Alleyway Encroachment Study (pilot) For Selected Areas in Dehradun

Date: 01/04/2024

By definition, alleyway encroachment is a term used to describe the development of structures on public property or natural areas such as encroachment by roads, encroachment by iron grills, and encroachment by vegetation or gardens, encroachment by forward ramps. In the context of Uttarakhand, Dehradun is indicated as a rapidly developing city. Every year many houses and buildings are constructed in Dehradun city by common people and others. After the completion of construction work, many people commit unauthorized encroachment around houses and buildings. As a result, traffic jams, obstruction in underground activities and other types of problems arise in the said areas. Keeping this problem in view, the work of Alley Encroachment Study (Pilot) is being done for some identified areas of Dehradun city on the basis of a pilot study by Uttarakhand Space Application Center. Under the above work, a geo database of encroached areas is being prepared on the basis of GIS based survey and shared with the concerned department. Identification of encroached areas, collection of geospatial database and creation of large scale map are some of the main objectives of this project. Identification of encroached areas, total encroached area and sharing of maps with the concerned department are the output results of this project. Dharampur and Mehuwala areas of Dehradun city were selected for study in the initial stage of the project. In the said project, ground truth data collection work was done by visiting the study area in the month of December and conducting survey work. In which work was done by collecting GPS

points, photographs and other related data of certain areas and creating a geo data base. The objectives of the present study are as follows

1. To identify encroachment areas in the study area.
2. Collecting GPS coordinates of encroachment areas.
3. Photography for verification.
4. Collecting other supporting data.

Beneficiaries – Municipal Corporation (Nagar Nigam), MDDA etc.

Benefits - Geo database of encroached areas, helpful in implementation of schemes etc.

How to apply -
