| 3      | <p>Technical characteristics, (specific to this type of device)</p> <ol style="list-style-type: none"> <li>1. Should be Electrically controlled (Remote) operating table</li> <li>2. Should be adjustable to all essential positions</li> <li>3. Should be equipped with movement controls at the side of the table.</li> <li>4. Should have frame and bottom made of 304 grade stainless steel material</li> <li>5. Should have reinforced five sections having fully radiolucent top &amp; C-Arm Compatible</li> <li>6. There should be no wobbling during orthopedic surgery.</li> <li>7. Table top should be eccentrically center of good access to C-Arm, should be compatible of screening from neck to toe with C-Arm without any disturbance.</li> <li>8. Table Column size should be very slick polyurethane detachable cushion top, is provided on the</li> <li>9. The column, table top frame fraction bar &amp; all accessories are made of non-corrosive high quality steel.</li> <li>10. Sturdy ss rail fitted on both side.</li> <li>11. Table base must have SS/plastic cover exterior for easy maintenance. It should have both side opening without any hindrance for very easy C-Arm access &amp; maneuverability It should be possible to enter C-Arm from both sides of the table right into the central top area so that spine imagine can be done very easily. There should be no central pillar coming in the way of C-Arm.</li> <li>12. The table should adapt to various types of advance retractors &amp; flexible arm.</li> <li>13. Leg attachment should be detachable, radiolucent &amp; single piece.</li> <li>14. Weight bearing capacity of table should be up to 300kg (at each point 200kg)</li> <li>15. Detachable headrest should be provided. There should also be detachable fracture attachment, detachable orthopedic base attachment (universal telescopic design)</li> <li>16. Accessories for orthoscopic surgery, shoulder &amp; knee surgeries, lateral position- traction attachment for hip, Toronto drace/lumber spine attachment</li> <li>17. Height should be adjustable by remote control.</li> <li>18. Table can be rotated 360° through base.</li> <li>19. Head section raised from the Horizontal :20°-30°</li> <li>20. Durable and leak-proof hydraulic pump.</li> <li>21. Head section lowered from horizontal: 28° - 30°</li> <li>22. Back section raised from the horizontal: 60°-70°</li> <li>23. Trendelenburg: 25-30°</li> <li>24. Reverse Trendelenburg: <math>\geq 30^\circ</math></li> <li>25. Leg section lowered from the horizontal: 40°-50°</li> <li>26. Kidney-position should be achievable by breaking the table.</li> <li>27. Table-top should be radio-lucent.</li> </ol> |                                                                                                                                                                                                                          |
