COVID-19 Update

India's Cumulative COVID-19 Vaccination Coverage exceeds 71.65 Cr

Recovery Rate currently at 97.48%

43,263 New Cases reported in the last 24 hours**India's Active Caseload (3, 93, 614) is 1.19% of Total Cases****Weekly Positivity Rate (2.43%) less than 3% for last 76 days**

With the administration of **86,51,701** vaccine doses in the last 24 hours, country's COVID-19 vaccination coverage surpassed the cumulative figure of **71.65 Cr (71,65,97,428)** as per provisional reports till 7 am today. This has been achieved through 73, 56,173 sessions.

The break-up of the cumulative figures as per the provisional report till 7 am today include:

HCWs	1 st Dose	1,03,62,250
	2 nd Dose	85,38,334
FLWs	1 st Dose	1,83,34,029
	2 nd Dose	1,37,98,266
Age Group 18-44 years	1 st Dose	28,64,51,739
	2 nd Dose	3,87,13,940
Age Group 45-59 years	1 st Dose	14,03,00,422
	2 nd Dose	6,05,11,083
Over 60 years	1 st Dose	9,14,48,566
	2 nd Dose	4,81,38,799
Total		71,65,97,428

The Union Government is committed to accelerating the pace and expanding the scope of COVID-19 vaccination throughout the country.

The recovery of **40,567** patients in the last 24 hours has increased the cumulative tally of recovered patients (since the beginning of the pandemic) to **3, 23, 04,618**.

Consequently, India's recovery rate stands at **97.48%**.

Recovered cases over 3.23 Cr & Recovery rate at 97.48%

Sustained and collaborative efforts by the Centre and the States/UTs continue the trend of less than 50,000 Daily New Cases that is being reported for 74 consecutive days now.

43,263 new cases were reported in the last 24 hours.

43k New Cases reported in last 24 hrs

The Active Caseload is presently **3, 93, 614**. Active cases presently constitute **1.19%** of the country's total Positive Cases.

The testing capacity across the country continues to be expanded. The last 24 hours saw a total of 18,17,639 tests being conducted. India has so far conducted over **53.68 Cr (53, 68, 17, 243)** cumulative tests.

While testing capacity has been enhanced across the country, **Weekly Positivity Rate at 2.43% remains less than 3% for the last 76 days now.** The **Daily Positivity rate reported to be 2.38%.** The daily Positivity rate has remained below 3% for last 10 days and below 5% for 94 consecutive days now.

COVID Appropriate Behaviours very important, considering festive season, cautions COVID Working Group Chairman

Almost 30,000 - 45000 daily cases on an average are being reported in our country for last several weeks. This is reported mostly from specific geographic regions, especially Kerala, many North Eastern States and a few districts of Maharashtra and some other southern states. If we follow the genomic analysis of SARS-COV-2 viruses circulating during June, July and August, no new variants have emerged and on the basis of sero-survey conducted during July, the on-going COVID cases represent the susceptible individuals who are not yet immunized; they are affected as part of the last phase of second wave.

In the sero-survey of July, 66% to 70% people were found to be infected; this also means 30% people are still prone to infection; and that they can be infected any time particularly if they are still unvaccinated. Hence any complacency on the part of any of us throughout the country will cost hugely since the 30% people can be infected and many of them can develop severe disease and rarely fatal, like we witnessed during April and May 2021.

Hence, following COVID Appropriate Behaviours is absolutely essential and critical, especially with the coming festive season. Emergence of new mutation around this time can also be a reason for the arrival of a third wave.
