Diagnosis of Mental Health issues post covid-19

The “Global prevalence and burden of depressive and anxiety disorders in 204 countries and territories in 2020 due to the COVID-19 pandemic” study, published in Lancet public health, has estimated an increase of about 35 per cent in the prevalence of anxiety and depression in India during the COVID-19 pandemic.

For providing affordable and accessible mental healthcare facilities, the Government is implementing the National Mental Health Programme (NMHP) in the country. The District Mental Health Programme (DMHP) component of the NMHP has been sanctioned for implementation in 704 districts for which support is provided to States/UTs through the National Health Mission. Facilities made available under DMHP at the Community Health Centre (CHC) and Primary Health Centre (PHC) levels, include outpatient services, assessment, counselling/ psycho-social interventions, care and support to persons with severe mental disorders, drugs, outreach services, ambulance services etc. In addition to above services there is a provision of 10 bedded in-patient facility at the district level.
