Dear TNOs

kindly see the trail mail which is already send to all Nodal officers /Biometric Admins of State Govt (AEBAS Haryana attendance).

You are thus requested to get it done following things

1. Re-install all the AEBAS devices as AEBAS devices are using old and outdated client softwares. Link for download latest updated AEBAS software
   is available in trail mail.
        For latest AEBAS applications, device drivers and installation guide, visit at URL: http://basreports.attendance.gov.in/downloads/.

2. Reinstalling activity will be required to be done in all AEBAS devices of Haryana Govt departments (directorates as well as field offices)
     before 31.5.2017. TNOs will further asks/assists biometric admins in their field offices to get things done. From 1st June 2017 only updated AEBAS devices with UIDAI ,remain functional.

3. Haryana Attendance portals(departments) : You may get fresh activation codes from **your respective TNOs of departments.** If TNOs had created users for field offices (nodal admins), then nodal admins   will
    create/supply activation codes for installation of new software.

4. Kindly go through the trail email for further details. You may contact Haryana helpdesk telephone 0172-2728229 [bas1-hry@nic.in] or

National helpdesk 011-24305055,6 [helpdesk-attendance@nic.in] for further assistance.

Dear AEBAS Users,
(Nodal Officers)

It is observed that many devices connected to AEBAS servers are using old and outdated client software. As you may be aware the old software lacks security features which are released in later versions. Moreover, the UIDAI has informed us that the older versions will automatically become dysfunctional after 31st May 2017 in view of certain security related requirements for all devices. From 1st June 2017 all devices will need to register themselves with the UIDAI to remain functional. NIC is also gearing up to make these changes in the client software and further action will be communicated shortly.

In view of the above, you are requested to update the client software to the latest available version without delay. Once your devices are up-to-date, further upgrades will be far easier and we plan to make them almost automatic. This will reduce the burden on your support staff. Kindly follow the links below for further action.

AEBAS Application Installer for Desktop (Windows):

Re-installation necessary for older clients.

- Please un-install your AEBAS Windows desktop application version 1.2, 1.4 or 1.5.0.0 and reinstall application AEBAS
