

THE OCEAN IS DEEPER

THAN ALL OUR QUESTIONS

Explore the mysteries of the Earth's oceans with the Wild Wisdom Global Challenge 2026. Learn to look beneath the surface — discovering marine ecosystems, understanding how life within them is interconnected, and the role these systems play in sustaining and protecting our planet.

KEY DETAILS

- Free registration.
- Minimum **50 students per school**
- Open to students from **Classes 6-9**
- **E-certificates** for all participating students.
- **Certificate of Recognition** for Teacher Coordinator (one per school)

LEVELS OF THE CHALLENGE

Cross over from the classroom to the global stage. Are you ready to dive right in?

CLASSROOM LEVEL

Jul – Sep

Through engaging virtual quiz series, supported by a dynamic leaderboard accessible to teachers.

STATE LEVEL

Sep – Oct

Virtual (leading students from each school compete)

ZONAL LEVEL

October

On-ground (5 Zones)

NATIONAL FINALE

November

On-ground (Location: Delhi)

INTERNATIONAL FINALE (GLOBAL)

December

(Virtual)

REWARDS

INTERNATIONAL LEVEL PRIZE

- Panda Trophy for the winning school
- Certificates and exclusive prizes for the winners and school

GRAND PRIZE — AN EXPEDITION INTO THE WILD!

Step out of the classroom and into the wild! Top 3 teams at the National level will win an exclusive, fully sponsored learning expedition to a premier wildlife landscape in India — an unforgettable experience of discovery, adventure, and conservation in action!

STATE, ZONAL & NATIONAL LEVEL AWARDS

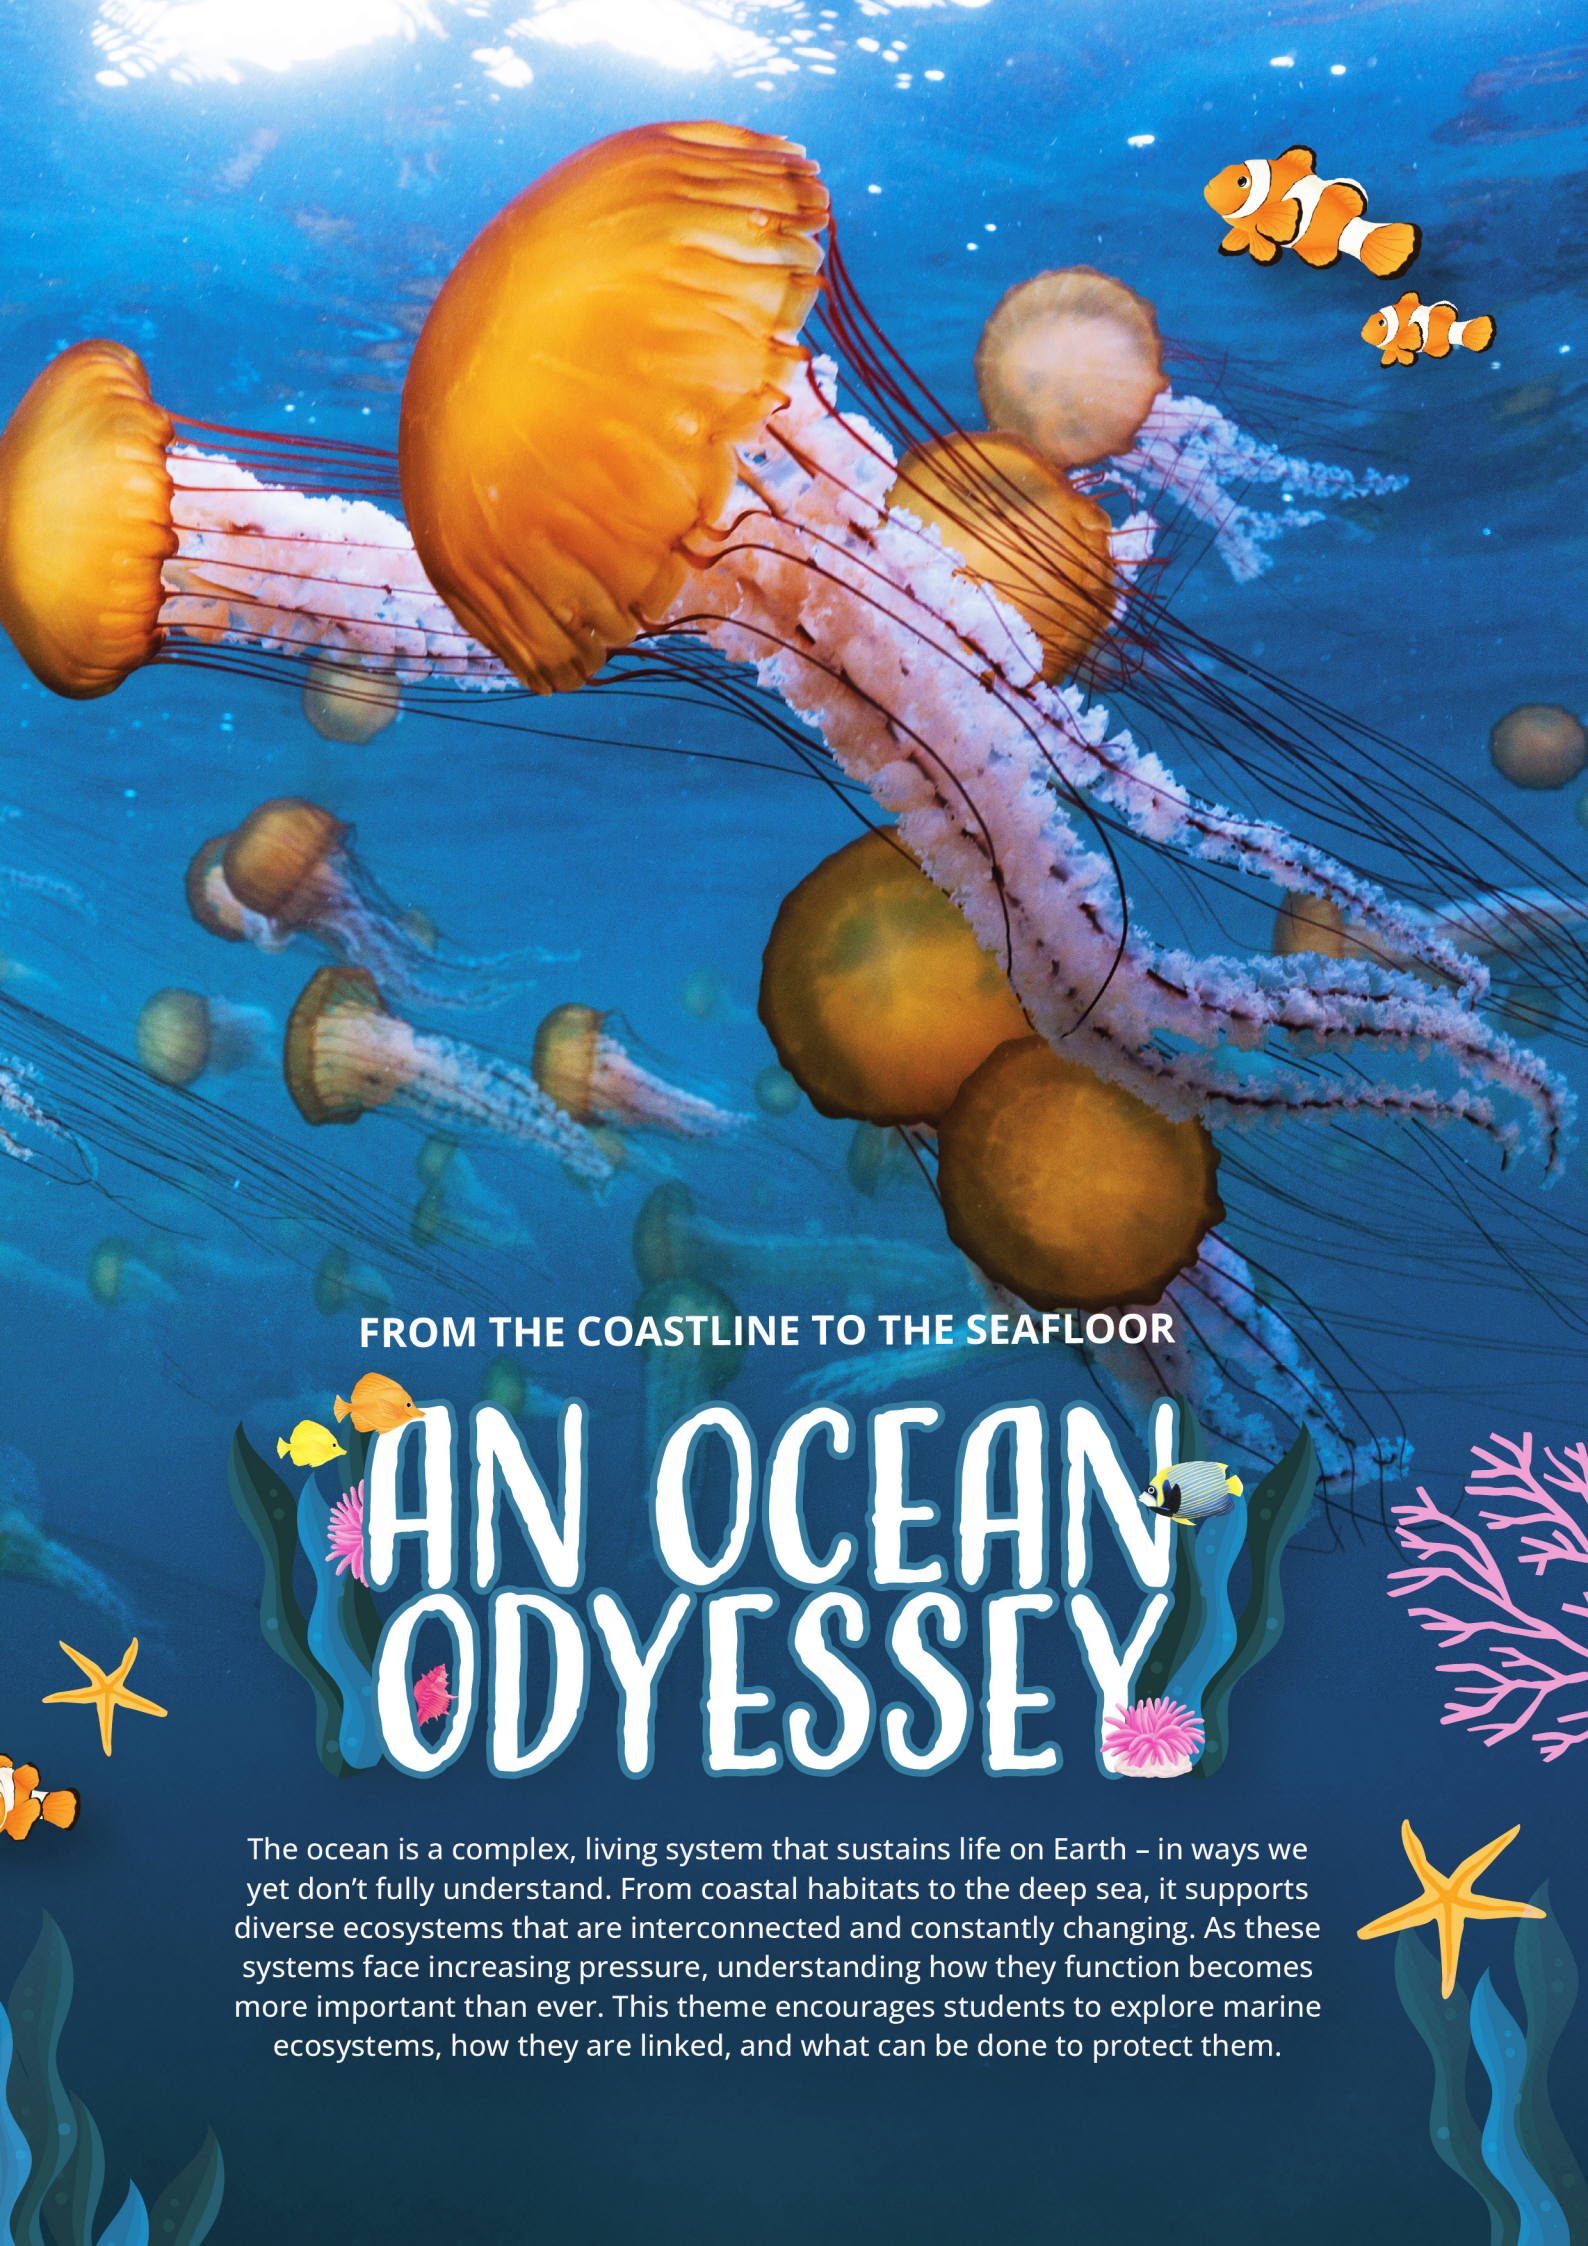

- Trophy and prestigious prizes for the Winning Teams at State, Zonal and National levels
- Medals and exclusive rewards for 2nd and 3rd position winners at State, Zonal and National levels
- Certificates and special prizes for top 5 teams at Zonal and National levels

PARTICIPATION RECOGNITION

- Participation Certificates for Classroom and State level students.
- Appreciation certificate awarded to the teacher coordinator

A vibrant underwater scene featuring several large, orange-brown jellyfish with long, thin, pinkish-white tentacles. Two clownfish are swimming in the upper right corner. The background is a deep blue with light rays filtering down from the surface. The overall theme is marine life and ocean ecosystems.

FROM THE COASTLINE TO THE SEAFLOOR

AN OCEAN ODYSSEY

The ocean is a complex, living system that sustains life on Earth – in ways we yet don't fully understand. From coastal habitats to the deep sea, it supports diverse ecosystems that are interconnected and constantly changing. As these systems face increasing pressure, understanding how they function becomes more important than ever. This theme encourages students to explore marine ecosystems, how they are linked, and what can be done to protect them.

STEP-BY-STEP INSTRUCTIONS

(TEACHER COORDINATOR)

- Register your school for free on the official Wild Wisdom Global Challenge website
- Get your students started with engaging learning resources, quizzes, and webinars
- Host the virtual Classroom Level series of quizzes (materials and leaderboard access will be provided)
- Top two students from each school advance to the virtual State Level round
- As your students qualify at State level round, support them as they step into the next challenge: the in-person Zonal round
- If they shine at Zonal, guide them forward to compete at the National Level round
- And if they emerge as National champions...celebrate! They'll represent your school on the global stage at the International quiz

*All updates, guidelines, and timelines will be shared via the registered email ID.

Join the global quest to explore, understand, and protect the Earth's oceans - register for Wild Wisdom Global Challenge 2026 today!
