DR JUSTICE D Y CHANDRACHUD

Judge, Supreme Court of India

Foreword

The e-Committee of the Supreme Court has been at the forefront of introducing digital reforms in the field of law. In the past one year, the pandemic has also pushed advocates, judges and litigants to adopt high tech solutions due to the closure of offices and courts in light of lockdowns and public health concerns. Working remotely, virtual courts, digital workplaces and electronic case management have become integral to how the legal profession is practiced and conducted. This has given us a rare opportunity to embrace technology not just as an interim measure but to transform our legal system to make it more efficient, inclusive, accessible and environmentally sustainable. The e-Courts Services Mobile Application is a step in this direction.

The e-Courts Services Mobile Application is a one stop electronic case management tool (ECMT) for advocates and litigants for cases filed in the District Courts and High Courts. It provides complete case history from filing till disposal including date wise case diary. It allows users to access orders/judgments, cause list, transfer details of the case and interim application status. A unique feature of the application is that an advocate can maintain a digital diary of all cases under "My Cases" tab.

All these facilities are available free of cost. The usage of the application will not only reduce the footfall at the court complexes but will also save time and effort for judges, court staff and other stakeholders. It will also ensure that geographical

constraints do not hinder access to relevant case information. We have also attempted to make the application accessible to persons with disabilities.

The ECMT tools have been discussed in detail in the manual with screenshots. Keeping in mind the linguistic and cultural diversity of India, the manual has been translated in 11 regional languages.

The improvement in technological capacities must be accompanied by a change in culture and mindset. I am happy to note that many advocates and litigants have already embraced the services offered through this mobile application with more than 57 lakh downloads so far. The application will pave the way for optimizing our legal system in an ever-evolving digital world.

FOREWORD

As the legal world is gradually turning digital globally, the process of ICT enablement of the judicial landscape in India has concurrently made significant strides. As an integral part of this multi-dimensional initiative, the eCourts Services Mobile App has been widely hailed as an effective Electronic Case Management Tool (ECMT). Its popularity is manifested in the growing number of downloads by lawyers, having already crossed the 57 lakh figure.

Robust Case Management and sound supporting systems are at the core of any well-functioning legal architecture. ECMT tool, enables a lawyer to efficiently manage case information, document assembly, calendaring, time-tracking of case status, accessing judicial decisions, compliance requirements etc. To cap it, ECMT is of immense convenience being available 24 x 7 with no geographical boundaries and easy access on no-cost basis. The eCourts Services Mobile App with its digital diary features has thus evolved into a must-have tool for lawyers to promote their professional efficiency.

Publication of this Manual on eCourts Services Mobile App is yet another laudable step by the eCommittee of the Supreme Court to create large scale awareness of this ECMT and in bringing its benefits to the doorstep of the lawyers' community. The manual is also available in Hindi and several other regional languages like Punjabi, Tamil, Gujarati, Odia and Nepali thus enhancing its outreach. I am confident that this Manual will be of great utility for the legal fraternity.
