**On tapping the complex, the app list out all the offices located within the complex along with its floor and room number and the user can search by giving a part of the name of the office.**

**On selecting the desired office from the list, a map of the floor containing that office will be drawn and the chosen office shall be indicated in a different color and on tapping the office, further details will be made available.**

**The map drawn can be zoomed to have a clear view of the various offices and tapping any office will show further details about that office.**

Tapping the 'Where am I' button below will show the current corridor location of the user within the premises.

Every complex shall be provided with Admin user credentials using which he/she can manage the rooms database. The maps are drawn dynamically based on the NoSQL data kept in Google Firebase.
