The platform was launched on 4th July 2022 to facilitate seamless access to multiple Government services through a single set of login credentials. MeriPehchaan enables users to authenticate themselves once and securely access various integrated applications without the need for repeated sign-ins. The platform integrates multiple identity providers such as JanParichay, DigiLocker, and e-Pramaan, thereby ensuring interoperability and a unified user experience. Users can register on the platform using basic details such as name, date of birth, and mobile number, and may complete verification through eKYC using Aadhaar, PAN, Driving Licence or APAAR. The platform supports advanced features such as multi-factor authentication, password-less login, and the ability to manage multiple accounts linked to a single mobile number. The NSSO framework significantly reduces the burden of maintaining multiple credentials, enhances data security, and provides a standardized authentication mechanism for Government services. It also benefits service providers by reducing the cost and complexity of developing independent authentication systems. MeriPehchaan thus serves as a secure, scalable, and citizen-centric digital identity solution, contributing to the vision of Digital India by improving ease of access to Government-to-Citizen (G2C) services.

Appendix-V

Procedure to be adopted for compilation of NTA scores for Multi-Shift Papers

Normalization procedure based on PERCENTILE SCORE

NTA may conduct Examinations on multiple dates, generally in two Shifts per day. The candidates will be given different sets of questions, one question paper per Shift, and it is quite possible that in spite of all efforts to maintain equivalence among various question papers, the difficulty level of these question papers administered in different Shifts may not be exactly the same. Some of the candidates may end up attempting a relatively tougher set of questions when compared to other sets. The candidates who attempt the comparatively tougher examination are likely to get lower marks as compared to those who attempt the easier one. In order to overcome such a situation, a "Normalization procedure based on Percentile Score" will be used to ensure that candidates are neither benefitted nor disadvantaged due to the difficulty level of the Examination. With the objective of ensuring that a candidate's true merit is identified and that a level playing field is created in the above context, the Normalization Procedure, set out below shall be adopted, for compiling the NTA scores for multi-Shift papers.

The process of Normalization is an established practice for comparing candidate scores across multishifts papers and is similar to those being adopted in other large educational selection tests conducted in India. For normalization across Shifts, NTA shall use the percentile equivalence.

Percentile Scores: Percentile scores are scores based on the Shift-wise relative performance of all those who appear for the examination. The marks obtained are transformed into a scale ranging from 100 to 0 for each Shift of examinees.

The Percentile Score indicates the percentage of candidates that have scored EQUAL TO OR BELOW (same or lower raw scores) that particular Candidate in that Shift. Therefore the topper (highest score) of each Shift will get the same Percentile of 100 which is desirable. The marks obtained in between the highest and lowest scores are also converted to appropriate Percentiles.

The Percentile score will be the Normalized Score for the Examination (instead of the raw marks of the candidate) and shall be used for the preparation of the merit lists.

The Percentile Scores will be calculated up to 7 decimal places to avoid bunching effect and reduce ties.

The Percentile score of a Candidate is calculated as follows:

$$100 \times \frac{\text{Number of candidates appeared in the 'Shift' with raw score EQUAL TO or LESS than the candidate}}{\text{Total number of the candidates appeared in the 'Shift'}}$$

Note: *The Percentile of the Total shall* ***NOT be*** *an aggregate or average of the Percentile of individual subject. Percentile score is not the same as percentage of marks obtained.*

Example: Suppose a test was held in 4 Shifts of Examinees as per details given below:

(Allocation of Days and shifts were done randomly)

(a) Distribution of candidates were as follows:

Day-1 Shift-1, Day-1 Shift-2, Day-2 Shift-1 and Day-2 Shift-2

Day/Shift	No of Candidates			Marks	
	Absent	Appeared	Total	Highest	Lowest
Day-1 Shift-1	3974	28012	31986	335	-39
Day-1 Shift-2	6189	32541	38730	346	-38
Day-2 Shift-1	6036	41326	47362	331	-49
Day-2 Shift-2	9074	40603	49677	332	-44
Total	**25273**	**142482**	**167755**	**346**	**-49**

In this method of scoring the HIGHEST RAW SCORE in each paper (irrespective of the raw scores) will be the 100 Percentile indicating that 100% of candidates have scored equal to or lesser than the highest scorer/ topper for that Shift.

Highest Raw Score and Percentile Score: All the highest raw scores will have normalized Percentile Score of 100 for their respective shift.

Day/Shift	Total Candidates Appeared	Highest Raw Score	Candidates who scored EQUAL OR LESS THAN Highest Raw Score	Percentile Score	Remarks
Day-1 Shift-1	28012	335	28012	100.0000000 [(28012/28012) *100]	i.e. All the highest raw scores in each shift would be normalized to 100 Percentile Score.
Day-1 Shift-2	32541	346	32541	100.0000000 [(32541/32541) *100]	
Day-2 Shift-1	41326	331	41326	100.0000000 [(41326/41326) *100]	
Day-2 Shift-2	40603	332	40603	100.0000000 [(40603/40603) *100]	

Lowest Raw Score and Percentile Score: The percentile Score of all the lowest raw scores will depend on the total number of candidates who have taken the Examination for their respective Shifts.

Day/Shift	Total Candidates Appeared	Lowest Raw Score	Candidates who scored EQUAL OR LESS THAN Lowest Raw Score	Percentile Score	Remarks
Day-1 Shift-1	28012	-39	1	0.0035699 [(1/28012) *100]	i.e., Percentile Score of all the lowest raw scores are different, i.e., Percentile Score depends on the total number of candidates who have taken the Examination for their respective shift.
Day-1 Shift-2	32541	-38	1	0.0030730 [(1/32541) *100]	
Day-2 Shift-1	41326	-49	1	0.0024198 [(1/41326) *100]	
Day-2 Shift-2	40603	-44	1	0.0024629 [(1/40603) *100]	

The following is a further explanation of the interpretation of the raw scores and Percentile Score in Shift -3 (Day-2 and Shift-1) with 41326 candidates who have taken the examination.

Candidate	Percentile Score	No of Candidates	Raw Score	Remark
A	**100.0000000** [(41326/41326) *100]	**1**	**331**	Indicates that amongst those appeared, 100% have scored either EQUAL TO OR LESS THAN the candidate A **(331 raw score)**.
				It also indicates that no candidate has scored more than the candidate A **(331 raw score)**.

STEP-BY-STEP PROCEDURE FOR NORMALIZATION AND PREPARATION OF RESULT:

Step-1: Distribution of Examinees in two shifts:

Candidates have to be distributed into two Shifts randomly so that each Shift has an approximately equal number of candidates.

Day-1 Shift-1, Day-1 Shift-2

In the event of more number of days or less number of Shift, the candidates will be divided accordingly.

This will ensure that there is no bias in the distribution of candidates who shall take the examination. Further, with a large population of examinees spread over the entire country, the possibility of such bias becomes remote.

Step-2: Preparation of Results for each Shift:

The Examination results for **each Shift** would be prepared in the form of

- Raw Scores
- Percentiles Scores of Total raw scores.

The Percentiles would be calculated for each candidate in the Shifts as follows:

Let TP1 be the Percentile Scores of Total Raw Score of that candidate.

$$\text{Total Percentile (TP1):} \quad 100 \times \frac{\text{No. of candidates appeared from the Shift with raw score EQUAL TO OR LESS than the score of the candidate}}{\text{Total No. of candidates who appeared in the Shift}}$$

Step-3: Compilation of NTA score and Preparation of Result:

The Percentile scores for the Total Raw Score for all the Shifts (Day-1 Shift -1: Day-1 Shift -2) as calculated in Step-2 above would be merged and shall be called the NTA scores which will then be used for the compilation of results and further processing for deciding the allocation.

In the event of the percentiles corresponding to the eligibility (cut-off) marks for the multi Shifts being dissimilar/unequal, the lowest will be the eligibility cut-off for that category for all candidates (i.e. all Shifts).

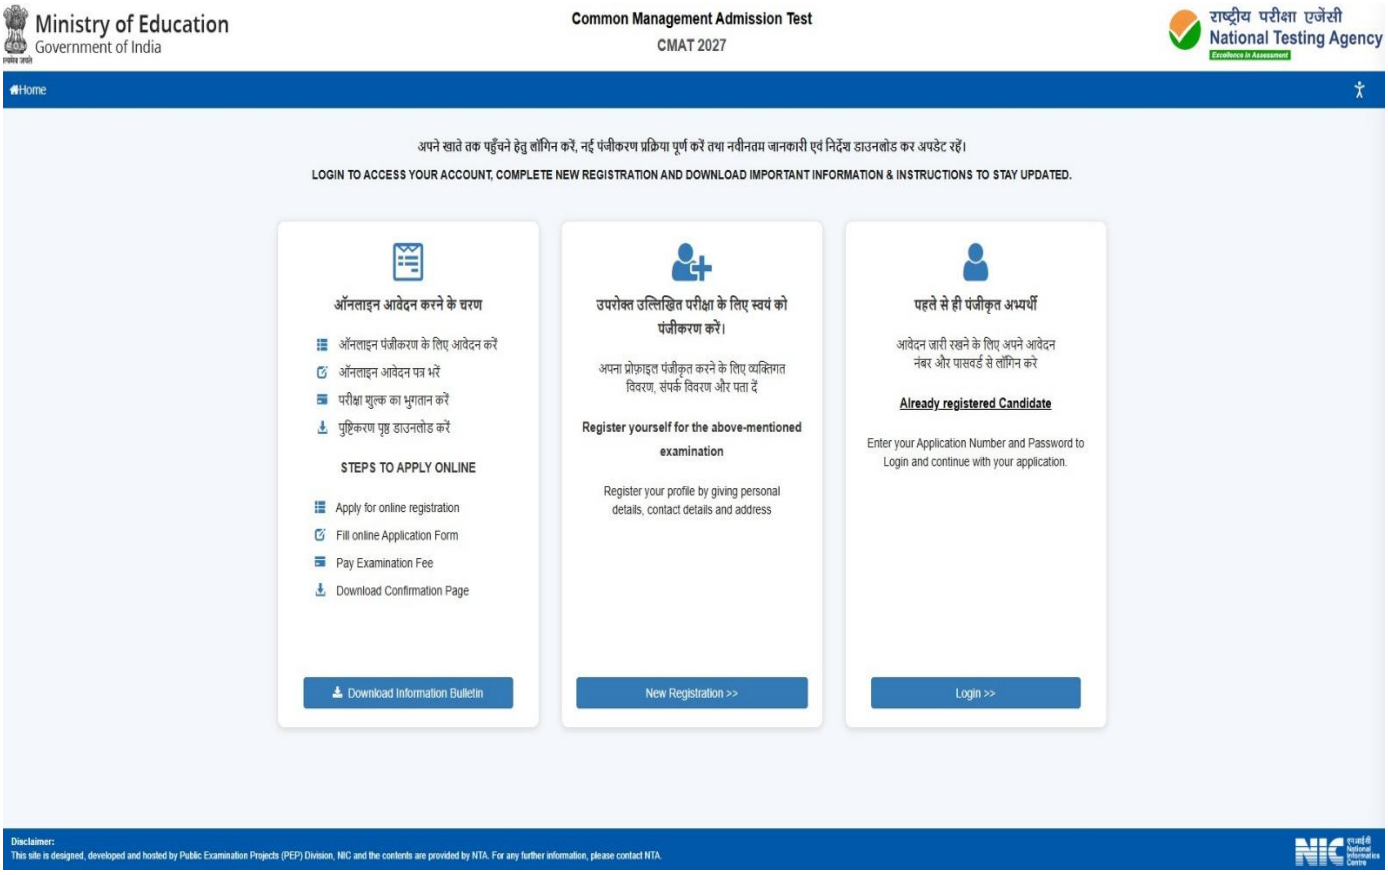

For Example: In the Examination held in two Shifts, if the 40% marks correspond to a Percentile score of 78 in Shift 1 and 79 in Shift 2, then all those equal to or above 78 percentiles (Percentile score of 100 to 78) in both Shifts will become eligible in General Category. A similar method will be adopted for the other categories to determine eligibility cut-offs. In case the examination is held in more number of Shifts the same principle shall apply.
