**One-Day State Level Conference on e-Court Initiatives
Organised at the High Court of Manipur in Coordination with
Manipur Judicial Academy on 08.02.2025**

The High Court of Manipur, in coordination with the Manipur Judicial Academy, has successfully organised a One-Day state-level conference on e-Court Initiatives at the High Court of Manipur. The conference was inaugurated by Hon'ble Chief Justice D. Krishna Kumar of the High Court of Manipur, in the august presence of Justice A. Bimol Singh, Chairman of the Computer Committee, and Justice Kh. Nobin Singh, Director of the Manipur Judicial Academy. The resource persons from the e-Committee, Supreme Court of India and NIC Pune graced the programme. The key speakers included Ms. R. Arulmozhiselvi, OSD Registrar (Member, Human Resource & Training Cell), eCommittee Supreme Court of India, Mr. Anupam Patra, OSD (Registrar II, Technology) (Head of Office), Member (Project Management), e-Committee,

Supreme Court of India, Mr. Ashish J. Shiradhonkar, Member (System), E-committee, Supreme Court of India, Bharati Jadhav, Scientist D, NIC Pune, Mr Jagdish Chhailkar, Scientist F, NIC Pune and Mr Anil, Role Team Lead, NIC Pune. As a part of the conference, the e-Office was launched for the Manipur Judicial Academy, following its successful implementation at the High Court of Manipur. An in-house Fund Management & Bill Processing Software was also launched for the High Court Registry Accounts Section. In his keynote address, Hon'ble Chief Justice D. Krishna Kumar emphasised the transformative role of technology in judicial administration. Quoting Eric Schmidt, former CEO of Google, he stated: "Technology will move forward with or without you. The question is: will you lead the change or be left behind?"

He highlighted how digital initiatives have revolutionised access to justice in Manipur, enabling advocates from remote districts like Ukhrul and Tamenglong to participate in court proceedings through video conferencing. He urged all District Judges to hold weekly review meetings with their staff to assess and encourage the use of technology in court functioning. These meetings should focus on the effective utilisation of Digital Court applications, implementation of hybrid hearings, monitoring the progress of scanning and digitisation, Implementation of NSTEP application and ensuring optimal usage of all available hardware resources. The conference marked a milestone as the first training program in Manipur, bringing together Judicial Officers, Master Trainer Advocates, and Technical Teams from the High

Court and District Courts for interactive sessions with the e-Committee, Supreme Court of India and NIC Pune. The discussions provided a bird's eye view of e-Court initiatives implemented by the Supreme Court of India and strategies for effective e-Filing implementation in District Courts. A live demonstration of the Digital Court Application was given by NIC Pune, showcasing features such as text-to-speech dictation in regional languages, scanning and digitisation of case records, and preservation mechanisms for digitised records. Additionally, a comparative analysis of CIS 4.0 and CIS 3.2 was conducted, highlighting advancements and necessary system upgrades. A dedicated technical discussion on data centre management by the NIC team for the High Court and District Court technical team was also held. During the conference, Ms.

R. Arulmozhiselvi and Shri Ashish J. Shiradhonkar, Member (System), NIC Pune, highlighted the importance of the National Judicial Data Grid (NJDG) and explained to the Hon'ble Judges of the High Court of Manipur and Judges of the District Judiciary how NJDG can serve as an essential tool for case management. He emphasised that portfolio and administrative judges can leverage NJDG to assess judicial officers' judicial performance under their jurisdiction, track pendency cases, and identify areas that require intervention. He further elaborated on how the District Judiciary can utilise this effective data-driven tool

for improved case management. The conference also focused on defining the roles and responsibilities of Judicial Officers and Technical Teams in implementing technology in their respective jurisdictions. A significant outcome of the conference was to assist the Computer Committee, High Court of Manipur, in the formulation of a Vision Document, outlining a strategic roadmap for the next five years for the successful implementation of a paperless court in the State. The YouTube link of the conference is https://www.youtube.com/watch?v=lgNe04sxG_4&t=12573s

ECT_13_2025 & ECT_14_2025 Conducted by High Court of Meghalaya Under the eCommittee Outreach Programme

On 22.02.2025, a training session, ECT_14_2025, was conducted by the Meghalaya State Judicial Academy for the Judicial Officers. 39 participants attended the session,

and Shri Rajarshi Rai Choudhury, Advocate, Calcutta High Court, was the resource person for the said training sessions.

On 28.02.2025, a training session, ECT_13_2025, was conducted by the Meghalaya State Judicial Academy for the Judicial Officers at Shillong, Nongpoh, Mawkyrwat, Tura, Khliehriat and Baghmara. 20 participants attended the session including Shri D.K.K. Mihsil, JMFC, Shillong, and Miss A.

Thangkhiew, Special Judge (POCSO), Nongpoh, Shri B. Laitmon, Special Judge (POCSO), Tura, Shri F. R Marak, JMFC, Khliehriat, Shri F.S Sangma, i/c District and Sessions Judge, Baghmara, Miss Daphira Sohtun, Chief Judicial Magistrate, was the resource person.

Training Programme for Staff Members Under ICT Outreach Programme Conducted by High Court of Tripura, Agartala

A Training programme for two days, i.e. “ECT_10_2025” and “ECT_11_2025”, was organised on 08.02.2025 and 09.02.2025 in the Auditorium of the High Court of Tripura. In the said training programme, a total 32 nos. of Technical Staff Members of the High Court of Tripura were imparted

training on various ICT topics by the nominated Trainers from the National Informatics Centre (NIC), Tripura State Unit and the Directorate of Information Technology, Government of Tripura.

Gauhati High Court (Itanagar Bench) Conducts a Training Programme on ECTs and NSTEP, also Implementation of Digital Equipment under eCourts Project

Two-day capacity building training programme under eCourts special drive training & outreach programme for District Court Staff and Ld. Advocates were organised by the Gauhati High Court, Itanagar Permanent Bench, in collaboration

with the Judicial Academy, Assam. Fourteen (14) zone-wise ECT training programmes were conducted during 2024-25 at three locations of Arunachal Pradesh, i.e. Naharlagun, Pasighat and Tezu.

Virtual Training on National Service and Tracking of Electronic Processes (NSTEP): NSTEP training was conducted for all the Technical Staff under the eCourts Project in Arunachal Pradesh. Also, smartphones were issued to all the district court process servers to serve processes through the NSTEP mobile application. All the District Courts in Arunachal Pradesh have commenced implementing NSTEP in their respective establishments.

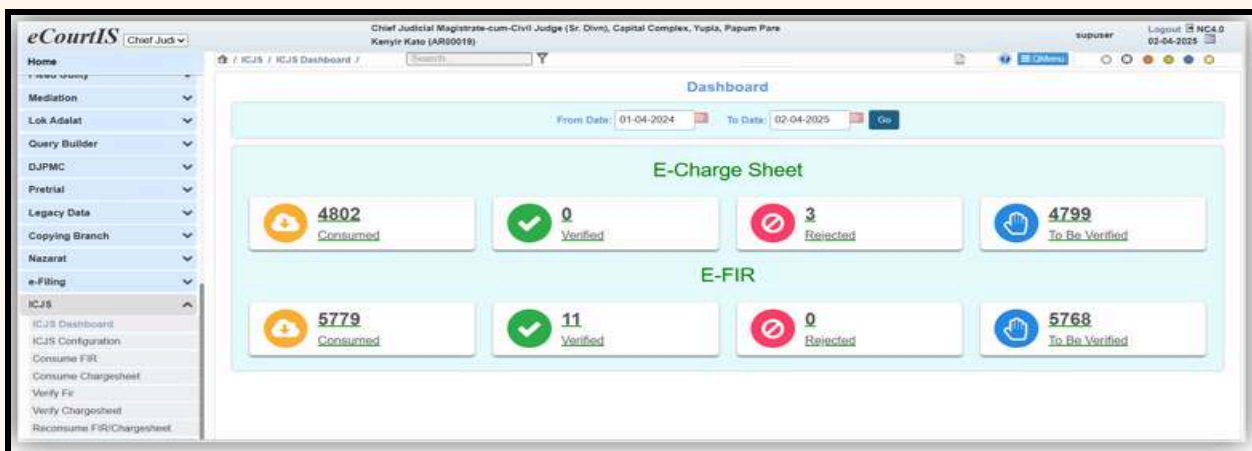

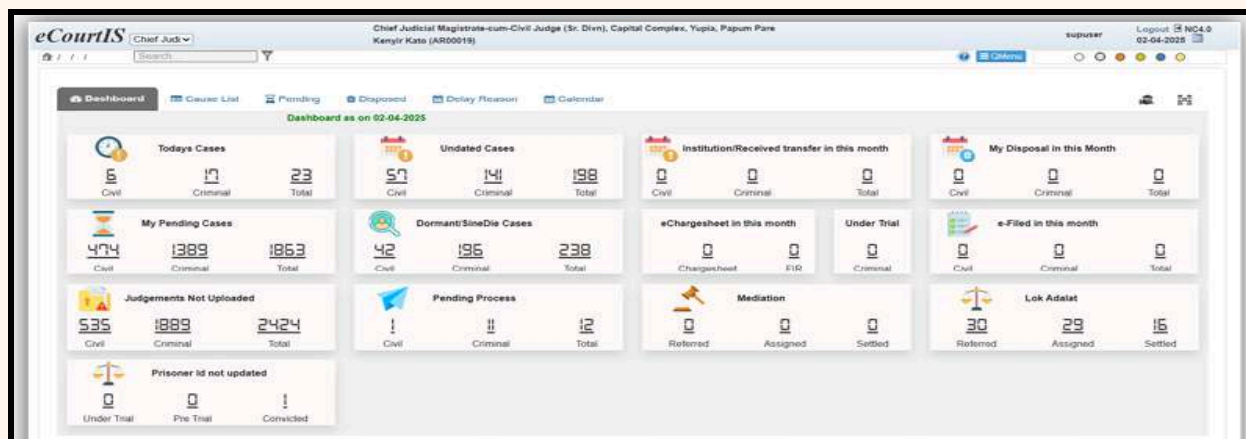

Scanning and Digitisation of Case Records: It started in the Itanagar Permanent Bench of the Gauhati High Court under Phase-III of the eCourts Project. As of 31.03.2025, 1365 case records with 123453 pages have been scanned. Document Management Software (DMS) is being developed to secure the storage, access, and retrieval of digitised case records.

Video Conferencing Equipment: It includes a large 55-inch LED display, high-definition camera, speaker, mic, document visualisers, an All-in-One Computer, and a 1 KVA UPS with batteries in 31 District Courts, 08 Jails/Sub-Jails and 21 District Government Hospitals for routine remands and production of under-trial prisoners, appearance of witnesses, etc.

e-OFFICE: The implementation of the eOffice project has been initiated in the Gauhati High Court, Itanagar Permanent Bench, Arunachal Pradesh. The registry, in coordination with NIC and Railtel Data Centre, has created an email account for all the users of Registry's eOffice, Employee Master Data (EMD) on-boarded, File-head master created, procured Digital Signature Certificates for signing e-file, and updated the Office with required hardware and network connectivity.

Case Information System Version 4.0: It has been installed in all 31 (thirty-one) District Courts of Arunachal Pradesh. Out of these 31 Courts, eCourts Connectivity is

available in 15 courts and is live across the Courts Services platform and the National Judicial Data Grid (NJDG).

Inter-Operable Criminal Justice System (ICJS): It has been implemented in 15 (fifteen) District Courts of Arunachal Pradesh where eCourts network connectivity is

available. These Courts are consuming the FIRs and Chargesheet from their respective Police Stations using the ICJS platform.

ICT Training to the Newly Recruited Judicial Officers in the State of Tamil Nadu and U.T. of Puducherry

Out of 231 newly recruited Judicial Officers, the High Court of Madras has conducted ICT training programs to 105 Judicial Officers in the State of Tamil Nadu and U.T. of Puducherry at the Tamil Nadu State Judicial Academy (TNSJA), Chennai in two batches from 03.02.2025 to 07.02.2025 and from 17.02.2025 to 21.02.2025, to sensitise and to promote the practical usage of the

ICT infrastructure in day to day Court proceedings. Further, the Registrar (IT-cum-Statistics), Madras High Court and the Technical team of Madras High Court have imparted training on e-filing of cases, Virtual Courts for petty offences, Virtual hearing of cases, CIS, NJDG, e-Payment, NSTEP, Citizen-centric services, etc.

Training Programmes for the Staff of District Headquarters through Odisha Judicial Academy

(I) Training Programme (ECT_12_2025) for Advocates and Advocate Clerks of District judiciary was conducted at District Headquarters through Odisha Judicial Academy, and its five Regional Judicial Academies on 01.02.2025 with 644 participants.

(II) Training Programme (ECT_4_2025) for Advocates and Advocate Clerks of the District judiciary was conducted both online and/ in physical mode at District Headquarters and Regional Judicial Academies on 08.02.2025 with 367 participants.

(III) Refresher Programme (ECT_9_2025) for Staff District Judiciary was conducted at District Headquarters and Regional Judicial Academies on 09.02.2025 with 864 participants.

(IV) One day Refresher Training Programme (ECT_9_2025) on “GR & CO (Criminal) and Maintenance of case records, Dealing with magisterial & Sessions case records, Dealing with Malkhana, Maintenance & up keepment of different kinds of Registers, preparation of Statements, dealing with Accounts, e-Courts filing (CIS),

VC Rules, Protection of Women from Harassment at workplace with Special Reference to Aureliano Fernandes Vrs. State of Goa & Others, AIR Online 2023 SC 423, Time and Resource Management” for nominated District Courts Staff (Criminal Side) held on 16.02.2025 with 864 participants.

(V) One day Hands on Training Programme on “Paperless Courts and Examination of Vulnerable Witness” for Civil Courts Staff from all the Cluster Districts held at Regional Judicial Academies on 22.02.2025.

(VI) On 23.02.2025, a Training Programme was conducted for Civil Court Staff on ICT & Hands on training on various e-Services at Regional Judicial Academies.

(VII) The e-Courts Training Programme ECT_16_2025 for Judicial Officers of District Judiciary (All Cadre) scheduled on 23.02.2025 at District Headquarters through Odisha Judicial Academy through virtual mode

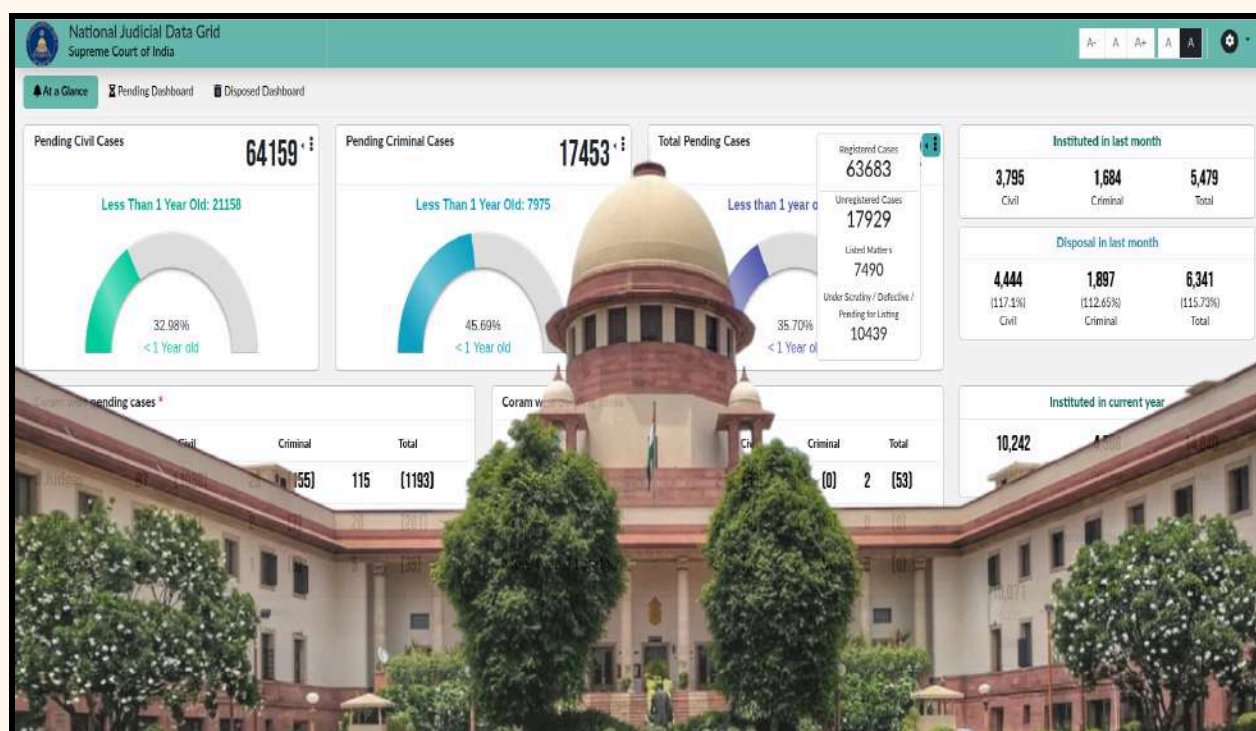

SPECIAL REPORT

A DATA-DRIVEN JUDICIARY: EXPLORING THE NATIONAL JUDICIAL DATA GRID¹

“India made enforcing contracts easier by introducing the National Judicial Data Grid, which makes it possible to generate case management reports on local courts.”

- The World Bank, in its Ease of Doing Business Report of 2018

INTRODUCTION

¹ **R. Arulmozhiselvi**, OSD(Registrar)/Training Cell & Member (Human Resources), eCommittee, Supreme Court of India
Bharat, Law Clerk Cum Research Associate, eCommittee, Supreme Court of India

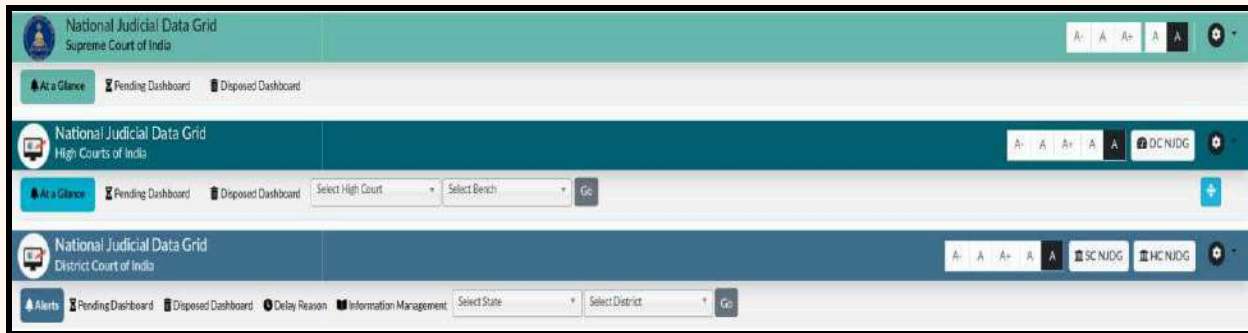

In an era increasingly driven by data, the Indian judicial system has embraced technological advancements to enhance efficiency and transparency. And at the forefront of this digital transformation stands the National Judicial Data Grid (NJDG). This comprehensive online platform serves as a national repository of case information from district courts, High Courts and the Supreme Court. The NJDG is a game changer as far as the eCourts Project is concerned. The World Bank has recognised its utility in its Ease of Doing Business Report of 2018.² The effective management of court cases is a cornerstone of judicial efficiency and public trust in the legal system. In India, the National Judicial Data Grid has emerged as a transformative

digital platform, enabling real-time monitoring, analysis, and management of case data across all tiers of the judiciary. And with the help of NJDG, one can easily find things like the current pendency of cases in court complexes around India, the list of cases disposed of, and other important information. This helps everyone stay informed and makes the legal process more efficient.

This article explains the National Judicial Data Grid (NJDG), a key digital system in India's courts. It will describe the NJDG's features, history, how to use it and the data it provides for different court levels. It will also explain how the NJDG makes the court system more transparent, accountable and efficient through better data use and technology.

NATIONAL JUDICIAL DATA GRID

The National Judicial Data Grid is a pivotal digital infrastructure within the Indian judicial system. It functions as a comprehensive database encompassing orders, judgments and detailed case information from over 18,000 courts, District & Subordinate Courts, High Courts and even the Supreme Court. This initiative provides a centralised repository of judicial data updated in near real-time. It was launched under the auspices of the eCourts Project, and it serves as a centralised repository of case information, fostering transparency, accountability and data-driven decision-making.

NJDG is like a big online website or system where information about court cases from all over India is stored. This includes cases in the local courts, each state's higher courts, and even the Supreme Court. Recently, reasons for delay have been included in NJDG. This feature helps track problems the judiciary faces in handling cases and allows decision-makers to take steps to reduce the backlog. It also highlights specific issues causing delays, making them easier to identify and fix.

The following are the key features of the NJDG:

1. The NJDG offers detailed and

consolidated data on the pendency of cases across the judiciary, which provides valuable insights into the current state of case backlogs.

2. Statistical data on NJDG is automatically updated daily to ensure accuracy and reliability.
3. Pending civil and criminal cases on NJDG are categorised into various types to facilitate better analysis and tracking.
4. Information on the institution and disposal of cases on NJDG is systematically displayed for easy access.
5. Statistical figures are presented in a detailed and drill-down format to allow users to examine data at multiple levels.
6. The NJDG Portal is a National Judicial Data Warehouse by centralising judicial data for improved decision-making.
7. It is developed using Elastic Search technology, which enables swift and

efficient data retrieval.

Furthermore, it promotes judicial accountability, reduces information asymmetry, and aids in identifying systemic bottlenecks. Dr. Dhananjaya Y Chandrachud, the former Chief Justice of India, discussed the importance of NJDG in the *Swapnil Tripathi vs. Supreme Court Of India* (2018 INSC 886), noting:

“The NJDG is a public portal providing a database of pending and disposed cases in various High Courts and District Courts across India. The NJDG portal, njdg.ecourts.gov.in, provides transparency in the judicial system to all citizens by allowing them to view statistics of cases pending before various courts. The World Bank has also acknowledged NJDG as a significant innovation. It serves as an NJDG warehouse that may be used to shape legislative policy.”³

³ *Swapnil Tripathi vs. Supreme Court Of India* (2018 INSC 886), part C.4

HISTORICAL BACKGROUND

The National Judicial Data Grid was officially launched for public access on 19.09.2015. This event marked a significant step in the modernisation of the Indian judicial system. The NJDG portal was inaugurated by Hon'ble Mr. Justice Madan B. Lokur, then the Judge in-charge of the eCommittee, Supreme Court of India. Chairpersons of the Computer Committees attended the launch ceremony from all the High Courts across the country and the Secretary

of the Department of Justice, Government of India. The NJDG was subsequently extended to the High Courts with the official launch on 03.06.2020. This expansion was inaugurated by Shri K. K. Venugopal, Attorney General of India, in the presence of Hon'ble Dr. Justice Dhananjaya Y Chandrachud, Judge, Supreme Court of India and Chairperson of eCommittee, Supreme Court of India. A significant achievement was

the integration of all High Courts into the NJDG. Later, NJDG for the Supreme Court was opened to the public on 14.09.2023 by Hon'ble Dr. Justice Dhananjaya Y Chandrachud, Chief Justice of India. This marked

the completion of the NJDG's coverage across all three levels of the Indian judicial system. This final step in the NJDG's development established a unified national platform for judicial data.

HOW TO ACCESS NJDG

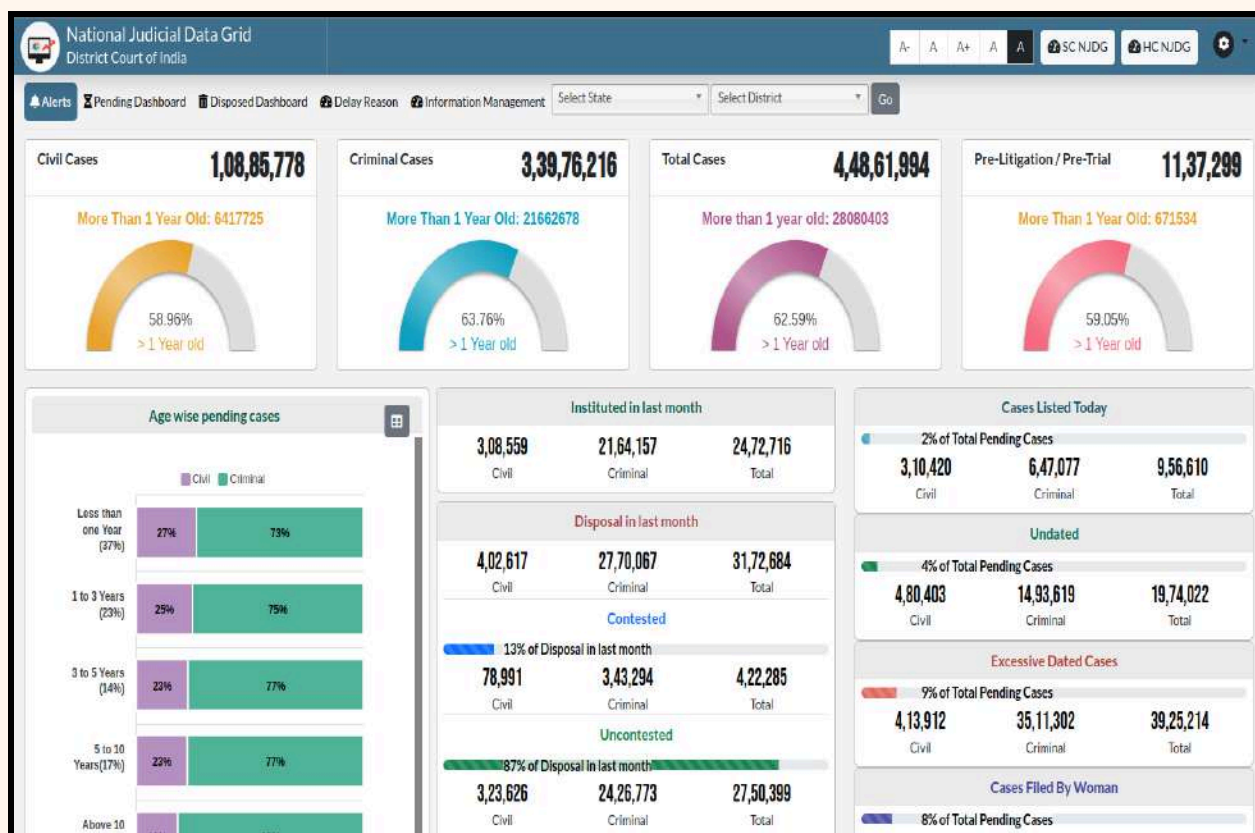

Through	Steps
NJDG webpage	NJDG can be accessed directly through the NJDG webpage. A simple Google search of the word “NJDG” will take you to the NJDG web page. In addition to that, the Supreme Court NJDG can also be accessed by the following link: https://njdg.ecourts.gov.in/njdg_v3/
Supreme Court of India website	The NJDG portal can be accessed directly from the Supreme Court of India website. On the homepage of the Supreme Court’s website, there is a tab named “Explore and Connect” at the bottom. Under this tab, the user can find a hyperlink named ‘NJDG’ that leads to the NJDG dashboard.
eCommittee website	NJDG can also be accessed through the eCommittee website (https://ecommitteesci.gov.in/). NJDG is provided under the “Citizens’ Corner” tab on the eCommittee’s website.
E-Courts services website	Supreme Court NJDG can also be accessed through the

	<p>E-Courts services website (https://services.ecourts.gov.in/ecourtindia_v6/). One can click on the “NJDG” tab, which is available on the top panel of the website, and will take them directly to the NJDG webpage.</p>

TYPES OF NJDG

Type of NJDG	Contents
 <p>National Judicial Data Grid District Court of India</p>	<p>The District Courts NJDG covers case data from District and Taluka courts nationwide. It provides information on civil and criminal cases, their pendency, disposal rates and trends.</p>
 <p>National Judicial Data Grid High Courts of India</p>	<p>The High Courts NJDG contains case details from various High Courts across India. It provides data on pending and disposed cases, categorised by subject matter, age and court benches.</p>
 <p>National Judicial Data Grid Supreme Court of India</p>	<p>The Supreme Court NJDG provides real-time data on pending and disposed cases in the Supreme Court of India. It offers insights into the number of cases at different stages, case types and disposal trends.</p>

DISTRICT COURTS NJDG

The District Courts NJDG dashboard has five primary tabs: **Alerts**, **Pending Dashboard**, **Disposed Dashboard**, **Delay Reasons** and **Information Management**. The user can select any tab by clicking on it and access the relevant data.

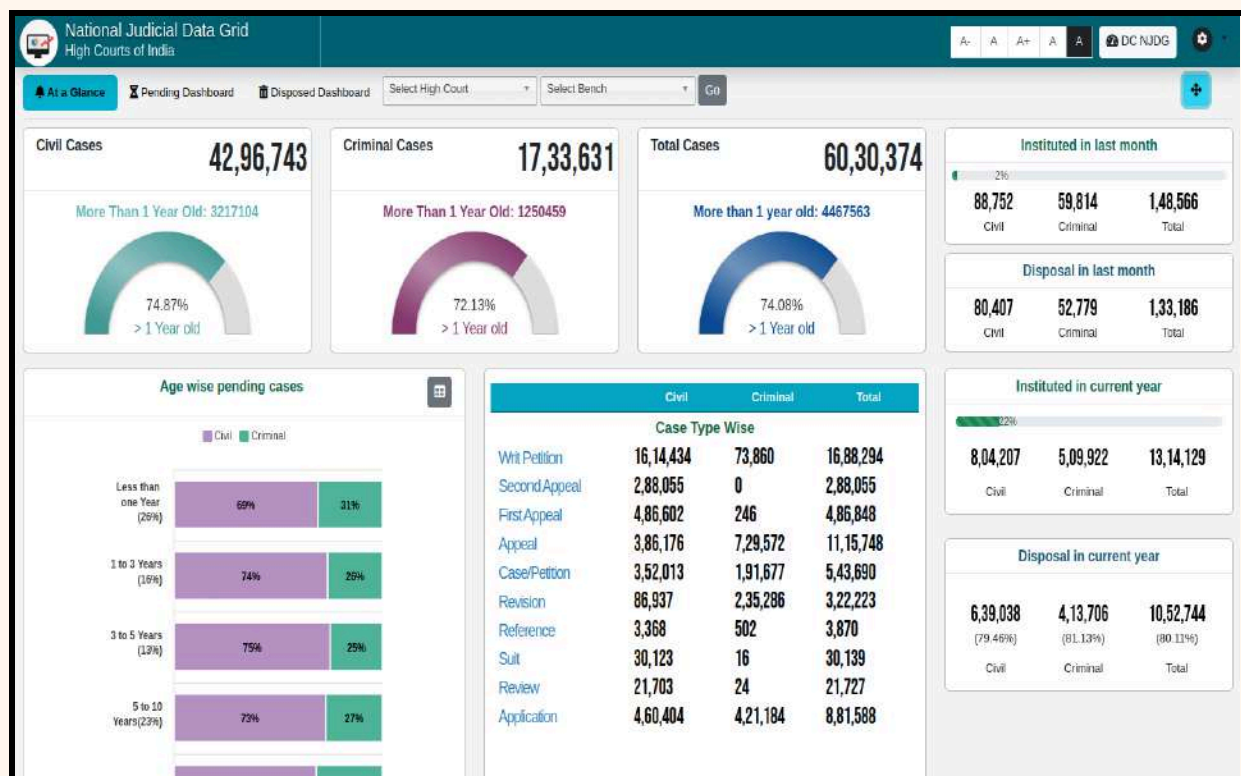

The initial tab, named **Alerts** on the NJDG District Courts dashboard, is a pivotal feature. Clicking on this tab

provides users with essential information regarding cases pending before the District Courts. It also furnishes details about cases instituted in the District Courts during the last month, cases disposed of in the previous month, cases initiated in the current year, and cases disposed of in the current year. The **Pending Dashboard** tab

shows the different types of cases still pending in the District Courts of India. It meticulously categorises these pending cases by their specific type, offering a detailed breakdown of the court's caseload. The data is displayed through various charts, such as an age-wise graph, a chart for stages of pendency, and a comparison of case institutions versus disposals. The **Disposed Dashboard** tab provides data related to cases disposed of by the District Courts of India. The information is displayed through graphs and charts, offering insights into the types of cases, such as civil, criminal, or both. The dashboard further categorises these disposed cases by their specific nature (listing examples like Arbitration cases, Civil Suits, Criminal Revisions, etc.), allowing for

A detailed analysis of the court's performance across different categories of litigation is needed. The **Delay Reasons** tab provides data related to cases that are delayed due to several reasons. The information is displayed through graphs and charts, offering insights into the types of cases, such as civil, criminal, or both. It also categorises cases by their kind, and it divides the data into 15 delayed reasons. The **Information Management** tab has five sub-tabs: *Data Monitoring - Summary Report*, *Court Judge Report*, *National Master - Summary Report*, *Establishment Code Not Entered* and *National Master - Summary Report*. The user can select any tab by clicking on it and access the relevant data.

HIGH COURTS NJDG

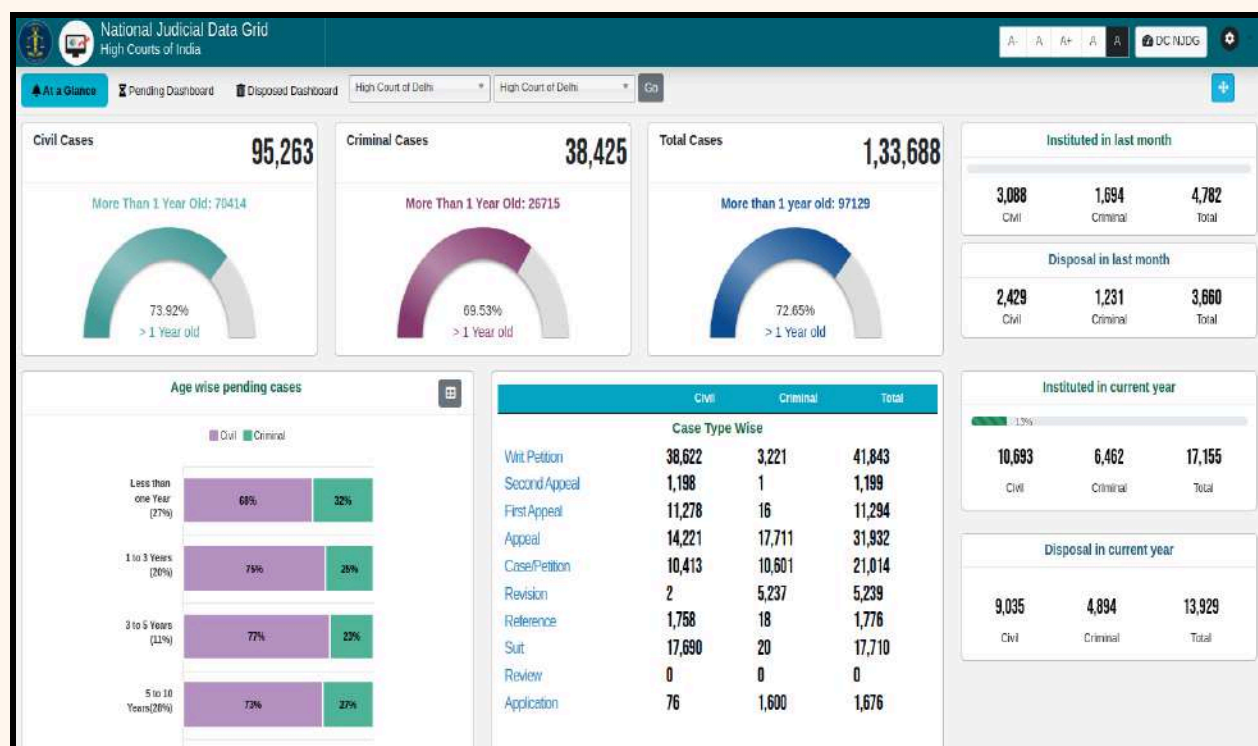

The High Courts NJDG dashboard has three primary tabs: ***At a Glance***, ***Pending Dashboard*** and ***Disposed Dashboard***. The user can select any tab by clicking on it and access the relevant data.

The ***At a Glance*** tab offers a crucial snapshot of the High Courts' case status. It immediately presents key metrics like the number of recently filed cases (less than one year old, both civil and criminal) and a

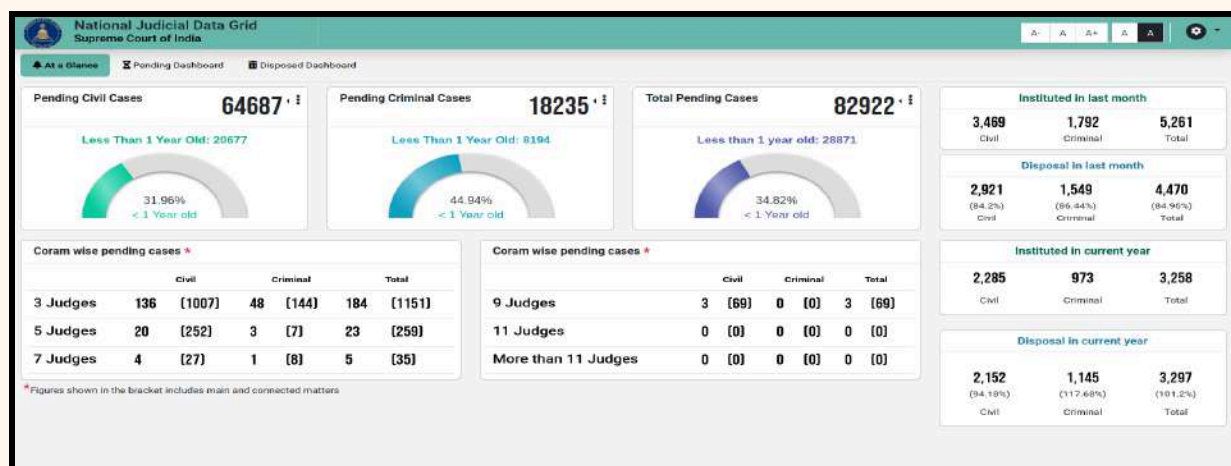

monthly and yearly summary of case initiations and disposals. Importantly, the displayed figures act as direct links, allowing users to instantly access detailed lists of these specific cases for deeper analysis. Whereas, the ***Pending Dashboard*** tab focuses on the current backlog within the High Courts. It categorises pending cases by type (such as Writ Petitions, various appeals, suits, and applications in

both civil and criminal domains). The dashboard utilises different visual representations, like age-wise graphs to understand how long cases have been pending, pie charts to show the distribution of cases across various stages of litigation, and comparative charts to track the balance between new cases filed and cases resolved. The *Disposed Dashboard* tab provides

Insights into the High Courts' efficiency in resolving cases. It presents data on cases that have been successfully concluded, categorised by whether they were civil or criminal. Furthermore, the dashboard breaks down the disposed of cases by type (like Writ Petitions, appeals, suits, applications, etc.).

SUPREME COURT NJDG

The Supreme Court NJDG dashboard has three primary tabs: *At a Glance*, *Pending Dashboard* and *Disposed Dashboard*. The user can select any tab by clicking on it and access the relevant data.

The *At a Glance* tab provides a quick overview of the judicial data. It includes key statistics and metrics such as the total number of cases, pending cases, disposed cases, and other relevant information. It gives users a snapshot of the current status of cases in the Supreme Court. Whereas, the *Pending Dashboard* tab focuses on cases that are still

pending. It allows users to filter and view detailed information about pending cases through different charts. Users can also perform drill-down analysis based on various attributes like case type, age, and stage of the case. The *Disposed Dashboard* tab displays information about cases that have been disposed of. It provides details about the disposed cases with the help of different charts. Users can also filter and analyse the data based on various criteria to gain insights into the disposal patterns and trends.

BENEFITS OF NJDG

1. Makes Things Clear and Courts Responsible: The NJDG has introduced transparency and accountability in the functioning of the courts, particularly regarding pending and disposed of cases. Today, the status of every case in the country can be tracked through the NJDG, which includes a variety of attributes. The NJDG is capable of

addressing a wide range of queries, such as:

A. *How many civil and criminal cases are currently pending in the State of Tamil Nadu?*

According to the NJDG, on 21.03.2025, a total of 14,84,627 cases (7,11,791 civil cases and 7,72,836 criminal cases) are pending in the State of Tamil Nadu.

B. *What is the number of pending cases filed by women at the District Court level in India, and what percentage of the total cases do these represent?*

According to the NJDG, as of 21.03.2025, there are 37,12,970

pending cases (17,87,765 civil cases and 19,25,205 criminal cases) filed by women at the District Court level in India. These cases represent 8% of the total pending cases.

C. How many cases have been pending for over 30 years in the State of Punjab?

According to the NJDG, on 21.03.2025, only 9 cases were pending in the State of Punjab for more than 30 years.

SHOW 10 ENTRIES

Years	Count
0 to 1 Years	380227
1 to 3 Years	296167
3 to 5 Years	113273
5 to 10 Years	60915
10 to 20 Years	2913
20 to 30 Years	72
Above 30 Years	9
Total:	853576

D. What are the reasons for the delay in case proceedings in the NCT of Delhi?

According to the NJDG, on 21.03.2025, a total of 6,23,377 cases were delayed in the NCT of Delhi. The primary reasons for these delays, along with the number of cases, are as follows:

SELECT CASE TYPE

Showing 1 to 15 of 15 entries Previous 1 Next

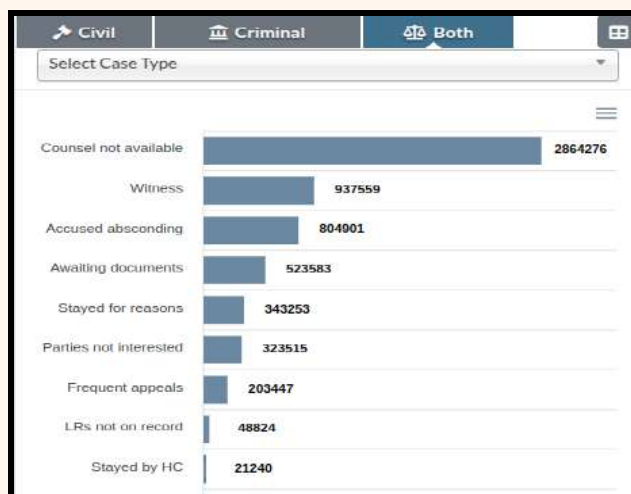

E. How many cases are delayed because the accused is absconding in the District of Hisar, State of Haryana?

According to the NJDG, on 21.03.2025, only 474 cases were delayed because the accused was absconding in the District Hisar of the State of Haryana.

F. How many cases are delayed due to a stay issued by the High Court in the State of Uttar Pradesh?

According to the NJDG, on 21.03.2025, a total of 21,240 cases were delayed due to a stay issued by the High Court in the State of Uttar Pradesh.

In *Yashpal Jain vs. Sushila Devi* (2023 INSC 948), the Supreme Court of India talked about the State-wise pendency of cases before the respective High Courts and overall Civil Courts as per the figures available at National Judicial Data Grid under the chapter “**Numbers**

speak more than words: A closer look to the Statistics of the National Judicial Data Grid”.⁴

⁴ *Yashpal Jain vs. Sushila Devi* (2023 INSC 948), para 33.

2. Helps Make Good Decisions: The wealth of data and information available on the NJDG can assist every judge,, including those directly involved in administration, in making appropriate policy decisions for expediting justice delivery. It is a remarkable tool for management purposes. In *Lok Prahari Through Its General Secretary S.N. Shukla IAS (Retd.) vs. Union of India (2021 INSC 261)*, the Supreme Court of India referred the NJDG while issuing directives regarding the appointment of ad hoc judges under Article 224A of the Constitution of India to address the backlog of criminal cases in High Courts. It observed that five High Courts (High Courts of Allahabad, Punjab & Haryana, Madras, Bombay, and Rajasthan) alone accounted for 54% of the pendency of over 57,51,312 cases.⁵

⁵ *Lok Prahari Through Its General Secretary S.N. Shukla IAS (Retd.) vs. Union of India (2021 INSC 261)*, para 23.

Furthermore, in *Yash Developers vs. Harihar Krupa Co-Operative Housing Society Limited & Ors (2024 INSC 559)*, the Supreme Court used data from the NJDG to highlight the significant volume of litigation generated by the Maharashtra Slum Act and the long pendency of these cases before the Bombay High Court. The Supreme Court stated that NJDG reveals that 1612 cases involving disputes arising under the Maharashtra Slum Areas (Improvement, Clearance and Redevelopment) Act, 1971, are pending before the Bombay High Court. This data from NJDG underscored the Court's concern about the propensity of the statute to generate litigation and supported the argument that there seem to be problems with the statutory framework of the concerned act.⁶

⁶ *Yash Developers vs. Harihar Krupa Co-Operative Housing Society Limited & Ors (2024 INSC 559)*, para 33.

3. Helps Use New Technology: The NJDG is providing enough data to introduce big data mining and Elastic Search technology. Through the NJDG, a quantum leap can be taken in utilising technology to benefit justice delivery in the country. In *Smt. Sunanda W/O. Dhanraj Wodeyar vs. Smt. Prabha A. Wodeyar (Criminal Petition No. 100162 of 2018)*, the High Court of Karnataka, relied on the National Judicial Data Grid to ascertain the pending case status before the trial court. The High Court of Karnataka directed the registry to investigate the case status using the NJDG after the petitioner failed to reappear in the court for filing a memo. The NJDG revealed that the suit had already been disposed of. Consequently, the HC determined that the petition's prayer was no longer valid and dismissed the petition.⁷

4. Helps Manage Judges' Work: The number of cases pending in every court in the country is available on the NJDG. It is therefore easy to find out if any judge is overworked or underutilised in terms of the number of cases pending in the court. The High Court of Punjab and Haryana has used the National Judicial Data Grid in many judgments to ascertain the pendency of cases at the District Courts while considering petitions seeking expedited proceedings.⁷ Furthermore, in *Mahar Uddin Ali vs. The Union of India and Ors. (WP(C)/3128/2017)*, Justice N. Kotiswar Singh, the Gauhati High Court, highlighted the existence and potential utility of the NJDG and the Case Management and Information System (CIS) to the State Government and Foreigners Tribunals. The High

⁷ *Suraj Chopra vs. Pooja CR-939-2025 (O&M)*, *Parvinder Singh vs. Gurwinder Kaur CR-6630-2024 (O&M)*, *HARMEET SINGH vs. KULDEEP SINGH CR-4825-2024 (O&M)*

Court suggested that a similar database should be created for the proceedings before the Foreigners Tribunals to manage the large number of pending cases better. The court observed that the NJDG and CIS have enhanced judicial productivity, transparency and accountability in the Indian judicial system.⁸

5. **Helps With Old Cases:** The age-wise pendency of cases is available and has been utilised to pass on this information to the High Courts. For example, cases for more than 30 years have been identified; there are more than 75,000 such cases. Therefore, the NJDG works as an effective administrative and organisational tool. In *Yashpal Jain vs. Sushila Devi* (2023 INSC 948), the Supreme Court of India noted the three oldest civil and criminal cases with the help of the National Judicial Data Grid.⁹

⁸ *Mahar Uddin Ali vs. The Union of India and Ors.* (WP(C)/3128/2017), para 23.

6. **Shows Where Each Case Is:** The stage at which each case is pending has been identified and made available on the NJDG. Lawyers and litigants, as well as judges, have complete information about each case that they are concerned with. In *Yashpal Jain vs. Sushila Devi* (2023 INSC 948), the Supreme Court of India referred to the National Judicial Data Grid to consider the stage-wise pendency. And it was revealed that the majority of the pendency in cases is at the Evidence/ Argument/ Judgement stage, within which the maximum pendency is caused at the stage of hearing and evidence.⁹

⁹ *Yashpal Jain vs. Sushila Devi* (2023 INSC 948), para 34.

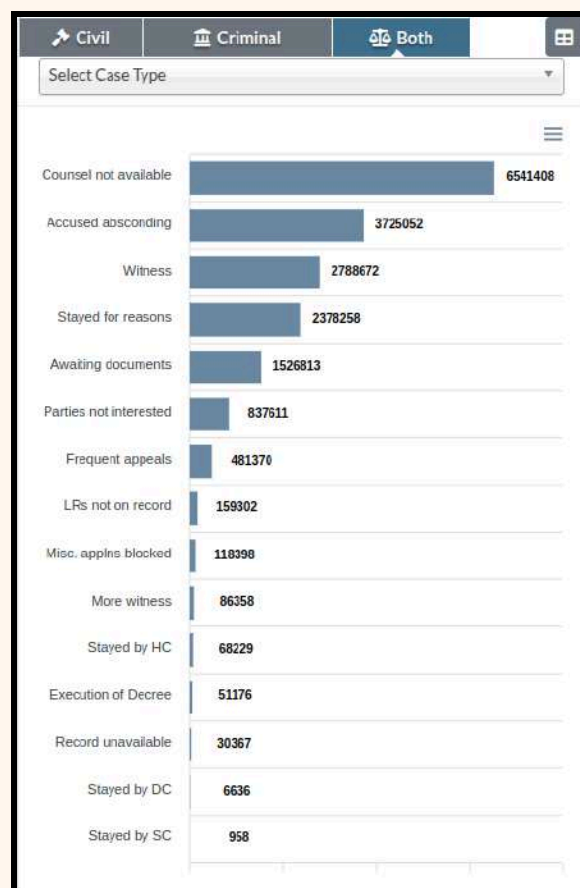

7. **Helps Track How Many Cases Start and Finish:** The number of cases instituted and disposed of in a month,

and during a specified period, can be easily tracked through the NJDG.

8. Helps Find Out Why Cases Take

Time: The NJDG can also assist in finding out the reasons for the delay in the disposal of cases. This is therefore an essential tool for judges at all levels to ascertain the problem of delays in justice delivery and to take remedial steps. The Delay Reasons in District Court NJDG divides the cases into 15 delayed reasons, such as Accused absconding, Awaiting documents, Counsel not available, Execution of Decree, Frequent appeals, LR's not on record, etc.

9. Made After Improving Court Processes and Using Better

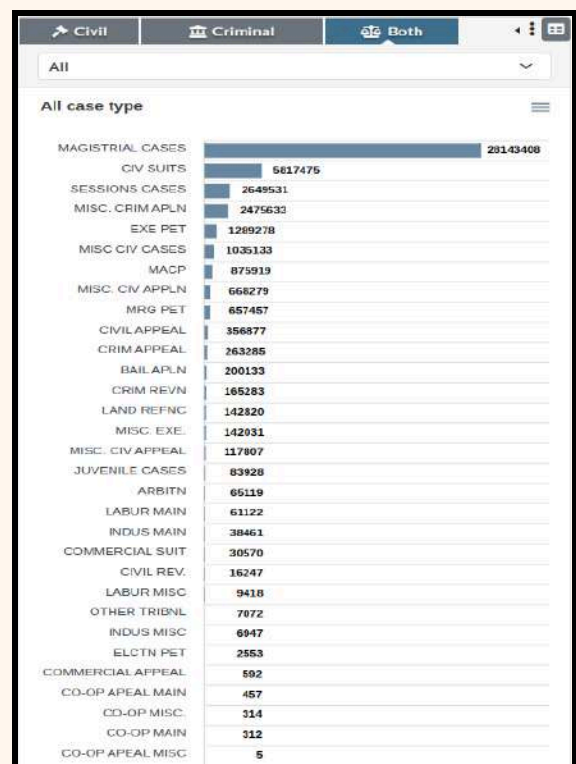

Technology: The NJDG is a product of a big process re-engineering exercise by the eCommittee. In this process re-engineering exercise, the Unification of local nomenclatures used across the country under National Types was done, and such

National Types were codified. As a result, data can be seen on NJDG under Case Types, Stages, Disposal types, Delay types, etc. At the same time, the Elastic Search database is used for speed, effectiveness and efficiency. Therefore, the new NJDG is a combination of processes

re-engineering and upgraded technology. In *Sri. Mariguru Swamigala Kudure Samadhi Gaddige Mutt/Temple vs. The Chief Commissioner, Bruhat Bengaluru Mahanagara Palike and Ors.* (Writ Petition No. 6284 of 2023), the High Court of Karnataka directed the establishment of a National Judicial Data Grid (NJDG) at the Bruhat Bengaluru Mahanagara Palike (BBMP). The proposed NJDG is intended to keep track of all pending quasi-judicial matters, including the authority before whom the matter is pending, links to the order sheet and orders passed. The High Court also suggested that a study of the existing NJDG be conducted to identify any additional fields or data points that may be required for the BBMP's implementation of the NJDG dashboard.¹⁰

¹⁰ *Sri. Mariguru Swamigala Kudure Samadhi Gaddige Mutt/Temple vs. The Chief Commissioner, Bruhat Bengaluru Mahanagara*

10. Shows How Many of Each Type of Case There Are: In NJDG, due to the National Codification exercise, it is possible to know how many Suits, Appeals, Motor Accident Claims, Land References, etc. are pending in the country, State or District. Similarly, it is now possible to know how many Sessions Cases are pending in the country.

Palike and Ors. (Writ Petition No. 6284 of 2023), para 6.

11. NJDG Intra for Court Management:

The NJDG has an intranet-based access for management and administration. Using this facility, High Courts have created admin logins for Districts, officers in High Court Registry and

Portfolio/Administrative Judges of High Courts for Judicial Planning, Monitoring and remote administration. The NJDG Intra can be accessed at the following link: https://njdgintra.ecourts.gov.in/njdg_intra/.

12. Tool to Find Specific Case Information: The NJDG Intra has a very interesting feature called a query builder, provided to management and administration users of NJDG. The advantage and benefit of a query builder is that a count and list of cases can be generated by combining a variety of parameters. Query builder can answer queries such as:

A. How many Sessions cases registered under Section 302 of the IPC have been pending for over 10 years in the State of Rajasthan?

According to the NJDG, on 21.03.2025, a total of 126 Sessions cases registered under Section 302 of the IPC have been pending for over 10 years in the State of Rajasthan.

CONCLUSION

The National Judicial Data Grid is a powerful tool that is changing how the Indian judicial system works. It makes court operations more transparent and accountable, helps make better decisions, and promotes the use of new technology. The NJDG is instrumental in improving the delivery of justice by providing easy access to case information and helping to identify the reasons for delays. It is a product of process re-engineering and technology upgrades. It caters to various needs,

from case-specific inquiries to court management. The ongoing development and utilisation of the NJDG holds the promise of a more efficient, transparent and responsive judicial system in India. While discussing the importance of NJDG, Dr. Dhananjaya Y Chandrachud, 50th Chief Justice of India, said:

“Onboarding of SC data on NJDG portal under the open data policy is a step on our part to bring transparency and accountability in the judicial domain”.
