NEXTGEN SOFTWARE DEFINED CLOUD PLATFORM

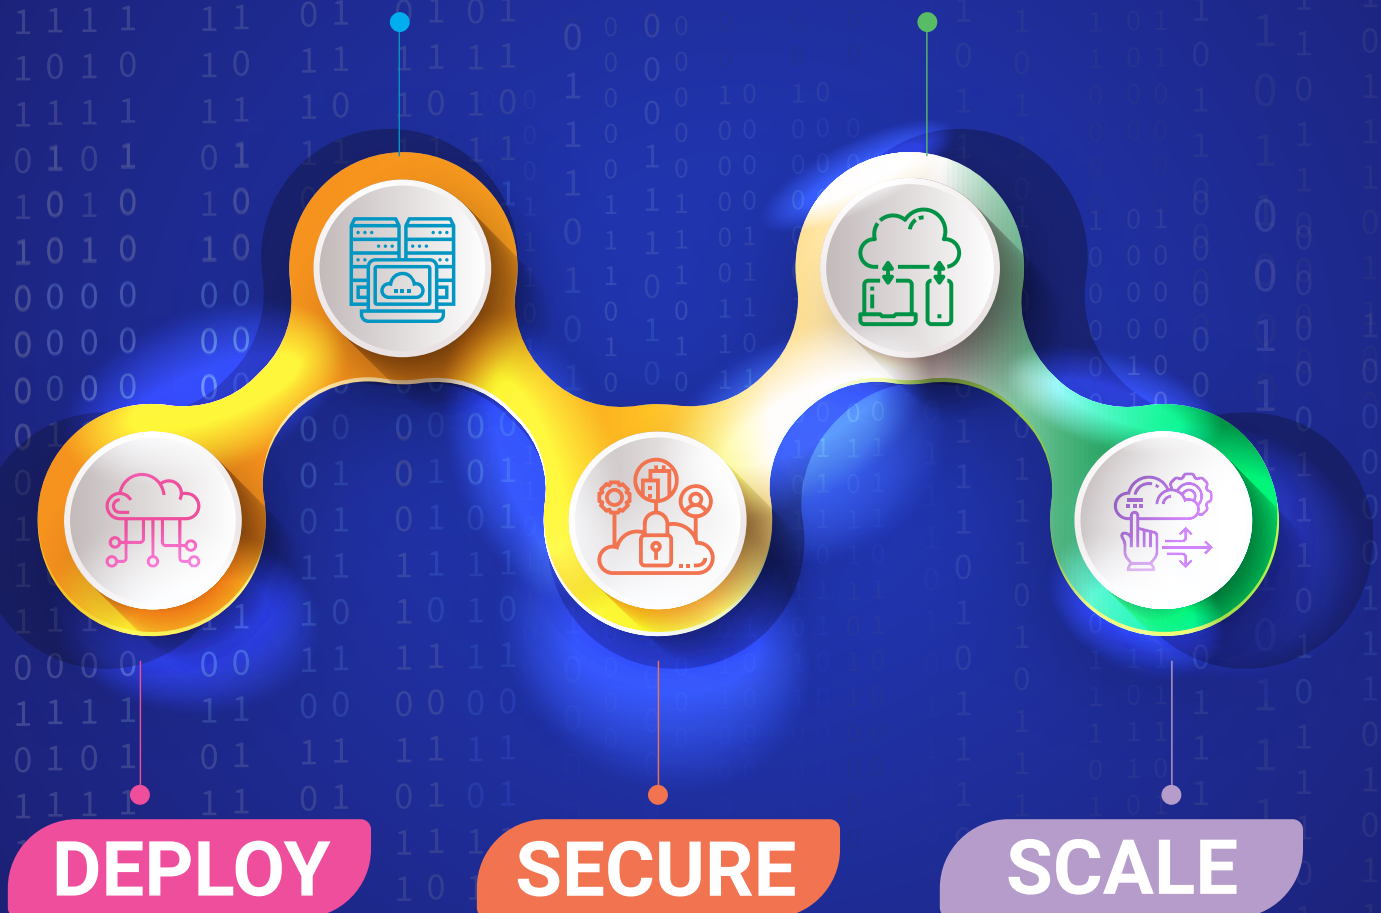

India's Own NextGen Software Defined Cloud Platform powered by the Open Infrastructure Principles appropriately conforms to the Third Pillar of the vision Atmanirbhar Bharat.

Consumes matured community driven Open Infrastructure Projects, other open source tools, technologies and services to offer unified multi-cloud with a self-service interface for running heterogeneous workloads across National Data Centres for virtualization, containerization as well as S/W defined network, storage, backup, firewall, load balancer, web application firewall, etc.
