Note.—The figures in the first part of the table, showing outstanding sales and mortgages up to 1885-86 are taken from Assessment reports, the figures for Tahsil Píplí covering the tahsil as at present constituted. These returns are fairly accurate except that the statistics for Tahsils Jagádhrí and Píplí do not distinguish total and cultivated areas. The figures for 1886-87 to 1891-92 are taken from Tables X and XI of the Revenue Report. They represent transactions brought to account in each year, and not the actual occurrences of the year.
