Chapter 1. True-Up of tariff for the FY 2024-25, Annual Performance Review for FY 2025-26 and Annual Fixed Charges for the FY 2026-27

It is respectfully submitted that based on applicable Regulations of the Hon'ble Uttarakhand Electricity Regulatory Commission, the Petitioner is filing the instant petition for True-Up of tariff for the FY 2024-25, Annual Performance Review for FY 2025-26 and Annual Fixed Charges for the FY 2026-27.

1.1 Norms of Operation

The norms specified by the Hon'ble Commission as applicable for the Khatima power station are as follows:

(i) Normative Plant Availability Factor (NAPAF):

The NAPAF for the station has been approved as 69.30% for the FY 2024-25 to FY 2026-27 in the tariff orders dated 28.03.2024 & 11.04.2025 passed by the Hon'ble Commission. The Power Station has achieved PAF of 51.14% for FY 2024-25. The power station is likely to achieve PAF of 57.78 % & 58.48% in FY 2025-26 & 2026-27 respectively.

(ii) Auxiliary Energy Consumption including Transformation Losses:

The Hon'ble Commission under Regulation 47(4) of Tariff Regulations 2021 and 2024 has specified the norms of Auxiliary Consumption. The Petitioner has claimed auxiliary consumption, transformation losses, consumption in Dam/ Barrages etc as per Table 1 below at the normative levels specified under Regulation 47(4).

Table 1: Auxiliary Consumption and Transformation Losses

Station Particulars	Norm
Type of Station	
a) Surface	Yes
b) Underground	No
Type of excitation	
a) Rotating exciters on generator	No
b) Static excitation	Yes
Auxiliary Consumption including Transformation losses (As % of Total Generation) for FY 2024-25	1.0%
Auxiliary Consumption including Transformation losses (As % of Total Generation) for FY 2025-26 & FY 2026-27	1.2%

- (iii) The Annual Report on Technical Performance of Khatima HEP is annexed here and marked as **Annexure-1**.

1.2 Apportionment of Common Expenses

The Petitioner in the present petition has adopted methodology of apportionment of common expense for FY 2024-25 in the ratio of 86:14 among 11 LHPs (9 old LHPs, MB-II and Vyasi) and SHPs respectively as directed by the Hon'ble Commission in its Tariff Order dated 28.03.2024. UJVNL has separated the direct expenses on Solar Business for FY 2024-25 and has not claimed the same from the tariff of LHPs.

Here it is pertinent to mention that the petitioner in compliance to the directive issued in Tariff order dated 30.03.2023 in its tariff petitions filed in Nov 2023, submitted proposal before the Hon'ble Commission to approve the apportionment of common expenses in ratio of 95:05 in accordance with the MW capacity of LHPs and SHPs for FY 2022-23. The proposal was not considered by the Hon'ble Commission in its Tariff order dated 28.03.2024. UJVNL filed review petition in the matter which was denied by the Hon'ble Commission vide its order dated 10.10.2024. Further, the petitioner had filed an Appeal before the Hon'ble APTEL in the matter.

Further, expenses incurred by such common units serving more than one station have been allocated as detailed below: -

- **Head Office/ CSPPO:** The 86% of the common expenses have been allocated among 9 LHPs, MB-II and Vyasi in a proportion of respective MW Capacity, and remaining 14% to SHPs
- **Dakpathar:** The common expenses have been allocated between Chibro, Khodri, Dhakrani, Dhalipur and Kulhal in the ratio of their respective installed capacity.
- **Civil Dhalipur:** The common expenses have been allocated on Chibro, Khodri, Dhakrani, Dhalipur and Kulhal LHPs in the ratio of their installed capacity.
- **Civil Mayapur:** The common expenses have been allocated on

Chilla, Ramganga and Pathri & Mohammadpur SHPs in the ratio of their installed capacity.

- **MB-I & II Civil:** The common expenses have been allocated on MB-I and MB-II HEP in the ratio of their installed capacity.

1.3 Capital Cost

1.3.1 Petitioner has already informed along with detailed explanation to the Hon'ble Commission in the previous tariff petitions that there has been limited transfer of historical data from UPJVNL to UJVNL. Despite the Petitioner's repeated follow-up, complete technical details are yet to be received. Certain essential documents such as the Detailed Project Reports, CEA clearances and Project Completion Reports have also not been provided. UJVNL is therefore not in a position to provide details regarding the break-up of original cost of fixed assets and those approved by a competent authority on COD.

1.3.2 Transfer Scheme between UPJVNL & UJVNL is still not finalized. This matter has also been apprised to GoU from time to time. GoU had notified the value of Gross Fixed Assets (GFA) for the purpose of RoE provisionally by notification dated 7.03.2008. Further, the Hon'ble Commission has considered the amount of Rs. 2.21 Crore for additional capitalization on the date of commissioning of MB-I HEP. The value of the GFA for nine large hydro projects (LHPs), notified by the GoU and considered by the Hon'ble Commission in its Tariff Order dated April 4, 2012 is tabulated below:

Table 2: Opening GFA as on January 2000 (Rs. Crore)

Plant	Amount (Rs. Crore)
Dhakrani	12.40
Dhalipur	20.37
Chibro	87.89
Khodri	73.97
Kulhal	17.51
Ramganga	50.02
Chilla	124.89

Maneri Bhali-I	111.93
Khatima	7.19
Total	506.17

1.3.3 Accordingly, the value of opening GFA, as on January 2000, transferred to UJVNL for Khatima Power House amounting to Rs. 7.19 Crore may be considered by Hon'ble Commission till the pending finalization and notification of the Transfer Scheme.

1.4 Additional Capitalisation and De-Capitalization

1.4.1 The actual and the revised projections of the additional capitalisation (including apportionment of common units) for the true-up year, current year and for ensuing year are as detailed below:

Table 3: Additional Capitalisation for FY 2024-25, FY 2025-26 and FY 2026-27 .

(In Rs. Crore)

Particulars	FY 2024-25 (Approved)	FY 2024-25 (actual)	FY 2025-26 (Approved)	FY 2025-26 (RE)	FY 2026-27 (Approved)	FY 2026-27 (projected)
a) Land	-	-	-	-	-	-
b) Building	-	0.44	-	0.01	-	3.16

g) IT Equipments	-	0.02	-	0.01	-	-
Total Capitalisation	-	3.03	-	0.74	-	31.63

1.4.2 The additional capitalization as given in the above table also includes the capital expenditure incurred/to be incurred on Balance RMU Works.

1.4.3 It is pertinent to note here that to ensure efficiency, safety and continuous operation of the plant, the additional capitalization was required to be incurred. It is also to be noted that the actual additional capital expenditure incurred for FY 2024-25 was in accordance with Regulation 22 (2) of the UERC (Terms and Conditions of determination of Tariff) Regulations, 2021.

1.4.4 Apart from above capitalization the petitioner has de-capitalized Rs. 1.62 Cr in common unit i.e. Head office Unit, the impact of this decapitalization is apportioned into all 11 LHPs as per the apportioned methodology approved by the Hon'ble Commission

1.4.5 It is pertinent to mention that the petitioner in true up petition filed in Nov 2024 for FY 2023-24 claimed additional capitalization to the tune of INR 0.28 Crores towards the work of SF6 circuit breakers for Khatima HEP. However, the Hon'ble Commission vide tariff order dated 11.04.2025 disallowed the said additional capitalization on the ground that the transmission assets fall under the purview of PTCUL. Further, UJVNL filed review petition in this matter before the Hon'ble Commission to allow the said additional capitalization but the Hon'ble Commission vide review order dated 28.10.2025 rejected the review by observing that the issue is devoid of merit and do not fall within the limited scope of review permissible under law and do not warrant any interference with the Tariff Order. The petitioner is in process of filing an Appeal before the Hon'ble APTEL in the issue.

It is humbly submitted that the petitioner is making all efforts for transfer of transmission assets to PTCUL and till the time transfer is not completed it is requested that the Hon'ble Commission may kindly consider and allow the claims of capital and R&M expenditure made in the current petition for transmission assets.

1.4.6 Therefore, it is respectfully prayed that the Additional Capitalisation and De-Capitalization as proposed above may kindly be allowed by the Hon'ble Commission.

1.5 Debt Equity Ratio

1.5.1 In accordance with the Regulation 24 of Tariff Regulations 2021 & 2024 and Tariff Orders passed by the Hon'ble Commission, normative debt-equity ratio of 70:30 has been considered for True-up of FY 2024-25 and for projections

of FY 2025-26 & 2026-27 except DRIP Works for which debt-equity ratio of 80:20 has been considered. This normative debt-equity ratio has been considered on GFA as of January 2000 (transferred assets) and additional capitalisation incurred till respective financial year.

1.6 Return on Equity

1.6.1 Regulation 26 of the UERC Tariff Regulations 2021 stipulate the following-

"26. Return on Equity

(1) Return on equity shall be computed on the equity base determined in accordance with Regulation 24.

Provided that, Return on Equity shall be allowed on amount of allowed equity capital for the assets put to use at the commencement of each financial year.

Provided further that, if the generating stations/licenses are able to demonstrate the actual date of asset being put to use and capitalized in its accounts of each assets for the purposes of business carried on by it through documentary evidence, including but not limited to 'asset put to use certificate', 'audited accounts etc.', then in such cases, after due satisfaction of the Commission, the RoE shall be allowed on pro-rata basis after considering additional capitalization done during the year out of the equity capital.

(2) Return on equity shall be computed on at the base rate of 15.5% for thermal generating stations, Transmission Licensee, SLDC and run of the river hydro generating station and at the base rate of 16.50% for the storage type hydro generating stations and run of river generating station with pondage and distribution Licensee on a post-tax basis."

Provided that return of equity in respect of additional capitalization after cut-off date beyond the original scope excluding additional capitalization due to Change in Law, shall be computed at the weighted average rate of interest on actual loan portfolio of the distribution company or the generating station or the transmission system;

1.6.2 However, proviso to the Tariff Regulation 26 of the UERC Regulations 2024 regarding equity in respect of additional capitalization stipulates that-

Provided that return of equity in respect of additional capitalization after

01.04.2025 beyond the original scope of work excluding additional capitalization due to Change in Law, shall be computed at the base rate of one-year marginal cost of lending rate (MCLR) of State Bank of India plus 350 basis point as on 1st April of the year, subject to the ceiling of 14%

1.6.3 It is respectfully submitted that petitioner has computed return on equity on opening equity for each financial year as considered by the Hon'ble Commission in its earlier tariff orders. However, Petitioner very humbly request the Hon'ble Commission to allow return of equity on actual additional capitalization made during FY 2024-25 in true up.

1.6.4 Here it is pertinent to mention that the Hon'ble commission in its Tariff order dated 28.03.2024 for True up of FY 2022-23 approved RoE at weighted average rate of interest (WAROI) on additional capitalization (excluding DRIP& RMU) works incurred from FY 2001-02 till FY 2021-22. The petitioner filed a review petition against tariff order dated 28.03.2024 before the Hon'ble Commission for allowing RoE at normal rate i.e., 16.5% for additional capitalization incurred till FY 2021-22 i.e. period prior to the enforcement of Tariff Regulation, 2021 which was denied by the Hon'ble Commission vide its review order dated 10.10.2024. Further, the petitioner had filed an Appeal before the Hon'ble APTEL in the matter.

1.6.5 The actual Return on Equity for FY 2024-25 based on audited accounts and the revised/proposed estimates for FY 2025-26 and FY 2026-27 are in accordance with the applicable regulations given below.

Table 4: Calculation of RoE for FY 2024-25, FY 2025-26 and FY 2026-27

1.6.6 It is respectfully prayed that the Hon'ble Commission may kindly consider and allow the Return on Equity as proposed in the above table.

1.7 Depreciation

1.7.1 It is submitted that the depreciation on Additional Capitalisation from FY 2001-02 onwards has been computed based on the rates specified under the UERC's Tariff Regulations 2004, 2011, 2015, 2018, 2021 & 2024 as applicable for relevant year(s).

1.7.2 No Depreciation has been claimed on opening GFA as of January 2000, since 90% depreciation has already been recovered.

1.7.3 The Depreciation for FY 2024-25, FY 2025-26 and FY 2026-27 has been computed considering actual and proposed additional capitalization in accordance with the applicable provisions and the rates provided under Appendix II of Tariff Regulations, 2021 and 2024. The asset class wise rates considered as per the said Regulations are as given in the table below:

1.8 Interest on Loan Capital

1.8.1 It is respectfully submitted that in accordance with the earlier tariff orders of the Hon'ble Commission, for the purpose of calculation of interest on loan, normative debt has been considered as 70% of additional capitalisation only. Whereas, for DRIP works normative debt has been considered as 80%.

1.8.2 Rate of Interest for normative loan is assumed to be same as weighted average rate of outstanding RMU Loan of Khatima HEP.

1.9.10 Regarding Insurance coverage of 11 LHPs of UJVNL it is to submit that RIV of UJVNL hydro plants is low in comparison to current market RIV ranging from 10-12 Cr./MW. To minimise the impact of under-insurance deductible and to increase the AOG limit, RIV of plants may be increased. Insurance expenses are allowed on actual basis by the Hon'ble Commission. Increase in RIV may result increase in tariff. Therefore, to minimize the tariff impact, it is proposed to adopt a five-year plan to gradually align the sum insured with the prevailing market benchmark by the FY 2030-31. A brief note in this regard is enclosed at **Annexure-3** for kind consideration of the Hon'ble Commission

1.9.11 It is respectfully prayed that the Hon'ble Commission may kindly consider and allow the Operation and Maintenance Expenses as proposed in Table 10 above.

Annual Report on Technical Performance of Khatima HEP

1.1 Overview

1.1.1 The petitioner in compliance of the relevant Regulations of UERC (Terms and Conditions for determination of Multi Year Tariff) Regulations, 2021 & UERC (Terms and Conditions for determination of Multi Year Tariff) Regulations, 2024 is providing information with regard to the operational performance related to technical parameters of Khatima Hydro Power Station.

The operational parameters considered are:

- (a) Gross generation.
- (b) AUX (Auxiliary consumption and Transformation losses)
- (c) Plant Availability factor (PAF)

1.1.2 The information provided in this chapter relates to operational performance:

- Actual in FY 2024-25 and FY 2025-26 (30.09.2025)
- Expected in FY 2025-26 & projected for FY 2026-27.

1.2 Power Station Description

1.2.1 Khatima Power Station, with an Installed Capacity of 41.4 MW (3X13.8 MW) is situated at Lohiahead (Khatima), District Udham Singh Nagar of Uttarakhand. Khatima hydro power Station is an irrigation canal based project. The project is located at a distance of about 6 km from Khatima town and connected by road. Meter Gauge rail connection is also available up to Khatima town.

1.2.2 The Sharda Canal / Power Channel draws water from river Sharda through Banbasa Barrage located at a distance of about 16 km upstream of the Power Station at Banbasa near Tanakpur. The Power Station units were commissioned in 1955 & 1956. Three English Electric make generating units of 13.8 MW capacities each had been installed, totaling to aggregate capacity of 41.4 MW. Power generated from Kaplan turbines at 11 kV is stepped up to 132 kV via three phase 17.5 MVA transformers. The generated power is evacuated through 2 nos. 132 kV feeders to 132 kV Dohna substation (Bareilly) and 3 nos. 33 kV feeders (one through 40 MVA, 132/33 kV transformer and other 2 nos. feeders through 20 MVA, 132 / 33 kV transformer) to Diesel PH, industrial supply and Tanakpur Project of NHPC respectively.

1.2.3 Due to long operation of about 60 years, the operating efficiency of the machines had gone down considerably. Power generation capacity of generating units got reduced and the condition of their auxiliaries, instruments, protective relays & control equipment deteriorated to such an extent that the combined output of the Power Station was restricted to about 25-28 MW against the rated capacity of 41.4 MW. So, the power station had been taken for Renovation, Modernization and Up-gradation (RMU). All three machines have been renovated as mentioned below:

- RMU of Unit 1 started on 01/10/2012 completed on 27/05/2015.
- RMU of Unit 2 started on 22/06/2015 completed on 21/05/2016
- RMU of Unit 3 started on 02/11/2015 completed on 25/09/2016.

1.2.4 Salient features of the Power Station are provided in form F 2.3 of this petition.

1.3 Energy Generation

1.3.1 Actual/Expected/Projected energy generation from FY 2024-25 to FY 2026-27 is given in the table below:

Table -1: Actual, Expected & Projected Energy

Particulars	Norms	2024-25 (A)	2025-26 (E)	2026-27 (P)
Design Energy		235.59	235.59	235.59
Actual Generation (MU)		185.32	202.47	207.00
Auxiliary Cons. And Transformation losses (%)	0.70%/1.20%	1.28%	0.85%	0.85%
Aux. Cons. & Trans. Losses (In MU)		2.36	1.72	1.76
Dam/Barrage/STP Consumption (In MU)		0.004	0.004	0.004
Net Saleable Energy (MU)		182.96	200.74	205.24

A : Actual

E :

Estimated

P:

Projected

1.3.2 From the above table it is evident that gross generation has been lower than the design energy of the plant in FY 2024-25 due to partial closure of Power channel from 6 to 19 July 2024 for repairing the same. It is expected to remain lower than the design energy for FY 2025-26 and FY 2026-27 due to dependency of water release in the power Channel by UPID.

1.3.3 The auxiliary consumption and transformation losses have been higher than the normative in FY 2024-25. However, it is expected to remain within the norms during the FY 2025-26 to 2026-27.

1.4 Plant Availability Factor

1.4.1 The recovery of the Annual Fixed Charges is dependent on the Plant Availability achieved by the Power Station. The principle for recovery of fixed charges on the basis of the availability achieved by the plant has been provided by the Hon'ble Commission by its regulations UERC (Terms and Conditions for determination of Multi Year tariff) Regulations, 2021 & 2024. The petitioner has provided this factor as per the provisions of the above regulations.

1.4.2 **PAFM:** The Petitioner requests the Hon'ble Commission to kindly consider and approve NAPAF of Khatima HEP for the FY 2024-25 as tabulated above due to partial closure of Power channel from 6 to 19 July 2024 for repairing the same. It is also requested to approve as tabulated above for the FY 2025-26 and 2026-27 due to dependency of water release in the power Channel by UPID.

Annexure-3

Note on Insurance coverage of Operational Hydro Power Plants of UJVNL

1. UJVNL purchased the Insurance Policies for the FY 2025-26 through L1 bidder M/s Oriental Insurance at a total cost of Rs. 21,58,65,901/- + GST.
2. The Industrial All Risk (IAR) Policy of hydroelectric plants are on the sum insured of Rs 10031.74 Cr. (LHPs & SHPs) and the Re-instatement value (RIV) of LHPs are –
Chibro, Khodri, Dhakrani, Dhalipur, Kulhal Kalagarh & Khatima LHPs- Rs. 5.00 Cr/MW
MB-I, MB-II & Chilla LHPs – Rs. 7 Cr / MW
Vyasi- 9.5 Cr/MW
3. Post Teesta-III incidence in Oct 2023, all the insurance companies governed by reinsurer GIC-Re, eliminate the GLOF and imposed AOG limit ranging from 7% to 75% of the sum insured value on all Hydro Power Plants in India. Accordingly, M/s Oriental Insurance Company Limited (L-1 bidder) provided AOG limit of 225 Cr. (AOO) /300 Cr. (Aggregate) to UJVNL in FY 2025-26 considering MB-II HEP as a base plant (Top Location) to arrive at AOG limit
4. Low RIV of UJVNL hydro plants in comparison to current market RIV ranging from 10-12 Cr./MW leads to under insurance deduction. Therefore, to minimise the impact of under-insurance deductible and to increase the AOG limit, RIV of plants may be increase. Increase in RIV may result nominal increase in tariff.
5. Therefore, to minimize the tariff impact, it is proposed to adopt a five-year plan to gradually align the sum insured with the prevailing market benchmark by the FY 2030–31. The proposed roadmap is as follows:

(All figure in Rs. Cr.)

FY	Estimated premium without Taxes	Total Sum insured of all 21 plants (MD+BI)	Proposed Trajectory increase
2026-27	25.78	10943.74	Increase in RIV - MB-II HEP from Rs. 7.0Cr./MW to Rs. 10.0 Cr./MW Inclusion of MBD Coverage – For Galogi, Dunao, Pilangad, Urgam & Suringad SHPs
2027-28	29.92	12424.44	Increase in RIV - Chibro, Khodri, Dhalipur, Dhakrani, Kulhal, Ramganga & Khatima HEPs including Mohd. Pur, Pathri & Galogi SHPs – Rs. 5 Cr./Mw to Rs. 7 Cr./MW
2028-29	33.18	13561.94	Increase in RIV - Chibro, Khodri, Dhalipur, Dhakrani, Kulhal, Ramganga, Khatima & MB-I HEP and Mohd. Pur, Pathri & Galogi SHPs – Rs. 7 Cr./Mw to Rs. 8 Cr./MW
2029-30	36.39	14543.29	Increase in RIV - Chibro, Khodri, Dhalipur, Dhakrani, Kulhal, Ramganga, Khatima & MB-I HEP and Mohd. Pur, Pathri & Galogi SHPs – Rs. 8 Cr./Mw to Rs. 9 Cr./MW
2030-31	39.56	15585.77	Increase in RIV - Chibro, Khodri, Dhalipur, Dhakrani, Kulhal, Ramganga, Khatima, Vyasi & MB-I HEP and Mohd. Pur, Pathri & Galogi SHPs – Rs. 9 Cr./Mw to Rs. 10 Cr./MW

Note:

1. The premium has been estimated in accordance with permlles rate of current policy. premium may vary in accordance to RIV and pervious reported claims.
2. Assessment of Act of GOD(AOG) limit for all phases will be Rs 257 Cr. (Any one Occurrence) and Rs 347 Cr. (Aggregate) as per circular of New India Assurance Company limited.

Submitted for kind perusal & consideration of the Honble Commission.
