

ESTIMATES OF STATE DOMESTIC PRODUCT OF UTTARAKHAND

(2004-05 TO 2013-14 WITH BASE YEAR, 2004-05)

Government of Uttarakhand

DIRECTORATE OF ECONOMICS & STATISTICS

Department of Planning

GOVERNMENT OF UTTARAKHAND

100/6 Neshvilla Road, Dehradun (Uttarakhand) – 248001

Telefax: 0135-2712604

Foreword

I am happy to note that fruitful and sustained efforts of the Directorate of Economics and Statistics (DES) makes it possible to prepare estimates of the State Domestic Product (SDP). This compilation, which is seventh of its series of publication and titled as "Estimates of State Domestic Product of Uttarakhand (2004-05 to 2013-14 with Base Year: 2004-05)", is an outcome of these efforts. The regularity maintained by the directorate in making this valuable data available to the users is praiseworthy.

SDP is a reflection of economic development of the state and its derivative Per Capita Income is a suitable measure used for preparing HDI. Thus, various aggregates given in this document shed lights on the economic growth of the state and its people.

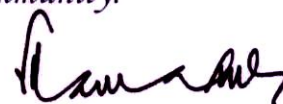

Estimates in this publication are given for the period 2004-05 to 2013-14. Estimates of Gross and Net State Domestic Product by industry of origin, both at Current and Constant Prices (2004-05) are presented.

Special thanks are extended to Shri Y S Pangtey, Director for providing direction to the DES. I would also like to place on record my deep and sincere appreciation for the efforts of officers, especially Shri Pankaj Naithani, Joint Director, and staff of the DES engaged in preparation of this document.

I hope this publication will immensely help the policy makers, development administrators, planners and academic & research community.

Date: March 28, 2014

Dehradun

Acknowledgement

The economic development of any state gets well-reflected by the estimates of State Domestic Product (SDP), also known as State Income Estimates. These estimates provide an overall view of economy of a macro region. The Planning Commission and the Finance Commission make use of these measures while allocating funds from the central pool to various states.

The Directorate of Economics and Statistics (DES), Uttarakhand introduced the first publication of the series, "Estimates of State Domestic Product of Uttarakhand (1993-94 to 2001-02), in November 2004. Subsequent issues have been released in March-2006, March-2007, April-2008, October-2009 and May-2012. The seventh issue, "New Series of Estimates of State Domestic Product of Uttarakhand (2004-05 to 2013-14 with Base Year: 2004-05), is in your hand now. It presents the Revised Estimates (RE) of GSDP, NSDP and Per Capita Income (GSDP & NSDP) for 2004-05 to 2010-11, the provisional Estimates (P) for 2011-12, the Quick Estimates (Q) for 2012-13 and the Advance Estimates (A) for 2013-14.

This publication would not have been possible without cooperation from the National Accounts Division (NAD) of the Central Statistical Office (CSO) and data-furnished by the concerned departments of the government of Uttarakhand. Help and support from the officials of these organisations is gratefully acknowledged.

I would like to express my sincere thanks and appreciation to Shri Pankaj Naithani, Joint Director and Shri TS Anna, EStO and other members of the small SDP-team for their dedication in making this publication available to the users.

Director, DES-Uttarakhand
Dehradun

P r e f a c e

The Directorate of Economics and Statistics (DES)-Uttarakhand has been enthusiastic enough in making considerable strides in the direction of preparing and disseminating aggregates of State Domestic Product (SDP). Since initiation in the year 2004, altogether six publications those cover SDP estimates pertaining to 1993-94, 1999-2000 and 2004-05 series have been produced. There are obviously number of documents on associated subjects, such as NPIs Survey: A Statistical Report, Back Series of State Income of Uttarakhand etc. However, what is more soothing is the production of various research papers by those affiliated with the State Income Unit of the DES.

This document, which is in your hand, provides SDP figures of 2004-05 series up to the year 2013-14. There are basically three chapters in the document – (I) About Estimation of the SDP (II) Brief Analysis of State Income Aggregates (III) GSDP/GDP and PCI of Uttarakhand and All-India – followed by 46 Tables and 2 Annexures. However, few more tables are included in Chapter-II to give it the desired flavour, and 8 figures are added at place for graphical/ pictorial representation of data. The Press Release of Advance Estimates (2013-14) dated 15 Feb. 2014 and its coverage in the print media expresses the timeliness being maintained by the DES.

I would not let the opportunity go out of my hand, and would like to pay sincere gratitude to the officials of the National Accounts Division (NAD) of the CSO. They really keep our interest alive through conduct of discussion meetings, regional workshops and also the annual conferences of IARNIW. Their help, support and guidance are heartily acknowledged.

Our data suppliers, mostly the state government departments and their statistical bodies/ units, are indeed complying our data demands/ needs and supply us reliable and consistent data on time. As it is difficult to name each of the officials of these departments, their help and support to the DES is collectively acknowledged and appreciated.

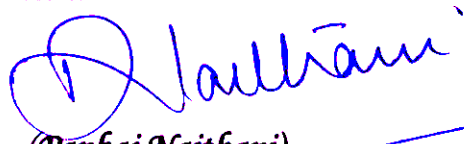

The print media that have given coverage to the SDP estimates prepared by us is warmly thanked for their kindness. Analyses being done by them always give us second angle to view our data.

Our staffs of various regional units and the directorate that contributed in this exercise through any means, directly or indirectly, are greatly thanked. However, it would not be fair on my part if I fail to acknowledge contribution of my affiliates namely – Shri TS Anna (E.St.O), Shri Sanjay

Sharma (Addl.St.O), Shri SK Giri (Addl.St.O) and Shri BS Rawat (Addl.St.O). They are the real building blocks for this publication. It is their hard work and dedication that DES excels in complex and sophisticated statistical calculations of state income aggregates.

Lastly, I wholeheartedly and warmly thank Shri S Ramaswamy, Principal Secretary (Planning) and Shri YS Pangtey, Director for giving us opportunity to work in this field and recognising our contribution.

(B)	Coverage in Print Media	57-59

I: About Estimation of State Domestic Product

(A) The SDP or State Income

The estimates of State Domestic Product (SDP), generally known as State Income, are considered as the most important macro-economic aggregates to measure the economic development of the state. The SDP of a State is defined as the aggregate money value of all goods and services produced within the geographical boundary of the state, counted without duplication with reference to a specific time period, usually a year. As SDP reflects the production capacity of any State, it simultaneously reflects outcomes of investments made, opportunities available and the likely impact of forthcoming economic policies. Thus, in the context of planned development of the economy of a state, the estimates of state domestic product and its derivative, per capita income plays a vital role since these estimates help government in formulating the policies and programmes as per critical economic analysis.

The broader utilities of the GSDP estimates are as follows:

1. To know the growth of the economy
2. To workout per capita income
3. For allocation of funds
4. To study structural changes in economy
5. For fixing the plan targets
6. To study the inter-state comparison

(B) Sectors of Economy

In order to estimate the SDP and State Income, the whole economy of a State is divided into 3 major sectors comprised of 13 sub-sectors as follows:

1-Primary Sector

- (i) Agriculture (including horticulture) & Livestock
- (ii) Forestry and Logging
- (iii) Fishing
- (iv) Mining and Quarrying

2-Secondary Sector

- (v) Manufacturing
 - (a) Registered

- (b) Un-Registered
- (vi) Construction
- (vii) Electricity, Gas and Water Supply

3-Tertiary Sector

- (viii) Transport, Storage and Communication
 - (a) Railway
 - (b) Transport by other means
 - (c) Storage
 - (d) Communication
- (ix) Trade, Hotel and Restaurants
- (x) Banking and Insurance
- (xi) Real Estate, Ownership of Dwelling, Business and Legal Services
- (xii) Public Administration
- (xiii) Other Services

(C) The Estimation Approaches

The estimates of SDP from the above sectors are prepared individually by adopting one or more of the following three approaches;

(C₁) Production Approach

This approach is applicable when an analyst has fair idea about outputs and inputs of a sector. Moreover, when the data on outputs and inputs is easily available. In this method the sum of economic values of all goods & services produced within the state boundary during the year is appropriately adjusted for the inputs consumed in the process of production i.e., production is calculated as the algebraic sum of outputs (+) and inputs(-). This approach is suitable for calculating SDP from Agriculture, Livestock, Forestry, Fishing, Mining & Quarrying and Manufacturing sectors.

(C₂) Income Approach

This approach is suitable when it is difficult to straight away calculate the Gross Value of Output (GVO), but one can reach/ calculate the Gross Value Added (GVA). The value addition is estimated taking into consideration the income accrued to the four factors of production namely Land, Labour, Capital and Entrepreneurship in the form of Rent, Salary and Wages, Interest and Profit. This approach is utilized in estimating domestic product from the sectors of Electricity, Gas and Water Supply, Transport, Storage and Communication, Trade, Hotel and Restaurant, Banking and Insurance, Real Estate, Business Services, Public Administration and Other Services.

(C₃) Expenditure Approach

This method is used when there is fair idea about the disposal of the product i.e., the quantity ultimately consumed (Consumption and Expenditure), the part of it is saved for future consumption (saving) and/ or for further production of goods and services. This method is based on measurement of income at the stage of disposal. All that is produced is either ultimately consumed or part of it is saved for future consumption or further production of goods and services. Thus, the money value of consumption and expenditure plus saving gives the income. This approach is used primarily in estimating income from construction sector.

The sector wise approaches mentioned above are not the ultimate and only possibilities. These may vary depending upon the data availability. One must note that GSDP can be prepared following either of three approaches and result should not vary. However, in practice it is not possible to use all these three approaches separately. Thus, a mix of approaches is normally used in SDP estimation.

(D) Current and Constant Price Estimates

An analyst may be interested to analyze the State Income or SDP estimates in two way:

- The actual increase in value terms i.e., the estimates of current output at current prices
- The increase in output i.e., the estimates of current output at constant prices (base year price)

Whereas, the first estimate helps in analyzing the overall impact of increase in price and increase in the quantity, the second estimate is used to analyze the increase in quantity terms, when the price effects are eliminated.

Following the above approaches two types of estimates of SDP and State Income are prepared – estimates at current and constant prices.

(E) Estimating the GSDP/ NSDP & PCI

Routinely, the GSDP/ NSDP estimation procedure is performed in five steps:

Step 1: Calculation of GVA

Step 2: Calculation of FISIM

Step 3: Calculation of GSDP; Adjusting GVA for FISIM

Step 4: Calculation of CFC

Step 5: Calculation of NSDP; Adjusting GSDP for CFC

Step 6: Calculation of PCI

It, therefore, seems necessary to understand the meaning of the terms that are used above, such as, GVA, FISIM, GSDP, CFC, NSDP & PCI.

(E₁) GVA

GVA of any sector is achieved as the net of outputs and inputs following approaches mentioned above. Mathematically,

$$\text{GVA} = \text{Value of Outputs} - \text{Value of Input} - - - - - (1)$$

(E₂) Financial Intermediation Services Indirectly Measured (FISIM)

There are various sectors in which banking and financial activities are involved but these are difficult to be considered while calculating GVA for those sectors of economy, such as agriculture, forestry, fishing, mining & quarrying, manufacturing, construction, electricity and gas, transport by other means, storage, trade, hotels and restaurants, business services and other services. Since banking and financing are supra-regional activities, it is difficult to calculate their impact (in terms of FISIM) on economy of any state. Thus, these estimates (of FISIM) are calculated at the CSO and supplied to different states. FISIM supplied to the states

are further distributed to different user industries within the state in proportion to the respective sectoral GSDP.

FISIM is defined as “an imputed income equivalent to interest and dividend receipt of banking and financial enterprises net of interest paid to depositors”.

(E₃) Gross State Domestic Product (GSDP)

The gross value added is worked out first by one or more of the approaches as indicated above and then an intermediate input (FISIM) is deducted to get GSDP.

Mathematically,

The GSDP of any sector is calculated as

$$\text{GSDP}_{(\text{unadjusted})} = \Sigma \text{GVA}; \text{ sum over sectors} \text{ - - - - - (2)}$$

$$\text{GSDP}_{(\text{Adjusted})} = \Sigma (\text{GVA} - \text{FISIM}); \text{ sum over sectors} \text{ - - - - - (3)}$$

(E₄) Consumption of Fixed Capital (CFC)

The fixed assets, such as land, building, plant & machinery etc. are used in the production process, and hence play a vital role in building up the GSDP. However, two things are possible either the fixed capital would depreciate or it could become obsolete. Thus, it is necessary to adjust the GSDP for the ‘Consumption of Fixed Capital (CFC)’ to reach to the estimates of NSDP.

CFC is defined as current replacement cost of the fixed assets used up (consumed) during a financial year as a result of normal wear and tear, and foreseen obsolescence.

CFC is specifically defined as the part of the gross product required to replace the fixed capital used in the production process. The industry-wise estimates of CFC are provided by CSO.

(E₅) Net State Domestic Product (NSDP)

The estimates of NSDP are arrived by deducting the estimates of Consumption of Fixed Capital (CFC) of concerned sector from the estimates of GSDP of that sector, and then aggregated to get the NSDP. Mathematically,

$$\text{NSDP} = \Sigma (\text{GSDP} - \text{CFC}); \text{ sum over sectors} \text{ - - - - - (4)}$$

(E₆) Per Capita Income (PCI)

The estimates of aggregated NSDP (at current and constant prices) so arrived at is divided by mid-year (financial) population to get Per Capita Income (PCI) i.e.,

$$\text{PCI} = \text{NSDP} / \text{Mid-year Population} \text{ - - - - - (5)}$$

Note that it can be calculated using GSDP figures as well.

(F) Supra-Regional Sector

The activities of Railways, Communication, Banking & Insurance and Public Administration (Central Government) are not confined to one state. It is difficult at state-level to prepare estimates pertaining to the activities of these sectors within the state. The CSO therefore prepares the estimates at national level by allocating them to various states on the basis of appropriate physical indicators, e.g. length of railway track, number of telephone/mobile connections, number of bank branches, strength of central govt. staff etc.

(G) Three Principal Figures

Most of the users of SDP or State Income get puzzled with set of estimates floated before them, and find it difficult to select the appropriate one. It is for their ease to concentrate on following three estimates:

- (a) GSDP at current prices
- (b) Growth of GSDP at constant prices (Perceived as Growth Rate)
- (c) Per Capita NSDP at current prices (Perceived as Per Capita Income)

II: Brief Analysis of State Income Aggregates

(A) The GSDP & NSDP Estimates

The estimates of GSDP/NSDP and Per Capita GSDP/NSDP at Current and Constant (2004-05) Prices for the year 2004-05 to 2013-14 are given in Table – A below:

Table – A : Estimates of GSDP, NSDP and Per Capita GSDP/NSDP at Current and Constant (2004-05) Prices

Year	GSDP (` Crore)		Per Capita GSDP (`)		NSDP (` Crore)		Per Capita NSDP (`)	
	Current Prices	Constant Prices	Current Prices	Constant Prices	Current Prices	Constant Prices	Current Prices	Constant Prices
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
2004-05	24786	24786	27497	27497	22288	22288	24726	24726
2005-06	29968	28340	32716	30939	26968	25448	29441	27781
2006-07	36795	32190	39544	34594	32670	28514	35111	30644
2007-08	45856	38022	48519	40231	40279	33498	42619	35444
2008-09	56025	42832	58377	44631	48616	37064	50657	38621
2009-10	70730	50598	72603	51938	61138	43407	62757	44556
2010-11	83969	55667	84946	56315	72970	47967	73819	48525
2011-12 ^P	97696	60870	97433	60706	84953	52407	84724	52266
2012-13 ^Q	113958	66356	112086	65266	99157	57190	97528	56251
2013-14 ^A	132969	72984	129021	70817	115868	62976	112428	61106

It can be observed from the above table that the estimates of GSDP, NSDP, and Per Capita NSDP at Current Prices, which are respectively ` 24786 Crores, ` 22288 Crores and ` 24726 during 2004-05 have gone up to ` 132969 Crores, ` 115868 Crores and ` 112428 in 2013-14. It means that these estimates have gone up by approximately, 536%, 520% and 455% respectively. Whereas at constant prices these estimates are ` 72984 crores, ` 62976 crores and ` 61106 respectively in 2013-14. Thus, it is clear that even at constant prices the GSDP, NSDP and Per Capita NSDP have gone up by 294%, 283% and 247%.

(B) Economic Growth of the State at Constant (2004-05) Prices

Although the above mentioned percentage increases reflect an overall growth of state's economy, it appears necessary to analyse the year-wise performance of state on various macro aggregates during the period 2004-05 to 2013-14. The year-wise economic growth in GSDP, NSDP and Per Capita Income (NSDP) at Constant (2004-05) Prices from 2004-05 to 2013-14 in percentage terms is presented in Table – B below:

Table - B : Yearly Growth in GSDP & NSDP and Per Capita GSDP & NSDP at Constant (2004-05) Prices

Year	Percentage Growth Over Previous Year at Constant Prices			
	GSDP	Per Capita GSDP	NSDP	Per Capita NSDP
(1)	(2)	(3)	(4)	(5)
2005-06	14.34	12.52	14.18	12.36
2006-07	13.58	11.81	12.05	10.30
2007-08	18.12	16.29	17.48	15.67
2008-09	12.65	10.94	10.64	8.96
2009-10	18.13	16.37	17.11	15.37
2010-11	10.02	8.43	10.50	8.91
2011-12 ^P	9.35	7.80	9.26	7.71
2012-13 ^Q	9.01	7.51	9.13	7.62
2013-14 ^A	9.99	8.51	10.12	8.63

It is clear from the above table that the state's economy achieved the highest growth rate in the year 2007-08 & 2009-10. It is mainly due to rapid performance observed in the sectors of manufacturing (registered), trade, hotel and restaurant and public administration during these years.

(C) Structural Change in The Economy

There are structural changes observed in the economy of the state, and this Table-C has been prepared to analyse the same.

Table - C : Sectoral Share of GSDP during 2004-05 and 2013-14

Sector	2004-05	2013-14	
		At Current Prices	At Constant Prices
(1)	(2)	(3)	(4)
Primary	23.48	13.73	10.26
Secondary	27.02	36.07	37.83
Tertiary	49.50	50.20	51.91
Total GSDP	100.00	100.00	100.00

From the above Table, it can be observed that considerable changes have taken place in the sectoral composition of the GSDP during the period 2004-05 to 2013-14. The tertiary sector has emerged as the major contributor through-out the period. The percent share of primary sector has declined from 23.48% to 13.73% (at current prices) and 10.26% (at constant prices). However percentage share of secondary and tertiary sectors have increased from 27.02% to 36.07% and 49.50% to 50.20% respectively during the reference period. It indicates contraction in the share of primary sector and expansion of secondary sector. The tertiary sector in the state has contributed almost stagnantly during the reference period; its contribution being nearly 50%.

III: GSDP/GDP & PCI of Uttarakhand and All-India

(A) The GSDP/GDP

The GSDP of Uttarakhand at constant prices is estimated as Rs. 72984 crores in 2013-14^A as against Rs. 24786 in 2004-05. Percentage share of GSDP of state to All-India GDP has increased from 0.83 in 2004-05 to 1.27 in 2013-14^A. Growth Rate of GSDP at constant prices of the state is observed as 9.9 percent, whereas national Growth Rate is 4.9 percent for the same year. Year-wise GSDP and Growth Rate of Uttarakhand and All-India can be observed in the Table-D below.

Table - D : GSDP of Uttarakhand and All-India GDP at Constant (2004-05) Prices

Year	Uttarakhand		All India		% of GSDP to GDP
	GSDP (Rs. Crores)	Growth Rate (%)	GDP (Rs. Crores)	Growth Rate (%)	
2004-05	24786	-	2971464	-	0.83
2005-06	28340	14.3	3253073	9.5	0.87
2006-07	32190	13.5	3564364	9.6	0.90
2007-08	38022	18.1	3896636	9.3	0.98
2008-09	42832	12.6	4158676	6.7	1.03
2009-10	50598	18.1	4516071	8.6	1.12
2010-11	55667	10.2	4918533	8.9	1.13
2011-12 ^P	60870	9.3	5247530	6.7	1.16

Advance Estimates of State Income of Uttarakhand (Year 2013-14)

State Income Estimate is **aggregate money value of goods and services** produced within the geographical boundary of an economic-region (Nation, State, District etc.), counted without duplication, during a specific period of time usually a year.

These are initially estimated for a Base Year (with respect to which growth/development is reflected) and subsequently for forthcoming/ following years. Basically four estimates are prepared:

- (1) Gross State Domestic Product at Base-Year Prices - GSDP at Constant Prices
- (2) Gross State Domestic Product at any Following-Year Prices - GSDP at Current Prices
- (3) Net State Domestic Product at Base-Year Prices - NSDP at Constant Prices
- (4) Net State Domestic Product at any Following-Year Prices - NSDP at Current Prices

However, two more estimates/ indicators, as mentioned below, are also obtained:

- (5) Per Capita NSDP at Current Prices - Per Capita Income of the State
- (6) Percentage Change in GSDP (Calculated at Constant Prices i.e. Base-year Prices) of Current Year with respect to the Previous Year (This reflects the growth in actual production i.e. eliminating the effect of prices) - Growth Rate of the State

Uttarakhand can't attain first Position in above (1) – (4) estimates as number of states are bigger in size, established long back and they are already leading in various production activities. However, due to having lesser population and also having chances to grow considerably in any particular sector, it is very likely for a smaller or newly incepted state performing better on (5) and (6) above.

Directorate of Economics & Statistics (DES), Department of Planning is entrusted for preparing above estimates of the state, Advance estimates for the year are being released as enclosed. These estimates have been prepared primarily on the basis of data supplied by the Department of Agriculture and the Directorate of Budget (Department of Finance). Salient Features of the estimates are as follows:

1. Estimates based on Base Year (2004-05) Prices

The advance estimates based on base year (2004-05) prices (Constant Prices) for the year 2013-14 is estimated as INR **72984** Crores and for the year 2012-13 (Quick Estimates) it is INR **66356** Crores. Economic Growth Rates of the state for the year 2013-14 (Advance Estimates) and 2012-13 (Quick Estimates) have been estimated as **9.99%** and **9.01%** respectively.

According to the data released on 07 February, 2014 by the centre All India Economic Growth Rate for the year 2013-14 has been estimated as 4.9%, which is 4.5% for the year 2012-13 (Quick Estimates).

Growth rates of 'agriculture', 'industry' and 'services' are expected to be 3.96 %, 12.69 % and 9.22 % percent in the year 2013-14 for the state.

2. Estimates at Current Prices

Advance estimates of Gross State Domestic Product at Current Prices for the year 2013-14 is ₹ 132969 Crores, for 2012-13 (Quick Estimates) it is ₹ 113958 Crores. Estimates of Net State Domestic Product at Current Prices for the year 2013-14 (Advance Estimates) is estimated as ₹ 115868 Crores, 2012-13 (Quick Estimates) as ₹ 99157 Crores.

3. Per Capita Income

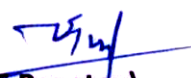

Per Capita Income of the state estimated for the years 2013-14 (Advance Estimates) and 2012-13 (Quick Estimates) is ₹ 112428 and ₹ 97528 respectively.

Comparative Statistics of All India and Uttarakhand

Item	All India		Uttarakhand	
	2012-13	2013-14	2012-13	2013-14
Economic Growth Rate (in %)	4.5	4.9	9.01	9.99
Per Capita Income (in ₹)	67,839	74,920	97,528	1,12,428

Comparison of above estimates prepared by the state with data compiled by the Central Statistics Office, Government of India is generally scheduled for forthcoming months of March/ April.

Economic Growth Rate of U'khand increases to 9.99 percent

DEHRADUN,
FEB 15 (HTNS)

The Economic Growth Rate of Uttarakhand has increased to 9.99 percent in 2013-14 which was 9.01 in 2012-13, while, Per Capita Income has increased to Rs. 1,12,428 in 2013-14 as compared to Rs. 97,528 in 2012-13. The Economic Growth Rate of Uttarakhand is about 5 per cent more than National rate.

According to the YS Pangtey, Director, Directorate of Economics & Statistics, Department of Planning, Uttarakhand, these estimates have been prepared primarily on the basis of data supplied by the Department of Agriculture

and the Directorate of Budget (Department of Finance). As per the statistics, the advance estimates based on base year (2004-05) prices (Constant Prices) for the year 2013-14 is estimated as Rs. 72984 Crores and for the year 2012-13 (Quick Estimates) it is Rs. 66356 Crores. Economic Growth Rates of the state for the year 2013-14 (Advance Estimates) and 2012-13 (Quick Estimates) have been estimated as 9.99 percent and 9.01 percent respectively. Advance estimates of Gross State Domestic Product at Current Prices for the year 2013-14 is Rs. 132969 Crores, for 2012-13 (Quick Estimates) it is Rs. 113958 Crores. Es-

timates of Net State Domestic Product at Current Prices for the year 2013-14 (Advance Estimates) is estimated as Rs. 115868 Crores, 2012-13 (Quick Estimates) as Rs. 99157 Crores. Per Capita Income of the state estimated for the years 2013-14 (Advance Estimates) and 2012-13 (Quick Estimates) is Rs. 112428 and Rs. 97528 respectively.

Pangtey said that the State Income Estimate is aggregate money value of goods and services produced within the geographical boundary of an economic-region (Nation, State, District etc.), counted without duplication, during a specific period of time usually a year.

These are initially estimated for a Base Year (with respect to which growth/development is reflected) and subsequently for forthcoming/ following years. Basically four estimates are prepared viz. Gross State Domestic Product at Base-Year Prices, Gross State Domestic Product at any Following-Year Prices, Net State Domestic Product at Base-Year Prices, Net State Domestic Product at any Following-Year Prices and additional Per Capita NSDP at Current Prices and Percentage Change in GSDP (Calculated at Constant Prices i.e. Base-year Prices) of Current Year with respect to the Previous Year (This re-

flects the growth in actual production i.e. eliminating the effect of prices).

He said, however, Uttarakhand can not attain first Position in top four estimates as number of states were bigger in size, established long back and they were already leading in various production activities. However, due to having lesser population and also having chances to grow considerably in any particular sector, it was very likely for a smaller or newly incepted state performing better on last two estimates.

एक लाख से पार उत्तराखंड में प्रति व्यक्ति आय

देहरादून | विशेष संवाददाता

उत्तराखंड के प्रति व्यक्ति आय अनुमानित एक लाख से ऊपर हो गई है। पिछले वर्ष की तुलना में इसमें 14,900 रुपये की छलांग लगाई है।

अर्थ एवं संख्या निदेशालय ने वर्ष 13-14 वित्तीय वर्ष के प्रति व्यक्ति आय और राज्य घरेलू सकल उत्पाद की अनुमानित दर को जारी कर दिया है। प्रति व्यक्ति आय कृषि, वन, मत्स्य, खनन, उद्योग, विद्युत, पेयजल, परिवहन, संचार, व्यापार, बैंकिंग एवं बीमा, रियल स्टेट, कॉमर्सियल सर्विस, सामान्य प्रशासन आदि 13 सेक्टरों के माध्यम से

1,12,428 रुपये राज्य में प्रति व्यक्ति की अनुमानित आय

97,528 रुपये थी पिछले साल उत्तराखंड की प्रति व्यक्ति

74,920 रुपये है देश में प्रति व्यक्ति आय

9.99 फीसदी पहुंची मोथ रेट

पिछले साल 9.01 गोथ रेट थी, जबकि इस बार 9.99 फीसदी तक पहुंच गई है। प्लानिंग कमीशन ने राज्य के गोथ रेट आकलन 9.5 फीसदी किया था।

निकाली जाती है। इसके आधार पर राज्य के प्रति व्यक्ति की अनुमानित आय

1,12,428 रुपये है, जबकि देश में प्रति व्यक्ति आय अभी 74,920 रुपये

प्लानिंग कमीशन के वर्ष 12 से 17 तक औद्योगिक पैकेज देने से सकल घरेलू उत्पाद (जीडीपी) अच्छी-खासी वृद्धि हुई है। इसके अतिरिक्त छोटा और नया राज्य होने की वजह से उत्तराखंड में अभी विकास की अनेक संभावनाएं हैं, जिसके चलते सकल घरेलू उत्पाद में वृद्धि की संभावना बनी रहेगी।

प्रदेश में 1,12,428 रुपये हुई प्रति व्यक्ति आय

अमर उजाला ब्यूरो

देहरादून। सांख्यिकी विभाग की ओर से जारी आंकड़ों के मुताबिक प्रदेश की आर्थिक विकास की दर 9.99 प्रतिशत रहेगी। इसी के साथ प्रदेश की प्रति व्यक्ति आय भी बढ़कर 1.12 लाख रुपये (वर्ष 2013-14 अनुमानित) प्रति व्यक्ति हो गई है। पिछले वर्ष (2012-13 में) आर्थिक विकास दर 9.01 प्रतिशत और प्रति व्यक्ति आय 97,528 रुपये आंकी गई थी। इससे साफ है कि आपदा के बावजूद प्रदेश की आर्थिक विकास की दर बढ़ रही है। वहीं, राष्ट्रीय स्तर पर विकास की

दर 4.9 प्रतिशत रहने का अनुमान है और राष्ट्रीय स्तर पर प्रति व्यक्ति आय अभी 74 हजार रुपये प्रति व्यक्ति ही पहुंच पाई है। केंद्र की ओर सात फरवरी को ये आंकड़े जारी किए गए। आंकड़ों के मुताबिक आधार वर्ष 2004-05 को लेते हुए स्थायी मूल्य पर सकल राज्य घरेलू उत्पाद वर्ष 2013-14 के लिए 72 हजार 984 करोड़ रुपये रहने का अनुमान है। राज्य में कृषि और संबंधित क्षेत्र में वर्ष 2013-14 में विकास दर 3.96 प्रतिशत, औद्योगिक क्षेत्र की विकास दर 12.69 प्रतिशत तथा सेवा क्षेत्र की विकास दर 9.22 प्रतिशत रहने की संभावना है।

राज्य की आर्थिक विकास दर 9.99 फीसद

राज्य ब्यूरो, देहरादून : आपदा की मार से बेहाल उत्तराखंड की आर्थिक सर्वेक्षण के अनुमानित आंकड़ों ने ढाढस बंधाया है। वर्ष 2013-14 में राज्य की आर्थिक विकास दर 9.99 फीसद रहने की संभावना है। वहीं सालाना सकल घरेलू उत्पाद में भी छलांग लगाते हुए राज्य 132969 करोड़ रुपये तक पहुंच रहा है, जबकि प्रति व्यक्ति आमदनी 97528 रुपये से बढ़कर 1,12,428 तक बढ़ी है।

राज्य ने आर्थिक विकास दर के मामले में राष्ट्रीय औसत से बड़ी बढ़त बनाई है। राष्ट्रीय विकास दर जहां 4.90 फीसद है, जबकि राज्य में वर्ष 2012-13 की विकास दर 9.01 फीसद से बढ़कर वर्ष 2013-14 में 9.99 फीसद होने का अनुमान है। अर्थ एवं संख्या निदेशालय की ओर से उक्त आर्थिक सर्वेक्षण जारी किया गया। निदेशक वाईएस पांगती ने बताया कि राज्य में कृषि तथा संबंधित क्षेत्र में वर्ष 2013-14 में विकास दर 3.96 फीसद, औद्योगिक क्षेत्र की विकास दर 12.69 फीसद और सेवा क्षेत्र की विकास दर 9.22 फीसद रहने की संभावना है।

उन्होंने बताया कि वर्ष 2012-13 में

- ♦ आपदा से बेहाल हुए उत्तराखंड को आर्थिक सर्वेक्षण ने बंधाई ढाढस
- ♦ जीएसडीपी छलांग लगाकर सालाना 132969 करोड़ तक पहुंचने का अनुमान
- ♦ प्रति व्यक्ति आमदनी में इजाफा, 97528 रुपये से बढ़कर 1,12,428 रुपये

त्वरित अनुमान के मुताबिक सालाना राज्य सकल घरेलू उत्पाद 113958 करोड़ अनुमानित है। गौरतलब है कि आपदा के चलते राज्य में सेवा क्षेत्र का बड़ा झटका लगा है। फिलवक्त अग्रिम अनुमानों में इसका बड़ा असर नजर नहीं आया है।

देहरादून। रविवार • 16 फरवरी • 2014

प्रदेश में प्रति व्यक्ति आय एक लाख 12 हजार पार

देहरादून (एसएनबी)। प्रदेश की प्रति व्यक्ति आय छलांग मार कर एक लाख 12 हजार के पार पहुंचने का अनुमान है। यही नहीं प्रदेश की आर्थिक विकास दर ने भी नई ऊंचाई को छुआ है। प्रदेश में इस वित्त वर्ष में विकास दर 9.99 फीसद पहुंचने का अनुमान है। इस आधार पर प्रदेश ने प्रति व्यक्ति आय और विकास दर के मामले में देश को भी काफी पीछे छोड़ दिया है।

■ प्रति व्यक्ति आय प्रति वर्ष व आर्थिक विकास दर के मामले में उत्तराखंड ने देश को काफी पीछे छोड़ा।
■ कृषि क्षेत्र की विकास दर 3.96, औद्योगिक क्षेत्र में 12.69 और सेवा क्षेत्र में 9.22 फीसद रहने की संभावना

अर्थ एवं संख्या निदेशालय की ओर से शनिवार को जारी आंकड़ों के मुताबिक वर्ष 2012-14 में राज्य की प्रति व्यक्ति आय एक लाख 12 हजार 428 रुपये प्रतिवर्ष पहुंचने का अनुमान है। 2012-13 के त्वरित अनुमान के मुताबिक यह अब तक 97 हजार 528 रुपये प्रतिवर्ष थी। इतना ही नहीं प्रचलित भावों पर राज्य के सकल घरेलू उत्पाद के आय के अग्रिम अनुमानों में भी जीडीपी में भारी बढ़ोतरी हुई है। वर्ष 2013-14 में जीडीपी एक लाख 23 हजार 969 करोड़ रहने की उम्मीद है। वर्ष 2012-13 के त्वरित अनुमान के हिसाब से प्रदेश का सकल घरेलू उत्पाद एक लाख 13 हजार 958 करोड़ रुपये अनुमानित किया गया था। अर्थ एवं संख्या निदेशक वाईएस पांगती के मुताबिक प्रचलित भावों पर वर्ष 2013-14 में नेट राज्य अनुमान एक लाख 15 हजार 868 करोड़ रुपये रहने की उम्मीद है। (शेष पेज 17)

प्रदेश में प्रति...

यह वर्ष 2012-13 में 99 हजार करोड़ रुपये अनुमानित थी। बता दें कि केंद्र सरकार की ओर से 7 फरवरी 2014 को जारी किए गए आंकड़ों के मुताबिक राज्य में कृषि एवं संबंधित क्षेत्र में वर्ष 2013-14 में विकास दर 3.96 प्रतिशत, औद्योगिक क्षेत्र की विकास दर 12.69 फीसद और सेवा क्षेत्र की विकास दर 9.22 फीसद रहने की संभावना जताई गई है।

राज्य में प्रतिव्यक्ति आय एक लाख के पार

● मुख्य संवाददाता, देहरादून

आर्थिक विकास दर और प्रतिव्यक्ति आय के मामले में उत्तराखंड राष्ट्रीय औसत की सीमा को लांघ जाएगा। योजना के अर्थ एवं संख्या निदेशालय के अनुमान के हिसाब से 2013-14 में राज्य की प्रतिव्यक्ति आय एक लाख के आंकड़े को पार कर जाएगी। इतना ही नहीं राज्य की आर्थिक विकास दर में इजाफा होने के आसार हैं। अनुमान के मुताबिक उत्तराखंड की आर्थिक विकास दर 9.9 फीसदी होने की संभावना है।

योजना विभाग के अर्थ एवं संख्या निदेशालय ने शनिवार को ये आंकड़े जारी किये। निदेशक वाईएस पांगती के मुताबिक विभाग ने 2013-14 के लिये राज्य की आय के अग्रिम अनुमान तैयार किये हैं। ये

■ आर्थिक विकास दर 9.9 फीसदी होने के आसार
■ नियोजन विभाग ने जारी किये आंकड़े

अनुमान आधार वर्ष के वास्तविक आंकड़ों और संदर्भित वर्ष के आंकड़ों के तुलनात्मक विश्लेषण से तैयार होते हैं। राज्य के कृषि निदेशालय और वित्त विभाग के बजट आंकड़ों के तुलनात्मक अध्ययन के हिसाब से नये अनुमान तैयार किए गए हैं। पांगती के मुताबिक आधार वर्ष 2004-05 के मूल्यों (स्थायी भावों) पर राज्य घरेलू उत्पाद के अग्रिम अनुमान वर्ष 2013-14 में 72984 करोड़ रुपये है। उन्होंने बताया कि

वर्ष 2013-14 में राज्य की आर्थिक विकास दर 9.91 प्रतिशत रहने की संभावना है। वर्ष 2012-13 में (त्वरित अनुमान) में यह 9.01 प्रतिशत थी। आर्थिक विकास दर का यह आंकड़ा राष्ट्रीय औसत से कहीं ऊपर है। केंद्र सरकार ने सात फरवरी को जारी आंकड़ों में 2013-14 के लिए देश की आर्थिक विकास दर 4.9 प्रतिशत का अनुमान लगाया है, जबकि 2012-13 में उसका 4.5 प्रतिशत पुनरीक्षित अनुमान था। यही नहीं जारी आंकड़ों के हिसाब से 2013-14 में राज्य की प्रतिव्यक्ति आय 112428 रुपये तक पहुंचने की संभावना है। 2012-13 में त्वरित अनुमान के हिसाब से इसका 97528 रुपये होने का अनुमान लगाया गया था।
