 nd Dose	1,11,57,062
Age Group 18-44 years	1 st Dose	14,95,34,704
	2 nd Dose	76,78,805
Age Group 45-59 years	1 st Dose	10,37,58,165
	2 nd Dose	3,75,98,059
Over 60 years	1 st Dose	7,46,25,671
	2 nd Dose	3,56,64,301
Total		45,60,33,754

The new phase of universalization of COVID-19 vaccination has commenced from 21st June, 2021. The Union Government is committed to accelerating the pace and expanding the scope of COVID-19 vaccination throughout the country.

Out of the people infected since the beginning of the pandemic, **3,07,43,972** people have already recovered from COVID-19 and **42,360** patients have recovered in the last 24 hours. This constitutes an overall recovery rate of **97.38%**.

Recovered cases over 3.07 Cr & Recovery rate at 97.38%

India has reported 44,230 daily new cases in the last 24 hours.

Less than 50,000 Daily New Cases have been reported since thirty-three continuous days. This is a result of sustained and collaborative efforts by the Centre and the States/UTs.

44k Daily New Cases reported in last 24 hrs

India's Active Caseload today stands at **4,05,155** and active cases now constitute **1.28%** of the country's total Positive Cases.

With substantially ramped up testing capacity across the country, a total of 18,16,277 tests were conducted in the last 24 hours in the country. Cumulatively, India has conducted over **46 crore (46,46,50,723)** tests so far.

While on one side testing capacity has been enhanced across the country, **Weekly Positivity Rate is currently at 2.43%** and the **Daily Positivity rate stands at 2.44% today**. Daily Positivity rate has remained below 5% for 53 consecutive days now.

COVID-19 Vaccination Update

More than 48.03 Crore vaccine doses provided to States/UTs

More than 2.92 Crore balance and unutilized doses still available with States/UTs and private hospitals to be administered

As part of the nationwide vaccination drive, Government of India has been supporting the States and UTs by providing them COVID Vaccines free of cost. In the new phase of the universalization of the COVID19 vaccination drive, the Union Government will procure and supply (free of cost) 75% of the vaccines being produced by the vaccine manufacturers in the country to States and UTs.

VACCINE DOSES	(As on 30 July 2021)
SUPPLIED	48,03,97,080

IN PIPELINE

71,16,720

CONSUMPTION

45,27,93,441

BALANCE AVAILABLE

2,92,65,015

More than **48.03 crore (48,03,97,080)** vaccine doses have been provided to States/UTs so far, through all sources and a further **71,16,720** doses are in the pipeline. Of this, the total consumption including wastages is **45,27,93,441** doses (as per data available at 8 AM today).

More than **2.92 Cr (2,92,65,015)** balance and unutilized COVID Vaccine doses are still available with the States/UTs and private hospitals to be administered.

COVID-19 Vaccination- Myths vs. Facts

The Union Government committed to supporting the States in expanding their COVID19 Vaccination coverage and pace of vaccination

Uttar Pradesh's 'cluster approach' for vaccination and creating special 'pink booths' for women have added to its high vaccination coverage

Vaccination coverage consistently rising in Bihar

There have been some media reports alleging slow pace of COVID-19 vaccination drive in Uttar Pradesh and Bihar, further stating that it will take three years for both the states to fully vaccinate its population.

It is clarified that the news report is misleading as it takes in \to account the average daily vaccination rate from the beginning of the COVID vaccination drive in order to show a low rate of vaccination and then further uses this number to claim that the states will take many years to complete the vaccination drive for its citizens.

Furthermore, using an average when the availability of vaccines was extremely low across the world (including India) and then extrapolating the low rate by comparing it with present data when the vaccine supply is expected to be very high, may also lead to vaccine hesitancy which is a global issue during vaccination.

In contrast to this, the vaccine availability and vaccination rate have been consistently improving across the country. It must also be kept in mind that Uttar Pradesh is India's largest state in terms of population. As per the 2011 census, the state has over 19.95 crore population. UP's population is higher than many counties including Brazil, Russia, Pakistan, Bangladesh, to name a few.

Expedite the development of COVID vaccine for children: Vice President urges scientific fraternity

- Vaccination drive against COVID-19 should become pan-India 'Jan Andolan': Vice President VP appeals to people to get vaccinated; says there is no room for vaccine hesitancy
- VP urges media to educate masses on gains of vaccination
- VP stresses the need to step up vaccine supplies and vaccinate all people
- VP cautions people against becoming complacent by temporary decline in COVID-19 cases
- VP advises leaders of various political parties and their followers to follow Covid-appropriate behaviour
- Visits Bharat Biotech and lauds its scientists for developing an effective vaccine in a very short time frame

The Vice President, Shri M Venkaiah Naidu today urged the scientific fraternity to focus on expediting the development of COVID vaccine for children. He stressed that protecting children from the virus should be accorded priority.

Shri Naidu emphasized that the vaccination drive against COVID-19 should become a pan-India 'Jan Andolan' and appealed to the people to immunize themselves by taking the required doses of the vaccine.

Addressing scientists and staff of the Bharat Biotech International Limited after a visit to its plant at Genome Valley in Hyderabad, he said "there is no room for vaccine hesitancy". Urging everyone to get vaccinated, he said "there is no other more powerful way to protect ourselves and people around us".

Union Health Minister digitally inaugurates Whole Genome Sequencing National Reference Laboratory for AMR and New BSL 3 Laboratory on occasion of 112th Annual Day of NCDC

The recent COVID-19 pandemic has highlighted the need of creating vigilance and awareness on Zoonotic Diseases. Accordingly, Division of Zoonotic Disease Programme at NCDC under the "National One health Programme for prevention and Control of Zoonoses" has created IEC materials (Print, Audio & Video) on 7 priority zoonotic diseases namely Rabies, Scrub Typhus, Brucellosis, Anthrax, CCHF, Nipah, Kyasanur Forest Disease in India. The Union Health Minister along with MoS(HFW) unveiled these today.

2.27 lakh Pregnant Women receive COVID-19 Vaccines in less than a month

Pregnant Women became eligible for COVID-19 Vaccination since 2nd July after NTAGI's recommendations

Trainings for all Health Workers across States and UTs have been completed regarding vaccination of pregnant women

In a significant development, over 2.27 lakh pregnant women have received first dose of COVID-19 vaccine under the ongoing National COVID Vaccination drive. This can be seen as a result of regular counseling of the pregnant women by health workers and medical officers about risks of COVID-19 infection to pregnant women and benefits of COVID-19 vaccination. This sustained campaign has empowered pregnant women to make an informed choice on taking the COVID vaccination.
