DOMESTIC TOURISM
IN
UTTARAKHAND

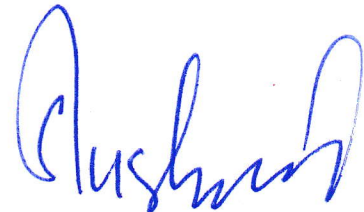

**BASED ON DATA COLLECTED IN STATE SAMPLE OF
72nd ROUND OF NATIONAL SAMPLE SURVEY
(JULY, 2014 – JUNE, 2015)**

PREFACE

The Directorate of Economics and Statistics, Uttarakhand has prepared a report on “**Domestic Tourism In Uttarakhand**” on the data of State sample collected in the 72nd round (Jul, 2014 – Jun, 2015) of National Sample Survey.

This report contains important findings of the survey in “Executive Summary”. Estimation procedure, concepts and definitions and statistical tables are also given in the report which is available on the website “<http://www.desuk.gov.in>” along with detailed tables.

I hope the results of this survey will be useful to senior officers of the Government involved in policy framing, researchers, economists and academicians.

(Sushil Kumar)

Director

29/10/2020

Directorate of Economics and Statistics,
Planning Department,

Government of Uttarakhand

ACKNOWLEDGEMENT

In a state like Uttarakhand which is endowed with splendid culture and religious heritage, has very much economic and social importance of domestic tourism. Directorate of Economics and Statistics, Uttarakhand is regularly participating with the National Sample Survey Office (NSSO) in various Socio-Economic Rounds, popularly known as NSS Surveys. The survey on Domestic Tourism Expenditure conducted, are the primary sources of data on various indicators on domestic tourism scenario. The survey provides estimates relating to indicators, like volume of domestic tourism, number of households undertaking domestic tourism activity, number of overnight trips and same day trips, average tourism expenditure etc. The results/data as per this survey are useful for planning, policy formulation and decision support and as input for further analytical studies relating to tourism by various Government organizations, academicians, researchers and scholars.

Directorate of Economics and Statistics, Uttarakhand has been the persistent endeavour to bring out its survey results in the form of reports after completion of field work of the survey to meet requirement of its data users. With this aim and with a view to make available the salient results of the survey, the present report titled "**Domestic Tourism In Uttarakhand**" presents the NSS 72nd round survey findings in details.

This report came into existence with great efforts made by DES's Data Processing and Analysis Wing comprising of Sh. G S Pandey (Joint Director), Sh. Gopal Gupta (Addl. Statistical Officer) and Sh. Alok Kumar (Addl. Statistical Officer). The fieldwork was conducted by Assistant Statistical Officer/Additional Statistical Officers under the guidance of concerned District Economic & Statistics Officers. All of them deserve special thanks for their efforts. Their zeal in making this publication possible is highly acknowledged. I also acknowledge and appreciate the efforts made by other officials of the DES for providing their valuable suggestions.

I hope this report will be useful to planners, policy makers, academicians and researchers. Suggestions for improvement in content, layout and other aspects of this report will be highly appreciated.

(Dr. Manoj Kumar Pant)

Additional Director

Highlights

A survey on “Domestic Tourism Expenditure” was conducted in NSS 72nd round (January-June 2014). A sample of 1355 rural households from 136 villages and 920 urban households from 92 blocks was surveyed in state sample.

Highlights of the findings of the survey are given below:

I. Household profile

- At state level average household size was 4.62 with 4.72 in rural areas and 4.35 in urban areas.

[Table 1]

- Around 60.6% of rural households and 64.0 % of urban households reported overnight trips with leading purposes holidaying, leisure and recreation; health & medical and shopping during last 365 days and/or with leading purposes business; social; pilgrimage & religious activities; education & training and others during last 30 days.

[Statement 5.1a]

- Average no. of overnight trips with leading purposes holidaying, leisure and recreation ;health & medical and shopping undertaken during last 365 days per 100 household was 86.5 (78.2 for rural and 109.0 for urban areas).

[Statement 5.1b]

- Average no. of overnight trips with leading purposes business; social; pilgrimage & religious activities; education & training and others undertaken during last 30 days per 100 household was 18.7 (21.5 for rural and 11.4 for urban areas).

[Statement 5.1b]

II. Characteristics of trips

- 49% of households reported at least one overnight trip with leading purposes holidaying, leisure and recreation, health & medical and shopping during last 365 days (47% for rural and 56% for urban households).

[Statement 5.2]

- 16% of households reported at least one overnight trip with leading purposes business, social, pilgrimage & religious activities, education & training and others during last 30 days (18% - for rural and 10% urban households).
[Statement 5.2]
- With leading purpose holidaying, leisure and recreation, health & medical and shopping - 167 overnight trips per 100 rural tourist households and 196 overnight trips per 100 urban tourist households were undertaken during last 365 days.
[Statement 5.3]
- With leading purposes business, social, religious & pilgrimage, education & training and others - 118 overnight trips per 100 rural tourist households and 113 overnight trips per 100 urban tourist households were undertaken during last 30 days.
[Statement 5.3]
- For the overnight trips completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping- 28% trips for health & medical purpose , 41% trips for holidaying, leisure & recreation purpose and remaining 1% for shopping purpose.
[Statement 5.4]
- For the overnight trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others 72% trips for leading purpose social , 8% trips for leading purpose education and training and 7% trips for business purposes.
[Statement 5.4]
- For the overnight trips completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping- Average trip size was 2.21 (2.15 for rural and 2.34 for urban).
[Statement 5.6]
- For the overnight trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others Average trip size was 2.02 (1.93 for rural and 2.48 for urban)
[Statement 5.6]
- Month of May, June & January generated over 38% of overnight trips among the trips completed during last 365 days with leading purpose holidaying, leisure & recreation.
[Statement 5.7]

- For the overnight visitor trips from rural area completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping- 61.9% of visitor trips were completed with visitor's purposes holidaying, leisure and recreation; health & medical and shopping and rest 37.4% with visitor's purposes business, social, religious & pilgrimage, education & training and others.

[Statement 5.10]

- For the overnight visitor trips from urban area completed during last 365 days with leading purposes holidaying, leisure and recreation; health & medical and shopping – 47.5% of visitor trips were completed with visitor's purposes holidaying, leisure and recreation; health & medical and shopping and rest 52.5% with visitor's purposes business, social, religious & pilgrimage, education & training and others.

[Statement 5.10]

- For the overnight visitor trips from rural area completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others - 95.8% of visitor trips were completed with visitor's purposes business, social, religious & pilgrimage, education & training and others and rest 4.1% with visitor's purposes holidaying, leisure and recreation; health & medical and shopping.

[Statement 5.10]

- For the overnight visitor trips from urban area completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others – 96.5% of visitor trips were completed with visitor's purposes business, social, religious & pilgrimage, education & training and others and rest 3.4% with visitor's purposes holidaying, leisure and recreation; health & medical and shopping.

[Statement 5.10]

- Bus was the most availed mode of travel in rural area with 56% share of the visitor-trips completed during last 365 days whereas in urban area bus (48%) and train (25%) were mostly used.

[Statement 5.11a]

- For the visitor-trips completed during last 30 days, bus was the dominant mode of travel - for 74.4% of visitor-trips from rural area and 55.6% of visitor trips from urban area.

[Statement 5.11b]

- Around 91% of overnight visitor trips from rural area completed

during last 365 days, visitors stayed with friends & relatives or in 'other' places whereas in urban case, place of stay during trips were- friends & relatives (76.9%), 'other' places (13.8%), hotel & guest house (7.2%).

[Statement 5.12a]

- Around 85% and 89% of visitor-trips from rural and urban areas respectively completed during last 30 days, availed friends & relatives house for overnight stay during the trips.

[Statement 5.12b]

- Main destination state for over-night visitor trips generated found Uttarakhand itself with maximum number of visitor trips (25.35 Lakhs) followed by Uttar Pradesh (6.06 Lakhs) out of all overnight visitor trips generated for all over the country which completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping.

[Statement 5.14]

- Main destination state for over-night visitor trips generated found Uttarakhand itself with maximum number of visitor trips (5.93 Lakhs) followed by Uttar Pradesh (1.19 Lakhs) out of all overnight visitor trips generated for all over the country which completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping.

[Statement 5.14]

- At state level, 35.4% households reported at least one same day trip completed during last 30 days (rural -38.8% and urban 26.1 % households).

[Table 1 & 27]

- 155 same-day trips on an average (i.e. on the average 1.5 trips per tourist household) were generated per 100 tourist household (rural -164 and urban -119).

[Statement 5.15]

- Shopping (47%) and social (22%) were the two most frequent same-day trips undertaken by the rural households, whereas, in urban areas 38% of such trips were for social purposes.

[Statement 5.16]

III. Expenditure on trips

- Among the overnight trips completed during last 365 days with leading purposes holidaying, leisure and recreation, shopping, health & medical, shopping were the costliest overnight trips with average expenditure per trip of ₹26731 followed by health &

medical trips with average expenditure per trip of ₹17605. Social trips were the least expensive trips (average trip cost ₹2563). Average expenditure on package component for overnight trips was negligible except for leading purpose health & medical (₹2338).

[Statement 5.17]

- For overnight trip expenditure contribution of Package component is low compared to that of non-package component –13% for rural sector whereas less than 2 % for urban.

[Statement 5.18]

- For trips undertaken during last 365 days with leading purposes holidaying, medical etc for both the sectors, share of expenditure on shopping (rural- 37% and urban- 25%) and medical items were quiet high(rural- 32% and urban- 29%) with respect to other items.

[Statement 5.18]

- For trips undertaken during last 30 days with leading purposes business, social, religious etc for both the sectors, expenditure on transport and shopping items was very high (more than 65%).

[Statement 5.18]

- At state level average expenditure per same-day trip was ₹1029 (rural – ₹918 and urban – ₹1642).

[Statement 5.23]

- For the same day trips undertaken by rural households, shopping constituted nearly 54% of total expenditure whereas for urban households, shopping contributed nearly 46 % of total expenditure.

[Statement 5.23]

Chapter One

Introduction

1.1 Background

1.1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MOSPI), Government of India, since its inception in 1950 has been conducting nationwide integrated large scale sample surveys, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. The NSS surveys are conducted by interviewing sample households selected through a scientific design and cover practically the entire geographical area of Indian Territory.

1.1.2 In its 72nd round survey, conducted during 1st July, 2014 to 30th June, 2015 (in this report this period is referred to as 2014-15), NSSO carried out a survey on 'Domestic Tourism Expenditure'. The last survey on this subject was conducted during 65th round of NSS (July 2008-June 2009), referred to as 2008-09. Key indicators of domestic tourism in India in 2014-15, based on the results of NSS 72nd round survey, are presented here.

1.2 Objective of the Survey

1.2.1 The importance of domestic tourism, socially and economically, in a diversified, multi-cultural, multi-linguistic and multi-religious country like India needs no special mention. The tourism activity because of its multidimensionality generates revenues and creates employability across different economic sectors. However, tourism, per se, does not constitute any specific industry or sector in the economy but it encompasses several traditional economic sectors like transport, hotel and restaurants etc. Being a demand side phenomenon, the tourism is generally seen through the activities of the persons identified as tourists. Besides its economic importance, tourism has a great social importance in developing social bond among people of a pluralistic society like India.

1.2.2 NSSO had conducted an all-India household survey on domestic tourism during the period July 2014-June 2015. The purpose of the survey was primarily to obtain appropriate rates/ratios/tables for the use of Ministry of Tourism in preparing the Tourism Satellite Account (TSA); 3rd in the series. As per the requirement of TSA, focus of the survey was on capturing details of domestic overnight trips. Information on household characteristics, which are the important determinants of tourism characteristics, such as household size, principal industry, principal occupation, household type, religion, social group, household consumption expenditure, particulars

of overnight trips completed during the reference period and expenditure incurred by the household on domestic tourism were captured. However some information on same-day trips was also captured.

1.2.3 A comprehensive household survey on domestic tourism for the first time was conducted by National Sample Survey Office (NSSO) during its 65th round (July 2008-June 2009) of operation. In that round, the survey was intended to provide estimates of the volume of domestic tourism in terms of number of *visitors* (i.e. persons performing trips), number of households undertaking domestic tourism activity and number of trips that contributed to domestic tourism and average tourism expenditure in India. In the 54th round (January-June 1998) of NSS, one of the subjects covered was tours involving overnight stay. The main household schedule of that round recorded details of journeys on tours involving overnight stay undertaken by household members during a specified period.

1.2.4 These indicators on domestic tourism are required for planning, policy formulation and decision making at various levels within the government and outside. The results of the survey are likely to be used by the Ministry of Tourism etc. apart from private data users, policy makers and other stakeholders.

1.3 Comparability with previous round survey

1.3.1 Though the survey on domestic tourism in NSS 72nd round covered similar indicators of domestic tourism as in NSS 65th round, some changes have been made in the subject coverage and in related concepts and definitions based on the experiences of previous round survey and also keeping in mind that the main thrust of this round was to collect information required for preparation of Tourism Satellite Account.

- a. In this round, the sample households for canvassing schedule on Domestic Tourism Expenditure were selected from the remaining households after selecting the sample households for schedules 1.60, 1.61 and 1.62 (Schedules relating to consumer expenditure) with the restriction that only one schedule was allowed to canvass in any household. No such restrictions were there in NSS 65th Round.
- b. Overnight stay was defined as a duration of stay of more than 12 hrs. including 12 midnight to 5 A.M. in this current round whereas in previous round, the duration covered at least two calendar days, wholly or partly.
- c. In 65th round all the trip details of individual household member was collected with the reference period of last 30 days, but all the estimates were derived and presented for the reference period of last 365 days relating to trips and trip expenditure based on information on total number of trips completed by the household during last 365 days captured through a single question, irrespective of their purposes. In the current round, this information was collected with the reference period of last 365 days for the overnight trips with leading purposes of the trip *holiday, leisure and recreation, health and medical and shopping*; and with reference period of last 30 days for the overnight trips

with leading purposes *business, social, pilgrimage and religious activities, education and training and others and* are presented for the reference period as collected. Therefore the tabulated results cannot be compared with those of NSS 65th round. However average expenditure per overnight trip for both the rounds can be compared.

- d. For same-day trips detailed information was collected only at household level and not for individuals in this survey, unlike in 65th round survey, No information was collected on total number of trips undertaken by the household and by the individuals during last 365 days in this survey. In 65th round survey these information were collected through a single question irrespective of the leading purpose/purpose of the trip/visitor-trip.
- e. In NSS 65th round, trip expenditure was canvassed for latest three trips by the household. Whereas in the current round expenditure details were collected for all the overnight trips completed by the household during the reference period.
- f. For international trips, final domestic port of departure was canvassed in this round.
- g. Information on usual household consumer expenditure (₹) in a month was collected through a single question, in place of the five questions in earlier round.
- h. Information of items like visits (if any) of NRIs to the household and their impact, renting out of some portion of the house to tourists during the last 365 days, awareness about tourism promotional campaigns were not collected in NSS 72nd round unlike in previous round.

1.4 Report of the 72nd round Survey on Domestic Tourism Expenditure

1.4.1 The results of the NSS surveys are released in reports based on a comprehensive tabulation of subject parameters and important indicators in various cross-classifications generated from the state sample data. The detailed results of the survey are given in Chapter Five of this report “Domestic Tourism in Uttarakhand”.

1.5 Contents of this Document

1.5.1 This document brings out the detail results of NSS 72nd round’s state sample data to facilitate decision support, policy inferences and socio-economic analysis. It is presented in six chapters and an appendix. The present one is the introductory chapter (Chapter One). Chapter Two figures out the main features of the survey on Domestic Tourism Expenditure along with its conceptual framework. Notes on concepts and definitions used in this survey are illustrated in details in Chapter Three. Details of sample design and estimation procedure are given in Chapter Four. The detailed results

of the survey are presented in Chapter Five. Chapter Six provides the detailed tables and lastly in Appendix D, the schedule of enquiry (Schedule 21.1) which was canvassed at the selected households is provided.

1.5.2 The indicators presented in this document are primarily on:

- a. Households reporting overnight trips
- b. Trips and visitor-trip characteristics of overnight trip
- c. Trip characteristics of same-day trip
- d. Tourism expenditure for both overnight and same-day trip

1.5.3 It is important to note that some estimates for the smaller State like Uttarakhand may be subject to high sampling fluctuations as such estimates may be based on very small sample sizes. In some cells of tables zero figures are reported, which are due to either zero sample vales or very small sample values.

1.5.4 In collecting information on gender of each household member, a new code as Transgender was introduced for the first time in this round. However, no sample cases at state level for transgender were reported.

Chapter Two

Main Features of The Survey

2.1 Schedules of enquiry

2.1.1 This schedule was designed to collect detailed information on household (**hh**) characteristics, visitor characteristics, trip characteristics and expenditure characteristics in relation to domestic overnight trips, required for preparation of Tourism Satellite Account (TSA) and also some important information on trips and expenditure in connection with domestic same-day trips in India through a nationwide household survey.

2.2 Scope and Coverage

2.2.1 **Geographical coverage:** The survey covered the whole of the Indian Union including Uttarakhand.

2.2.2 **Population coverage:** The following rules were adhered to determine population coverage:

1. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., were excluded, but residential staff therein was listed while listing was done in such institutions. The persons of the first category were considered as members of their parent households and were counted there. Convicted prisoners undergoing sentence were outside the coverage of the survey.
2. Floating population, i.e., persons without any normal residence were not listed. But households residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, were listed.
3. Neither the foreign nationals nor their domestic servants were listed, if by definition the latter belonged to the foreign national's household. If, however, a foreign national became an Indian citizen for all practical purposes, he or she was covered.
4. Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) were kept outside the survey coverage due to difficulty in conduct of survey therein. However, civilian population residing in their neighbourhood, including the family quarters of service personnel, was covered.

5. Orphanages, rescue homes, *ashrams* and vagrant houses were outside the survey coverage. However, persons staying in old age homes, *ashrams/hostels* and the residential staff (other than monks/ nuns) of these *ashrams* were listed. For orphanages, although orphans were not listed, the persons looking after them and staying there were considered for listing.

2.3 Sample size

2.3.1 First-stage units: As usual, most States and Union Territories participated in the survey: a “State sample” was surveyed by State Government officials in addition to the “Central sample” surveyed by NSSO. For rural sector of Uttarakhand, the number of villages surveyed in the State sample was 136 and the number of urban blocks surveyed was 92. This document is based on the estimates obtained from the State sample only. The results presented in this document are solely based on the state sample. FSUs and households surveyed in state sample are given in Statement 2.2.

2.3.2 **Second-stage units:** Stratification of the households was done on the basis of households having at least one member who performed overnight trip during last 365 days for trips with medical/ holidaying/ shopping purpose or from the remaining, households having at least one member who performed any other overnight trip during last 30 days (details are given in Chapter Four). For this particular survey, 10 households were selected from each sample village/block. The total number of households in which Schedule 21.1 was canvassed, were 1355 and 920 in rural and urban areas respectively of Uttarakhand (Statement 2.2).

2.4 Reference period

2.4.1 The estimates presented in this report are based on data collected during 01.07.2014 to 30.06.2015, a period of one year.

2.4.2 The reference period for capturing data on overnight trips was last 365 days with reference to leading purposes holidaying, leisure and recreation; health & medical and shopping. On the other hand, reference period for capturing data on overnight trips was last 30 days with reference to leading purposes business; social; pilgrimage and religious activities; education & training; and others. The reference period for capturing data on same- day trips was last 30 days for all trips.

2.5 Quintile class of Usual Monthly Per Capita Consumer Expenditure (UMPCE)

2.5.1 This refers to the 5 quintile classes of the rural/urban state distribution (estimated distribution) of households by UMPCE. In the tables, the different quintile classes are referred to simply as 1 (lowest quintile class), 2, 3, 4 and 5 (highest quintile class).

2.5.2 Following Statement 2.1 shows the lower and upper limits of the state quintiles to have an idea of level of living of the households belonging to these quintile classes.

Statement 2.1: Lower and upper limits of UMPCE in different quintile classes for each sector				
quintile class	UMPCE (₹)			
	Rural		Urban	
	lower limit	upper limit	lower limit	upper limit
1	2	3	4	5
1	-	1000	-	2000
2	1000	1333	2000	2500
3	1333	1667	2500	3000
4	1667	2400	3000	4000
5	2400	-	4000	-

Statement 2.2: Number of FSUs (villages/blocks) allotted & surveyed and number of households surveyed for Schedule 21.1: NSS 72nd round, State sample						
State	number of FSUs (villages/blocks) allotted		number of FSUs (villages/blocks) surveyed		no. of households surveyed	
	Rural	Urban	Rural	Urban	Rural	Urban
1	2	3	4	5	6	7
Uttarakhand	136	92	136	92	1355	920

Chapter Three

Concepts and Definitions

3.1 In order to ensure that uniform concepts are followed while collecting data of survey on 'Domestic Tourism Expenditure', concepts and definitions for the items of enquiry were formulated. Important terms which are used in this document are explained below.

3.1.1 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-away (those whose total period of absence from the household is expected to be less than 6 months) but excludes temporary visitors and guests (expected total period of stay less than 6 months).

Even though the determination of the actual composition of a household was left to the judgment of the head of the household, the following procedures were adopted as guidelines.

- (i) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., will constitute a single-member household. If, however, a group of persons among them normally pool their income for spending, they will together be treated as forming a single household. For example, a family living in a hotel will be treated as a single household.
- (ii) More emphasis is given on 'normally living together' than on 'ordinarily taking food from a common kitchen'. In case the place of residence of a person is different from the place of boarding, he or she is treated as a member of the household with whom he or she resides.
- (iii) A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) is included in the employer's/host's household. However, in special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, he has to be counted as a member of the household formed by other members of his family.
- (iv) If a member of a family (say, a son or a daughter of the head of the family) stays elsewhere (say, in hostel for studies or for any other reason), he/ she will not be considered as a member of his/ her parent's household. However, he/ she will be listed as a single member household if the hostel is listed.

3.1.2 Household size: The size of a household is the total number of persons in the household.

3.1.3 Household type: The household type, based on the means of livelihood of a household, was decided on the basis of the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities was considered; but the incomes of servants and paying guests were not taken into account.

In **rural** areas, a household belongs to any one of the following six household types:

- self-employed in agriculture
- self-employed in non-agriculture
- regular wage/salary earning
- casual labour in agriculture
- casual labour in non-agriculture
- others

For **urban** areas, the household types are:

- self-employed
- regular wage/salary
- earning casual labour
- others

3.1.4 Strong dwelling structure: A strong dwelling structure is one whose walls and floors are made of strong materials, such as, cement, concrete, oven burnt bricks, hollow cement/ash bricks, stone, stone blocks. For hilly areas, timber was also considered as strong material while determining type of the dwelling structure.

3.1.5 Household's usual consumer expenditure (₹) in a month: Household's usual consumer expenditure is the sum total of monetary values of all goods and services usually consumed (out of purchase or procured otherwise) by the household on domestic account during a month. This has the following components which are given below:

- A. Usual expenditure for household purposes in a month.
- B. Purchase value of any household durables (mobile phones, TV sets, fridge, fans, cooler, AC, vehicles, computers, furniture, kitchen equipment, etc.) purchased during the *last one year* and the expenditure *per month* obtained by dividing by 12.
- C. If any household consumption (usually) from (a) wages in kind (b) home-grown stock (c) free collection was there, then the approximate monthly value of the amount usually consumed in a month was imputed.

Then the sum of A+B+C is taken as household's usual consumer expenditure in a month in whole number of rupees. Usual monthly per capita consumer expenditure (UMPCE) for a household is the household's usual consumer expenditure in a month divided by that household size.

3.1.6 Quintile class of UMPCE: A single set of UMPCE distribution (separately for rural and urban) was generated for state based on all the members of the household. UMPCE quintile distribution, for a part of the population, say, persons undertaken overnight

trips or same-day trips for different purposes in the state in rural/urban areas, was assumed to be same as the UMPCE distribution of the entire population of the state in rural/urban areas. UMPCE distribution of households is same as the UMPCE distribution of the persons belonging to those households.

3.1.7 Travel: In general, *travel* is understood as the movement of persons between different geographic locations specifically different geographical administrative areas (like different villages/towns/cities), for any purpose and any duration. Those who travel are referred to as travelers. Travel can occur within a country (domestic travel) or involve more than one country (international travel). Domestic trip (defined later, separately for overnight and same-day) is a subset of domestic travel.

3.1.7 Usual Place of Residence: The usual place of residence (UPR) of a person is the place (village/town) where the person has been staying continuously for at least six months immediately prior to the date of survey. Even if a person was not staying in the village/town continuously for six months immediately prior to the date of survey but is presently staying there with intention to stay there continuously for six months then that place should be taken as his/her UPR.

3.1.8 Usual Environment: The *usual environment* (UE) of an individual refers to the notional geographical space, including his/her UPR, within which he/she moves more or less regularly and frequently (daily/ every alternate day or at least once in a week repeatedly/ likely to be repeated for more than six months for the same purpose) irrespective of the distance.

The *usual environment* of an individual includes the place of usual residence of the household to which he/she belongs, his/her own place of work or study and any other place that he/she visits more or less regularly and frequently, even when this place is located far away from his/her place of usual residence or in another locality.

The purpose of introducing the concept of usual environment was to **exclude** the travelers who move regularly between their UPR and place of work or study, or more or less regularly and frequently visit places, for instance homes of friends or relatives, shopping centers, religious, health care or any other facilities, between geographical locations irrespective of their distance.

3.1.9 Domestic Overnight Trip: A domestic overnight trip is one with a main destination within the country of residence of the visitor. It refers to a movement - for a duration of not less than twelve hours (including 12 midnight to 5 A.M.) in two consecutive calendar days (i.e. crossing midnight or 00-00 hours) and of not more than 6 months - by one or more household members outside their usual environment (which includes the usual place of residence (UPR)) and return to the same UPR (a round trip), irrespective of place of stay during this hours. The movement is for any of the following purposes:

- Business
- Holidaying, leisure & recreation
- Social
- Pilgrimage & Religious

- Education and Training
- Health and Medical
- Shopping
- Others

The followings were excluded from the purview of domestic trip:

- i. Any movement for the purposes of migration or getting employed or setting up of residence in that place.
- ii. Movements between UPR and the place of work or study.
- iii. All movements, made more or less regularly and frequently from the UPR and back (daily/ every alternate day or at least once in a week) for shopping, visiting family, for religious purpose, health and medical care, education and training, etc. repeatedly/likely to be repeated for a period of more than six months for the same purpose, was not considered as trips irrespective of the distance travelled.
- iv. All the trips completed during the reference period by former household members who were currently not a member of that selected household at the time of survey.

Trips for persons who were household members at the time of survey but were not household members at the time of actually completing a trip within the reference period were also considered as trips for the selected household.

A trip is uniquely specified by its main destination, leading purpose, no. of household members in the trip being together (with variation of up to 3 days). 'Being together' means being in the same town or village for most of the time during the trip and also either starting or ending trip together. They can either start together but end the trip with a variation of up to 3 days or vice-versa.

In cases where set of destinations differed slightly from person to person (among household members who undertook the trip they were considered to be on the same trip provided they were together for most of the time in the trip. But if two members of a household spent most of the time away from each other during the period since leaving their residence to returning to their residence, they were considered to have been on two different trips even though their starting and returning dates might be the same.

3.1.10 Domestic Overnight Tourism: It covered overnight trips by household members within the territory of India, either as a domestic trip or as domestic part of an international trip.

3.1.11 Domestic Overnight Visitor: A *domestic overnight visitor* is a person (household member), residing in the country, who performed an overnight trip.

3.1.12 Starting month: The month in which a particular trip was started from UPR was the starting month of that trip. When many members of a household travelled together on a trip but one or more trip member started later than the rest, the earliest starting date of that trip by any household member were considered for determining the starting month.

3.1.13 **Purpose & Leading Purpose:** The *purpose of a trip* of a household member is that purpose but for which he/she would not have undertaken the trip. Whereas the *leading purpose of a trip* is that purpose without which none of the household members in that trip would have undertaken the trip. Leading purpose of a trip is unique to all the members participating in that trip.

3.1.14 **Main Destination:** The *main destination* of a trip is defined as the place, visiting of which was central to the decision to undertake the trip. However, if no such place could be identified by the informant, the main destination was taken as the place where the visitors spent most of their time during the trip. If the visitors spent the same amount of time in two or more places during the trip, then the main destination was defined as the one among these places that was the farthest from the usual place of residence of the visitors.

3.1.15 **Type of trip:** A trip could be of two types-package and non-package. The term package trip, to be used in the survey, is given below.

3.1.15.1 **Package Trip:** A package trip consisted of a “tourism product” provided by a tour-operator which elaborates it and sells it directly or through travel agencies. Within a package trip, travelers received a combination of products associated with a trip, which were made of more than one of the following tourism services: Transportation services, accommodation services, food serving services, sightseeing services, entertainment services, etc. and other goods and services at will.

The components of a package trip might be pre-established or tailor-made, in which case, the visitor chooses a combination of services he / she wishes to acquire from a pre-established list of such services. If such a package was availed of for the major part of time in a trip, such a trip was considered as a package trip.

If the expenditure on more than one chargeable travel services *availed for some time during the trip* did not cover the whole trip but covered only a minor time of the duration of the trip then such a trip was **not** considered as package trip although the trip had a package component. A package trip may have a non-package component in addition to package component, e.g., a visitor may avail himself of accommodation and other services in the package through some tour operator but make some special sight-seeing arrangements in some places of visit in the trip on his own. Similarly, a trip, which is non-package, may also have package component in addition to non-package component.

3.1.16 **Mode of travel:** *Mode of travel* refers to means of transport used by visitor(s) to travel in a trip. The travel relevant here was the travelling done to cover the distances to the destinations and not joyrides or movement for adventure, as in skiing or boating for pleasure, or walking inside a museum, fort or maze. Visitor(s) might be using one or more means of transport in a trip, such as: on foot, bus, train (railways, ship/boat, air, own transport: motorised (such as, two-wheeler, auto rickshaw, car/jeep, tractor/truck etc.) , non-motorised (e.g. bicycle, rickshaw, animal driven transport etc.); transport equipment, rental (hired transport): motorised (such as, two-wheeler, auto rickshaw, car/jeep, taxi, tractor/truck etc.) , non-motorised (e.g. bicycle, rickshaw, animal driven transport etc.)

3.1.17 **Major and minor mode of travel:** The means of transport by which maximum distance was travelled was treated as ‘major’ *mode of travel* for that trip. In case more than one such mode was there [e.g. train, air] for which equal distance was travelled then entry to be recorded for that means which was more expensive.

The means of transport by which second maximum distance was travelled will be treated as 'minor' *mode of travel* for that trip.

3.1.18 Type of stay: The *type of stay* refers to the accommodation used for stay by visitor(s) in an overnight trip. Accommodation refers to the space, whether paid or unpaid, where the visitor(s) spent some considerable time for spending night, taking rest, spending some leisure time, refreshing oneself, etc. during the trip. It could be hotel, guest house, dharamshala, rented house, friends & relatives, others (carriages / coaches, railway station, ship/boat, waiting rooms, airport lounge etc.

3.1.18.1 Major and minor type of stay: The place where the highest number of nights was spent was treated as 'major' type of stay. In case more than one such place was there (e.g. hotel, *Dharamshala*) where same no. of nights was spent then information was captured for that type of stay which was more expensive.

The place where second highest number of nights was spent will be treated as 'minor' type of stay.

3.1.19 No. of nights spent outside usual place of residence (including journey): The number of nights spent by the visitor outside his/her usual place of residence from starting of the trip to the completion of the trip, including the nights spent in transit.

3.1.20 Tourism Expenditure: For the purpose of this survey tourism expenditure included expenditure made not just during the trip but also the expenditure related to the trip even if made before or after the trip. It included all expenses related to the trip **paid or payable** by the household. It also included expenditure related to the trip, whether directly paid or reimbursed, by some institution like Government or other agencies on behalf of the selected household. All expenditure in connection with the trip **except** those used for productive purposes/enterprises was included. All the expenditure incurred relating to the trip performed by the member (s) of the sample household during the reference period was included irrespective of the source of expenditure, i.e. whether the expenditure had been incurred by the sample household or not. The payment might be made through cash, cheque, credit card, debit card, in installments, etc. The total expenditure in all such cases irrespective of mode of payment was recorded.

The components of tourism expenditure were classified as under:

- a) Package component
- b) Non-package component, which were further sub-divided as below:
 - i. Accommodation
 - ii. Food and drink
 - iii. Transport
 - iv. Recreation, religious, cultural, sporting and health related activities
 - v. Shopping
 - vi. Others

Tourism expenditure includes

- Monetary expenditure on goods and services paid or payable by the visitor out of his/her own pocket or reimbursed by some institution like Government or other

agencies/individuals or expenses of the visitor directly paid by such institutions/individuals;

- Expenditure incurred on items of high unit values like cars, computers, etc. related to a trip if those were used for consumption purpose and not for productive purpose.

Tourism expenditure excludes

- The payment of taxes and duties not levied on products (goods and services);
- The purchase of financial and non-financial assets, including land, real estate but excluding high unit values like cars, computers, etc. if those are used for consumption purposes;
- All transfers of cash or used goods such as donations to charities or to members of other households as these do not correspond to the purchase of consumption goods or services from these charities or individuals. Alms, bribes, cash tips, cash gifts etc. were also excluded;
- The payment of all classes of interest, including those on expenditures made during and for trips

3.1.21 Domestic Same-day Trip: A **domestic same-day trip** is one that does not involve an overnight stay (i.e. duration of more than 12 hrs and incl. 12 midnight to 5 A.M.) but fulfill other conditions of overnight trips, irrespective of the number of hours spent on the trip.

Same-day trip can be either completed on a same calendar date or spread over two consecutive calendar dates with a main destination within the country of residence of the visitor, for any of the following purposes:

- Business
- Holidaying, leisure & recreation
- Social
- Pilgrimage & Religious
- Education and Training
- Health and Medical
- Shopping
- Others

Like in overnight trips, all movements of persons, whose nature of work/job was regular touring outside their UPR to different places, like, mobile hawkers, on-board staff of airlines /ship/ railways or of buses or of hired taxis and other public transports etc. was **not** considered as trips (overnight or same-day). However movements of medical representatives, sales executives, field investigators, who have to travel to different places, other than their main place of work from where they report to their controlling officer/ get salary etc., in relation to their official work/ business, were considered as trips.

3.1.22 Domestic Same-day Visitor: A *domestic same-day visitor* was a person (household member), residing in the country, who performed a same-day trip.

Chapter Four

Sample Design and Estimation Procedure

4.1 Introduction

4.1.1 Subject Coverage: The 72nd round (July 2014 – June 2015) of NSS was devoted to the subject of Social Consumption and earmarked for surveys on ‘Domestic Tourism Expenditure’, ‘Household Expenditure on Services and Durable Goods’, ‘Household Consumer Expenditure’, ‘Household Consumer Expenditure with details of Food Consumption’ and ‘Household Consumer Expenditure with details of Non-Food Consumption’.

4.2 Outline of Survey Programme

4.2.1 Geographical coverage: The survey covered the whole of the Indian Union including Uttarakhand..

4.2.2 Period of survey and work programme: The period of survey was of one year duration starting on 1st July 2014 and ending on 30th June 2015.

4.2.3 Sub-rounds: The survey period of this round was divided into four sub-rounds of three months’ duration each as follows:

sub-round 1 :	July - September 2014
sub-round 2 :	October - December 2014
sub-round 3 :	January - March 2015
sub-round 4 :	April - June 2015

In each of these four sub-rounds equal number of sample villages/blocks (FSUs) was allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period. Attempt was made to survey each of the FSUs during the sub-round to which it was allotted.

4.2.4 Schedules of enquiry: During this round, the following schedules of enquiry were canvassed:

Schedule 0.0 :	List of Households
Schedule 1.60 :	Household Consumer Expenditure
Schedule 1.61 :	Household Consumer Expenditure with details of Food

	Consumption
Schedule 1.62 :	Household Consumer Expenditure with details of Non-Food Consumption
Schedule 21.1 :	Domestic Tourism Expenditure
Schedule 1.5 :	Household Expenditure on Services and Durable Goods

4.2.5 Participation of States: In this round Uttarakhand has participated on equal extent of matching bases.

4.3 Sample Design

4.3.1 Outline of sample design: A stratified multi-stage design was adopted for the 72nd round survey. The first stage units (FSU) were the Census villages in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In the case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from each rural/ urban FSU.

4.3.2 Sampling Frame for First Stage Units: For the rural sector, the list of 2011 Population Census villages constituted the sampling frame. However, for Kerala, the latest available updated list of Panchayat wards was the sampling frame. For the urban sector, the list of UFS blocks (2007-12) was considered as the sampling frame.

4.3.3 Stratification:

- (a) Stratum was formed at district level. Within each district of a State/UT, generally speaking, two basic strata were formed: (i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 4 lakhs or more as per Census 2011, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.
- (b) A special stratum in the rural sector only was formed at State/UT level before district-strata were formed in each of the States/UTs. This stratum comprised all the villages of the State/UT with population less than 150 as per Census 2011. However, this special stratum was formed if at least 50 such villages were available in a State/UT.

4.3.4 Sub-stratification:

4.3.4.1 Rural sector: If 'r' was the sample size allocated for a rural stratum, 'r/4' sub-strata were formed in that stratum. The villages within a stratum (district) as per frame were first arranged in ascending order of population. Then sub-strata 1 to 'r/4' were demarcated in such a way that each sub-stratum comprised of a group of villages of the arranged frame and had more or less equal population.

4.3.4.2 Urban sector: Each urban stratum was divided into two parts – 'Affluent part' consisting of UFS blocks identified as 'Affluent Area' and 'Non-Affluent part' consisting of the remaining UFS blocks within the stratum. Sample allocation of a stratum was then allocated to Affluent and Non-Affluent parts in proportion to total number of households in the UFS blocks with

double weightage to Affluent part subject to a maximum of 8 FSUs in 'Affluent part' of any stratum. Let 'u' was the sample size allocated for an urban stratum consisting of both affluent area UFS Blocks and non affluent area UFS Blocks. 'u/4' sub-strata were formed within each stratum. Out of these 'u/4' sub-strata, the first two sub-strata '01' and '02' were earmarked for those UFS blocks which were identified as 'Affluent Area' and the remaining sub-strata, '03', '04',..... and so on, were assigned to the non-affluent UFS blocks. If any stratum did not have any Affluent Area UFS block then also the sub-stratum number was started from '03' for that stratum. For all strata, if $u/4 > 1$, implying formation of 2 or more sub-strata, all the UFS blocks within the stratum were first arranged in ascending order of total number of households in the UFS Blocks as per UFS phase 2007-12. Then sub-strata 1 to 'u/4' were demarcated in such a way that each sub-stratum had more or less equal number of households. This procedure was done separately for Affluent-part and Non-Affluent part of the stratum (if two sub-strata are required to be formed in the Affluent part).

The following three types of cases were found while doing the sub-stratification:

- i) If there was no 'Affluent Area' UFS block in the stratum, all the UFS blocks were divided into 'u/4' sub-strata and numbered as '03', '04',, '(u/4)+2'.
- ii) If only one sub-stratum was formed with the 'Affluent Area' UFS blocks, then all the remaining non-affluent blocks were divided into '(u-4)/4' sub-strata and numbered as '03', '04', '(u/4)+1'.
- iii) If two sub-strata were formed with the 'Affluent Area' blocks, then all the remaining non-affluent UFS blocks were divided into '(u-8)/4' sub-strata and numbered as '03', '04',, 'u/4'.

4.3.5 Total sample size (FSUs): 14092 FSUs were allocated for the central sample at all-India level. 228 FSUs were allocated for the state sample of Uttarakhand.

4.3.6 Allocation of total sample to States and UTs: The total number of FSUs allotted in the central sample was further allocated to the States and UTs in proportion to population as per *Census 2011* subject to a minimum sample allocation to each State/ UT.

4.3.7 Allocation of State/ UT level sample to rural and urban sectors: State/UT level allocation was allocated between two sectors in proportion to population as per *Census 2011* with double weightage to urban sector in general. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) was allocated to each State/UT.

4.3.8 Allocation to strata: Within each sector of a State/ UT, the respective sample size was allocated to the different strata in proportion to the population as per *Census 2011*. Stratum level allocation was adjusted to multiples of 4 with a minimum sample size of 4.

4.3.9 Allocation to sub-strata: In both rural and urban sectors, 4 FSUs were allocated for each sub-stratum in general.

4.3.10 Selection of FSUs:

For the rural sector, from each stratum/sub-stratum, required number of sample villages was selected by Probability Proportional to Size With Replacement (PPSWR), size being the population of the village as per *Census 2011*.

For the urban sector, from each stratum/sub-stratum, FSUs were selected by Probability Proportional to Size With Replacement (PPSWR), size being the number of households of the UFS Blocks.

Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples was allocated among the four sub rounds.

4.3.11 Selection of hamlet-groups/ sub-blocks - important steps

4.3.11.1 Criterion for hamlet-group/ sub-block formation: After identification of the boundaries of the FSU, it was determined whether listing will be done in the whole sample FSU or not. In case the approximate present population of the selected FSU was found to be 1200 or more, it was divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector by more or less equalising the population as stated below.

Approximate present population of the sample FSU		No. of hg’s/sb’s to be formed
less than 1200	(no hamlet-groups/sub-blocks)	1
1200 to 1799		3
1800 to 2399		4
2400 to 2999		5
3000 to 3599		6
.....and so on		-

For rural areas of Uttarakhand (except four districts Dehradun, Nainital, Hardwar and Udham Singh Nagar) the number of hamlet-groups were formed as follows:

Approximate present population of the sample village		No. of hg’s to be formed
less than 600	(no hamlet-groups)	1
600 to 899		3
900 to 1199		4
1200 to 1499		5
1500 to 1799		6
.....and so on		-

4.3.11.2 Formation and selection of hamlet-groups/ sub-blocks: In case hamlet-groups/ sub- blocks were formed in the sample FSU, the same was done by more or less equalizing population. Note that while doing so, it was ensured that the hamlet-groups/ sub-blocks formed were clearly identifiable in terms of physical landmarks.

Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU wherever hamlet- groups/ sub-blocks were formed in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb1; one more hg/ sb was selected from the remaining hg’s/ sb’s by simple random sampling (SRS) and termed as hg/ sb2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation was treated as sample hg/ sb number 1.

4.3.12 Formation of second stage strata and allocation of households:

4.3.12.1 A cut-off point ‘A’ (in ₹) was determined from NSS 68th round data for urban areas of **each NSS region** in such a way that top 40% of the population have Monthly Per Capita Expenditure (MPCE) more than ‘A’.

The following was the plan of second stage stratification for Schedule 21.1.

SSS	composition of SSS	number of households surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)

rural

1	households having at least one member who performed overnight trip during last 365 days for medical/ holidaying/ shopping purpose	with strong dwelling structure	2	1
2		without strong dwelling structure	2	1
3	from the remaining, households having at least one member who performed any other overnight trip during last 30 days	with strong dwelling structure	2	1
4		without strong dwelling structure	2	1
5	other households		2	1

urban

1	households having at least one member who performed overnight trip during last 365 days for medical/ holidaying/ shopping purpose	with MPCE > A	2	1
2		with MPCE ≤ A	2	1
3	from the remaining, households having at least one member who performed any other overnight trip during last 30 days	with MPCE > A	2	1
4		with MPCE ≤ A	2	1
5	other households		2	1

4.3.13 Selection of households: From each SSS the sample households for each of the schedules were selected by SRSWOR. Only one schedule was canvassed in any household. So, under no circumstances, any household was selected for more than one schedule. It is to be mentioned here that Sch. 21.1 (Domestic Tourism Expenditure) was canvassed from the remaining schedules of listed households after selection of sample households for schedules 1.60, 1.61 and 1.62.

4.4. Estimation Procedure**4.4.1 Notations:**

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$ if $D = 1$

$= (D - 1)$ for FSUs with $D > 1$

Z = total size of a rural/urban sub-stratum (= sum of sizes of all villages/blocks of a sub-stratum)

z = size of sample village/UFS block used for selection.

n = number of sample FSUs surveyed including ‘uninhabited’ and ‘zero cases’ but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X}, \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{stmijk} = observed value of the characteristic y for the k -th household in the j -th second stage stratum of the d -th hg/ sb ($d = 1, 2$) of the i -th FSU belonging to the m -th sub-sample for the t -th sub-stratum of s -th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

4.4.2 Formulae for Estimation of Aggregates for a particular sub-sample and stratum × sub-stratum:

4.4.2.1 Schedule 21.1

4.4.2.1.1 Rural/ Urban:

(i) For j -th second-stage stratum of a stratum × sub-stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

4.4.3 Overall Estimate for Aggregates for a sub-stratum:

Overall estimate for aggregates for a sub-stratum (\hat{Y}_{st}) based on two sub-samples in a sub-stratum is obtained as:

$$\hat{Y}_{st} = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{stm}$$

4.4.4 Overall Estimate for Aggregates for a stratum:

Overall estimate for a stratum (\hat{Y}_s) will be obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

4.4.5 Overall Estimate of Aggregates at State level:

The overall estimate \hat{Y} at the State level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State.

4.4.6 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as ($\hat{R} = \frac{\hat{Y}}{\hat{X}}$)

4.4.7 Estimates of Error: The estimated variances of the above estimates will be as follows:

4.4.7.1 For aggregate \hat{Y} :

$$\hat{V}ar(\hat{Y}) = \sum \hat{V}ar(\hat{Y}_s) = \sum \sum \hat{V}ar(\hat{Y}_{st})$$

where $\hat{V}ar(\hat{Y}_{st})$ is given by

$$\hat{V}ar(\hat{Y}_{st}) = \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2,$$

where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum ‘s’ and sub-stratum ‘t’.

4.4.7.2 For ratio \hat{R} :

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

4.4.7.3 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{\hat{V}ar(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

4.5. Multipliers:

The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a sub-sample for schedule 21.1 are given below:

Sch. type	Sector	Formula for multipliers	
		hg / sb 1	hg / sb 2
21.1	rural/urban	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{Z_{stmi}} \times \frac{H_{stmi1j}}{h_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{Z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$
	j = 1, 2, 3,4,5 for Sch. 21.1		

Note :

- (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.
- (ii) Multipliers have to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

Chapter Five

Summary of Findings

5.1 Introduction

5.1.1 Major findings of the survey and salient features relating to prime indicators on domestic tourism as on 1st January, 2015, the mid-point of the survey period July, 2014-June, 2015 are summarised in this chapter. Estimates for state separately for rural and urban areas on some key characteristics are presented in this document.

5.2 Estimated number of households & population

5.2.1 Estimated population as per this survey was 89.8 lakhs with rural share of 66.8 lakhs (around 70% of total population) and urban share of 23.0 lakhs. Estimated number of households was 19.5 lakhs at state level, out of which nearly 73% were in rural areas and rest were in urban areas. Estimated numbers of households and population separately for rural and urban areas are provided in Table 1 of Chapter 6.

5.3 Households reporting overnight trip

5.3.1 Trip is the basic unit of domestic tourism activities. Overnight trip refers to a movement of household member(s) for a duration of not less than twelve hours (including 12 midnight to 5 A.M.) in two consecutive calendar days (i.e. crossing midnight or 00-00 hours) and of not more than 6 months outside his (their) usual environment.

Statement 5.1a: Percentage of households reporting at least one overnight trip with leading purposes for each sector		
Sector	Estimated no. of households (00)	Percentage of households reporting at least one overnight trip*
(1)	(2)	(3)
Rural	14210	60.6
Urban	5280	64.0
Rural + Urban	19490	61.5

*: percentage of households reporting at least one overnight trip with leading purposes holidaying, leisure and recreation; health & medical and shopping completed during last 365 days and/or business, social, religious & pilgrimage, education & training and others completed during last 30 days

Ref: Table 1

Statement 5.1a reveals that at state level, 62% of households reported to have completed at least one overnight trip with leading purposes holidaying, leisure and recreation, health & medical and shopping completed during last 365 days and or at least one overnight trip with leading purposes business, social, religious & pilgrimage, education & training and others during last 30 days.

Statement 5.1b shows that with leading purpose holidaying, leisure and recreation, health & medical and shopping - 87 overnight trips per 100 households were undertaken during last 365 days where as 19 overnight trips per 100 households were undertaken with leading purposes business, social, religious & pilgrimage, education & training and others during last 30 days.

Statement 5.1b: Average number of overnight trips per 100 households for different leading purpose			
Leading purpose	Rural	Urban	Rural+Urban
(1)	(2)	(3)	(4)
Completed during last 365 days			
Holidaying, leisure & recreation	28.6	52.4	35.0
Health & medical	27.9	15.6	24.6
Shopping	5.4	2.3	4.6
All (incl. n.r.)	78.2	109.0	86.5
Completed during last 30 days			
Business	1.7	0.6	1.4
Social	14.9	9.6	13.4
Religious & pilgrimage	0.5	0.5	0.5
Education & training	2.0	0.1	1.5
Others	2.4	0.6	1.9
All (incl. n.r.)	21.5	11.4	18.7

Ref: Table 1 & Table 14

5.4 Extent of Tourism activity

The extent of tourism activity in the context of overnight trip may be measured by percentage of households reporting at least one overnight trip during the reference period. Statement 5.2 presents percentage of households reporting at least one overnight trip during the respective reference period for both rural and urban areas for the state. It is observed that at state level 49% households have reported at least one overnight trip with leading purposes holidaying, leisure and recreation, health & medical and shopping completed during last 365 days and 16% households with leading purposes business, social, religious & pilgrimage, education & training and others completed during last 30 days.

Statement 5.2: Percentage of households reporting at least one overnight trip during the reference period for state						
State	Percentage of households reporting at least one overnight trip with leading purposes					
	Holidaying, leisure and recreation, health & medical and shopping completed during last 365 days			Business, social, religious & pilgrimage, education & training and others completed during last 30 days		
	Rural	Urban	Rural+Urban	Rural	Urban	Rural+Urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Uttarakhand	47	56	49	18	10	16

Ref: Table 1 & Table 22

5.5 Intensity of Tourism activity

5.5.1 The intensity of tourism activity in the context of overnight trip during last 365 days is presented in the statement 5.3. This is measured by the number of overnight trips generated per 100 households reporting at least one overnight trip during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping. It reveals that there is a difference between rural and urban tourist households in undertaking overnight trips. With leading purpose holidaying, leisure and recreation, health & medical and shopping - 167 overnight trips per 100 rural tourist households and 196 overnight trips per 100 urban tourist households were undertaken during last 365 days.

Statement 5.3: Average number of overnight trips per 100 tourist households* for different leading purpose		
Leading purpose	Rural	Urban
(1)	(2)	(3)
Completed during last 365 days		
Holidaying, leisure & recreation	61	94
Health & medical	60	28
Shopping	12	4
All (incl. n.r.)	167	196
Completed during last 30 days		
Business	9	6
Social	82	95
Religious & pilgrimage	3	5
Education & training	11	1
Others	13	6
All (incl. n.r.)	118	113

*Ref: Table 22 *.Household reporting at least one overnight trip*

5.5.2 Statement 5.3 also gives the intensity of tourism activity in the context of overnight trip during last 30 days. This is measured by the number of overnight trips generated per 100 households reporting at least one overnight trip during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others. There is negligible difference between rural and urban households in respect of overnight trips performed with leading purposes business, social, religious & pilgrimage, education & training and others during last 30 days - 118 overnight trips per 100 rural tourist households and 113 overnight trips per 100 urban tourist households.

5.6 Overnight trips by leading purpose

Statement 5.4 shows that out of 100 overnight trips completed during last 365 days, 41 trips were undertaken for holidaying, leisure & recreation purpose and 28 trips for health & medical purpose. It also shows that on an average out of 100 overnight trips completed during last 30 days, 72 trips were performed for social purpose and 3 trips for religious & pilgrimage purpose. However distribution pattern of overnight trips completed during last 365 days for rural and urban areas in state is not same as more overnight trips are made for the health & medical purpose (35.7%) in rural areas compared to that in urban areas (14.3%).

But overnight trips that are made for the purpose of business, religious & pilgrimage, education & training and others completed during last 30 days the distribution pattern in both rural and urban areas is almost same.

Statement 5.4: Percentage distribution of overnight trips by leading purpose			
Leading purpose	Rural	Urban	Rural+Urban
(1)	(2)	(3)	(4)
Completed during last 365 days			
Holidaying, leisure & recreation	36.5	48.1	40.5
Health & medical	35.7	14.3	28.4
Shopping	6.9	2.1	5.3
All (incl. n.r.)	100.0	100.0	100.0
Completed during last 30 days			
Business	7.8	5.0	7.4
Social	69.2	84.2	71.6
Religious & pilgrimage	2.4	4.2	2.7
Education & training	9.5	1.2	8.1
Others	11.2	5.7	10.3
All (incl. n.r.)	100.0	100.0	100.0

Ref: Table 14

5.7 Overnight trip by quintile classes of household UMPCE

Statement 5.5R for rural & 5.5U for urban shows the distribution of overnight trips that are made for different purposes during reference period in the hierarchy of levels of living of the households classified as quintile classes of usual MPCE. In this context Household usual consumer expenditure is the sum total of monetary values of all goods and services usually consumed (out of purchase/home produced or procured otherwise) by the household on domestic account during a month. Here this is taken as a proxy for household level of living.

It is observed that percentage of overnight trips completed during the reference period for different quintile classes in rural areas is increasing on the whole i.e. no. of overnight trips is highest among the households belonging to highest class of UMPCE except for class '00-20' with reference period of last 365 days. The same feature is also seen in the urban areas on the whole with reference period of last 365 days, but not uniform for each of the leading purposes.

Statement 5.5R: Percentage distribution of overnight trips by quintile class of UMPCE for each leading purpose of trip										
Sector: Rural										
Quintile class of UMPCE	Completed during last 365 days with leading purpose				Completed during last 30 days with leading purpose					
	Holidaying, leisure and recreation	Health & medical	Shopping	All	Business	Social	Religious & pilgrimage	Education & training	Others	All
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
00-20	16.2	18.9	14.3	13.7	3.3	9.8	14.8	0	8.9	8.4
20-40	15.1	18	15.7	13	21.8	22.4	17.4	0	4.1	18.1
40-60	15.3	16.6	17.6	14	3.6	16.2	30.1	45.7	22.4	19
60-80	20	23.8	25.9	23.9	30.6	28.7	16.4	48	34.4	31
80-100	33.5	22.7	26.5	35.4	40.7	22.9	21.3	6.3	30.2	23.5
All	100	100	100	100	100	100	100	100	100	100

Ref: Table 16

5.8 Average overnight trip size for each leading purpose

Statement 5.6 reveals number of persons travelled together in an overnight trip. It gives an idea of the average trip size by presenting the average number of visitors per overnight trips, separately for rural and urban areas with different leading purposes. In rural areas, every overnight trips completed during last 365 days had 2.15 participating members on average and in urban areas, every overnight trips completed during last 365 days had 2.48 participants on average. Similarly in rural areas, every overnight trips completed during last 30 days had 1.93 participating members and in urban areas, every overnight trips completed during last 30 days had 2.48 participants on average.

However average size of the group travelling on an overnight trip varied noticeably with the leading purpose of the trip. It is observed that leading purpose holidaying, leisure & recreation attracts more visitors per overnight trip followed by leading

purpose social. Statement 5.6 shows that Business trips (about 1.13 persons per trip for both rural and urban areas) and trips for education and training (about 1.55 persons per trip for both rural and urban areas) has the smallest number of members travelling together.

Statement 5.6: Average number of overnight visitors per overnight trip for different leading purpose			
Leading purpose	Rural	Urban	Rural+Urban
(1)	(2)	(3)	(4)
Completed during last 365 days			
Holidaying, leisure & recreation	2.23	2.55	2.36
Health & medical	1.92	1.97	1.93
Shopping	1.58	2.38	1.69
All (incl. n.r.)	2.15	2.34	2.21
Completed during last 30 days			
Business	1.09	1.47	1.13
Social	2.09	2.60	2.19
Religious & pilgrimage	2.11	1.36	1.92
Education & training	1.55	1.29	1.55
Others	1.78	2.53	1.85
All (incl. n.r.)	1.93	2.48	2.02

Ref: Table 14

5.9 Month of visit for overnight trips with leading purpose holidaying, leisure & recreation:

Intensity of tourism activity varies over the Starting month of overnight trip. However among the several leading purposes for overnight trip, intensity of tourism activity concentrated mostly in the months of May, June & January with leading purpose holidaying, leisure & recreation. It is clear from the statement 5.7 that the month of May, June & January generates over 38% of overnight trips among the trips with leading purpose holidaying, leisure & recreation and rest are distributed more or less evenly among the remaining 9 months. In fact, this phenomenon of intensity is more in the months of May, June & January for any purpose with reference to trips completed during last 365 days as observed from Table 15. It is also observed that tourism with leading purpose 'shopping' generated about 23% of overnight trips in the months of October which is much more than that for any other month.

Statement 5.7: Percentage distribution of overnight trips by starting month with leading purpose holidaying, leisure & recreation completed during last 365 days													
Sector	Starting Month												
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	All
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)
Rural	11.8	7.2	8.9	6.6	13.9	11.3	3.5	5	4.7	8.1	8.8	10.3	100.0
Urban	11.7	3.5	9.9	5.8	10.4	18.1	5.2	5.7	2.4	9.1	9.4	8.7	100.0

Ref: Table 15

5.10 Visitor-trip

Certain features of trips, differ not only from trip to trip but, for the same trip, may vary from one participant to another – and therefore were recorded separately during the survey for each trip for each participant. These include mode of travel, place of stay, and even purpose of the visitor (as distinct from leading purpose, which is fixed for a particular trip). These characteristics are termed visitor-trip characteristics as they may vary with each visitor-trip combination. For visitor trip, there may be two reference periods but visitor's purpose may be any of the eight purposes irrespective of the leading purpose of trip. Statement 5.8 describes the percentage distribution of overnight visitor-trips by visitor's purpose of trip with leading purposes holidaying, leisure and recreation, health & medical and shopping completed during last 365 days and with leading purposes business, social, religious & pilgrimage, education & training and others completed during last 30 days for different sectors. The statement reveals that a substantive part of visitor's purpose (37.4% for rural areas and 52.5% for urban areas) is different from leading purpose of the trip when trips were made with leading purposes holidaying, leisure and recreation, health & medical and shopping completed during last 365 days. However that divergence (4.1 % for rural areas and 3.4% for urban areas) is very low when the leading purpose is business, social, religious & pilgrimage, education & training and others for the trips completed during last 30 days.

Statement 5.8: Percentage distribution of over night visitor-trips by purpose of trip for different sectors person@				
Visitor's purpose	Percentage distribution of over night visitor-trips			
	Completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping		Completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others	
	Rural	Urban	Rural	Urban
(1)	(2)	(3)	(4)	(5)
Holidaying, leisure & recreation	26.6	36.7	0.1	2.8

Ref: Table 5A & 5B

5.11 Visitor's purpose by Visitor's age

Statement 5.9 presents proportion of overnight visitor trips among different visitor's purpose for all the overnight trips made by particular age group of visitors. It shows that for major age-groups with the increase of age of visitor proportion of overnight trips decreases for the visitor's purpose holidaying, leisure and recreation and social. However opposite is true for the visitor's purpose health & medical. It is also seen that overnight trips with visitor's purpose social, age of visitors does not matter for the trips completed during last 30 days.

Statement 5.9: Percentage distribution of overnight visitor-trips by purpose of trip for different agegroups of the visitor											Person [@]
Rural+Urban											
Age Group	Visitor's purpose

@ includes Transgender

Statement 5.10a presents proportion of overnight visitor-trips completed during last 365 days by purpose of trip for different educational levels of the visitor with leading purposes holidaying, leisure & recreation, health & medical, and shopping. It reveals a very interesting picture that with the increase in educational level of visitor, proportion of overnight visitor trips increases for the visitor's purpose holidaying, leisure and recreation. Statement 5.10b shows that more than 80% of overnight visitor trips made by visitors during last 30 days of any educational level are with the purpose social.

Statement 5.10b: Percentage distribution of overnight visitor-trips completed during last 30 days by purpose of trip for different educational levels of the visitor with leading purposes holidaying, leisure & recreation, health & medical, and shopping

5.13 Mode of travel

Mode of travel refers to means of transport used by visitor(s) to travel in a trip. Here travel means the travelling done to cover the distances to the destinations and not joyrides or movement for adventure, as in skiing or boating for pleasure, or walking inside a museum, fort or maze. One or more of the means of transport as shown in the statement 5.11a & 5.11b were possible in a trip. The means of transport by which maximum distance was travelled was treated as 'major' mode of travel for that trip. Statement 5.11a presents percentage distribution of overnight visitor-trips by major mode of travel for each visitor's purpose completed during last 365 days. It reveals that bus was the most availed mode of travel in rural areas with 56% and in urban areas with 58% share of the visitor-trips completed during last 365 days. Mode of travel was 'air' having UPR in urban areas for 32% of visitor-trips with purposes education & training but such cases are negligible for overnight visitor-trips having UPR in rural areas.

Statement 5.11a: Percentage distribution of overnight visitor-trips by major mode of travel for each visitor's purpose completed during last 365 days with leading purposes holidaying, leisure & recreation, health & medical, and shopping						
Visitor's purpose	Major mode of travel					
	Bus	Train	Air	Own transport	Transport equipment, rental (hired transport)	All (incl. n.r. and rest of the modes@)

5.14 Type of Stay

The type of stay refers to the accommodation used for stay by visitor(s) in an overnight trip. Accommodation refers to the space, whether paid or unpaid, where the visitor(s) spent some considerable time for spending night, taking rest, spending some leisure time, refreshing oneself, etc. during the trip. For a visitor on a trip, major type of stay means the accommodation where the visitor spent the greatest number of nights for overnight trips. Statement 5.12a and Statement 5.12b reflect that friends and relatives are a prominent source of accommodation with respect to both the rural and urban visitor trips for trips completed during last 30 days. For around 85% and 95% of visitor-trips from rural and urban areas respectively, friends and relatives provided the stay during the trips.

Statement 5.12a: Percentage distribution of overnight visitor-trips by major type of stay for each visitor's purpose completed during last 365 days with leading purposes holidaying, leisure & recreation, health & medical, and shopping

Visitor's purpose	Major type of stay

5.15 Average trip duration

Average duration of overnight visitor-trip is measured by the number of nights spent by the visitor outside his/her usual place of residence from the starting of the trip to the completion of the trip, including the nights spent in transit.

Statement 5.13 gives the average duration of overnight visitor-trips in terms of number of nights, separately for trips with visitor's purpose. On an average, the duration of a trip was 6.4 nights (i.e. 6 to 7 nights) for rural areas and 6.2 nights (i.e. 6 to 7 nights) for urban areas for those visitor-trips with leading purpose holidaying, leisure and recreation, health & medical and shopping completed during last 365 days. Similarly for those visitor-trips with leading purpose business, social, religious & pilgrimage, education & training and others completed during last 30 days, on an average, the duration of a trip was 2.9 nights (i.e. 2 to 3 nights) for rural areas and 4.2 nights (i.e. 4 to 5 nights) for urban areas.

The maximum average duration of overnight trips is seen as 8.1 (i.e. 8 to 9 nights) for the visitor's purpose 'others' in rural areas and 7.5 nights (i.e. 7 to 8 nights) the visitor's purpose 'Holidaying, leisure & recreation' in urban areas, for those visitor-trips with leading purpose holidaying, leisure and recreation, health & medical and shopping completed during last 365 days. Similarly for those visitor-trips with leading purpose business, social, religious & pilgrimage, education & training and others completed during last 30 days, maximum average duration of overnight trips is 7.0 nights in urban areas & 6.1 nights (6 to 7 nights) in rural areas for visitor's purpose 'Holidaying, leisure & recreation' which exhibits maximum among all purposes.

Statement 5.13: Average duration (no. of nights spent) of overnight visitor-trips by purpose of trip				
Visitor's purpose	Average duration (no. of nights spent) of overnight visitor-trips with leading purposes			
	Holidaying, leisure and recreation, health & medical and shopping completed during last 365 days		Business, social, religious & pilgrimage, education & training and others completed during last 30 days	
	Rural	Urban	Rural	Urban

Education & training	6.7	2.9	1.8	1.9
Others	8.1	5.5	2.5	1.8
All	6.4	6.2	2.9	4.2

Note: '-' indicates figures are not presented due to very small sample size at state level.

5.16 Visitor generation

Table 12A & Table 12B reveal estimated no of visitor-trips for Uttarakhand state. It reveals that Uttarakhand generated 37.30 lakhs number of visitor trips which completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping.

Similarly Table 12B reveals overnight visitor trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others, Uttarakhand generated 7.37 lakhs number of visitor trips.

5.17 Main Destination

Main destination is generally a place which is central to the decision to undertake the trip. However, during the survey if no such place can be identified by the informant, the main destination was taken as the place where the members spent maximum night during the trip. Statement 5.14 presents estimated number of visitor-trips for top 05 receiving states. It reveals that Uttarakhand had the maximum number of visitor trips (25.35 lakhs) as destination place followed by Uttar Pradesh(6.06 lakhs) out of those overnight visitor trips originated from Uttarakhand which completed during last 365 days in their UPR with leading purposes holidaying, leisure and recreation, health & medical and shopping. Similarly overnight trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others, Uttarakhand (5.93 lakhs) received maximum number of visitor trips followed by Uttar Pradesh(1.19 lakhs).

Statement 5.14: Estimated no. (00) of overnight visitor-trips for top 05 States of main destination (combining visitors from within State and from outside State)			
		Rural + Urban	
Completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping		Completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others

Ref: Table 13A & 13B

5.18 Extent of same-day Tourism activity

A domestic same-day trip is one that does not involve an overnight stay (i.e. duration of more than 12 hrs and incl. 12 midnight to 5 A.M.) but movement of one or more household members outside their usual environment (which includes the usual place of residence (UPR)) and return to the same UPR (a round trip), irrespective of place of stay during these hours. Same-day trip can be either completed on a same calendar date or spread over two consecutive calendar dates with a main destination within the country of residence of the visitor, for any of the following purposes:

- Business
- Holidaying, leisure & recreation
- Social
- Pilgrimage & Religious
- Education and Training
- Health and Medical
- Shopping
- Others

The extent of tourism activity in the context of same-day trip can be measured by percentage of households reporting at least one same-day trip during last 30 days. Table 1 & Table 27 of Chapter Six reveal that 35.4% households had reported at least one same-day trip during last 30 days. However in rural areas 38.8% households and 26.1% households in urban areas had made at least one same-day trip during last 30 days.

5.19 Intensity of same-day Tourism activity

The intensity of tourism activity in the context of same-day trip has been presented in the statement 5.15. This is measured by the number of same-day trips generated per 100 households those have made at least one same-day trip during the reference period (tourist household). Statement 5.15 shows that 1.55 same-day trips on an average (i.e. 1 to 2 trips) were generated per tourist household.

Statement 5.15: Average number of same-day trips completed during last 30 days per 100 tourist households for different leading purpose			
Leading purpose	Rural	Urban	Rural + Urban
(1)	(2)	(3)	(4)
Business	7	16	9
Holidaying, leisure & recreation	6	22	9
Social	37	46	38
Pilgrimage & religious	6	3	6
Education & training	1	1	1
Health & medical	23	5	20
Shopping	78	14	65
Others	6	14	8
All	164	119	155

Ref: Table 25 & 27

5.20 Same-day trips by leading purpose

Percentage distribution of same-day trip by leading purpose completed during last 30 days has been presented in the statement 5.16. It is seen that Shopping (47%) and social (22%) were the two most frequent same-day trips undertaken by the rural households, whereas, in urban areas highest percentage of trips were for social purposes (38%).

Statement 5.16: Percentage distribution of same-day trips by leading purpose completed during last 30 days			
Leading purpose	Rural	Urban	Rural + Urban
(1)	(2)	(3)	(4)
Business	4.1	13.5	5.5

Others	3.9	11.3	5.1
All	100	100	100

Ref: Table 23

5.21 Expenditure on overnight trips

Statement 5.17 shows the item wise average expenditure (in ₹) per overnight trip in respect of different leading purposes for rural and urban areas combined. Trips with leading purpose shopping were the costliest overnight trips with average expenditure per trip of ₹26731 followed by health & medical trips with average expenditure per trip of ₹17605. Social trips were the least expensive trips (average trip cost ₹2563). Average expenditure on package component for overnight trips was negligible except for leading purpose health & medical (₹2338).

Statement 5.17: Average expenditure (in ₹) per overnight trip by categories of expenditure for each leading purpose									
Leading purpose	Package component	Non-package component							Total
		Accommodation	Food and drink	Transport	Shopping	Recreations, religious, etc.	Medical	Other	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Completed during last 365 days

others	0	51	397	1050	912	0	1556	202	4169

Ref: Table 20

5.22 Item-wise share of overnight trip expenditure

5.22.1 Tourism expenditure has usually two components- one package component and other non-package component. Non-Package component includes accommodation, food, transport, shopping, recreation, religious, cultural, sporting and health related activities and others.

5.22.2 Statement 5.18 gives item wise share of overnight trip expenditure separately for rural and urban areas for trips completed during (a) last 365 days with leading purposes holiday, leisure, health& medical and shopping and (b) last 30 days with leading purposes business, social, religious and pilgrimage, education & training and others . This statement shows that there is variation in expenditure over different items related to domestic tourism.

For overnight trip expenditure contribution of Package component is low compared to that of non-package component –13% for rural sector whereas less than 1 % for urban. Further, it is observed that for trips undertaken during last 365 days with leading purposes holidaying, medical etc for both the sectors, share of expenditure on shopping (rural- 37% and urban- 25%) and medical items were quiet high(rural- 32% and urban- 29%) with respect to other items. For trips undertaken during last 30 days with leading purposes business, social, religious etc for both the sectors, expenditure on transport and shopping items was very high (more than 65%).

Statement 5.18: Item-wise share (in %) of trip expenditure for overnight trips				
Items of expenditure	Completed during last 365 days for leading purposes holidaying, leisure and recreation; health & medical and shopping		Completed during last 30 days for leading purposes business; social; religious and pilgrimage; education & training and others	
	Rural	Urban	Rural	Urban
(1)	(2)	(3)	(4)	(5)
Package	12.5	1.2	0.0	0.1

Recreation etc.	0.2	0.7	0.5	1.3
Medical	31.9	28.5	10.5	7.4
Others	3.1	6.1	10.7	11.5
Total	100.0	100.0	100.0	100.0

Ref: Table 21A & 21B

5.22.3 Statement 5.19a and 5.19b provide the item wise contribution of non-package component in overnight trip expenditure separately for rural and urban areas for overnight trips completed during last 365 days and last 30 days respectively. As the major part for overnight trip expenditure was contributed by non package components, so it is worthwhile to see how items of expenditure of non-package component contribute in trip expenditure on non-package component. The share of expenditure on shopping items (rural- 90% and urban- 81%)and medical items for health & medical (rural- 74% and urban- 83%) trips were very high. For all other trips, there was no such single item with that much high share. However, there are differences in the item-wise share of expenditure specially for leading purpose holidaying between trips undertaken by the households from rural and urban areas but not much variation for other leading purposes.

Statement 5.19a: Item-wise share (in %) of trip expenditure on non-package component for overnight trips completed during last 365 days for leading purposes holiday, leisure and recreation; health & medical and shopping						
Items of expenditure of non-package component	Leading purpose					
	Holidaying, leisure and recreation		Health & medical		Shopping

Ref: Table 22

Statement 5.20R and 5.20U describe the average expenditure per overnight trip by leading purposes and quintile classes of UMPCE. In general, the average trip expenditure incurred by households in rural and urban areas was same except for the leading purpose 'others' and 'social' where average expenditure in urban areas is triple and double respectively as compared to rural areas for the overnight trips completed during last 30 days.

5.24 Expenditure on overnight trip by leading purposes

The following Statement 5.21 provides the estimates of average expenditure (in ₹) per overnight with respect to different leading purposes. It may be observed that it is shopping trips upon which both the rural and urban households spend most (rural- ₹25368, urban- ₹35301) among all the trips completed during last 365 days. It is also observed for rural households it is education & training trips upon which maximum expenditure (₹3914) is incurred while for urban household, it is others trips (₹10562) among all the trips completed during last 30 days.

Statement 5.21: Average expenditure(in ₹) per overnight trips for each leading purpose		
Leading purpose	Rural	Urban
(1)	(2)	(3)
Completed during last 365 days		
Holidaying, leisure and recreation	10058	9767
Health & medical	16795	21508
Shopping	25368	35301
All	11695	9734
Completed during last 30 days		
Business	3187	2700
Social	2008	4883
Pilgrimage & religious activities	2465	3382
Education & training	3914	4069
Others	3541	10562
All	2463	5022

Ref: Table 20 & 21

5.25 Expenditure on same-day trips

5.25.1 A domestic same-day trip is one that does not involve an overnight stay (i.e. duration of more than 12 hrs including 12 midnight to 5 A.M.) but fulfill other conditions of overnight trips, irrespective of the number of hours spent on the trip.

5.25.2 Statement 5.22 provides average expenditure per same-day trip, incurred by the households in rural and urban areas, completed during last 30 days. It is observed for rural households it is 'education & training' trips upon which maximum average expenditure (₹1147) is incurred while for urban household, it is 'Pilgrimage & religious' trips (₹4518) among all the same-day trips completed during last 30 days. It is also observed that for all the purchases average expenditure for urban areas (₹1642) were nearly double the corresponding expenditure in rural areas (₹918).

Statement 5.22: Average expenditure (in ₹) per same-day trip completed during last 30 days for each leading purpose			
Leading purpose	Sector		
	Rural	Urban	Rural+Urban
(1)	(2)	(3)	(4)
Business	900	2250	1409
Holidaying, leisure and recreation	463	900	670
Social	554	1073	677
Pilgrimage & religious activities	568	2400	736
Education & training	546	274	498
Pilgrimage & religious activities	1005	4518	1173
Education & training	1147	3609	1255
Others	786	928	835
All	918	1642	1029

Ref: Table 25

5.26 Item-wise share of same-day trip expenditure

Statement 5.23 provide the item wise contribution of same day trip expenditure separately for rural and urban areas for same day trips competed during last 30 days. For the same day trips undertaken by rural households, shopping constitute nearly 54% of total expenditure whereas for urban households making same day trips, shopping contribute nearly 46% of total expenditure. No remarkable differences in the item-wise share of expenditure were observed between trips undertaken by the households from rural and urban areas except the item of expenditure 'transport' for which 12% share of expenditure has found for rural households whereas it was 20% for urban households.

Statement 5.23: Item-wise share (in %) of trip expenditure for same-day trips completed during last 30 days

Items of expenditure	Rural	Urban
(1)	(2)	(3)
Package component	0.3	1.0
Accommodation	0.3	1.3
Food	6.4	8.9
Transport	12.3	20.3
Shopping	54.4	45.7
Recreation, religious etc.	1.6	1.1
Medical	11.8	8.7
Others	13.0	13.0
All	100.0	100.0

Chapter Six

Tabulation Plan

Tabulation Plan on Schedule 21.1: Domestic Tourism Expenditure Survey NSS 72nd Round (July, 2014-June, 2015)

6.1 The Tabulation Plan, approved by the Working Group in its 5th meeting on 29.01.2015 in New Delhi, has been modified consequently on the basis of the decisions of NSC in its 78th meeting, held in New Delhi on 30.09.2015. The modified Tabulation Plan along with the following notes is presented here.

6.2 Tabulation plan is basically structured in following modules:

a. Overnight Trip

- i) Table 1: Control table,
- ii) Table 2- 4: Household characteristics
- iii) Table 5-19: Trip characteristics
- iv) Table 20-22: Trip expenditure

b. Same-day Trip

- i) Table 23-24: Trip characteristics
- ii) Table 25-27: Trip expenditure

c. Lower and Upper limits of UMPCE (Table 28)

6.3 Information on overnight trips were collected in two different Blocks-5.1 & 5.2 on the basis of leading purposes of overnight trips with information on corresponding expenditure in Blocks 6.1 & 6.2 respectively. Blocks 5.1/6.1 are related to leading purposes health & medical, holidaying, leisure and recreation and shopping with reference period of last 365 days, whereas Blocks 5.2/6.2 are for trips related to leading purposes business, social, pilgrimage & religious activities, education & training, and others. **No inflator shall be used to get the estimates** of no. of overnight trips/visitor-trips and trip expenditure etc. for reference period of last 365 days from the information collected for last 30 days reference period for the trips in Block 5.2.

6.4 Tables are to be generated separately for trips completed during last 365 days and completed during last 30 days as in the manner the data was captured.

6.5 Number of 'Visitor-trip' of a visitor is the number of trips he/she had made during the reference period and is determined by counting a visitor as many times as the number of trips he or she made during the reference period.

6.6 Usual monthly per capita expenditure (UMPCE) for each household is to be obtained by dividing the entry against item 7, Block 3 (i.e. household's usual monthly consumer expenditure) by entry against item 1 (households size) of Block 3.

6.7 Tables are to be generated for quintile classes of UMPCE (separately for rural and urban) at the State level.

6.8 For State level, quintile classes of UMPCE are to be determined based on usual monthly consumer expenditure of all the households. UMPCE quintile distribution, which does not cover all persons / all households, will be assumed to be same as the UMPCE distribution of the entire households.

6.9 No attempt shall be made for the derivations of item-wise break-up in the tables relating to tourism expenditure (Table Nos. 20-22 & 25-28) where only total expenditure or sub-total expenditure have been reported without providing any break-up of constituent items of expenditure. However, the average expenditure per trip for all the items for any leading purpose/quintile class of UMPCE, etc. in those tables shall be based on the total number of estimated trips (i.e., with common denominator for all the items) for that particular leading purpose/quintile class of UMPCE, etc. and **not** on the basis of trips reporting positive expenditure for that particular item of expenditure. Hence there might be a possibility that item-wise expenditure would not add up to the sub-total or total expenditure for any row/column.

6.10 There should not be separate tabulation for trips by transgender, information on which was collected for the first time in this round, as the part data revealed that such cases are very few. This information should also not be clubbed with gender-'male' and will be reflected only in the category -'person'.

Tabulation Plan for Schedule 21.1, NSS 72st Round: July, 2014 to June, 2015**List of Tables**

Table No.	Title	Page No.
(1)	(2)	(3)
1	Number of households, total no. of persons, number of households reporting overnight trip(s), number of overnight visitor(s), number of overnight trip(s) and average household size, both surveyed and estimated	49
2	Per 1000 distribution of households reporting overnight trips during last 365 days by religion	50
3	Per 1000 distribution of households reporting overnight trips last 365 days by social group	51
4R	Per 1000 distribution of households reporting overnight trips during last 365 days by household type (rural)	52
4U	Per 1000 distribution of household reporting overnight trips during last 365 days by household type (urban)	53
5A	Per 1000 distribution of overnight visitor-trips completed during last 365 days by purpose of trip with leading purposes holidaying, leisure & recreation, health & medical, and shopping	54-62
5B	Per 1000 distribution of overnight visitor-trips completed during last 30 days by purpose of trip with leading purposes business, social, religious & pilgrimage, education & training and others	63-71
6A	Per 1000 distribution of overnight visitor-trips completed during last 365 days by purpose of trip for different age-groups with leading purposes holidaying, leisure & recreation, health & medical, and shopping	72-80
6B	Per 1000 distribution of overnight visitor-trips completed during last 30 days by purpose of trip for different age-groups with leading purposes business, social, religious & pilgrimage, education & training and others	81-89
7A	Per 1000 distribution of overnight visitor-trips completed during last 365 days by purpose of trip for different educational levels with leading purposes holidaying, leisure & recreation, health & medical, and shopping	90-98
7B	Per 1000 distribution of overnight visitor-trips completed during last 30 days by purpose of trip for different educational levels with leading purposes business, social, religious & pilgrimage, education & training and others	99-107
8A	Per 1000 distribution of overnight visitor-trips completed during last 365 days by purpose of trip for different activity statuses with leading purposes holidaying, leisure & recreation, health & medical, and shopping	108-116
8B	Per 1000 distribution of overnight visitor-trips completed during last 30 days by purpose of trip for different activity statuses with leading purposes business, social, religious & pilgrimage, education & training and others	117-125
9A	Per 1000 distribution of overnight visitor-trips by major mode of travel for each visitor's purpose completed during last 365 days with leading purposes holidaying, leisure & recreation, health & medical, and shopping	126-128
9B	Per 1000 distribution of overnight visitor-trips by major mode of travel for each visitor's purpose completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others	129-131
10A	Per 1000 distribution of overnight visitor-trips by major type of stay for each visitor's purpose completed during last 365 days with leading purposes holidaying, leisure & recreation, health & medical, and shopping	132-134

Table No.	Title	Page No.
(1)	(2)	(3)
10B	Per 1000 distribution of overnight visitor-trips by major type of stay for each visitor's purpose completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others	135-137
11A	Per 1000 distribution of overnight visitor-trips by average number of night spent in the trip (including journey) for each visitor's purpose completed during last 365 days with leading purposes holidaying, leisure & recreation, health & medical, and shopping	138-140
11B	Per 1000 distribution of overnight visitor-trips by average number of night spent in the trip (including journey) for each visitor's purpose completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others	141-143
12A	Per 1000 distribution of overnight visitor-trips completed during last 365 days by main destination for Uttarakhand State as origin with leading purposes holidaying, leisure & recreation, health & medical, and shopping	144-152
12B	Per 1000 distribution of overnight visitor-trips completed during last 30 days by main destination for Uttarakhand State as origin with leading purposes business, social, religious & pilgrimage, education & training and others	153-161
13A	Per 1000 distribution of visitor-trips by purposes for visitor-trips completed during last 365 days from the same state and from other states for Uttarakhand state as main destination with leading purposes holidaying, leisure & recreation, health & medical, and shopping	162-164
13B	Per 1000 distribution of visitor-trips by purposes for visitor-trips completed during last 30 days from the same state and from other states for Uttarakhand state as main destination with leading purposes business, social, religious & pilgrimage, education & training and others	165-167
14	Number of overnight trips, both surveyed and estimated, by leading purpose	168-170
15A	Estimated number (00) of overnight trips for each starting month for different leading purpose	171-173
15B	Per 1000 distribution of overnight trips by starting month for each leading purpose	174-176
16	Per 1000 distribution of overnight trips by quintile class of UMPCE for each leading purpose of trip	177-179
17	Per 1000 distribution of overnight trips by number of members in the trip and percentage of female member trip in a single member trip	180-182
18	Estimated number (00) of overnight trips by leading purpose of trip for household NIC	183-185
19	Estimated number (00) of overnight trips by leading purpose of trip for household NCO	186-188
20	Average expenditure (in ₹) per overnight trip by categories of expenditure for each leading purpose	189-191
21A	Average expenditure (in ₹) per overnight trip with leading purposes holidaying, leisure & recreation, health & medical, and shopping by categories of expenditure for each quintile class of UMPCE completed during last 365 days	192-194

Table No.	Title	Page No.
(1)	(2)	(3)
21B	Average expenditure (in ₹) per overnight trip with leading purposes business, social, religious & pilgrimage, education & training and other by categories of expenditure for each quintile class of UMPCE completed during last 30 days	195-197
22	Average expenditure (in ₹) per overnight trip by quintile class of UMPCE and leading purpose of trip	198-200
23	Number of same-day trips, both surveyed and estimated, by leading purpose completed during last 30 days	201-203
24	Per 1000 distribution of same-day trips by quintile class of UMPCE for each leading purpose of trip completed during last 30 days	204-206
25	Average expenditure (in ₹) per same-day trip by categories of expenditure for each leading purpose completed during last 30 days	207-209
26	Average expenditure (in ₹) per same-day trip by categories of expenditure for each quintile class of UMPCE completed during last 30 days	210-212
27	Average expenditure (in ₹) per same-day trip by quintile class of UMPCE and leading purpose of trip completed during last 30 days	213-215
28	Lower and upper limits (₹) of each quintile class of UMPCE for State	216-218

Appendix A

Schedule 21.1

Domestic Tourism Expenditure

RURAL	
URBAN	

CENTRAL	
STATE	

GOVERNMENT OF INDIA
NATIONAL SAMPLE SURVEY OFFICE
SOCIO-ECONOMIC SURVEY
SEVENTY SECOND ROUND: JULY, 2014 - JUNE, 2015
SCHEDULE 21.1: DOMESTIC TOURISM EXPENDITURE

[0] descriptive identification of sample household			
1. state/u.t.:		5. hamlet name	
2. district		6. investigator unit/ block	
3. sub-district/ tehsil/town*		7. name of head of household	
4. village name		8. name of the informant	

[1] identification of sample household									
item no.	item	code			Item no.	item	code		
1.	srl. no. of sample village/block				11.	sub-sample			
2.	round number	7		2	12.	FOD sub-region			
3.	schedule number	2	1	1	13.	sample hg / sb number			
4.	sample (central-1, state-2)				14.	second-stage stratum number			
5.	sector (rural-1, urban-2)				15.	sample household number			
6.	NSS region				16.	srl. no. of informant [#] (as in col.1, block 4)			
7.	district code				17.	response code			
8.	stratum				18.	survey code			
9.	sub-stratum								
10.	sub-round				19.	reason for substitution of original household (code)			

CODES FOR BLOCK 1

item 17: **response code:** informant: co-operative and capable – 1, co-operative but not capable – 2, busy – 3, reluctant – 4, others – 9

item 18: **survey code:** original – 1, substituted – 2, casualty – 3

item 19: **reason for substitution of original household :** informant busy – 1, members away from home – 2, informant non-cooperative – 3, others – 9

* tick mark (✓) may be put in the appropriate place

if the informant is not a household member, code 99 will be recorded.

[2] particulars of field operations										
srl. no.	item	field investigator (FI)/ asstt. superintending officer(ASO)				field officer (FO)/ superintending officer (SO)				
(1)	(2)	(3)				(4)				
1(a).	(i) name (block letters)									
	(ii) code									
	(iii) signature									
1(b).	(i) name (block letters)									
	(ii) code									
	(iii) signature									
2.	date(s) of:	DD	MM	YY	DD	MM	YY			
	(i) survey/ inspection									
	(ii) receipt									
	(iii) scrutiny									
	(iv) despatch									
3.	number of additional sheet(s) attached									
4.	total time taken to canvass the schedule by the team of investigators (FI/ASO) (in minutes) [no decimal point]									
5.	number of investigators (FI/ASO) in the team who canvassed the schedule									
6.	whether any remark has been entered by FI/ASO/ supervisory officer	(i) in block 9/10								
		(ii) elsewhere in the schedule								

[9] remarks by investigator (FI/ASO)

[10] comments by supervisory officer(s)

[3] household characteristics										
1.	household size					4.	household type (code)			
2.	principal industry (NIC – 2008)	description				5.	religion (code)			
		code (5-digit)								
3.	principal occupation (NCO-2004)	description				6.	social group (code)			
		code (3-digit)					7. household's usual monthly consumer expenditure (₹)			

CODES FOR BLOCK 3

item4 : household type:**for rural areas:**

self-employed in agriculture-1,
 self-employed in non-agriculture-2,
 regular wage/salary earning-3,
 casual labour in agriculture-4,
 casual labour in non-agriculture-5,
 others-9.

for urban areas:

self-employed-1,
 regular wage/salary earning-2,
 casual labour-3,
 others-9.
