of May 2025

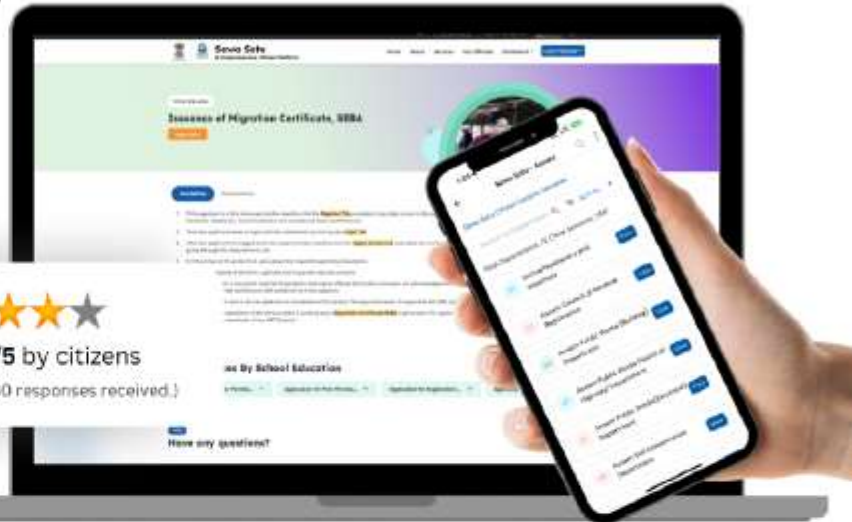

Sewa Setu continues to streamline citizen services across Assam. As of May 2025, 807 services are live on the platform, with 115 in various stages of User Acceptance Testing (UAT) and 30 under development or modification. The platform has processed over 1.82 crore applications, achieving a disposal rate of 89.6%.

During the month, 22 additional services were added to the UMANG platform, increasing the total Sewa Setu services available on UMANG to 244.

The Issuance of Migration Certificate service (SEBA) under the School Education Department, previously managed as an end-to-end workflow, has now been integrated into the department's portal. The revamped service features auto-approval, enabling instant certificate delivery and significantly enhancing convenience for students.

Rated 3.98*/5 by citizens

TECHNICAL SUPPORT

Highlights

Assam is committed to fostering a business-friendly environment through comprehensive regulatory reforms, digital governance, and seamless investment facilitation. The Ease of Doing Business (EoDB) initiative aims to simplify business processes by reducing bureaucratic hurdles, ensuring faster approvals, and enhancing transparency.

At the core of these efforts is the Assam Single Window System, a centralized digital platform designed to streamline business approvals. By enabling auto-renewals, self-declarations, and the elimination of redundant approvals, the state has significantly reduced compliance burdens, facilitating a smoother experience for businesses.

Highlights (Report- February, 2025)

URL: <https://cmdashboard.assam.gov.in>

The **CM Dashboard** was initiated following the 2021 Varanasi Chief Ministers' Conclave, where the Hon'ble Prime Minister underscored the significance of **data-driven governance** in enhancing public service delivery. This initiative aligns with the government's vision of leveraging real-time, technology-driven insights for effective decision-making.

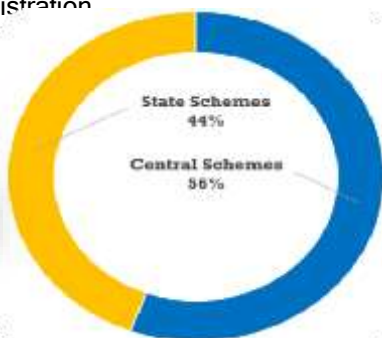

The **dashboard** is structured around **Key Performance Indicators (KPIs)**—measurable policy goals aimed at optimizing governance and improving service outcomes. It serves as a "**Dashboard of Dashboards**" consolidating critical data across multiple government schemes into a single, comprehensive interface.

A key feature of this dashboard is its **automated data integration** mechanism, making it one of the first **Chief Minister's Dashboards** to seamlessly fetch real-time data directly from **departmental scheme portals** through **APIs**. The system is designed to ensure **scheduled, automated data synchronization** without the need for manual intervention, thereby enhancing **accuracy, transparency, and efficiency** in governance.

This initiative marks a significant step towards **digital governance**, reinforcing the government's commitment to **evidence-based policymaking** and citizen-centric administration.

Assam is the front-runner state in all aspects in transport project. Assam has implemented the highest number of contactless services (56 services) in India.

The Transport Mission Mode Project (eTransport MMP), driven by the Ministry of Road Transport and Highways (MoRTH) and executed by NIC, has successfully automated the operations of District Transport Offices (DTOs) across Assam.

On a national scale the Transport Project has set up a consolidated nationwide transport database with real-time update and availability and has launched a host of citizen-centric and trade-centric applications, contributing greatly towards the country's e-Governance initiative under the Digital India Programme.

THIS MONTH'S APPLICATION SUMMARY

2751904	6062879	19675782
Driving License Issued	Vehicle	Transaction

Assam CM-TRANS (Chief Minister-Transport Randomized Allocation Networked System)

Assam CM-TRANS (Chief Minister-Transport Randomized Allocation Networked System) uniformly distributes the work in all the 33 District Transport Offices (DTOs) of Assam and makes the backend intranet contactless. The workflow was the brainchild of the Chief Minister of Assam and hence the system has been named as such. A service application submitted in one DTO is randomly allocated for processing in any other DTO based on the workloads of the DTO.

Benefits to Citizens:

The cost has decreased and revenue has increased due to increased capacity to process applications faster. Making the backend contactless and has stopped all corrupt practices. All payments are digital and done online. Besides eliminating role of middlemen, citizens also do not have to visit transport offices resulting in saving in travel costs and time. All manual processes have been automated.

Land Records Project

Department of Revenue and Disaster Management, Govt. of Assam

NIC एनआईसी
National Informatics Centre

Highlights

URL: <https://ilrms.assam.gov.in/>

The aim of the project is to digitize various processes of Land record system for providing online G2C services. All the G2C services are provided through Sewasetu portal, which is single window e-Governance portal for citizen services. There are several applications under the Land Record, i.e. Basundhara, Dharitree, Bhunaksha, eKhazana, Chitha, Svamitva, NOC, Landhub, etc. and all these are integrated. The main highlights of the project are:

- Digital signature/ e-Signing
- E-KYC through Aadhaar and PAN
- SMS service
- e-Payment through e-GRASS
- Use of mobile app for geo-tagging
- SSO implementation
- Multifactor authentication
- Aadhaar seeding of land owners
- API based integration of 5 external applications, i.e. AGRISTACK, APDCL, DoHUA, Paddy procurement and PM Gatishakti.
- Integration with property chain. POC completed

The Government of Assam (GoA) has launched three Mission Basundhara (MB) projects, out of which two have been successfully completed.

The eOffice product of NIC aims to support governance by ushering in more effective and transparent inter and intra-government processes. The vision of e-Office is to achieve a simplified, responsive, effective and transparent working of all government offices.

The Assam Government has embarked on a transformative journey by adopting the eOffice platform. eOffice (eFile) has been implemented in almost 350 plus offices which includes Departments, Directorates, S.P. offices, DC offices and Co-district offices. In the next phase, eOffice (eFile) will be rolled out in district level offices of line departments.

Departments

Single Sign-on (SSO) with Parichay Platform: eCabinet is onboarded to NIC's Parichay Platform, allowing eOffice users to log in seamlessly.

Seamless Integration: eCabinet is integrated with Aadhaar for eSign and supports DSC token based digital signatures for secure authentication.

Tracking of Additional Announcements: Any additional announcements made during Cabinet meetings are updated in eMantri Sabha, with real-time progress tracking.

Monitoring Follow-up Actions: Departments are accountable for implementing Cabinet decisions, and their progress is monitored within the system.

TOP 5 Departments with Most Approved Decisions

Top 5 Departments by Implementation Rate (%)

Digital Efficiency in Governance

During meetings, Ministers view the agenda on dedicated tablets, cutting out extensive paper printing. This digital shift improves decision making, lightens administrative loads, and streamlines governance for greater efficiency.

Since its launch in May 2023, eMantri Sabha has digitized Cabinet meetings, boosting governance with transparency, streamlined workflows, and swift decision-making. Tailored training and ongoing support ensure smooth adoption, with initial comprehensive sessions held twice for all departments, followed by on-request one-on-one assistance for effective system use.

National Generic Document Registration System (NGDRS) Assam

A common, generic platform for registration

Highlights

URL: <https://ngdrs.assam.gov.in>

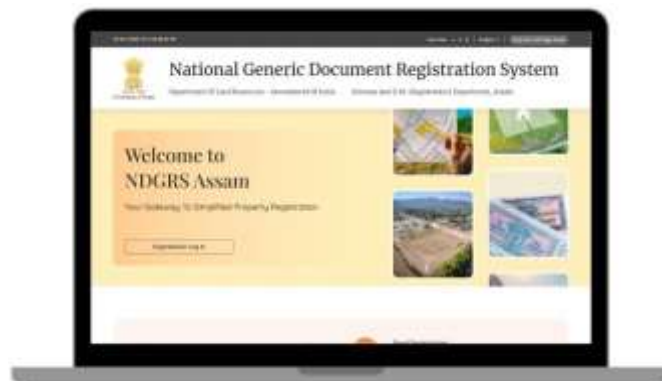

National Generic Document Registration System (NGDRS) has been launched in Assam on 14th February, 2024.

NGDRS Assam has been customized to integrate with Dharitree, NOC, e-Stamp, e-Gras, Aadhaar e-KYC, PAN verification and APDCL. A PoC of integration with Blockchain based Property chain has been done with NGDRS.

A new e-Deed module for paperless registration has been introduced on February 1, 2025, covering 28 document articles.

Key Features of the e-Deed Module:

- Auto-generated e-Deed based on the selected article and metadata.
- Signatures of the involved parties are captured using a digital pen pad device.
- The registering officer digitally signs the document using a DSC device.
- The applicant is allowed to print the registered e-Deed only once.

Public Distribution System

A Comprehensive Citizen Platform

Highlights

The Public Distribution System (PDS) in the country facilitates the supply of food grains and distribution of essential commodities to a large number of poor people through a network of Fair Price Shops at a subsidized price on a recurring basis. The vision of the project is to ensure Food Security for citizens of the country.

- Cost-effective, fast and targeted delivery of food grains.
- Reduced complaints of divergence and other corrupt practices.
- Consumers can get online information regarding their ration shops, availability of food grains and distribution of essential commodities.
- Status of ration cards and number of registered card holders.
- Transparency in the supply chain management

The Finance Department (FD), Government of Assam, has decided to receive payments electronically. e-payment is a mode of payment in addition to the conventional methods of payment offered by the Government of Assam. The acceptance of on-line payment of Assam State's Taxes through the internet portals of various banks has been developed, without having any implication on the existing procedure of the executive and accounting agencies of the Department. To avail of this facility the taxpayer is required to have a net banking account with any of the banks listed by the government on this site. Facility of Payment across the Bank Counter is made available (with limited Banks) for those who do not have net banking account with Bank participating in GRAS.

- This is a 24X7 facility and citizen can make the payment any time of the day.
- On-Line Filling of single challan form facilitates minimum fields of the challan to be filled.
- Instant online receipts for payment made and instant online banks transaction number becomes available.
- One can pay personal taxes as well as behalf of the firm, company and others.

CDA Guwahati, established on 15th July 1983 by the GOC-in-C Eastern Command, Calcutta, began as a Liaison Cell and Financial Advice Agency for Army and Border Roads Units in North Eastern States and Bhutan. Initially operating as a nucleus staff under CDA Patna, it evolved into a full-fledged Regional CDA on 1st April 1988, managing Accounts and Store Audit Sections. Today, CDA Guwahati serves as the Financial Advisor to the GOC-in-C Eastern Command, Formation Commanders, and Border Road Organization units across Assam, Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, Tripura, and Bhutan.

The office relocated to its current premises, "Udayan Vihar," Narangi, Guwahati-781171, in June 1994. CDA Guwahati ensures financial oversight, audit support, and advisory services for military and border road operations in the region. Currently, the platform is under maintenance to address security concerns, with ongoing efforts to enhance its features and user experience for future operations.

MONTHLY USER HIGHLIGHTS

Data is currently unavailable due to ongoing maintenance.

TECHNICAL SUPPORT

CDA Guwahati leverages a secure digital platform to manage financial advisory, audit, and liaison services, ensuring transparency, efficiency, and compliance with government standards.

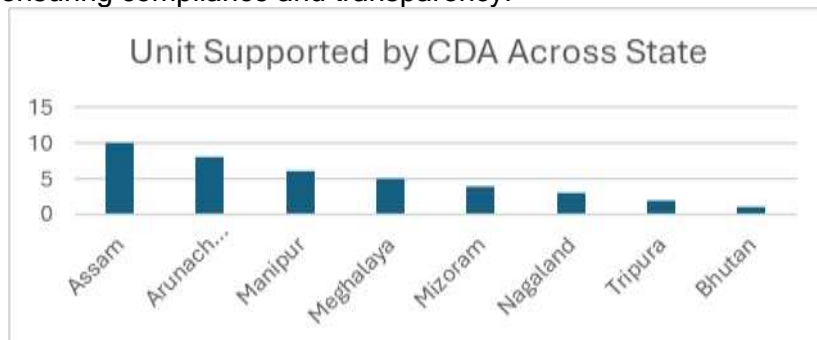

THIS MONTH'S APPLICATION SUMMARY

Data is currently unavailable due to ongoing maintenance.

KEY PERFORMANCE INDICATORS

Financial advisory support was provided to over 50 units across the North Eastern States and Bhutan.

Streamlined audit processes for Accounts and Store Sections, ensuring compliance and transparency.

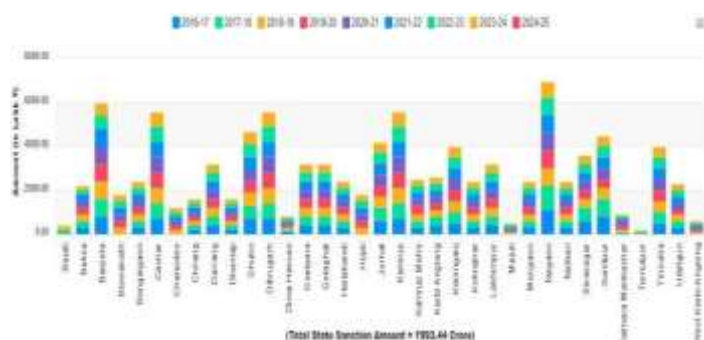

Highlights

A Scheme Monitoring System for the Transportation and Development Department, Government of Assam, facilitates the monitoring of physical and financial progress of schemes under MLAADS, Suhrud, Untied Fund, Assam Darshan, and Assam Adarsh Gram Yojna. It integrates with Bharat Maps, enabling geo-tagging of schemes, and allows for the upload of Utilization Certificates (UC) and photos. The system offers user-friendly reporting and monitoring services and is integrated with the CM Dashboard through APIs.

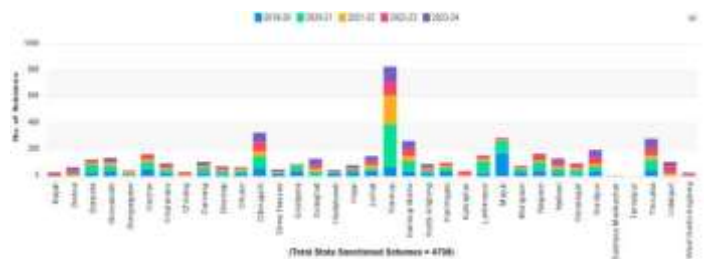

FUNCTIONALITIES

- To translate the Government's developmental policy into a proper implementation framework and ensure its aim at achieving a stable growth rate.
- To promote Public Private initiatives in infrastructure and various related sectors.

Medical Asset Management System (Med-AMS) is a comprehensive solution designed to streamline the asset management processes for medical facilities.

In the month of February, A total of 46 major assets and 9 minor assets are entered and these are reflected in CM's Dashboard. Overall, 16 health institutes have been onboarded to the system, with a total of 43,610 minor assets, 3,226 major assets, and 40 tickets raised.

To improve the platform's user experience, the existing leaderboard and general statistics, including pie charts and monthly graphs, were maintained and refined for better usability.

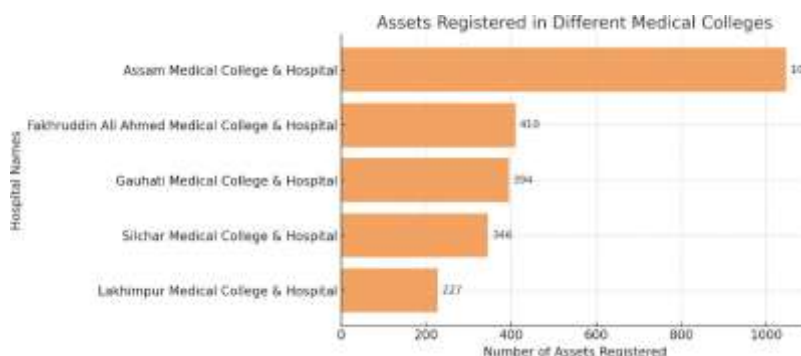

Med-AMS automates and centralizes the management of medical equipment, supplies, and other assets, allowing for improved accuracy, efficiency, and transparency. With Med-AMS, medical facilities can keep track of their assets from procurement to disposal, ensuring proper maintenance and utilization.

Medical College Transfer Management System (MTMS)

Highlights

URL: <https://mtms.assam.gov.in>

Health Care Providers in Medical Colleges and Hospitals of the State apply for transfer from their present place of posting from time to time on various grounds. Due to off-line process of transfer application and its large quantity of numbers, the management of such transfer processes consumes time and it also creates difficulties for the management and applicants to trace their transfer applications. To streamline such cumbersome process, Medical Education & Research Department, under visionary guidance of Hon'ble Chief Minister, Assam requested NIC Assam to develop comprehensive end to end application software. The Medical College Transfer Management System Portal (MTMS) is developed to address the transfer requests promptly for Medical Staffs of various Medical Colleges and Hospitals of Assam.

Objectives:

MTMS was developed to address the challenges associated with the offline transfer application process for health care providers posted in medical colleges and hospitals of Assam.

The application software has been developed to handle the large volume of transfer requests more efficiently, reduce processing time, and provide a transparent way for applicants to track the status of their applications.

▼ WHAT IS 'Medical College Transfer Management System (MTMS)'?

Ans: The Medical College Transfer Management System (MTMS) is a digital portal developed by the Medical Education & Research Department under the guidance of the Hon'ble Chief Minister of Assam. It aims to streamline and manage the transfer processes for health care providers in medical colleges of Assam. The system simplifies the transfer application process, making it more efficient and easier to track for both applicants and administrators.

▼ Why was MTMS developed?

Ans: MTMS was developed to address the challenges associated with the offline transfer application process for health care providers in medical colleges. The system was created to handle the large volume of transfer requests more efficiently, reduce processing time, and provide a transparent way for applicants to track the status of their applications.

▼ Who can use the MTMS portal?

Ans: The MTMS portal is intended for health care providers working in medical colleges across Assam. This includes serving staff, paramedics, technicians, and other Grade-III and Grade-IV supporting staff who are applying for transfers from their current posting.

Floods are devastating natural disasters that can cause significant damage to property, infrastructure, and human life. Riverine floods, caused by heavy rainfall or snowmelt, require real-time monitoring of river water levels by disaster managers to ensure sustainable water resource management and prevent potential disasters. The current manual river gauge system has limitations in terms of precision, reliability, and it is also labour-intensive, time-consuming, and error-prone.

Key Highlights

- An IoT-based system that automates water level monitoring during flood season.
- Ensures real-time data transmission with minimal human intervention.
- A software dashboard (<https://jaltarangini.assam.gov.in>) for real-time data visualization.
- Model with non-contact measurement, high precision, and 4G/RF data transmission.

Impact Created

For Disaster Managers:

- Accurate, real-time, 24x7 river water level data.
- Reduced manpower & operational costs for water level monitoring.
- Historical data for better risk assessment.

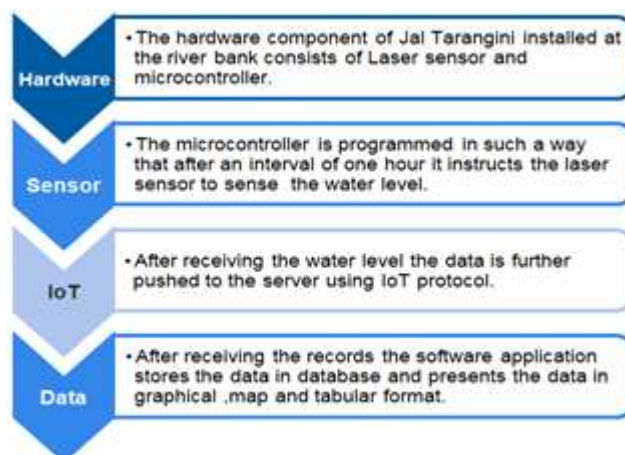

For Citizens:

- Mobile access to reports
- Timely alerts for evacuation and safety

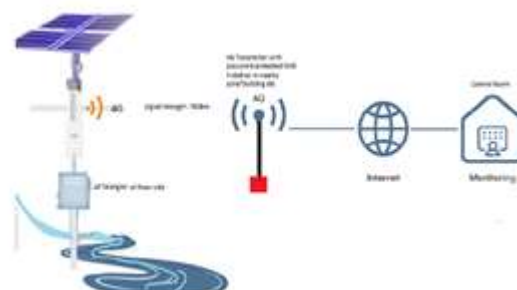

Technology Stack Used

- Microcontroller: Used for Data processing & Controlling the various devices.
- Communication Module. For data transmission
- Floating Sensors/Laser. Used for sensing the current water level.
- MCP23017 I2C I/O extender IC. Used for extending the I/O capabilities of microcontroller.
- Solar Cell Used for power the devices
- Python/Postgresql as development platform

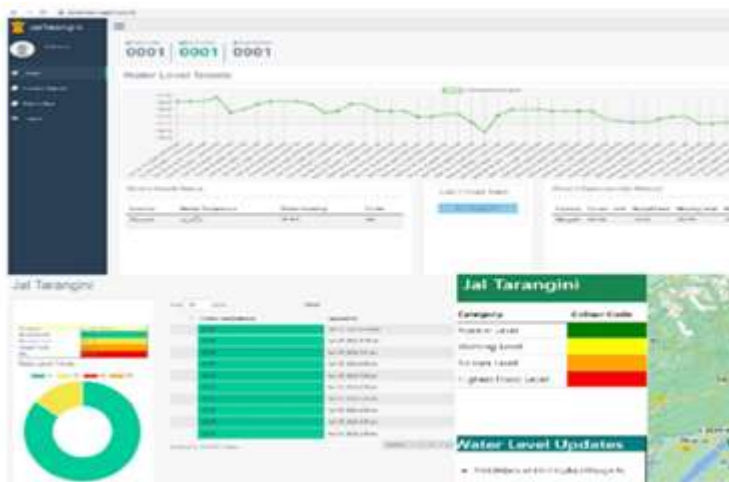

HOW IT WORKS

Web based dashboard for data visualization

Fishery Assets Portal and MatsyaBaibhav Mobile Application

Ghare Ghare Pukhuri Ghare Ghare Maach (GGPGGM)

Highlights

URL: <https://fisheryassets.assam.gov.in>

Matsya Baibhav mobile application and Fishery Assets Portal has been developed by NIC, Assam State Centre for Department of Fisheries, Assam to geo-tag the assets created under Ghare Ghare Pukhuri Ghare Ghare Maach (GGPGGM) a Government of Assam scheme.

Matsya Baibhav is a digital initiative to enhance fisheries management in Assam. Launched under the GGP GGM project, it tracks and geo-tags fishery assets using a mobile app and web portal integrated with Bharat Map Services. With 9,083 ponds created and 9,029 geo-tagged, it ensures transparency, real-time monitoring, and data-driven decision-making. By reducing fish imports and boosting self-sufficiency, Matsya Baibhav plays a key role in Assam's fisheries development.

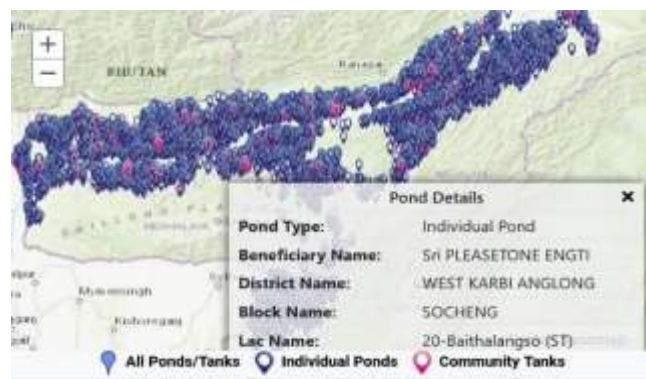

Objectives:

- To build a common platform for monitoring of the schemes in the Web portal.
- To build a system that can provide up-to-date status of the GGP GGM scheme to the management.
- To get the summary status of the scheme through the dashboard and graphical representation of consolidated data and detailed status through various reports.
- To view the presence of ponds/ tanks in the map with detailed parameters.
- To build a system where dashboard and reports are accessible to public.

THIS MONTH'S APPLICATION SUMMARY

Total Ponds/Tanks GGPGGM: 9083	Total Ponds Geotagged: 9029	Geotagged In Current Under Month: 0
Individual Ponds: 8706	Individual Ponds: 8650	Individual Ponds: 0

URL: <https://nextgen.ehospital.gov.in>

The NextGen e-Hospital application is a Hospital Management Information System (HMIS) designed for the internal workflows and processes of hospitals. NextGen eHospital is a one-stop solution which helps in connecting the patients, hospitals, other healthcare service providers and doctors on a single digital platform.

The eHospital is Cloud-based, Web-based and HL7(Health Level Seven International) compliant HMIS application available through Software as a Service (SaaS) model for managing healthcare service delivery in government hospitals across the country. MoHFW has been emphasizing that the creation of electronic health records (EHR) of patients across the country is one of the significant priorities of the ministry.

NextGen eHospital PMU Management App

The Mobile App is a powerful tool designed to streamline and optimize proper management and review & monitoring of implementation status of NextGen eHospital application across health facilities in the State of Assam. It consists of an Assam specific Dashboard. It offers a platform that brings together all the stakeholders for efficient management, tracking, and communication among PMU, NIC, NHM. Geotagging of hospitals is going on in NextGen PMU Management Mobile App.

CUMULATIVE SUMMARY FOR THE STATE OF ASSM

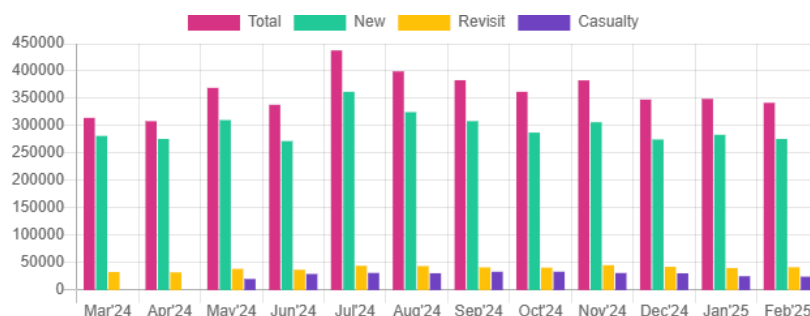

Hospital Implemented: 79
Total Patients Registered: 12987391
Total ABHA Registration: 4,42,549
Total IPD Transaction: 32007

NextGen eHospital PMU Team

The NextGen PMU team, led by a Team Lead and supported by 9 PMU members, is responsible for the successful implementation and support of the NextGen application across health facilities in Assam. They also track implementation progress and escalate complex challenges as needed.

Training Sessions

The NextGen eHospital PMU Team conducted over 100 training sessions, including both on-site and remote, across various districts in Assam. More than 40 health facilities have been visited by the PMU Team until now.

Result Declaration Portal

NIC एन आई सी
National Informatics Centre

Highlights

URL: <https://resultsassam.nic.in>

The Result Declaration Portal is an online platform utilized by the Board of Secondary Education, Assam (SEBA) and the Assam Higher Secondary Education Council (AHSEC) to publish the examination results for students in Assam. This portal facilitates the announcement of results for both the High School Leaving Certificate (HSLC) Examination and the Higher Secondary (HS) Final Examination in a structured and efficient manner.

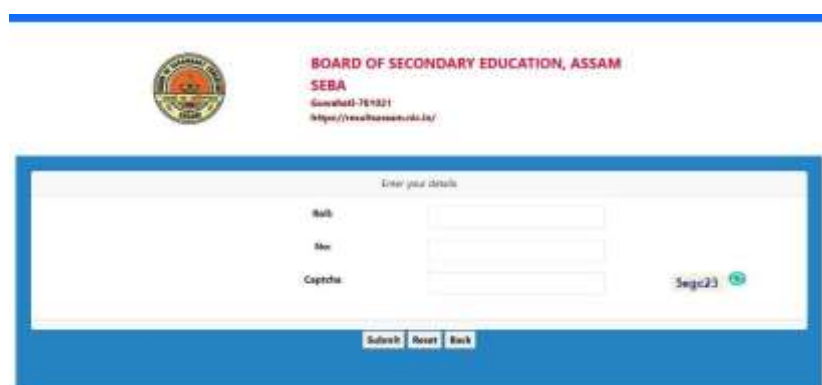

By providing digital access to results, the portal ensures a smooth and timely declaration process, eliminating the need for students to visit their respective schools or examination centres to collect physical mark sheets. It serves as a crucial tool in Assam's education system, enabling students, parents, and educational institutions to access examination results conveniently from anywhere.

Objectives

- To enable the HSLC candidates to view their marksheets online.
- Eliminate the need for physical visits to schools or centres.

Implementation Status

- Operational Since: The Result Declaration Portal has been in use for the past 14 years, publishing HSLC and HS examination results.
- Recent Update: A new self-upload module has been introduced, allowing authorized users to upload results directly to the portal.

The "Chief Minister's Atmanirbhar Asom Abhijan 2023" is a visionary initiative aimed at addressing the issue of unemployment and fostering inclusive progress in the state. By empowering the youth with self-employment opportunities and seeking collaboration from various stakeholders, the government is taking a significant step towards building a more self-reliant and prosperous Assam. This holistic approach not only benefits individuals but also contributes to the overall socio-economic development of the state, creating a brighter future for all its residents.

Under this initiative, the government is taking the inaugural step to lay the foundation for a brighter future. The key objective is to enable unemployed youth to become self-reliant by providing them with the necessary resources, guidance, and support. This includes training programs, financial assistance, and access to markets.

Project Sadbhavana is an initiative by the Government of Assam aimed at transforming bureaucratic processes and enhancing citizen engagement. Launched on February 1, 2022, the project has streamlined file handling, improved transparency, and eliminated the need for physical visits by citizens. Following the successful completion of Phase 1, it transitioned into a permanent portal on May 17, 2023, providing continuous access to administrative resolutions. Sadbhavana enables citizens to submit requests digitally for resolving pending files in various government offices, reducing paperwork and simplifying the process. Sadbhavana also can search for records in eOffice, provided the relevant file has been onboarded onto eOffice. Sadbhavana has now been enhanced to include the district level offices of departments as well.

The “Matri Pitri Vandana” portal enables Government of Assam employees to apply for special casual leave online.

The Hon'ble Chief Minister Dr. Himanta Biswa Sarma has urged the government employees to make use of the special holidays in spending quality time with parents, in-laws and other family members. This facility is allowed to be availed once during a year.

Government employees who are interested in this special Casual leave will be able to avail by applying online.

In January 2024, special casual leave was allowed for 2 days in November. A total of 82424 applications were received through the portal.

Highlights

URL: <https://assamcivilianawards.assam.gov.in/>

In a remarkable endeavour to acknowledge exceptional contributions and achievements, the Government of Assam has introduced the Assam Civilian Awards.

This prestigious recognition has been established in the spirit of public service and as a tribute to those who have exhibited extraordinary performance across diverse fields of human endeavor.

Modelled after the esteemed Bharat Ratna and Padma Awards of the Government of India, the Assam Civilian Awards are poised to celebrate outstanding individuals who have left an indelible mark on society.

Every year, nominations for each of the award categories are received through the portal.

225 applications were received in the year 2022, while for 2023, 90 applications were received through the portal. In 2024, 266 applications were received.

Highlights

ePrastuti, initiated by NIC Assam in 2015, aims to standardize government websites to enhance citizen engagement in e-Governance. The Standardized Website Framework (SWF) was developed in 2016, ensuring compliance with GIGW and WCAG guidelines. This secure, scalable platform serves as a blueprint for all government department websites. In line with technological advancements, SWF has been upgraded to version 2.0 for improved functionality.

A total of 299 websites, including the Assam State Portal, Raj Bhavan, departments/sub-departments, districts and co-districts have been built under the ePrastuti Framework.

Assam is one of the forerunners in the Integrated Road Accident Database (iRAD) Project which is an initiative of the Ministry of Road Transport and Highways (MoRTH), objective to improve road safety in the country. **Assam was the first to implement the PM Cashless Scheme for road accident victims as a pilot state.** Under this scheme, all road accident victims are eligible for cashless treatment up to INR 1,50,000 for up to seven days from the start of their treatment.

The overall objective of the project is the establishment of an accurate and uniform road accident data collection mechanism from all over India. For this purpose, iRAD mobile & web application has been developed. This is followed by training & handholding support to stakeholder departmental users through state / district roll out managers.

THIS MONTH'S ACCIDENT SUMMARY

899 Total	168 Fatal	593 Injury	23 TMS case Disposed
---------------------	---------------------	----------------------	-----------------------------------

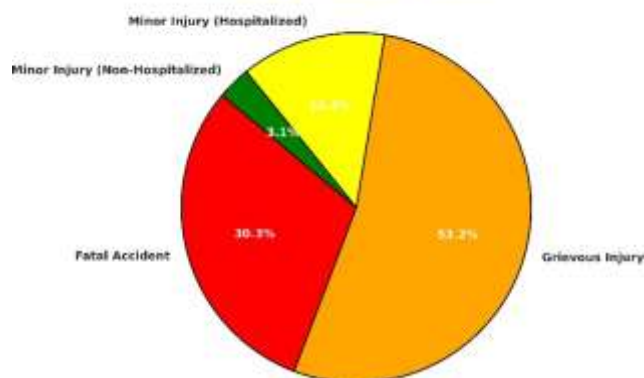

TRAINING SESSIONS

960 training sessions were provided to 6,433 participants.

The Project facilitates road accident data collection by 4 stakeholder departments Police, Transport, Highways, Health Departments. eDAR (e-Detailed Accident Report) is extended version of iRAD. eDAR is used for MACT claim settlement and has been implemented in Assam.

The **Online Management Information System (MIS)- NIRMAN SAKHI** for the **Assam Building & Other Construction Workers Welfare Board (ABOCWWB)** is designed to streamline worker registration and facilitate access to government welfare schemes, enhancing operational efficiency and transparency. The system enables construction workers to **register online**, **verify their identity through Aadhaar-based eKYC**, and **subscribe to various benefits**, with seamless integration of **eGRAS for payments**, **SMS APIs for notifications**, and **PFMS for financial transactions**. Key modules include **Worker Registration**, **Accounting & Finance**, **Scheme Management**, and **Cess Collection**, ensuring comprehensive data management and tracking. A **mobile application** further enhances accessibility, allowing workers to register and apply for benefits conveniently.

The Assam Building & Other Construction Workers' Welfare Board has more than 7 lakhs Building and Construction workers registered as beneficiaries and has formulated various welfare schemes such as Pension benefits, Marriage assistance, Maternity assistance, Death benefits, Skill training, Medical assistance, Educational assistance, Cash awards, Transit shelters for the upliftment of the construction workers.

Key Highlight of the Project

- **Online Worker Registration:** Enables construction workers to register digitally.
- **Aadhaar-based eKYC:** Facilitates identity verification through Aadhaar authentication. This has been implemented for the first time in Assam for any Govt Project
- **Aadhar Data Vault:** Use Of Aadhar Data Vault
- **Benefit Subscription:** Allows workers to subscribe to various welfare schemes.
- **eGRAS Integration:** Ensures seamless online payment processing.
- **SMS API Notifications:** Sends real-time updates and alerts to users.
- **PFMS Integration:** Manages financial transactions securely and efficiently.
- **Key Modules:**
 - **Worker Registration:** Manages worker onboarding and verification.
 - **Accounting & Finance:** Tracks and processes financial transactions.
 - **Scheme Management:** Administers worker benefits and entitlements.
 - **Cess Collection:** Oversees the collection and management of levies.
- **Comprehensive Data Management:** Ensures accurate tracking and record-keeping.

eNirvachan (Polling Personnel Management System) is a generic Polling Person Management System for managing various Election like Assembly Election, Parliamentary Election, Panchayat Election and other local body Election conducted by State Election Commission of Assam.

The Application was initially hosted in NOC Server Assam during Parliamentary Election of 2019. Since then it is running smoothly for Managing various Election and each District of Assam has been using the Application for managing Poll Person. Initially the Application was using backend as Postgre SQL version 17 and front end as core PHP. Recently the whole front end is migrated to Laravel Framework and has been tested in last Assembly Bye Election-2024.

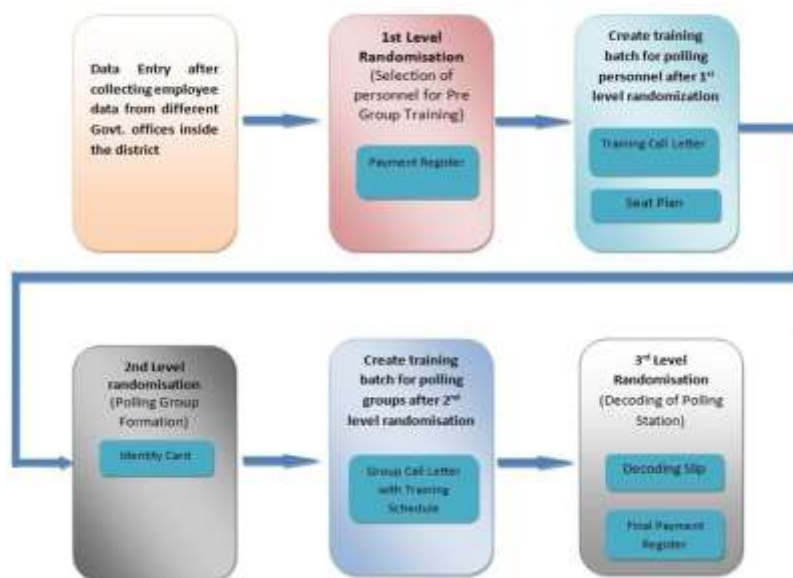

At present the Application is being used by two District namely Kamrup and Goalpara District for Rabha Hasong Autonomous Council Election and by other Districts for ensuing Panchayat Election-2025.

On request of CEO Assam in last month the Application is going to be modified for incorporating few new features.

Security Audit for PPMS is already done by the Regional Center of Excellency, Guwahati, Assam. Now Manual Audit is being done and will be completed in few days.

The demonstration was given to both CEO Office and State Election Commission and UAT Certificate has been received from both.

Process flow diagram for Polling Personnel Management System

TRAINING SESSIONS

Training to Stake holder of from District Administration and CEo office is given from time to time. Also during Election Period a Central team is made ready for support through phone call, remote connection etc.

ITI Digital Platform

Designed to streamline and digitalize ITI operations

Highlights

URL: <https://iti.assam.gov.in/>

The **Digital ITI Platform** is a comprehensive solution designed to streamline and digitalize ITI operations. It consists of three core projects, each addressing a crucial aspect of ITI management:

ITI MIS Portal:

- Manages all institutional activities and student academic records.
- Facilitates real-time tracking of student progress, faculty management, and administrative processes.
- Ensures efficient record-keeping and reporting for ITI institutes.

ITI Affiliation Portal:

- Handles the entire ITI affiliation process, from application submission to approval.
- Provides a transparent and structured workflow for ITI accreditation and compliance monitoring.
- Enables seamless communication between ITIs and governing authorities.

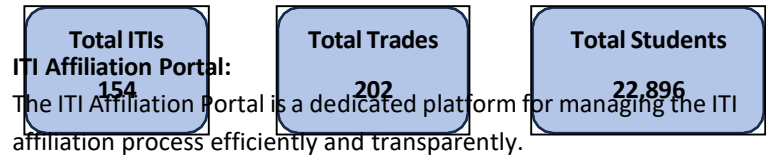

ITI e-Counselling Portal:

- Manages ITI admissions through an automated, merit-based counselling system.
- Allows candidates to select their preferences, check seat availability, and secure admissions online.
- Ensures fair and efficient seat allocation with minimal manual intervention

Project Summary:

ITI MIS Portal:

The ITI MIS Portal is a centralized system designed to efficiently manage all institutional activities and student academic records.

Total Applied	168
New	26
Stage 1 Pending	45
Stage 1 Completed	52
Stage 2 Pending	13
Stage 2 Completed	18
Stage 3 Pending	2
Stage 3 Completed	12

ITI eCounselling Portal:

The ITI e-Counselling Portal is a fully automated platform for managing ITI admissions efficiently and transparently.

- Online Choice Filling – Candidates can select preferred institutes and trades.
- Automated Merit List Generation – Ranks candidates based on qualification
- Category-Wise Seat Allocation – Ensures fair distribution of seats as per reservation policies.
- Real-Time Admission Status – Applicants can track allotments and admission updates online.
- Fully Digital & Paperless – Eliminates manual intervention for a seamless admission process.

Previous Year Data:

HIGHLIGHTS

URL: <https://iti.assam.gov.in/>

The Online Electoral Roll Management System (OERMS) aims to digitally transform the electoral roll preparation process for Panchayat and local body elections by eliminating manual inefficiencies, enhancing transparency, and ensuring accuracy.

Citizens can now check their electoral details online, reducing the need for physical visits to Block or Gaon Panchayat offices.

New dashboards for District Administration, EROs, and ASEC (Assam State Election Commission) provide real-time insights and better decision-making. Project enhances **operational efficiency through digital inspections, compliance monitoring, and real-time dashboards** for data-driven governance.

The introduction of OERMS has also led to significant cost savings. Printing costs for electoral rolls have been reduced by 75%. Instead of printing 50-60 sets of electoral rolls for draft and final publications, the District Administration can now distribute soft copies via CD, further optimizing resources.

FEATURES AND BENEFITS

Elimination of Manual Electoral Roll Preparation -EROs, AEROs, and officials no longer need to manually identify electors for their constituencies.

Instead, they input constituency location data and map villages to Panchayat Polling Stations in OERMS. This automates the generation of draft electoral rolls, eliminating 99% of manual work, including manual composing of rolls.

Seamless Delimitation Updates - The Map - Freeze - Defreeze - Remap feature allows district administration to undo and remap constituency boundaries easily. This fully automates electoral roll updates after delimitation, eliminating 100% of repetitive manual table-top exercises.

Highlight of the Project

The National Informatics Centre (NIC) has established a robust Information and Communication Technology (ICT) network known as NICNET, which connects all Central and State Government Ministries, Departments, Union Territories, and District administrations across India. NICNET has played a key role in driving e-Governance across multiple levels of government, improving transparency, efficiency, and accountability. In Assam, NICNET has been operational since 2003, connecting over 320 government offices and serving as the primary backbone for data sharing within the state government. The network also facilitates fast access to various services through peering with BSNL, PGCIL, Railtel, and international content delivery networks like Google, Microsoft, and Akamai.

The cloud provides a platform for rapid development and deployment of applications. Developers can experiment, test, and roll out new solutions. NIC Cloud Services offers variety of service models such as:

Platform as a Service - PaaS provides pre-installed web and database servers so that you can publish and run web application without worrying about server setup.

Infrastructure as a Service - IaaS provides you basic virtual compute infrastructure resources like CPU, Memory, Disk Storage attached to blank VMs with allowing you to install OS, using ISOs, from scratch and customization.

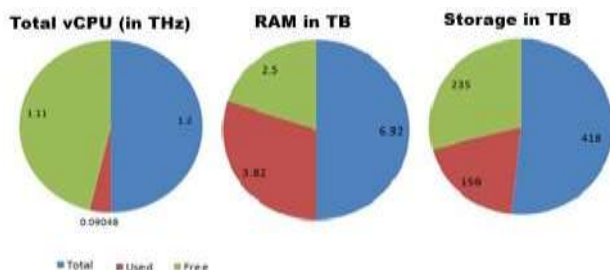

Software as a Services - SaaS This provides on demand software service. SaaS is a software delivery model where users are not responsible for supporting the application or any of the components. The server infrastructure, OS and software is being managed by cloud services.

APPLICATION DEPLOYED

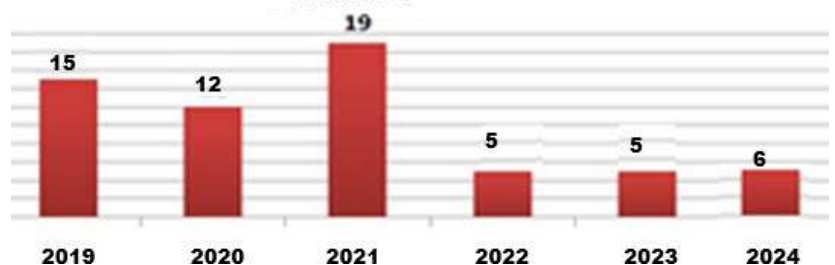

Pension Sanction & Payment Tracking System, Guwahati High Court, Online Public Grievance Lodging & Monitoring System, Assam Civilian Awards, Online Public Grievance Lodging & Monitoring System, Assam Police Dugs Free, Online Recruitment Portal of Govt of Assam, Gateway to results of Assam Examinations, Polling Personal Management System, State Level's Bankers Committee, Jaltarangini, Fishery Assets, Transformation & Development Department, Personnel Department - Govt Of Assam

Highlight of the Project

The National Knowledge Network (NKN) project is designed to create a secure and reliable high-speed network across India, connecting universities, research institutions, and healthcare and agricultural institutions. In Assam, NKN has been operational since 2010, linking 69 premier educational and research organizations, including IIT Guwahati and AIIMS Guwahati, to facilitate knowledge sharing, collaborative research, and advanced distance education. NKN Guwahati has maintained zero central downtime since its inception, and it connects to other states via 12 core links with 10/2.5 Gbps bandwidth.

State-of-the-Art NKN Central PoP at Assam Secretariat equipped with a total 80G bandwidth with High Availability (HA) and ISO Compliant infrastructure backed up by proper power backup.
