

FINAL ANNUAL PLAN OPERATION OF PLANTATION YEAR : 2018-19

COMPILED BY : BUDGET BRANCH
O/o PRINCIPAL CHIEF CONSERVATOR OF FORESTS, HARYANA, PANCHKULA

FOREWARD

The compilation of Final Annual Plan Operation of Plantation for the year 2018-19 is aimed at managing forest resources in a better way and planning for future forestry related operations. It contains details of plantation on sites under various schemes on forest and non-forest land and provides all necessary information for monitoring and evaluation of the works in the years to come. Such evaluation of Project Works provide valuable information for policy formulation, better planning and investment related decisions for the future.

Planning of plantation activities at micro-level will also be assisted by this database. Such database will assist field staff and others of Haryana Forest Department to achieve the mandated developmental programmes while planning for future plantations.

I am sure that the information contained in this book will be of immense use, not only in terms of assessing the plantation progress in the State, but would also serve as a tool for assessing the output and impact of forestry sector. Diversified and modern plantation techniques available for different species need to be adopted so as to increase area under Forest and Tree Cover.

I appreciate the sincere efforts made by the concerned staff of Budget and 20-Point Branches, who have made significant contribution in bringing out this publication.

Dated: December, 2019

Dr. Anil Kumar Hooda, IFS
Principal Chief Conservator of Forests (HoFF),
Haryana, Panchkula.

P R E F A C E

Final Annual Plan Operation of Plantation for the year 2018-19 contains detail of plantation sites such as Name of Scheme/Component, Name of Range/Block/Beat, Location with exact Khasra No. Km/RD, Plantation Month, Target Achieved (in Ha/RKM), Specie-wise Plants Planted, Spacing and GPS Co-ordinates (Longitude & Latitude) including State level abstract for various schemes like State and Central sponsored schemes like CAMPA, WBI etc.

Graphic representation of plantation is aimed at making quick view of Circle-wise plantation(in Ha./Plants), District-wise Forest & Non-Forest Plantation (in Ha./Plants), Category-wise Forest & Non-Forest Plantation (in Ha./Plants) and hoped that it will be helpful in making decisions on policies of Forestry Sector Investment and Development Programmes for the coming years.

Scheme/Component-wise abstract as per forest and non-forest land in territorial wing have been included and hoped that it will further enhance the utility of this book. However, the over-all approach and design has remained unchanged.

Such type of compilation relating to plantation in different years will serve as a reference book for planning and policy making on plantation activities in the State. Compilation will be of immense use in Monitoring and Evaluation work of plantations. It will also help in assessment of Forestry Sector output in a better way. Modern techniques of plantation can also be adopted to increase forestry sector share in economic development and to get better output in the form of pollution free environment in future.

The data was collected from Divisional Forest Officers of Territorial Wing. It has been compiled, organized, analyzed and augmented in a better way by the Budget and 20-Point Branch of PCCF office. Every effort has been made to minimize the typing mistakes.

Various suggestions for further improvement of this book are always welcome.

Dr. T.P. Singh, IFS
Chief Conservator of Forests (Headquarters)
Haryana, Panchkula.
